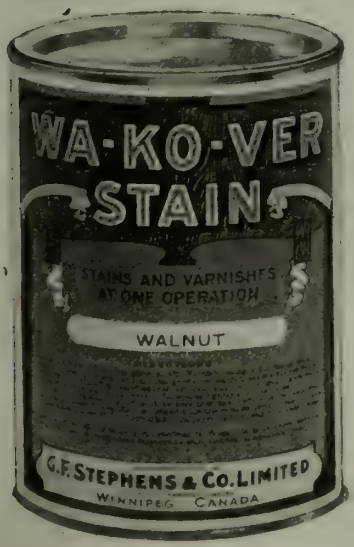
"A Beautiful Clear Finish that Will Not Wear Out"

Two Strong Selling Points that Make for Sales!

One customer says:



"Once Wa-ko-ver has been applied it seems almost impossible to wear it out. Whether on floor or woodwork it continues to display a beautiful clear finish that is always just like new."

You can have Wa-ko-ver making permanent friends for you if there is no Stephens' Agency in your locality. Write us to-day about our interesting proposition.

"A War-Time Seller"

CONCEIVED during war times, to enable dealers to cash in on the war-time demand for an all 'round household finish that would be worthy of the valuable time any housewife or handy man spent in applying it, "61" in Colors was born. There you have it — a better varnish stain; clear and transparent; colors with life and sparkle. As for durability — these new colors have all the toughness, elasticity and waterproof qualities that have characterized "61" Natural (clear) these twenty-five years.

And as befitting a war-time spirit, thousands and thousands of cans have been leaving the P&L factories since January, marching through live dealers' stores into the hands of consumers, to help them renew the old furniture, floors and woodwork, instead of buying new.

The new magazine advertising and dealer helps are in keeping with the new product. The phenomenal sales last spring are a good indication of their worth to dealers.

Don't pass this by. Get our complete Dealer's Proposition before you say, "This is just another one." Write today.

PRATT & LAMBERT-INC.
VARNISH MAKERS 69 YEARS
24 Courtwright St., Bridgeburg, Ontario

"61" FLOOR VARNISH

for Floors, Furniture and all Woodwork

Now made in Eight Colors

Lowe Brothers
HIGH STANDARD PAINTS
Do Save Your Customer Money

Lowe Brothers' High Standard Paint is just what the name implies—**The Highest Standard in Paint.**

In giving it that name we intended that it should convey to customers the fact that because Lowe's covers more surface than a gallon of cheaper paint, **it actually does save time, labor and money.**

Your customer will find that it spreads easier and does a better job in less time.

And this means good-will towards your store and more sales later.

Write for our paint proposition.

Lowe Bros. Limited

Entirely Different from Others

And Sell Quickly

PERFECTION STEEL ANKLE SUPPORT

Patented in Canada and United States.

The Perfection Ankle Supports is the only **perfect** support on the market.
It does away with all old-time cumbersome devices, and also the fatigue which prevents many from indulging in this healthful pastime.
The "Perfection" is something entirely new that will surely prove a popular seller this winter in your sporting goods department.

Made from the best quality Steel. Order from

OWEN SOUND STEEL PRESS WORKS
OWEN SOUND, ONT.

"Ice Choppers"

SOMETHING DIFFERENT

Not the thin sheet steel chopper so familiar to most of us, but a steel laid ice chisel that will wear for years.

Place your order right away to get them in time.

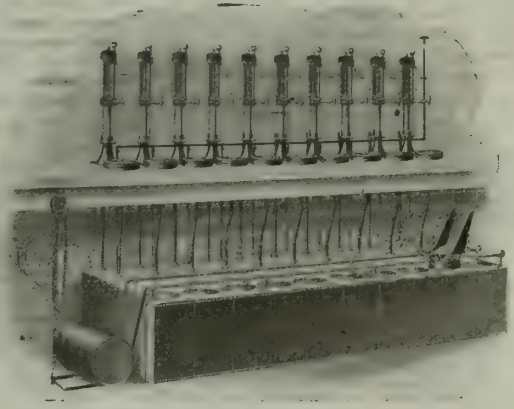
Sell Handles that are Most in Demand

STILL'S



There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*

There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Cant Hook and Peavie Handles.

There's nothing like selling the best of everything. Good profits in our handles, too.

J. H. Still Mfg. Company
ST. THOMAS -:- ONTARIO

BOWSER
ESTABLISHED 1885

Paint Oil Storage Systems

are direct producers of economy. They eliminate all waste, such as spillage, leakage, and evaporation. They save time and labor. And they insure accuracy in measuring any quantity of oil.

Built to meet any requirement.

Write for Booklet 17.

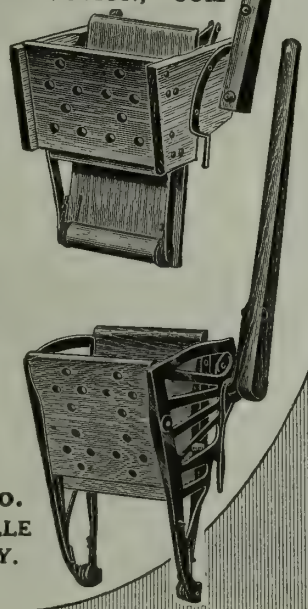
Talk Number One Hundred and Seventy-Three

What makes the best substitute for a good Galvanized Steel Sheet? There ain't any such animal! Everybody knows that now.

TINKER TOM.



Look for Talk No. 174 next Week.

DOMINION SHEET METAL CORPORATION, Limited
HAMILTON, CANADA

"White"

MOP WRINGERS

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.

Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use —often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

Letting You Into A Secret

THEY were talking about things in general — Jones and Brown. But it was easily seen by Jones that Brown talked with a positiveness and definiteness lacking in himself. Brown evidently had real knowledge about things and this gave him an assurance lacking in Jones. Jones found himself talking in generalities, and he had the sense to know that what he had to say wasn't very convincing. In the end he spoke up. "Brown, tell me, where do you get your information? You talk like one who knows. You use facts to fortify your opinions, and you seem to have a wealth of information about things Canadian. What's the secret of your greater confidence and knowledge?"

And Brown said: "I'll tell you, Jones, how I have strengthened myself in confidence and knowledge, as you put it. I read my newspaper in a new way now, and I make it a point to know a good deal about Canada, the land of my birth, residence and affection.

"For years—until I was forty—I read newspapers, as many others do—pretty thoroughly. I read about accidents, and meetings and fires, and everything else. One day I woke up,—was awakening up, to tell the truth—to discover that I was just frittering away time when I read everything.—Then I determined to concentrate my interest on matters Canadian—the things about Canada that really matter.

"I wanted direction. I needed a focal point, as it were. What should be skipped, and what should be read closely? I was floundering. I am not much of a politician, and I abominate party politics. I wanted to see things fairly.

"Then one day I made the acquaintance of THE FINANCIAL POST. It seemed to me to give me the direction I needed. I found it was sifting things for me, and giving current affairs their right proportioning. At any rate, it was a new kind of newspaper to me, and I read it with zest.

"I am a business man, and business in its larger aspects is the special field of THE FINANCIAL POST. I found the paper written in a readable way, and that it has a breadth of interest pleasing to me. So I subscribed for THE POST, and every Saturday and over the week-end this paper is pretty thoroughly ready by me.

"I find that the reading of this paper helps me get out of my daily newspaper the meat in it. As a matter of fact, I read my daily newspaper and other papers with a new and informed interest which makes my reading a profitable thing.

"I read somewhere that an hour a day spent on any subject would make a man master of that subject in 10 years. Well, I do not know that I am seeking to be a master of Canadian affairs, but I do know that for the past two years or so I have been having a new joy in life. I am really trying to know my Canada.

"I clip a good deal, and my scrap-book on Canada is a treasure house for me, I collate the material I put in that book, and whenever I want to read up any particular subject, I have before me, gathered up, a surprising amount of material obtained from many sources.

"I take luncheon at the Club daily. There are eight of us who gather daily at the same table. One is a wholesaler, another is a banker, another a publisher, another a manufacturer, another a manufacturers' agent—and so on. We have a representative gathering.

"We talk about many things, and about Canada most of all. I take great satisfaction from the knowledge that I am able to hold up my end of the conversation. To tell you the truth, it is this reputation that spurs me on to keep myself brushed up all the time. I own up, also, to practising a little subtlety. I guide the conversation in the direction of a subject that I am well informed on, and then I bide my time, letting others wrestle with it until they have told all they know. Then is my chance, and I am able to say something useful to a company that is attentive.

"Jones, if you want to improve the quality of your information, read purposefully, objectively. Cut out the reading of everything under the sun. You are a business man, the same as I am. Why not read definitely along the line of business? You will find it a most pleasurable kind of reading, and you'll find that you will acquire the sifting mind which will enable you to pass over a lot of stuff of no value to you, and seize on material of real value.

"I recommend THE FINANCIAL POST as a paper that will give your reading direction. It has helped me much, and I believe will help you. At any rate, it is easy to try it out."

IF JONES wants to try out THE FINANCIAL POST he can have it go to him by mail for four months for a dollar bill. One thing that ought to impress and please Jones is that THE POST is not a one-man paper. It is produced by many men, each a surpassingly well-informed man on the subject he writes. One man writes on matters pertaining to agriculture, another on the iron and steel industry, another on the food problems and milling and cereal subjects, another on insurance, another on textiles, and so on. The special contributed articles which are a regular feature of THE POST are by authorities or by men of position. Besides which, THE POST surveys many fields of interest, and this survey is world-wide. It is a meatful paper, in very truth, and assures those who read it regularly an amount, kind and quality of reading not commonly found in a single newspaper. If you would make your daily reading take on a new interest and value, we suggest that you should sign and forward the coupon opposite.

Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

If interested tear out this page and place with letters to be answered.

THE "ONE DEALER" POLICY

What it means to you

The most profitable varnish and enamel business in the town.

Store and window displays that are not only designed to bring the business—but actually attract the dollars into your cash drawer.

A completely "tied-up" National Magazine Advertising campaign—the most extensive and most powerful in the industry for exclusive agents.

Absolute protection for Kyanize Exclusive Agents—All the Kyanize business in each locality goes **to the one Kyanize Dealer.**

Kyanize KY-AN-IZE **Products**

are quality varnishes and enamels that bring customers back for more. Sold on an iron-bound guarantee of absolute satisfaction or "money back for the empty can."

The Kyanize proposition will make your store stand head and shoulders above every other in your locality. Get in line now—write for details to-day.

The Business Papers Got The Volunteers

EDWARD N. HURLEY, the clear-headed, resourceful Chairman of the United States Shipping Board —the man who induced Chas. Schwab to take the general management — puts a big rating on the national importance of the business paper. In the recent campaign for shipyard volunteers the business papers aided greatly in getting the required number of men.

Mr. Hurley, writing the Secretary of the Associated Business Papers, which includes a large number of the most progressive in North America, says:

> "I WANT to tell you and those connected with the division of advertising that the services rendered the United States Shipping Board and the Emergency Fleet Corporation by the Business Papers in our recent campaign for shipyard volunteers, deserves our highest commendation.
>
> "The editorials which these papers published and the advertisements bearing coupons and postcards to be filled in by those desiring to enrol in the shipyard volunteers, materially helped us in securing our full quota of volunteers.
>
> "I recognize the great force of the Technical and Trade Press of the country, and particularly in these critical times, both with relation to business as well as to the war.
>
> "Please accept this as a testimonial of my appreciation of your very valuable services and the assistance given us by the Associated Business Papers."

It is only since the beginning of the war that many have come to recognize the value and power of the Business Paper. Manufacturers who have subscribed for and used the Business Press in their own campaigns have long known its power in developing not only the business of its readers but the resources of the country. The Business Paper to-day stands high in the estimation of those executive heads connected with war endeavors, because they realize it is a mighty force in stabilizing business and in giving technical knowledge which cannot be secured in any other way.

Following MacLean Trade and Technical Papers and Magazines stand at the top for Service to readers:

Canadian Grocer	Marine Engineering	Sanitary Engineer
Hardware and Metal	Dry Goods	Financial Post
Canadian Machinery	Men's Wear Review	MacLean's Magazine
Power House	Bookseller and Stationer	Farmers' Magazine
Canadian Foundryman		Printer and Publisher

November's rain and sleet demand perfect brakes

Go after relining business now and make the winter months pay a profit

WET and wintry weather raises havoc with most brake linings. The water soaks into the lining causing it to swell. Moisture causes the fabrics of ordinary brake lining to break down and quickly wear out. It also causes brakes to grab, a source of annoyance and danger.

The brake lining for winter

Thermoid Brake Lining is particularly efficient for wet and wintry weather because it is practically impervious to moisture. All Thermoid Brake Lining is *Grapnalized*, an exclusive process which resists moisture, oil and gasoline. Scientific tests have shown that Thermoid absorbs only one-third as much moisture as ordinary woven brake lining.

Thermoid has two other special features which make it a trade builder.

Thermoid Brake Inspection Chart

At speed of	A car should stop in
10 miles per hr.	9.2 ft.
15 " " "	20.8 "
20 " " "	37 "
25 " " "	58 "
30 " " "	83.3 "
35 " " "	104 "
40 " " "	148 "
50 " " "	231 "

Will your car do this?

1.—Contains over 40% more material

Over 40 per cent. more material and 60 per cent. more labor is used in the manufacture or Thermoid Brake Lining than in any woven brake lining. This is why Thermoid gives such exceptionally long service.

2.—Hydraulic compressed

Every square inch of Thermoid is compressed under 2,000 pounds of hydraulic pressure This gives Thermoid the ideal coefficient of friction. It makes it uniformly hard all the way through so it can be used until cardboard thin.

In November there is a real need for a brake lining that will resist moisture. Thermoid is the only brake lining that is Grapnalized to resist moisture. Write for suggestions showing how to increase relining business and make the winter months pay a profit. Back of every foot of Thermoid stands ***our guarantee: Thermoid will make good--or we will.***

Cold Weather Made Profitable

This is the season of the year for dealers to "cash in" on automobile equipment and supplies for use during the cold weather months.

Engine Hood Covers

With Fan Front

This is without question the best appearing and most serviceable two-piece outfit on the market. The circular front design is very attractive, and at the same time provides a simple method of ventilation.

Made of waterproof material, extra heavy felt lines, padded and quilted. This cover will retain the heat of the motor while standing, and furnish ample ventilation when in motion. Does not interfere with raising the hood.

No.	Price
9006—Ford, 1917-18-19	$12.50
9007—Chevrolet "490," "490A"-"490B"	12.50
9008 Gray Dort	12.50
9009—Dodge	12.50
9010—For other 4 cylinder cars	15.00
9011—For 6, 8 and 12 cylinder cars	18.00

Always specify make, year and model of car when ordering.

Fleming Windshield Cleaner

The most practical cleaner ever offered the motoring public. Insures safe driving in rain, fog and snowstorms.

Will not injure the frame or scratch the glass. Operates on rubber rollers. Fits any windshield.

No. 9031—Price $2.25

"Presto" Headlight Intensifier Plug Socket for Ford Cars

This new invention is scientifically correct, and is the greatest device for the price ever offered to Ford owners for increasing the illumination of the headlights.

No. 9088—Price $2.00

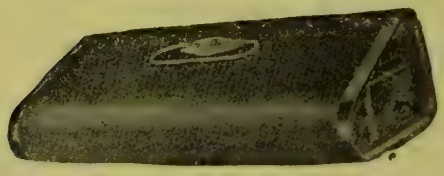
Utility Junior Heater For Fords

For use in open or closed cars.

No noise, no odor, no escaping gas, no back pressure on motor or loss of power. No operating cost. No cold draughts from outside. Installed in half an hour. Impossible to burn clothes or shoes. Cannot get out of order.

No. 9013 Price $12.50

Champion "Priming" Spark Plugs



Will start any motor on first quarter turn.

Brings gasoline right to the sparking point.

A great winter seller. The ½-inch thread size is especially recommended for Fords.

No. 9200—Price, ½-inch thread $1.50
No. 9201—Price, ⅞-18 in. thread 1.50
No. 9202—Price, Extra Porcelain 0.65

High Grade Foot Warmers

For automobiles, wagons, carriages, sleighs, etc. Gives cold weather comfort for less than one cent per hour. It provides a warm foot rest, and when placed underneath lap robe radiates heat which warms the entire body.

No. 9014—Price $3.50

Wool-Lined Gauntlets

Price, $5.50 pair.

Why You Should Be A Michelin Dealer

No. 31

Every Michelin User Is a Real Booster for The Michelin Dealer

It isn't often that you find an article so good that the people who buy it feel themselves indebted to the seller and boost for him in an effort to repay the debt.

But Michelin Tires are so good that this is exactly what happens.

You can't find a Michelin Dealer anywhere who has not a steadily growing list of volunteer boosters—many of whom are as good as salesmen and sometimes better.

How many salesmen have you? Would you be able to do more business if you had twice or three times as many—all as good as your present staff but costing you no more in all?

Of course you would.

That's just what the Michelin Proposition will give you; it will turn your customers into salesmen.

Write for details today.

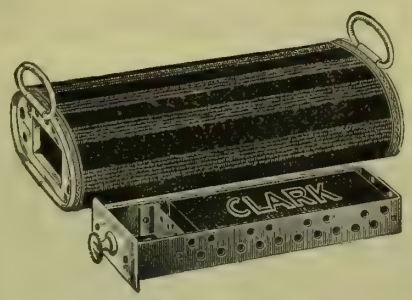
Clark Indestructible Steel Heaters

For Automobiles, Carriages, Sleighs and all Vehicles

Dealers! *This has been a good selling and profitable line with the Trade for 25 years, and Clark Heaters are more popular than ever.*

DEALERS ORDER NOW

Your Jobber Can Supply You



No. 8XX Clark Automobile Heater—The Duchess

The handsomest heater ever built. Covered with rich velvet plush in blue, green or maroon shades. Extra wide, highly finished, nickel-plated flange at ends. Side and end adjustable ventilators. Re-inforced steel body. Extra heavy asbestos lining. All outside metal parts quadruple nickel-plated. De luxe finish, 24 inches long. Weighs 12 lbs.

No. 7D Clark Heater—Slanting Top

Clark indestructible riveted steel body. Drawn steel ends, heavily nickel-plated. Side and end adjustable ventilators, allowing perfect regulation of heat. Thick asbestos lining. Covered with extra quality of green Brussels Carpet. A beautiful heater. 14 inches long. Weighs 9 lbs.

No. 5B Clark Heater

Strong, durable, and of good appearance. Covered with Brussels Carpet. Asbestos lining. A good heat giver. Used extensively by farmers, mail carriers, cab drivers, etc.
Light and handy. 12 inches long. Weighs 4 lbs.

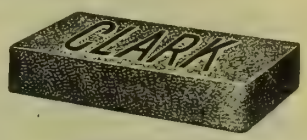
Case Containing 100 Bricks

Clark Carbon

The World's Best Heater Fuel

A scientifically prepared carbon densely compressed into bricks yielding a much higher percentage of heat than any other heater fuel. No known substance contains so high a caloric value. One brick in a Clark heater will furnish a strong and steady heat for a period of from 12 to 16 hours.

The New Carton and Container for Clark Carbon



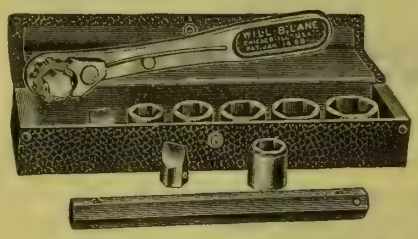
For the convenience of dealers and customers, Clark carbon scores another big hit in the new package. Three bricks are packed in a neat cardboard carton, and four of these cartons, or one dozen of the bricks, are packed in the larger cardboard container.

This package preserves the brick from breakage in shipment and makes it clean and convenient to retail in packages of ¼ dozen bricks.

Only our Clark Carbon is put up in this way.

Chicago Flexible Shaft Co.

Twelfth Street and Central Ave., Chicago, Illinois



SINGLE BRICK
Sizes 7½ x 2½ x 1¼ inches

FORD SET

The Ford Set contains: 1 Handle 7 inches in length; 2 Screw-driver Bits; 1 Extension Bar 6 inches in length; SIX SOCKETS to fit all nuts and bolt heads on Ford Car, including the cylinder head.

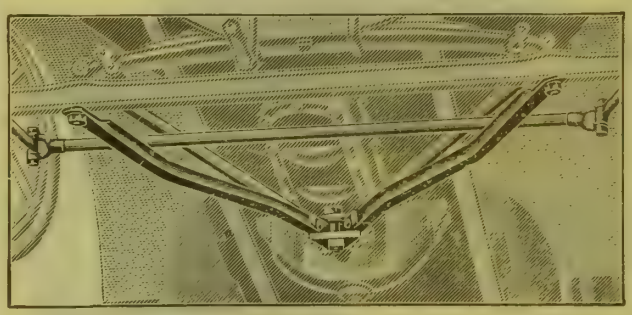
STANDARD SET

Standard Set contains: I Handle 7 inches in length; 2 Screw-driver Bits; 7 Sockets to fit semi-finished Hex nuts, as follows: U.S. Standards from ¼ to ½ in.; A.L.A.M Standards from 5-16 to 11-16 in.; Cap Screw Heads from 5-16 in. to ⅝ in.

Autoists like that ratchet feature

Lane's Unique Ratchet Wrench is ideal for close work

The autoist who has once discovered a few of the hard-to-get-at nuts and screws on his car is only too pleased to have some one introduce to him Lane's Unique Ratchet Wrench. He sees at a glance how effective the ratchet feature would be in close quarters where an ordinary tool would be absolutely useless.



Play up this ratchet feature and so arrange auto accessory displays that when motorists get up against the tool problem they will remember Lane's Unique Ratchet Wrench and come to you for a set.

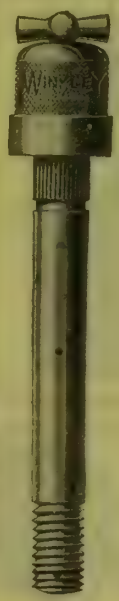
RADIATOR NEVERLEAK

Stops All Leaks

Radiator Neverleak is a guaranteed preparation for stopping leaks in Auto Radiators. It is a carefully and scientifically compounded liquid that will, positively, in from five to ten minutes, stop any ordinary leak in a radiator or cooling system. And the repair will be permanent.

It Contains No Acid, Meal, Cement or Sediment to Clog or Impair the Cooling System



It will not evaporate, consequently it remains in the radiator indefinitely, automatically sealing any new leaks that may occur. It also tends to prevent the formation of scale or rust in the cooling system.

As your profit on NEVERLEAK is extra good, it will pay you to investigate. You can sell on an absolute money-back guarantee.

"The Power of the West"

AS soon as peace is in sight, politics will again come into play in Canada and then the West may hold the balance of power. Such is the prediction made by J. K. Munro, special political writer, in November MACLEAN'S. He thinks that the Western tail may wag the Canadian dog and that this explains why statesmen and others are trying to-day to get both hands on the tail. An outspoken article—incisive, humorous, fearless, unbiased. Read it—"The Power of the West."

Germany Should Pay Canada's War Debt

Had Germany won the Junkers intended to seize and divide Canada. Writing in the November issue of MACLEAN'S MAGAZINE, Lieut-Col. J. B. Maclean contends that the war debt we have piled up should be paid in cash by Germany as one of the peace terms. He makes a vigorous presentation of Canada's case.

Chronicles of the Klondyke

The real story of the great gold boom is being told for the first time by E. Ward Smith, who was treasurer, assessor, clerk and tax collector of Dawson City during the Yukon stampede. His series starts with "My Recollections of Early Strikes"—Strange stories of how men stumbled on tremendous fortunes in the frozen North. The author knew everyone in the Klondyke and saw everything that went on at first hand.

Bright Stories—Vital Articles—Famous Writers

The important articles and the big stories that are being written in Canada by the best Canadian writers are always found nowadays in MACLEAN'S. Here's a partial list of the November bill:—

The Minx Goes to the Front - **C. N. and A. M. Williamson**
Better Dead—The Silly World of the Spiritualists - **Stephen Leacock**
The Strange Adventure of the Staring Canvas - **Arthur Stringer**
Family Pride - **Theodore Goodridge Roberts**
The Three Sapphires - **W. A. Fraser**
The Life of Mary Pickford - **Arthur Stringer**
We Must Tighten Our Belts - **Henry B. Thomson (Chairman, Canada Food Board)**
Lenix Ballister—Detective - **A. P. McKishnie**
Business Outlook - **Investment Situation**
Women and Their Work - **Books of the Month**

World Happenings in a Nutshell.—"Review of Reviews Dept."

The periodicals of the world are searched to get the best articles on current events. For instance, November MACLEAN'S contains: The Starving of Lille, The True Story of the Jameson Raid, Germany's Fleet Will Come Out? Mysterious New City in France, The Woman Who Caused Russia's Defeat, Hypnotism Cures Shell Shock, How Turkey Planned to Butcher British, Queen Mary is Accomplished Letter Writer, Why Palestine Was Captured.

Cutting Sodering Time

Robert W. Hunt & Co., Testing Engineers, Chicago, carried out exhaustive tests with the four Allen Fluxes, and six other leading commercial fluxes. Their report contained the following paragraph:

"In making up the test pieces it was noted that the time required for the sodering operation varied considerably for the different fluxes and that greater speed and cleaner joints were made with the use of Allen's paste and liquid fluxes."

Wanted

HELP WANTED

SIDE-LINE FOR TRAVELLERS—INFORMATION wanted from small towns regarding new building. Will not interfere with your regular business. We don't ask you to sell anything—merely to acquire information. Commission paid for each report. We supply forms and postage. Apply stating route and how often covered. Box No. 112, Hardware and Metal.

WANTED—FACTORY MANAGER OR SUPERintendent. A splendid opening for an experienced, capable and ambitious man to take charge of the manufacturing end of our business, with a place on our Board of Directors and a financial or working interest in our company. No investment necessary, although preferable. Experience in the manufacture of farm implements and particularly threshing machinery especially desirable. Farm Machinery Manufacturers. Ltd., 210 Alberta Ave., Saskatoon, Canada.

TINSMITH WANTED—A YOUNG MAN WITH one or two years' experience in general tin shop work. This is a good chance to complete the trade at good wages and steady work. Apply at once to A. R. Wright & Son, Port Burwell, Ont.

IS THERE A LIVE, AGGRESSIVE SALESMAN or manufacturer's agent with not too many irons in the fire, covering Quebec and the East, who would like to handle, on a commission basis, a line sold to the wholesale hardware and grocery trade? Box 119, Hardware and Metal.

FOR SALE

FOR SALE—HARDWARE AND FURNITURE business in the best district in the West. Stock about $5,000, fixtures $500. Building can be bought or rented. Owner must sell. Very little cash will handle this. Box 92, Hardware and Metal.

THE SUREST WAY FOR THE MANUFACturers' agent to connect with good live firms is to sell the manufacturers who read Hardware and Metal all about his ability to sell their goods. Try an advertisement on the Condensed Ad. Page of Hardware and Metal, under this heading.

FOR SALE, AT A BARGAIN, SET OF TINsmith tools in first-class order. For further particulars apply to Byron Carney, manager Canadian Oil Co., London, Ont.

HARDWARE AND PLUMBING SUPPLIES business for sale. Owner will keep half interest if buyer prefers. Business situated near the largest market in Canada. Established since 1865. E. J. Laverdure, 71 William St., Ottawa, Ont.

FOR SALE—GENERAL HARDWARE STOCK. We offer our stock of hardware at invoice prices, as a greater part of this stock would be at prices before the war. We consider it a bargain for quick sale. Stock all new six years ago. Amount of stock at present between seven and eight thousand. Building can be rented or bought, or stock can be moved away. Good district in Ontario. Box 118, Hardware and Metal.

GALVANIZED IRON SHEETS, APOLLO brand. We have the following gauges in stock: 14, 16, 18, 20, 22 and 24. Wheeler & Bain, Toronto.

FOR SALE

FOR SALE—300 BOXES IC AND IX 20" x 28" Prime Tinplates. These plates can be bought below present market prices. The Schultz Mfg. Co., Limited, Hamilton, Canada.

SITUATIONS WANTED

A1 SALESMAN DESIRES POSITION AS traveller to call on retail trade. British Columbia territory preferred. Box 120, Hardware and Metal.

MISCELLANEOUS

GOOD STENOGRAPHERS ARE WHAT EVERY employer wants. The place to get good stenographers is at the Remington Employment Department. No charge for the service. Remington Typewriter Co., Ltd., 144 Bay St., Toronto.

WAREHOUSE AND FACTORY HEATING systems. Taylor-Forbes Company, Ltd. Supplied by the trade throughout Canada. (tf)

STOVE REPAIRS FOR GARLANDS, PEN Esthers, Acmes, Sunlights, Silver Kings, Souvenirs, Welcomes, Crown Hurons, Peninsulars, Jewels, Pandoras, Favorites, Imperial Oxfords, and all kinds of Ranges and Heaters. Write for list and prices. Grundy Bros., Strathroy.

DOUBLE YOUR FLOOR SPACE—BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space, and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

HARDWARE DEALERS HAVING IN STOCK Colts Revolvers, 32 Calibre and 38 Calibre, please submit list and prices to Marks-Clavet-Dobie Company, Port Arthur, Ontario.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch with the people who will be most interested.

TOOLS FOR SALE

WE ARE OBLIGED TO DISCONTINUE OUR tinshop, and have for sale the following tools which have been used very little and are in first-class shape: 1 encased setting down machine BB; 1 wiring machine, No. 1 x 167 large burr BB; 1 wiring machine, No. 1 x 168 small burr BB; 1 beading machine with crimp head; 1 encased groover, No. 3; 1 folding machine, adjustable bar, solid base 20"; 1 double seaming stake with 2 heads; 1 breakhorn stake; 1 hollow mandrel stake; 1 mandrel stake; 1 sheet iron folder, No. 7; 1 solid frame stove pipe former, No. 5; 1 squaring shear, No. 1, with table. Price complete $100.00 F.O.B. Thamesville, Ont. Write E. S. Hubbell & Sons, Thamesville, Ont.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

2 cents

per word for the first insertion is the rate charged for an advertisement on this page. Each figure is counted as a word, and a charge of 5c extra is made when a box number is required.

When more than one insertion is ordered the cost is one cent per word for each subsequent insertion, providing the copy is not changed.

Write your message legibly and state the number of times you wish it to appear.

HARDWARE AND METAL "Wanted" ads get results.

Improved No. 1 Valve Spring Lifter
For Ford Cars

A FEW FACTS:

1. Specially designed for Ford Cars.
2. This Lifter is made of strong, tough, malleable iron.
3. Can be folded together, occupying very little space in tool chest or roll.
4. The improved ratchet holds the lifter in any desired position when compressing a valve spring.
5. You have the free use of both hands.
6. The springs are made from selected spring stock.
7. The slot at the end of arms is **WIDE** and the stock heavy.
8. Length overall, 8¾ inches.
9. Weight for mailing, approximately 1 lb.
10. Carefully packed in carton properly labelled.

LIST PRICE

No. 1 .....65 cents each

Auxiliary Radius Rod
For Ford Cars and Ford One-Ton Trucks

You will add 100% to the strength of Axle and Radius Rod already on Ford Cars.

The Clamps are Solid and of Selected Malleable Iron. The Bar is **SOLID** ⅝-inch, carefully selected material and machine threaded. The finish is black Japan, properly baked on.

NOTE, **Mr. JOBBER:**

All "Ford" One-Ton Trucks should be equipped with McKINNON HEAVY RADIUS RODS.

Why You Should Be A Michelin Dealer

No. 32

Michelin Dealers are Backed by Tire Specialists

When you become a Michelin Dealer you line up with the company that is acknowledged as the world's great tire specialist.

The House of Michelin makes pneumatic tires and nothing else.

Rubber footwear, clothing, hose and sundries have no opportunity to compete for Michelin's attention. Instead, all of Michelin's experience, skill and money are devoted to the single purpose of making better tires and selling them properly.

This specialization has enabled Michelin to build better tires and to avoid many a fault that would otherwise have crept in, had materials and manufacture been less carefully watched.

This specialization has also made it possible to develop a sales organization that works with supreme smoothness, every detail being watched with care to make the selling of Michelin Tires easier and more satisfactory for the Michelin Dealer—the cornerstone of Michelin success.

Write for Michelin's Dealer-Proposition.

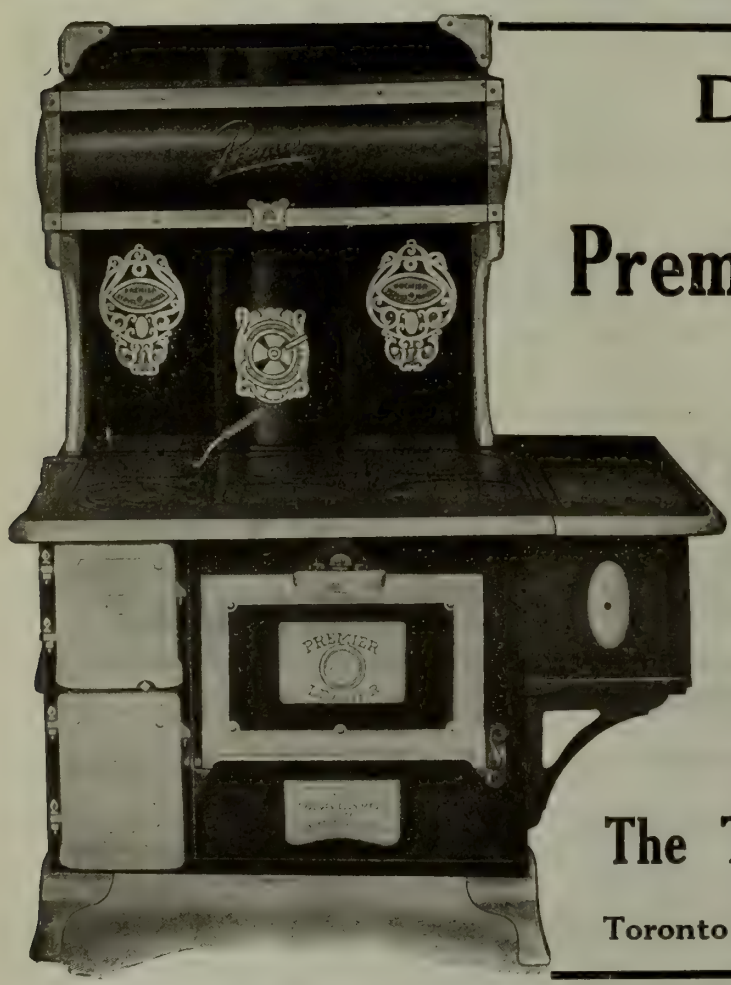
America Hangers Sell Easily and Give Life-time Service

The roller bearing tandem truck hanger is constructed entirely of steel and built to carry heavy doors.

The adjusting screw below the track is always accessible and allows increasing or decreasing the space between door and building.



The detachable drop strap permits door to swing out at right angles and prevents tearing down.

America hangers run on the famous Hatch Trolley Track, supported with corrugated brackets.

Swing in to-day. Hitch your efforts to the biggest selling, profit-making line of door hangers.

NUMBER THREE

IN the year 1853, Cyrus W. Field believed that by means of a cable people could talk across an ocean three thousand miles wide. For thirteen years he concentrated on perfecting his means of communication. He made fifty voyages across the Atlantic. Many of his cables broke in mid-ocean. In August, 1866, the first message was successfully transmitted from New York to England. This grand achievement was the result of a man with an idea concentrating on one thing. The story is one of the noblest records of American enterprise.

The secret of Cyrus W. Field's success was

CONCENTRATION

No man ever achieved a worth while victory by accident. Fine achievments are always the result of exhaustive experiments, hard work and concentration. One of the greatest men who ever lived, whose influence has lasted for centuries, took this for his motto: "This one thing I do."

Victor Hack Saws have achieved their position of dominance because we make nothing but hack saws. For many years we have concentrated all our energies and resources on perfecting this one tool. As a result, the Victor Hack Saw Blade is recognized by good mechanics and foremost technicians in all parts of the world as the most efficient hack saw for every metal-cutting purpose.

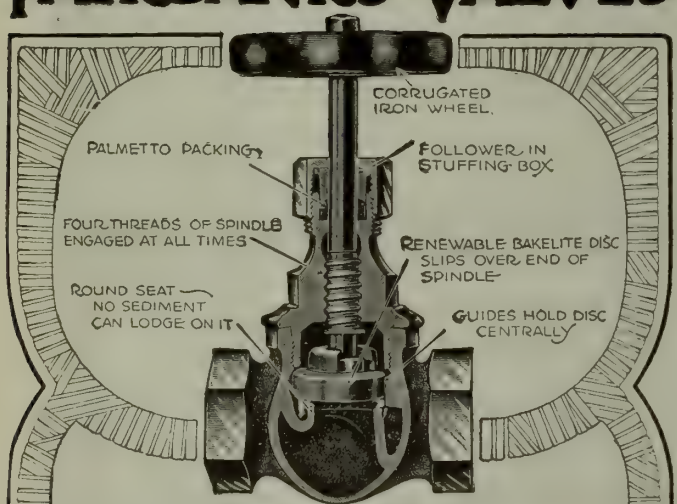
Two Timely Suggestions For Fall Selling---

T-F. Tree Pruners— Post Hole Augers

In preparation for good crops next year, every grower will be anxious to give his trees full assistance to bear well, and to prepare for the protection of these crops with proper fencing.



To help accomplish this, your part and profit is to sell him the most approved type of pruners—the "Orchard King" and the "Kansas"—and to sell him the quickest and least costly way to dig post-holes in the building of fences, outbuildings, etc.

The usual Taylor-Forbes guarantee behind both products. Write for particulars TO-DAY.

Taylor-Forbes Company, Limited

Guelph, Canada

FAIRBANKS VALVES

Renewable Disc Valves

The only tool required is a wrench to remove the bonnet. The vise, hammer and cold chisel are all eliminated. Once sold always demanded by your trade.

The Canadian Fairbanks-Morse Co., Limited

"Canada's Departmental House for Mechanical Goods"

Selling the Big Fellows

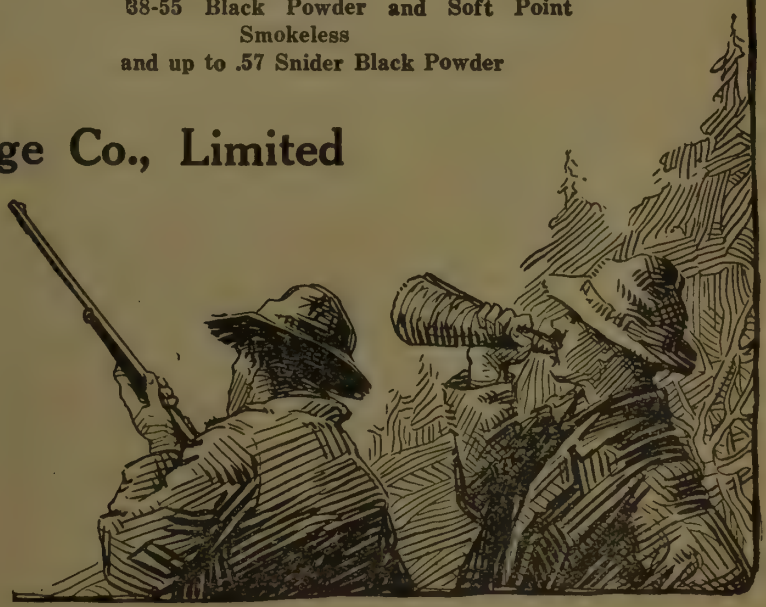
The only choice open to the big game hunter when purchasing cartridges is between the various brands of the particular cartridge that functions in his rifle.

Dominion Big Game Cartridges

(See List Below)

are made for the popular rifles in Canada.

The established quality of Dominion Sporting Cartridges is the result of the employment of brains that have developed those manufacturing facilities that mean the perfection of product.



Chemical and microscopic analysis of all raw materials—continual inspection at every stage of manufacturing—and thorough tests by actual shooting of hundreds of cartridges result in Dominion velocity—Dominion accuracy—Dominion penetration in every cartridge packed in the boxes having the "D" trademark label. Tell your customers this.

Dominion Sporting Cartridges are:
25-35 Soft Point Smokeless
30-30 Soft Point Smokeless
303 British Soft Point Smokeless
32 Special
32-40 Black Powder and Soft Point Smokeless
38-55 Black Powder and Soft Point Smokeless
and up to .57 Snider Black Powder

Dominion Cartridge Co., Limited

Nothing builds up Good-will and Holds Trade like smart delivery, and nothing is more essential to good delivery than putting a strong, handsome Body on the Chassis of your delivery motor. The IMPROVED EXPRESS Body is made to fit any chassis. Mention the chassis you use, and write us for prices and full particulars. If we have no agent in your town, we will sell you **direct.**

A Real, Live Agent Wanted in Every District

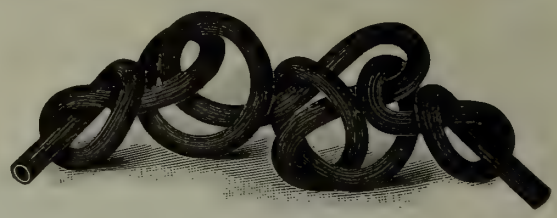
There is real money in selling Improved Bodies. If you know of a good agent, please have him write us.

CARRIAGE FACTORIES LIMITED,

Head Offices, Excelsior Life Building, Toronto

Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.



¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

TRADE MARK

ONE of the largest buyers of tools in the Dominion said to us the other day, "After the war we shall sever many business connections we have been obliged to make in order to keep our stock in shape for our customers. The manufacturer who has in these past four years kept up the quality of his product in spite of the temptation to sacrifice quality for quantity output is the only man with whom we shall maintain business relations."

Which is sound "Hoss Sense"

Confidence is the basis of all trade, and a buyer can only place reliance on the product which has stood up under the war strain.

P.H. and Imperial Files have been and will be marketed solely on the basis of service.

The Value of the Business Press to Business Men

"Business men do not realize the value which trade journals and technical magazines may have for them in increasing the efficiency of their factories and in giving them a broad and comprehensive view of their business.

"Our foreign competitors read almost every article published upon their business with great care and thoroughness. Many of them have duplicate copies of their favorite trade paper sent to their homes so that they may read them away from the business without being disturbed. Many foreign manufacturers contribute articles to these journals on phases of the business with which they are most familiar. Such articles are bound to be helpful and have a constructive effect.

"Our trade journals and technical papers are the best in the world, and they should be supported and encouraged by our business men.

"Copies should be placed where employees can see them and they should be urged to read and study them.

"These papers are preaching the gospel of sound business on practical lines and are helpful not only to business but to the country as a whole.

"If the suggestions made by them in the past had been followed by our business men it would not be necessary at this time to point out some of the fundamental weaknesses in American business."

—Edward N. Hurley, formerly Chairman of the Federal Trade Commission, in "The Awakening of Business."

There's a great satisfaction and **profit** in selling goods that stand up.

Take Brushes, for instance.

When you sell a customer a RUBBERSET Brush—you know beyond question that he will find it satisfactory.

You know he will not be in next day or next week to register a complaint.

You know he will have no "kick coming." He will think better of your store because you sold him an article of merit.

No matter what kind of a bristle brush he wants, RUBBERSET make it—for fine finishing—for rough painting—for manufacturing—for toilet uses—RUBBERSET make 'em all. And the bristles of every Rubberset Brush are **gripped everlastingly** in hard vulcanized rubber.

That's the kind of brush to sell, isn't it?

Brushes so well made that we are able to say:
"Rubberset Brushes must make good—or **WE WILL!**"

To the trade -

From now on the trade conditions are liable to be more or less excited owing to the uncertainty of the after war conditions. However, from a business outlook owing to what is to be done in the way of replacement we cannot see any business depression whatever in sight. This means that although prices may decline slightly, they will do so gradually. There is no doubt that the Allied Governments will not allow the business conditions to become unsettled. At this time it is absolutely impossible to tell what the trend of the market will be, but from the indications of the metal market we would suggest that the purchases from your office should not exceed sixty days supply. Although we think it would be a mistake to over stock, at the same time we think it would be a worse mistake not to have sufficient material to fill your orders promptly, as the firm that can make prompt delivery in these days is the firm that gets the business.

Yours truly,

G. F. Allen.

GFA/B. Manager.

THE LINE OF LEAST RESISTANCE AND THE LINE OF MOST PROFIT

Some of the goods you carry are sold almost automatically—without an argument. People know about them and feel confident of their quality. To handle these goods is to follow the "line of least resistance."
You follow the line of least resistance when you put in a stock of

O-Cedar Polish

Housewives have been taught to appreciate how indispensable O-Cedar Products are to efficient housekeeping. They expect you to sell them O-Cedar.
When you consider what a handsome profit you can make on O-Cedar—at pre-war prices —there is not a single reason left for not stocking up on O-Cedar Polish and O-Cedar Polish Mops, and displaying them where your customers will see them constantly. O-Cedar is the "Line of Least Resistance" and it is also the "Line of Most Profit."

Order from your Jobber.

Weigh Wants and Supply Them Now

Careful Buying as Followed by Hardwaremen For Past Three Years is Safe Policy—Question of Prices in Many Lines Remains Uncertain—Outlook For Securing Supplies is Improving For Many Manufacturers

HARDWARE merchants have readjusted their buying within the past two or three years in a manner different to that obtaining for many years. They have bought with care and deliberation. By so doing they have come to be better merchants and to know the extent of their stocks and the value these represented. As a consequence of this watchfulness, many have weeded out undesirable non-sellers, and the money released has been available for saleable merchandise in which there is profit.

There are more dangerous pitfalls today confronting the merchant than there were four weeks ago. The rapid change in international and world-wide events has brought with it the very problems that all anticipated would come. The merchant has anticipated a great deal and has drawn some general conclusions as to the course that he must follow. In some cases decisions arrived at will call for the abandonment of buying to any considerable extent, and in the acceptance of this principle many will feel that they are doing the very wisest thing.

Caution is Wisdom

HARDWARE AND METAL in the performance of its function aims to represent trade conditions and to assemble the best views of the trade for the benefit of the retailer, as well as the giving of market information afforded through a fine combing of the large production centres of Canada and the United States.

Many merchants are proceeding in their buying with caution. This is sound advice, if the opinion of the large jobbers and manufacturers is worth anything, and if any country in the world to-day is in the position of looking ahead with great confidence, that country is Canada. The careful, sane, cautious buying characteristic of the past two or three years is probably as wise a gauge for the hardware men to follow as any that can be suggested.

HARDWARE AND METAL has interviewed many of the large houses since the declaration of an armistice. It desired the fair and unbiased opinion of jobbers' and manufacturers' representatives. With an almost unanimous voice the future was looked upon with the greatest confidence, and with the best of reasons to support the exercise of this feeling.

As has already been stated, many warehouses are depleted of the usual supply of staple merchandise. There may be an odd exception, but in lines that have found ready sale, little overstock has been accumulated. There has been, and is to-day, an actual shortage, and in view of the fact that the manufacturers' plants have been turning out war material, with many plants not working at all because they could not secure the basic materials, this condition of short supply cannot be overcome for many months.

In many cases it was pointed out that the manufacturer, as heretofore, is dependent upon the trade for an index of its requirements for some time ahead. If he is not able to gauge this through the orders that are received well in advance, he will not manufacture to take care of anticipated demand. In many lines he cannot possibly do this, and for this reason the wisdom of ordering consistently on lines that one must have is obvious.

Some years ago at the Atlantic City Hardware Convention, Mr. Backus, vice-president of the United States Steel Corporation, made a pronouncement which created a great deal of interest among hardware manufacturers and jobbers. He said: "The United States Steel Corporation is big enough to stabilize prices. There will be price changes, but it will be our business to see that these changes come gradually'.'

This statement was made shortly after the United States Steel Corporation was formed, and during the years that have intervened they have done their best, and have succeeded very largely in carrying out this policy. In the present crisis it is to be expected that the firms who control the steel industry will see to it that any decline that comes in prices will come as gradually as possible."

Cases in Point

At a meeting held this week in Montreal, the manufacturers of steel shovels, scoops, spades, etc., decided on a continuance of the present price basis for these lines. This was made necessary in view of the scarcity of plate, and the manufacturers are not at all sure that supplies at their command will enable them to take care of the average amount of business in a normal year. There is no guarantee that they will receive the essential material, they state, and if it is received its cost may be high.

The same policy has been decided upon by the manufacturers of other lines of steel goods. Many quotations ruling today may be continued for another six months, and in accepting business, it is upon the present schedule of prices that orders will be considered. This applies to those lines that are specified for delivery next fall. It is simply another reflection of the outlook for supplies, and the makers of these goods are taking their raw materials as they can secure them. This is even a bigger consideration with many of them than that of price.

Some Other Views

From many varied sources come reports as to the outlook for the immediate future. Some do not care to say that values will be undisturbed indefinitely, but with practically no exception the tendency is that of regarding prices of to-day as a gauge of what they may continue to be for some months.

A survey of the situation on rope, for instance, indicates that existing base prices are likely to rule for several months. Even though the trade for the present season has been pretty well covered, it is anticipated that there will be a continued steadiness in this market. Shipbuilding, as already planned, will call for a large amount of rope, and the expansion that is looked for in an agricultural way will also be a stimulus to the trade.

Continued on page 41.

SOME PRICES INCREASE WHILE OTHERS GO DOWN

JUST what is going to happen as a result of the coming of peace is a question that still has retailers guessing. Manufacturers declare that the way orders are coming in is an indication that merchants are playing the situation absolutely safe and are buying only for their immediate needs, then if prices go down they will not be caught with any quantity of goods bought at high prices. There has been a decline already in some prices. The range of prices on sheets for instance has narrowed this week. Fuel oil and gas oil used largely in munitions work have dropped a cent a gallon. Steel plate was brought down to $8 in Toronto, a drop of $2. It is still selling here well above the price fixed at American points. On the other hand, turpentine is still climbing. It went up five cents this week. This is due to conditions outlined in previous issues of HARDWARE AND METAL. Some lines of woodenware have shown big advances. Dealers in electrical goods who have been unpacking goods for the Christmas trade state that they will be about twenty per cent. higher than usual. There are many indications of a revival in the building trades, but it is not expected that any large amount of construction will be undertaken owing to the nearness of winter. One of the large manufacturers of implements is advertising for 100 moulders and 1000 men. This means that the firm is preparing for a big output in the spring and next year. It is a fact that many firms are taking on men who are qualified for special work as quickly as they can get them. That means they are preparing for bigger business. In the meantime the hardware business is going along much as usual and no untoward conditions of any kind have manifested themselves.

GOVT. MAY CUT OUT ALL GASOLINE RESTRICTIONS

ALTHOUGH many meetings have been held in various parts of the country this week to consider the situation in regard to gasoline no definite action is expected for about two weeks. The proposal of the Fuel Controller, which is still in abeyance, to limit the profit of retailers to ten per cent., has caused a storm of protest from firms all over the Dominion. The Retail Merchants' Association alone has received nearly 700 letters in connection with the case. A committee from this association is expected to go to Ottawa next week to take the question up with the Fuel Controller and as stated in last week's issue of HARDWARE AND METAL indications are that he will be asked to make the profit limit twenty per cent. instead of ten. The merchants also plan to ask that the government fix the price, so that no matter what part of the Dominion a dealer resides in he will be sure of getting the twenty per cent. Largely attended meetings were held in Toronto on Thursday and in St. Thomas, Ont., on Friday to discuss what action will be taken in Ontario. Similar gatherings are being held in other places and from resolutions passed at these meetings will be framed a general appeal which will be submitted to the Fuel Controller. In the meantime the proposed license regulations are non-operative and the Government may remove the restrictions altogether.

TELEPHONE COMPANY MUST GIVE FIGURES

THE Railway Board has granted the application of the Municipal Corporations of the cities of Montreal, Toronto and Hamilton, and the Union of Canadian Municipalities, for an order directing delivery by the Bell Telephone Company of evidence in support of the company for an increase in rates. In the opinion of the board, the request made is a reasonable one, and the company is to make a return covering its operations from 1913 to 1917. The return must cover gross operating revenue, operating expenses, annual maintenance, depreciation, taxes, net operating revenue, etc. Other items called for include the amount of the company's capital, charges, including stocks, bonds and floating debt, the value of the company's lands and plant, a statement showing increases in labor costs, and a statement showing the estimated increase in revenue that would be enjoyed by the company under the tariffs now submitted.

NO CHANGE EXPECTED IN PRICES OF GLASS

PEACE has brought no change in the price of glass, nor is it likely to do so until the Belgian industry is revived. The United States, the source of the world's supply during the war, is today making very little plate glass and practically no sheet glass. The production is less than the demand and with the gradual resumption of building which, in a large part of the United States is not stopped by the severe winter conditions which prevail in Canada, the market is likely to remain firm.

The wage Scale and the Manufacturers' Committees have not come to any agreements yet as to wages for the 1919 fire, but a twenty-five per cent. increase is demanded and as the industry is highly skilled and strongly unionized, it is understood the increase will be granted. Whether such increase in wages is followed by advanced prices is problematical, but it must have an additional steadying influence on the market. Usually the wage scale is adopted in October and factories resume work in November, but now the hand factories will not commence blowing until January, which means diminished production. Therefore, until Belgium is sufficiently reconstructed to again become a factor in supplying Canada, little change may be expected in window glass prices.

TURPENTINE PRICES ARE FIRM IN SOUTH

THE turpentine situation continues to arouse much interest and reports from the south state that with the increasing prices producers who have been holding supplies for some months are beginning to unload. A dispatch from Savannah says: "At a meeting of the naval stores factors it was decided in view of the greatly increased cost of handling the commodities it would be necessary to establish an additional labor charge of three cents on each barrel of turpentine and rosin received. The charge goes into effect at once at Savannah and Brunswick and it is presumed will likewise be adopted at Jacksonville and other ports. In this

connection it may be pointed out that a persistence in holding when prices are as high as they now are may work damage in the end, not only to the holder but to the industry. All that is necessary is to recall what happened some years ago when the market was put above the present price—when it was arbitrarily shoved to $1.02. Consumers sought in every direction for substitutes and some have never returned to the use of gum spirits of turpentine. The situation as it is now is seems healthy and in view of the advances other commodities have had during the war 76 cent turpentine is not out of place.

U.S. PREFERENCE LIST HAS BEEN DISCARDED

THE announcement from Washington on Wednesday that the Priorities Commissioner had decided to discard the entire "preference list" instituted by the United States War Industries Board will have important effects on Canadian trade. It opens the way for much-needed supplies that have long been on order to come into Canada as soon as possible. This makes the general situation much brighter and affords relief to many firms who a few weeks ago were wondering just how they were going to continue. Although it may not be possible for many of them to get any large quantities immediately, owing to the orders which are piled up at many of the American plants, they are hopeful that things will straighten away nicely and that they will be kept going. It will now be possible also for firms to get goods through without permits until December 1. After that time it is expected that the ruling will be from time to time extended. As a result of the preference list being discarded many firms are preparing to go ahead with a much more extensive line of manufacturing than they believed would be possible not long ago.

RE ROUTING OF FREIGHT FOR WESTERN POINTS

THE Canadian Pacific Railway announces that freight will be accepted for routing via for Port McNicoll, and lake and rail to Port Arthur, Fort William and points west on and after the following dates:—

From stations east of Megantic, Que., November 16

From stations east of Montreal to Quebec and Megantic, November 19.

From stations Montreal and west to Windsor, Ont., including branches, November 23.

NO PRICE DECLINE IN SCOOPS AND SHOVELS

IT was decided this week, HARDWARE AND METAL is informed, to continue the present price basis for all steel scoops, spades, shovels, etc., for another six months, and probably longer. This is due to the extreme scarcity of steel plate for making up these lines. The manufacturers in the States, it was pointed out, were unable to make any guarantee of delivery, and there no prices on these lines are being quoted at all. The action shows clearly that there is little material in sight for the manufacturer turning out these lines.

RUBBER TRADE SOON ON A NORMAL BASIS

PRICES for plantation rubber have advanced in anticipation of an early lifting of all restrictions.

The rubber trade throughout the world is preparing for a return to the pre-war basis. Many believe that normal conditions of supply and demand will be closely approached if not completely re-established before the year ends, or that at least their return will not be deferred much beyond the beginning of 1919. As a result a heavy business has already been done in future shipments at advancing prices, the ratio of the rise increasing with the distance of the position under negotiation. The advance further has the support of the stabilizing influence upon the Far East markets of the British Government's recently imposed regulation of the industry. He stated that there is a two-year accumulation of raw rubber in Brazil waiting for ships to deliver it to countries where there is a rubber shortage.

NO RESTRICTIONS ON CANADIAN CHROME ORE

THE United States War Trade Board announces in a new ruling (W. T. B. R. No. 314) that all outstanding licenses for the importation of chrome ore, except those covering shipment from Cuba, Canada, and Brazil, are revoked as to shipment from abroad after November 11, 1918.

Hereafter, no licenses will be issued for the importation of chrome ore, except licenses covering shipments from Cuba, Canada, and Brazil.

IMPORT RESTRICTIONS SOON TO BE MODIFIED

THE Canadian War Trade Board is considering the whole situation regarding import restrictions as affected by the termination of the war, and will in the near future announce modifications of an important nature.

The War Trade Board announces that, under certain circumstances, from now on it will be prepared to give favorable consideration to applications for licenses to import firearms and ammunition, baskets of all kinds, game tables or boards, draughts, feathers, fishing tackle, furniture, silver novelties, musical instruments and other parts, including phonographs, photograph goods and smokers' articles, bells and gongs, skates of all kinds, all of which are included in the list of restricted articles.

MANY INQUIRIES FOR CANADIAN PRODUCTS

MAILS received from England and France this week brought to many manufacturers inquiries which would indicate splendid chances for export business. One paint manufacturer stated to HARDWARE AND METAL that he expects to obtain many splendid orders. Other firms report inquiries for various lines of steel goods, and supplies. There have been a number of inquiries, it is stated, for raw materials in fairly large quantities.

All Sizes Paint Cans Available for 1919

Pint and Half Gallon Sizes Are Now Being Sold For Spring Delivery—Many Dealers May Make Changes in Specifications Which Have Already Been Sent In

FOLLOWING the announcement in HARDWARE AND METAL regarding the improvement in the tinplate situation, comes the welcome news that the pint and half gallon cans are to be reinstated. The decision was made at a special meeting of The Canadian Paint, Oil and Varnish Association, and applies as well to varnish cans as to paint. In view of the division of opinion as to the working of the new arrangement, many hardware men in Canada will welcome this news. There have for some time past been cases where orders were booked for spring.

As stated in HARDWARE AND METAL some time ago the proposal of the manufacturers to discontinue the pints and half gallons did not meet with the approval of a great many retailers. Several of the manufacturers also were against the move, The question has been frequently discussed by the retailers, and in many quarters it is believed their views in the matter have hastened the action of the manufacturers in replacing the sizes which were eliminated.

Spring Orders Affected

Orders are now being booked for spring shipment. It is stated to HARDWARE AND METAL by various authorities in the manufacturing end of the trade, that orders will be filled in the various sizes as required. It may be some weeks before supplies, which have now become available because of their diversion from the special requirements of the war can be turned into cans, but there is reason to expect that these will be in hand soon enough to get supplies forward to the dealer in ample time for his spring trade. There will be no time wasted, it is said, in speeding up production.

Time for Changes

It is probable that some may wish to make changes in their specifications, where these already have been made. In this case there is reason to believe that the change can be made without difficulty.

Fourteen Million to Thirty Million Boxes

The pre-war production of tinplate in the United States was about 14,000,000 boxes. This was so increased through intensified production as to make the annual output 30,000,000 boxes. Obviously there is a considerable surplus and this is encouraging, but it does not mean that it will be available for less money than that paid three weeks ago. Orders are piled high on the books of the plate mills. Production cost has been high. It is decidedly improbable that these mills will sell their output on a reduced basis, therefore the paint manufacturer will have to go into the market and pay the price, whatever it may be. He will be glad to get the cans, and this is his chief concern at this time. The big feature, and the encouraging one, is that the trade will be able to proceed in selling paint and varnish in the sizes which the consumer wants.

Convention Program Outlined

Meetings to be Held Feb. 18-19-20 at Royal Connaught Hotel, Hamilton—Program Will be Along Practical Lines

At a meeting of the advisory committee of the Ontario Retail Hardware and Stove Dealers' Association, held in Toronto this week, definite action was taken in the preparation of the programme for the next convention.

The dates of the convention were definitely decided upon as Feb. 18, 19 and 20. The convention will be held at the Royal Connaught Hotel, Hamilton, Can. The complete programme will be announced within the next couple of weeks, but the outline which follows will indicate to the trade that the convention will be along real practical lines, and a large attendance is expected.

The ten-minute talks by prominent manufacturers should prove a most interesting feature at the convention. This feature was greatly appreciated at the last convention. Following is a preliminary draft of programme, to be supplemented with additions and names of speakers at an early date:

Tuesday, February 18

Executive meeting; appointment of committees; arrival of delegates. Open session: Reception by mayor and trade representatives. Closed session: Distribution printed form of officers' reports. Consideration of notices of motion from 1918 convention, including proposed advance of membership fee, reduction in numbers of members of executive. Report of resolution committee. Ten minute talks by exhibitors (names later).

Wednesday, February 19

Ten-minute addresses on prospects for 1919 by manufacturers and wholesalers on the following subjects: Wire and wire fencing; wire nails and kindred products; builders' hardware; ready-mixed paints; white lead situation; linseed oil situation; wholesalers; glass situation; auto accessories; stove situation. Nomination for officers. Ten-minute talks by exhibitors. Visits to exhibits.

Wednesday, Noon

"The Income Tax, Who is Eligible, and How to Prepare Financial Statements," by official of government.

"Government Action on Sale of Gasoline—Is a Fixed Retail Price in This Commodity in the Best Interests of the Retail Trade," by official of oil company.

"How to Maintain Your Profits in the Face of Future Declining Markets," by Jno. C. Kirkwood.

Talk by authority on "How to Advise Customers to Finish Floors."

Election of officers. Visits to exhibits.

Wednesday Evening

"How I Placed My Business on a Cash Basis, and Reasons Why I Will Continue on Same Basis," by W. F. Macpherson, Prescott, Ont.

Questions and answers. A round table talk on problems affecting the hardware trade. The use of illustrations and prices in advertisements.

The use of price tickets and show cards in windows, with results.

"How I Made Use of the Association Sales Bureau."

Are associations of manufacturers to make and control uniform prices an advantage or detriment to retail trade?

QUESTION BOX DISCUSSION

Thursday A. M.

Address by George A. Simpson, sales manager Steel Co. of Canada, Limited. Visit to exhibits.

Thursday, P.M.

Are we figuring profits on the right basis?

Are we making satisfactory profits?

"Leaks in business"—an address illustrated by moving pictures.

Address on accounting systems.

HUNTING LIGHT THIS YEAR

The usual interest in deer hunting in the Montreal district this year has been greatly lessened. This is primarily due to the absence of the many hunters overseas. Shipments of the big game to the city from outside points have been small, and it is probable that with another fall season there will be a marked interest in this sport. The real enthusiast will have returned within the coming year, and his old-time interest in the game will very probably return with him.

Now is Time to Clean Up Accounts

Get After "Slow Pays" and by Following up Collection Systematically You Will Close the Year With Many Dollars You Would Otherwise Have Outstanding—Series of Letters That Will Help in Bringing in the Money

NOW is the time to examine all your overdue accounts and get everything possible cleaned up with a view of starting the new year with a clean slate. Some radical changes have taken place in the business world in the past four years and one of the finest and most profitable lessons that retailers have learned is that uncollected accounts and ill-advised credits are the source of greatest loss. They are responsible for more failures than any other causes. There is no better time than right now to get after all your outstanding accounts. Insist upon payment by a definite date, the earlier the better. If the party cannot pay all, insist that the account be reduced and have an understanding as to when a further reduction will be made.

The Opportune Time

If you give this matter your careful consideration and work at it perseveringly for the next few weeks, you will have the satisfaction of finishing the year with a good many dollars in hand that otherwise would still be owing you. This money is needed in your business. It is money you are entitled to and for which you have delivered goods. The strange thing about it all is that many merchants are such poor collectors. They let all kinds of accounts stand and stand, until the party who took the goods home gets good and ready to come and settle. It is surprising in how many cases the aforementioned party forgets to come and the merchant sustains a dead loss. Statistics prove that thousands of dollars are lost in each community every year in this way. It is equally surprising how many customers, especially those in the country districts and in the smaller towns, ask merchants to wait for their money. This means a delay of anywhere from thirty days to six months, perhaps longer.

Have the Money

Canada, from coast to coast, was never in a more prosperous condition than right now. Therefore there could be no better time for getting in all the accounts that are owing you. Merchants are taking various ways of doing this. Some of them are inserting advertisements in their local papers. Others are sending out collection letters and others are getting in their money by personal calls.

Here is a letter inserted by a Western Ontario merchant on the front page of his home paper this week. It is straight to the point and without offending anyone should be effective:

IT IS DISAGREEABLE

To send or receive an account with a foot-note on it such as "Please," "Your kind attention is requested," "Please favor us," etc., etc. Our accounts are never rendered unless they are due. Our terms are, and have been for some time, strictly 30 days (the large Toronto stores do not give one day). Conditions in trade have changed greatly. It now requires nearly double the capital to swing a business. Goods are scarce and difficult to procure. Formerly manufacturers and wholesalers were more lenient in their terms—now the majority of them ask for payment in ten days after the merchandise is shipped (actually before the goods are received, if they are routed by freight). Any thinking person can see the necessity of prompt payment. We ask it in the same courteous manner that we solicit your esteemed trade; both are necessary for our success.

This week upwards of six hundred (600) accounts, running from $3.00 to $300 will be sent out from our office, every one of them due and payable. Many of them are rendered for the first time, many have been rendered many times before. Our experience in rendering the above number of accounts is that about fifty (50) of them will be paid promptly—the remainder will have about as much effect as water on a duck's back. It is expected that all accounts leaving our office this week will be paid on or before November 23rd.

We would like very much to carry these four or five hundred accounts for several months if we were strong enough—but we are not.

A Gentle Reminder

Some people only need a reminder in the shape of a letter to bring them into the store with the cash. A politely worded note something like the following will very often suffice:

Dear Mr. ——

Your account is quite a bit past due. We are in need of additional funds and ask, therefore, that you drop in and make some arrangements for paying your account now or as soon as possible.

We do not like to write a letter of this kind to any patron of our store, that you know. We, however, buy for cash and sell on that basis, in order that we may make prices to our patrons that are right. We did to you.

Come in and see us so that we may make some arrangements to settle this account. We will greatly appreciate your doing so.

May we look for you some time this present week? Thank you.

Yours very truly,

A Little Stronger

If this does not bring them in try something a little stronger. Keep right after them. Persistency pays in cases of this kind. Here is a follow-up letter to be sent a week after the first one went out:

Dear Mr. ——

It seems a bit strange to us that so far you have paid no attention to our recent letter asking you to call and settle your past due account.

Our policy has been to buy on a basis of spot cash and sell the same way. We made you prices accordingly, as you know. In other words, we gave you the benefit of spot cash prices and agreed to wait for our "spot cash."

Now, we think you owe it to yourself and us to come in and settle up. We really are in need of the money, as all retailers are at this particular time.

If you are unable to pay in full, we will be glad to have you pay some on account and give us an understanding as to when the balance will be taken care of.

Come in, then, tomorrow or next day, and make arrangements to settle this. Do not disappoint us this time. We shall look for you soon.

We wish to remain,

Yours very truly,

Need The Money

Before taking any drastic action merchants sometimes find it advisable to send a third letter in, which it is intimated that if the party cannot pay the account in full he should come in and at least reduce it. Many of those owing fair sized accounts will respond to this appeal. A third letter may be worded as follows:

Dear Mr. ——

Here we have asked you twice to come in and make some sort of payment on your old account.

We believe the reason you delayed doing so was because you lacked ready money. So do we.

Expects No Decline in Paint Prices

High Production Costs of All Material Will Require Maintenance of Market, Says Managing Director—Bareness of Stocks a Factor —Wages Cannot Decline Unduly While Living Costs Remain High—Confidence All Around Justified

PAINT prices will be continued on a steady and unchanged basis for some time to come, in the opinion of W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Limited.

In an interview with Mr. Fallis, HARDWARE AND METAL was informed that the dealer possessing confidence and good common sense at the present time would make plans as usual for the development of trade, and would have no reason to fear for the results—the future would be all right.

The release of many Canadian soldiers at the front would make labor more plentiful, which would enable those who have deferred painting for the past four years, to do the work now. The future promises to be alright, and conditions are sound.

In support of the deductions made, Mr. Fallis referred to the facts that are responsible for the maintenance of the market on a steady basis.

Supplies are Short

"As producers of a great many of their basic materials this company has found it difficult to procure the quantities necessary for their own needs, aside from the surplus that ordinarily is available for outside demands," he said. "The production of many basic raw materials at the lead, zinc and oxide mines is far behind, and it will take three or four months to catch up with the orders. It has required their purchasing from outside producers from time to time, products that have always been available in full quantities from their own mills."

Effect of Armistice

The news of November 11, was very definite regarding a cessation of hostilities, yet, in view of the announcement of this important fact, which would ordinarily have caused sharp market declines, the conditions continued quite undisturbed. On that very date the market prices for many materials used in the manufacture of paint, some of them largely chemical that were in constant demand through the war period, and others used in various ways, held steady. In no instance has there been a change of price, but several important raw materials have stiffened considerably.

High-Priced Material

It will be necessary to bear in mind the fact that production costs on all commodities showed a continuous advance during the war period. Scarcity of labor and the high cost of living have been responsible for the steady increases that have taken place from time to time, and which has naturally brought about a new standard of prices at a higher level than any known in the history of the trade. Without exception, costs so increased as to make stocks completed during the war period, or in process of manufacture, on a level with present prices. This applies to material in the hands of manufacturers or finished stock in the hands of the jobber and retailer.

In view of the fact that labor is likely to be paid relatively high wages so long as living costs rule high, and rightly so, there is no logical reason for a recession of values on manufactured products. It is out of the question to anticipate an immediate or early decline in the market.

Linseed Oil Scarce

Our Canadian crop with the United States crop falls short of supplying the normal needs of the trade in the United States and Canada, and it is necessary to bring from the Argentine, somewhere about 10,000 bushels to supply the demand in our own markets. Europe for the past four years has received less than one-fifth of her normal supply of flax. Consequently the whole of Europe is hungry for linseed oil, the product of flax seed.

As transportation becomes more open there will be a constant demand for Canadian, American and Argentine seed for Europe, and this is already reflected in the advances of price of almost 50c a bushel since the armistice was declared. Inland transportation is another feature that is seriously retarding operations of the crushers. Last winter many of the linseed oil mills were closed down during January and February for lack of supplies and transportation difficulties are not any too promising this year, as indicated by the tardiness in the movement of all grains from the interior to the head of the lakes. The demand for food products in Europe is even more urgent than last winter, to feed the starving multitudes, and transportation facilities will be utilized to the greatest possible extent in moving grain from the interior of Canada to the seaboard for European demand.

Paints Should Sell Well

The paint dealer ought to sell a great deal of paint this coming season. Buildings require it as a preservative, and the energetic dealer will urge its use consistently. The great volume of paint sales is through the medium of the retail dealer, and it is incumbent upon him to use every means given him through advertising and personal solicitation, and co-operation with other dealers in his own town, to control the paint sales of his district. It is the merchant who makes his plans well in advance, and who then works to these plans, whose business will grow and not be seriously affected by competition with the active merchant. Competition with the active merchant is an incentive to create energy.

The lack of attention to painting for the last four years leaves a great gap to be filled. and it is the wise merchant who lays his plans early to secure this trade that will have a most successful and profitable trade. Next year's sales from the dealer's shelves should eclipse all previous records.

BIG CONVENTIONS ARE AGAIN POSTPONED

All paint manufacturers irrespective of membership or non-membership are to be invited to the Paint Manufacturers' Association meeting and all varnish manufacturers similarly to the National Varnish Manufacturers' Association meeting to be held in December of this year.

The meeting of the Paint Manufacturers' Association was originally planned for the Hotel Astor, New York City, on Friday and Saturday, December 6 and 7. The National Varnish Manufacturers' Association was to meet at the same place on Tuesday morning, December 10, Monday being filled with committee meetings, etc., but it has been deemed best to postpone these conventions to a date later in the month which will be announced shortly and they may be transferred to Atlantic City.

CORRECTION

A wrong underline was placed beneath the cut which appeared on page 19 of HARDWARE AND METAL last week. The line should have read, "Charging of open hearth furnaces at the American Rolling Mills Company, Middletown, Ohio."

DUTY ON OVENWARE

According to the latest decision of the Canadian Board of Customs, Pyrex transparent ovenware is declared to be dutiable under tariff item No. 326.

Cash Prizes for Best Xmas Windows

Cash is Offered by "Hardware and Metal" For the Best Christmas Windows—Now is the Time to Try Out Your Plans and Cash in on Your Ideas by Drawing Big Holiday Trade to Your Store

IT is estimated that no less than ninety per cent. of the general public do more or less of their Christmas purchasing by the "window shopping" method. No matter what other means a dealer may take to advertise his goods, there are scores of sales made by window displays that would never be made in any other way. The Christmas show window first attracts and then if the right goods are displayed it holds the prospective buyer and sends him into the store to make his or her purchase. Many people have almost a passion for window shopping. They depend upon what is displayed in the windows for making their selection of Christmas presents. The window that is attractively arranged and filled with the right assortment of goods will pay for itself many times over in sales returns and sales returns are what the merchant is after.

Can Win Cash Prize

You can by a little planning arrange a window that will not only be most satisfactory to you in every way by the profits it will earn, but win a cash prize in the Christmas Window Display competition put on by HARDWARE AND METAL. The only stipulation is that the goods shown in your window must be for the Christmas trade. Your own talent for selecting goods that will appeal to your trade, your own taste in arranging them in your window and your ideas are what will count. Many splendid window displays have been shown in recent issues of HARDWARE AND METAL. Right here you have a training school at your disposal. Every one of the illustrations of window displays in HARDWARE AND METAL has contained many ideas that are invaluable in the work of window dressing. Your ingenuity in arranging a Christmas display window may be stimulated by a study of these, and a cash prize is ready for you if your display is a winner.

Get Busy Now

Get busy now with your plans. You can improve your talent in window display by trying out your ideas in the weeks before Christmas, and you will be surprised what you can do. You will learn by doing and you will not only learn but you will make more money in your business and have every chance for winning one of the cash prizes offered by HARDWARE AND METAL. The competition is wide open. Every hardware man from coast to coast has an absolutely equal chance. What appeals to the buyers in your community will probably not interest the people a thousand miles away. This is why windows all across Canada will be different at Christmas time. The hardware dealer who knows most about the people of his community, what they are likely to buy, what appeals they are likely to respond to in a window display, has a good basis on which to start right now planning for a record Christmas trade. It is essential, however, that he must apply this knowledge in arranging his display. After he has decided what kind of merchandise will bring the people into his store he should arrange to display this goods in the way that will produce the greatest results.

Should Bring Business

The primary object of the Christmas display window is to bring people into your store and send them away satisfied customers with their Christmas shopping wants supplied. A pretty window may make them stop and look but if you do not have Christmas goods that will appeal to them, the buyers will pass right along until they find something they think is appropriate. No merchant has a stock of goods that carry such a wide appeal as those handled by the hardwareman. His goods are not only useful and attractive, but will give real service for years and will be appreciated by the recipient because of their value. You have the goods. If you put them in your window attractively you will get the buyers, and if you send a photo of your window to HARDWARE AND METAL no later than January 1, 1919, you have every chance of winning a splendid cash prize.

TRADE COMMISSION CITES GLASS JOBBER

Declaring it has reason to believe the concern is practising the misbranding of inferior grades of window glass to deceive and defraud dealers and the public into the belief they are higher grades of glass, the United States Federal Trade Commission has issued formal complaint against the A. T. McClure Glass Company, wholesale jobbers, of Reynoldsville, Pa.

The complaint charges the jobbers "systematically and continuously" have opened boxes of glass supplied them by manufacturers, removed enclosed slips indicating the true quality and otherwise altered marking and labels to make it appear the glass thereafter resold to the trade was of a better quality than it in reality was; and have charged prices which would apply to the higher qualities.

The concern was cited to appear before the Commission in Washington, December 26.

SAYS NO CHANGE

HARDWARE AND METAL is informed by a Montreal manufacturer of steel goods, including various wares, stamped and pieced, that the present basis of price will rule for goods on which delivery is to be made during the coming season. This is attributed to the scarcity of supplies for making up stock, the producers having little encouragement as to an early recovery of the present bare conditions brought about through the war. There is no possibility of lower levels being reached, this informant states. The prices of today would be the lowest, he expected, for a period of at least six months, and probably for a longer time.

WEIGH YOUR WANTS AND SUPPLY THEM NOW

Continued from page 35

Readjustments Gradual

Assuming that there will be readjustments, and which none will deny must come, the very nature of general stocks of both manufactured and raw materials will preclude the likelihood of values declining in a precipitate manner. The readjustment will be a gradual one, and, as pointed out in an interview this week with George C. Davis, managing director of Frothingham and Workman, Ltd., this change will very probably be scarcely noticeable for some months to come. It was stated that radical changes were not anticipated, even in the raw materials, for with the cessation of munition making there will be a large call for materials in the prosecution of railway development building operations and export trade.

If there was ever a time for the exercise of great confidence, that time is today. The recent success of the Victory Loan campaign is an index, unmistakable and encouraging, as to the soundness of Canada from a financial viewpoint. The programme of the government in the matter of building up a merchant marine is also one of the soundest reasons for optimism. The assured price for the farmer's production during the coming season is most reassuring, and in view of these facts it behooves every Canadian, merchant, jobber, manufacturer or consumer, to proceed with greater faith than ever before. It is a well-known principle that confidence begets confidence. It is time now to exercise it.

Merchants Oust "Arizona Plan"

Retailers Force Suspension of Law Compelling Them to Mark Selling and Production Prices on All Merchandise—Blow Aimed at Dealers by Socialistic Element is Warded Off by Prompt Action of Business Interests

FOLLOWING a storm of protest from Arizona business interests, the highly socialistic "Arizona plan"—ordering that all merchandise on sale in retail stores must be plainly marked with both the selling price and the production price — has been "indefinitely suspended."

The official order reads that the suspension shall be effective "for not less than thirty days, but it is not probable that the law will ever be enforced, in spite of the pressure brought to bear upon Governor Hall by the I. W. W. and other anti-capitalistic organizations.

Flayed the Plan

The "Arizona plan," formulated by a partisan State Council of Defense and directly aimed at certain State influences which opposed the election of Governor Hall, was flayed at a recent two-day conference of retail merchants, hastily called to discuss this blow at the very heart of their business.

The order provided that all merchandise must bear in plain figures a tag or card indicating both the selling price and the cost at the place of production with merely the freight charge to the place of sale added. The protest was not so much against having a selling cost marked as against the selling cost as defined by the new State Council of Defense.

Say It Is Unfair

Merchants who attended a two-day conference over the matter claimed that to arbitrarily term the cost at mill and freight the cost price of an article would be unfair because it ignored the cost of all the services rendered by the merchant.

Most of the merchants contend that, to be fair the tag must bear a cost totaling all the elements of doing business—not merely the cost of the manufactured article at point of origin plus the actual freight charged. They pointed out that in many regions in Arizona it cost 33 1-3 per cent. to do business and in some mining sections even more. Thus, they contended, an article might cost $10 at the factory with freight of twenty-five cents and still have to sell at $20 or more to make a reasonable profit, whereas to mark the cost of the article at $10.25 and the selling price at $20 would lead the purchaser to believe the merchant a robber and war profiteer of the worst kind.

Text of the Resolution

One of the counter-suggestions was that a list of staple articles, say 100 in number, might be included in the order. Just how seriously such a suggestion is being considered is not known. The common opinion here, however, is that the matter will not come up again, so general was the protest among the dealers.

HARDWARE AND METAL on page 46 of the issue of October 12, outlined in detail under the heading of "A Radical Price Experiment," the unheard of plan that was to be tried out in Arizona. This is the sequel of the story and shows what happened to the plan. The case has been followed by retailers all over the country with the keenest interest.

In full this resolution suspending the order runs:

"For the purpose of obtaining further information from the National Council of Defense and the National War Industries Board, as to the best method of putting into effect some thoroughly practical, just and thorough plan to check profiteering in merchandise in the State of Arizona without serious disturbance to legitimate merchandising, the operation of the resolution adopted by this council on August 15 last, regarding marketing cost and selling price on merchandise, is temporarily suspended for a period of not less than thirty days."

Original Plan

The resolution of the council originally ordering the price marking was as follows:

Be it Resolved, That the Arizona State Council of Defense, by virtue of the authority in it vested, orders that

On or after October 1, 1918, all retail merchants, dealers in commodities of merchandise, foodstuffs, articles of wearing apparel, and all other articles sold retail, shall mark in plain figures the cost and sale price of each article sold, displayed for sale, or kept in stock, either on each unit of sale, or in such a conspicuous manner in the immediate vicinity of such article or articles, that no confusion or error can arise in any interpretation of the cost and sale price of each unit of sale.

Suggests Compromise

During the course of the two-days' discussion, which brought merchants from the furthermost corners of Arizona to Phoenix, one of the moves of pacification attempted was a compromise which would enable the State Council of Defense to reach its object without so seriously handicapping merchants. A committee of three from the council and three from the merchants was named and this joint committee, after considerable deliberation, furnished what it thought a solution of the difficulty.

This solution, which has been briefly alluded to as the counter-suggestion that 100 articles be tagged, was that such a list be formulated and from time to time the council signal out ten or twenty articles from the list of 100 or more to be tagged with cost and selling prices —a different list of ten or twenty being used every week or so. It was pointed out that in this way the council could keep tab on profits without rubbing it in too hard.

Was Not Accepted

In addition to this suggestion the merchants volunteered to raise a fund of $6,000 for the employment of a man of national standing, a man who would in ordinary times draw several times such a salary, but who would be content because of the patriotic nature of the work to serve for such pay. This man would be kept in touch with mercantile conditions and would establish prices which, in his estimation and the estimation of the National Industries Board, would be fair and nonprofiteering.

The new State Council of Defense would not accept this suggested compromise.

Feared Competitors

While it was not openly discussed at the conference to any great extent, many of the merchants who attended found strong objection to the open cost tag in the belief that competitors would thereby find out what they were paying for articles. This, many believed, would result in the loss of some purchasing advantage.

Some of the remarks made during the conference became rather heated and there was no difficulty at its conclusion, after the merchants had really gained their point largely because the council could not agree among its own members, to form a State-wide mercantile association which is now one of the most vigorous organizations of its kind in the West and which represents perhaps the largest proportion to total number of merchants.

Underlying Motive

Back of all the bickering is something which runs deep into the political situation of the State and which has the most direct bearing upon the original order. It finds its root in the remarkable gubernatorial contest of almost two years, when Thomas E. Campbell, Republican, was elected Governor over Geo. W. Hall, Democrat. Campbell's majority was only thirty votes and a contest and recount followed. The lower court with a Democratic judge sustained Campbell. An appeal was made to the Supreme

Current Events in Photograph

VICTORY ARCH

The handsome Victory Arch here shown was built by the retail merchants of St. Catherine St., Montreal, and was presented by them to the Victory Loan Committee. It was made of lath and plaster and was very imposing in its snow-white coat of dull finish. It was erected on St. Catherine St. in front of Phillips Square. At a formal function, which was largely attended, it was dedicated, and the suggestion made at the time that a marble replica of the arch be made to form a permanent memorial of the success of the Victory Loan campaign and also of the Allies' triumph in the great war was well received and may be adopted.

NOW IS THE TIME TO CLEAN UP ACCOUNTS

Continued from page 39.

We need money to carry on our business, and we must, by all means, get it in.

We never like to make trouble of any kind for a patron of our store. When it becomes necessary to do so, he generally loses more than we do. He loses the advantage of cash prices on the goods he gets here, and also loses money and local repute by the law course. We do not want to take such a step now. We say this in all fairness.

Can we, then, depend upon you to square up the old account by the first of the week? Pay at least something on it.

In the hope that you will so favor us, we are,

Yours very truly,

Must Take Action

If all these appeals prove fruitless it means that the party probably does not intend to pay. A fourth letter along the lines indicated below should be sent and the most important point in connection with this is in meaning what you say. It is useless to tell a delinquent you will take action and then never follow it up. It gives him the impression you are afraid. One of the most successful collectors in the country to-day tries all methods of persuasion and appeal before threatening action, but once he says he is going to take the case to the courts he always does so. In this way he has established a reputation for himself that goes a long way with "slow pays." Once they know that R—— has been given the account to collect, they know he means business, and is prepared to go the limit. They also know that if they are temporarily hard up and show by their attitude that they are willing to do the best they can and are honest and will pay a little at a time, he will give them every consideration.

The final letter to be sent out before taking legal action may be worded as follows:

Dear Mr. ——

This makes the fourth letter we have written you, asking that you make some kind of settlement of your long past due account.

So far you have not paid any attention whatever. Do you think this course on your part is right? Place yourself in our shoes and see how you would like it.

Unless some arrangement is made to pay this account by the 10th of this month, we shall consider it our duty to hand same to the attorneys.

We have enjoyed doing business with you, and believe you have found us fair and square. But ignoring us as you have does not help one bit.

So please step in and pay up the account, or a part of it, before the 10th. Save us and yourself expense, and we shall be glad to continue with you as formerly. There is no personal feeling in this letter at all; we simply need the money due us.

Thanking you in advance for the courtesy of a settlement by the date mentioned, we are,

Yours very truly,

EDITORIAL COMMENT

EDITORIAL BRIEFS

THE Canadians who are going to Siberia appear to be the only soldiers who may see any more fighting.

* * *

ARE you busy with plans for entering the Christmas Window Display Contest of HARDWARE AND METAL and capturing a cash prize.

* * *

THE way the Victory Loan went "over the top" shows how whole heartedly the people of Canada are behind the cause and should prove a splendid stimulus to business.

TIME TO RESUME

WITH the advent of peace and the commencement of the readjustment period, the usual crop of alarmists are making themselves heard. They are not all confined entirely to the retail trade, because the latter with a few exceptions as a whole are taking a wise course, as a result of the lessons they have learned during the past four or five years. Some of the alarmists are among manufacturers, wholesalers and even travelling salesmen. They are crying "Wolf, wolf," when there is no wolf. Canada is in a grand position to "carry on" during the period of readjustment. So far as the hardware trade is concerned, there should be no cause for alarm. Faith in the future of Canada, coupled with a wise buying and selling policy will greatly assist in stabilizing industry. Do not take the "croakers" too seriously. Here is an illustration of how rumors get started. Last week a traveller for a wholesale hardware firm visited a leading merchant in an Eastern Ontario town. The merchant is strong financially, has abundant faith in the future of Canada and of his business. He has a good stock and has booked well ahead for spring deliveries. His business during the past year has been the best in its history. He is somewhat of a joker, although travellers usually take him seriously. Here is the dialogue which took place in his store:

(Enter wholesale traveller.)

Merchant: "Don't think I need anything this trip, prices are going to be shot to pieces now, and I am not going to be caught with high-priced goods in stock."

Traveller: "Well, to tell the truth, I don't blame you."

Merchant: "Aha! You feel that way do you? Well, now I won't buy, because when you fellows admit that things are going to the dogs, then I am going to play safe."

(Exit traveller.)

The foregoing is an actual occurrence, related laughingly by the merchant to the writer a few days ago. "I would like to see the report made to the house, by that traveller," he said.

The merchant is not going to quit buying. He feels sure business is going to be good and he knows of several buildings which are to be erected in his town in the near future.

The point is, that at a time like this, even jokes may be misconstrued, and the remarks, innocently made, may cause great missapprehension. Careless remarks by men in the trade, may cause great damage. Travellers above all should not get cold feet, and despite discouraging features of the situation, if any, look the facts in the face, and discuss the proposition on its merits. And what is more, the situation calls for the best available support and co-operation of the house behind the traveller.

This is a time for some of our "too conservative" tradesmen to come out of their shell and take their part in abating alarm, which is uncalled for and liable to do damage to all branches of the trade.

BOOST THE CONVENTION

AT a meeting of the Executive Committee of the Ontario Retail Hardware and Stove Dealers' Association held this week, the bulk of the programme for the big annual convention to be held in Hamilton in February was completed. The Association is sparing no pains to make this year's meeting a record breaker in every way. The programme is replete right from start to finish with items that will not only be of keen interest to hardware men, but of profit to them. The discussions will deal with problems that are encountered in every-day business life. Ideas will be forthcoming that you can use to make your business bigger and better. There will be practical demonstrations that will help you not only to understand window dressing, floor finishing and other things. This will mean more sales and better sales and consequently more profit to you. You cannot afford to miss one minute of the sessions and should come prepared to take careful note of all that you can apply in your own store. You should not only

come yourself, but you can help along the good work by bringing some other hardwareman. By all working together the best interests of the trade as a whole can be forwarded. There are many problems to solve and discuss and by everyone lending his aid their solution will be arrived at more quickly. The hardwareman who stays away from conventions or who does not do anything he can to help along movements which are in the best interests of all is taking a stand that is selfish in the extreme. He is losing a lot that is worth while and not only hurts himself, but injures others by withholding from them co-operation they are entitled to.

A DRAMATIC EVENT

ONE of the most dramatic events in the history of the world was the handing over by Germany of a huge fleet of battleships, including many of her finest dreadnaughts, to Admiral Beatty, without a shot being fired. The Huns spent millions of dollars and years of labor in trying to build up a fleet that would match Britain's when "The Day" came. For more than four years the men of the British navy watched ceaselessly, day and night, winter and summer, in storm and in fine weather, for the German fleet to come out. These men lived up fully to the glorious traditions of the navy. Theirs was one of the greatest tasks of the war and how well they performed it is evidenced by the remarkably few losses sustained in the transport of millions of troops, vast quantities of supplies, and by the fact that the German navy never dared to meet them. It is one of the freaks of the great war that the men who were longing, hungering and thirsting as it were, for a chance to meet the Huns on the sea, were denied that chance. Even the knowledge of work well done, the collapse of Germany and the handing over of the battle fleet without a shot being fired, cannot compensate many of the sailors for their disappointment in not having a chance to fight. Thousands of them were looking forward to a battle that would live in the pages of history as greater even than Trafalgar and entitle them to places in the hearts of their countrymen with the men who fought under Nelson, Drake and others. There is no question that they are entitled to this place, but the fact that they won it by unceasing vigilance and without a fight does not compensate the sailors. Incidentally the action of the Hun in evading a battle has not raised him any in their esteem.

RETAILERS NOW REPRESENTED

A MOVE that promises to be a long step forward in helping retailers to obtain more intelligent legislation in connection with business problems has been taken by the merchants of the United States. They now have a "friend at court" in the shape of a special committee of their chosen representatives who will direct affairs at Washington. Taxation without representation of any kind has been one of the great problems of the retailers across the line as it is in Canada. All sorts of legislation and rulings not in the interests of business have been passed by those not conversant with the situation. The retailers have suffered as a result. They often protested, but because their protests were not backed up, nothing came of them. Now they have an organization which will make not only a fight, but a strong fight against any legislation that is against retailers. The Government has fully recognized the committee and it is to have a voice in any legislaton which affects merchandising. There is a lesson here for Canadian retailers. There have been many occasions on which they have suffered because measures were passed at Ottawa by lawyers or doctors who did not realize the effects they were going to have on trade. If the retailers of Canada were to get together and obtain proper representation in not only each province, but in the Dominion Government, many matters could be adjusted that would make for better business.

BRITAIN'S BIG SHARE

BECAUSE of the collapse of the Germans before the American troops had a chance to really show what they could do in a big way, the United States is in the position of having a remarkably small casualty list. More than 1,000,000 British troops are sleeping in Flanders, and other fields. Just what the French casualties are has never been given out. Out of the Canadians who went over more than 50,000 will not return. Referring to the American losses, the Buffalo *Express* says editorially:

"Officials at Washington estimate that the American casualties during the war will not exceed 100,000, including all who died of disease or accident as well as those killed and wounded in action. This is a remarkably low record and will put the war, so far as losses are concerned, in the class with our minor national conflicts, such as the Spanish and Mexican wars.

Incidentally it should impress upon us the comparatively minor part which we were called on to play. British casualty lists have run to 30,000 and 40,000 a week from action alone. This has been continued during many weeks of the present year as well as in previous years. The French never have reported their casualties at all, nor have the Italians.

We must be very thankful that we have not had to sacrifice more of our men, but we have lost enough to understand and appreciate the individual sorrow and suffering that the war has brought to our friends."

EVENTS IN THE TRADE

Business Changes

Montreal.—J. M. D'Aoust Limited, hardware, has obtained a charter.

Obituary

The death occurred at Galahad, Alberta, of F. C. Ansell, hardware.

Miss Marjorie Bailey, of St. Thomas, Ont., who went to Bridgeport, Conn., some months ago to take a position in the offices of the Union Metallic Cartridge Co., died from pneumonia which followed an attack of influenza.

Fred Hess, sr., for many years a carriage and waggon manufacturer and also an implement agent, died at his home in Zurich, Ont.

Fire Losses

The plant of the T. E. Bissell Co., Ltd., Elora, Ont., manufacturers of disc harrows and implements, was completely destroyed by fire on Wednesday. Only the foundry was saved. The loss, which will be about $25,000, is fully covered by insurance.

David Courville, hardware and furniture, Alexandria, Ont., sustained a loss of $1,000 by fire. The loss is fully covered by insurance.

Fire, which broke out in the plant of the Barrett Mfg. Co., Ltd., Montreal, manufacturers of roofing supplies, was checked before any serious loss was sustained. The firm is prepared to take care of the trade for all lines. Sales Manager D. P. Hatch stated to HARDWARE AND METAL that the damage had been repaired. The large stills, in which the tar and pitch are stored, had been effected, but the plant is now in good working order again.

Personals

Albert Webber, who represents Merrick-Anderson Co., Winnipeg, in Northern Manitoba, was a Toronto visitor during the week.

T. F .Shurly, president of the T. F. Shurly Co., Ltd., St. Catharines, Ont., was in Toronto during the week calling on the wholesale trade in the interests of his firm.

F. C. McMaster and family, of Lindsay, left this week for Brighton, where Mr. McMaster has purchased a hardware business. Mr. McMaster has resided in Lindsay for a number of years, having conducted the "Oak Front" hardware business and latterly was identified with the Cinnamon-Allin Hardware Company, Ltd.

A. H. Richardson, of the Canadian Warren Axe and Tool Co., St. Catharines, Ont., was in Toronto during the week, and later left for Collingwood.

Byron Carney, who has sold out his hardware business at Walters Falls, Ont., has moved to London, Ont., where he has been appointed manager of the Canadian Oil Company.

J. S. Mitchell Goes On Commerce Board

J. S. Mitchell, of the firm of J. S. Mitchell & Co., Ltd., Sherbrooke, Quebec, wholesale and retail hardware, has been elected a director of the Canadian Bank of Commerce. He takes the place made vacant by the death of Wm. Farwell. The Sherbrooke *Daily Record* says in connection with Mr. Mitchell's election to the board: "Mr. Mitchell has for a long period carried on the largest commercial business in the eastern townships, and his business ability and standing in the country were recognized long ago by the old Eastern Townships Bank, of which he was a director for fourteen years before its amalgamation with the Bank of Commerce.

He, without doubt, had a wider acquaintance with the business men of this part of the country, and a more intimate knowledge of their commercial and financial standing than any other man in the townships, and he is still in the prime of his business career which, moreover, has brought him such substantial financial rewards that he is now in a position to give of his time and ripe commercial experience to the interests of the bank which has done honor to itself and the townships by calling him to a seat on its board.

Notes From Regina

A. G. Low, of A. G. Low Co., Saskatoon, was in the city recently

W. McIntyre, of the P. A. C. McIntyre Co., auto accessories, is calling on the trade in this district.

C. Carbury, of the Wood Vallance Co., is calling on the trade in Regina and district.

Thos. J. Edwards, of Stewart & Edwards, was married recently to Miss Mary C. McNeill of this city.

Trade Notes

International Castings Ltd., of Essex, Ont., has obtained a provincial charter.

John Weighton, Toronto, manufacturer of washing machines, has disposed of his business.

The Maitland Roofing and Supply Co. of Toronto, has been succeeded by McDermid Bros.

International Castings, Limited, capital $40,000, head office, Sandwich, Ont., has received a Provincial charter.

R. C. Glaze, agent for the Imperial Oil Co. at Red Deer, Alberta, has been given charge of the Medicine Hat district, and wil have supervision of twelve or more local agencies in that district. He will make his headquarters at Medicine Hat.

A petition for a winding-up order for the Caledonia Iron Works Co., Ltd., Montreal, was granted, and W. Gordon Finlayson named as provisional liquidator.

In order to conserve light and heat the hardware stores at Tweed, Ont, have decided to close every evening except Saturday at 6 p.m. The other stores of the town close three evenings a week at 7 o'clock.

Montreal News

Wm. T. Evans, agent for the Sphinx Mfg. Co. of Birmingham, England, has left for the Old Country and will spend several months there.

Mr. Merchey, representative of the Diamond Saw and Stamping Works of Buffalo, N.Y., was in Montreal for several days this week.

J. C. Watson has joined the travelling staff of Frothingham and Workman, Ltd., wholesale hardware merchants, Montreal. Mr. Watson will cover the territory previously assigned to Chas. B. Edmunds, deceased.

George Henderson, president of Brandram-Henderson, Ltd., left on Wednesday of this week for New York.

T. H. Houghton, sales promotion manager of the Martin-Senour Company, has been confined to the house for several days this week.

ATLANTIC CITY CONVENTIONS NEXT MONTH

The annual conventions of the National Hardware Association and the American Hardware Manufacturers' Association, which were postponed from October by the action of the health authorities of New Jersey, will be held at Atlantic City, N.J., on December 11, 12 and 13.

SHEFFIELD FIRMS ARE NOW WORKING FULL TIME

Reports from Sheffield, England, state that, following a period of depression extending over nearly six months, a marked revival in the conditions of the crucible-steel industry is manifesting itself. Makers who had been working only four days a week are now able to run full time, and in some cases overtime is necessary. The encouragement which is being given by the government to overseas trade in the shape of a more generous policy in granting export permits has been a considerable factor in the improvement. A large quantity of tool and other crucible steel, even that containing tungsten, is now being shipped to the United States, Canada, and other markets. The home demand is also rather better. Many manufacturers have enough orders on hand now to keep them working to capacity for twelve months.

Peterboro Dealers Took Care of Hunters

Peterboro' is a point from which many hunters go north every fall on shooting expeditions. This usually means a lot of good business for the hardwaremen. In view of restrictions and shortages of supplies this fall there was some apprehension that business might be lighter than usual, but without exception Peterboro' hardware stores report a very fair season in sales of hunting supplies in spite of difficulties due to limited supplies and shortage of ammunition and guns. The embargo placed on the importation of firearms from the United States prevented the Peterboro' Hardware Company and other firms from securing a complete stock of rifles. It was also difficult to secure supplies of the commercial lines of ammunition. On the whole though the trade was fairly well supplied and none of the hunters had any reason to go into the woods without a full line of necessary equipment.

Sheets From England May Be Available

HARDWARE AND METAL is informed by a large importer of metals from Great Britain that lines of steel sheets, black sheets and other similar goods may be obtained shortly. The information as yet does not indicate just when supplies may be had. These will be available, however, when shipping and government restrictions are adjusted. It is stated that those desiring these goods may be assured of delivery in the early Spring, just when a great deal of material comes forward in a normal season.

In view of the fact that competition is bound to develop in due time on various goods, assurances are looked for that will give the buyer favorable freight rates and this is expected to be favorable on both sea and rail routes. The outlook for deliveries is encouraging.

W. B. Murdock, hardware dealer, Amherst, Nova Scotia, has received word that his youngest son, Private H. Ward Murdock, 85th Nova Scotia Highlanders, Machine Gun Corps, has been awarded the Military Medal, and is now in England taking his commission. No particulars have been received. Private Murdock enlisted in February, 1916, in the 193rd Battalion, and was a sergeant in that unit when it went to England. He transferred there to the 185th, and reverted to the rank of private on going to France to the 85th Battalion. He has been through all the fighting on the western front this year.

Lieut. Rochereau de la Sabliere, aged 23, was killed in action on October 3. Before going overseas he assisted his father who is president and manager of the Gendron Manufacturing Co., of Toronto.

Pte. Fred McDonald, of Elora, formerly with the T. E. Bissell Co., of that town, died of wounds in France. He went overseas with the 153rd Battalion.

Gunner Melford M. Ford, aged 29, formerly acting traffic manager for the Dunlop Tire & Rubber Goods Co., Toronto, was killed in action. Before moving to Toronto he resided at Elmira.

EXPORTS OF AUTOS

Canada is doing a steadily increasing trade with Australia in motor cars and accessories. Imports for the past four years of Canadian cars are as follows: 1914. $980,945; 1915, $994,040; 1916, $1.862.175; 1917, $1,189,240. The falling off in 1915 was attributed to large surplus stocks being carried over and the troubles in getting freight moved.

Taking into consideration the increased cost of the cars and the great increases in the price of petrol, the demand continues active, but importers have not only to contend with the absence of necessary transportation facilities, but also with the embargo on the importation of bodies, which are now being made in Australia. To effect economies in ocean freights, some of the cars are fitted with Australian-made tires.

With a view to effecting economies in the upkeep of the motor transport branch of the Commonwealth Defence Department, the board of business administration at headquarters has reorganized the service, and arrangements have been completed for the introduction throughout the Commonwealth of a standard type of motor-car for defence purposes.

The Canadian made Ford car has been selected by the board as the model to be brought into general use, and contracts for about 100 cars and 30 trucks have already been placed. It is stated that the bodies for at least the majority of the cars will be manufactured in Australia in conformity with the customs regulations limiting the importation of bodies.

In deciding in favor of the Canadian car the business board is stated to have been influenced by the fact that they could obtain a comparatively cheap type of chassis, of a standard pattern, and one that could be easily repaired.

CATALOGUES and BOOKLETS

"Plymouth Products," for November, issued by the Plymouth Cordage Co. of Welland, Ont., contains several interesting illustrated articles in which various uses of the firm's goods are shown.

"'Automotive Equipment" catalogue A 19, just issued by Kinzinger, Bruce & Co. of Niagara Falls, Ontario, lists a complete line of "'Made In Canada" bumpers, jacks, pumps, and specialties for Ford cars. It contains twenty pages and is most attractively printed and illustrated.

Advance catalogue No. 9 of the Powers Manufacturing Co., Waterloo, Iowa, contains twenty pages of information regarding textile automobile products, anti-draft shields, curtain lights, cushions, fan belts, belting and fasteners, radiator and hood covers, tool rolls, water buckets, web straps and miscellaneous canvas products.

The Usona Manufacturing Company, Inc., of Toledo, Ohio and Windsor, Ont., has issued catalogue No. 8, listing an attractive line of Kwik-Lite quality flashlights. The catalogue contains thirty-one pages and lists a large number of flashlights, batteries, lamps and display cabinets. All are splendidly illustrated, many of the pages being lithographed in colors.

Skates and accessories for the Christmas trade are featured in the November issue of "Vim," published by the Canada Cycle and Motor Co., Ltd. The remainder of the issue deals largely with matters of interest to the cycle trade.

HARDWARE LETTER BOX

Wire Nail Manufacturers

In giving the list of wire nail manufacturers in Nov. 2 issue of HARDWARE AND METAL on page 51, the name of the Dominion Iron and Steel Co., Ltd., Sydney, N.S., was inadvertently omitted.—Editor.

Employees Become Shareholders in Firm of T. S. Simms & Co., Ltd.

AT the annual meeting of the directors of T. S. Simms & Co., Ltd., St. John, N.B., announcement was made to department foremen, travellers, and branch managers that they had been taken into "partnership," and each was presented with a generous allotment of fully paid-up and non-assessable shares of dividend-bearing stock in the company, according to their length of service.

The directors made it very plain that this was not in lieu of any future salary bonuses or increases that they might be entitled to, but simply—as President L. W. Simms put it—a desire that the workers for the success of the company should share in its prosperity which they had helped to create, as one big partnership, in which they were all alike interested.

The appreciation of the men was suitably acknowledged at the time of the presentation. They immediately had their photos taken as shown below.

From left to right: Upper Row, J. Kennedy, D. Moore, J. McCarthy, C. H. Ritchie, R. J. Hennesay, W. H. Swanker, F. W. Olive. Middle Row, H. B. Agnew, (London Branch), G. C. Phinney, W. L. Bevill, R. W. Pugh, V. M. Parlee, J. L. Brown, (Secretary), H. S. Bissett, D. Gauthier. Front Row, C. D. Wright, (Eastern Ontario), F. M. Baker, (Toronto Branch), R. E. Charlton, (Province of Quebec), S. D. Purdy, (Superintendent), A. L. Foster, (Treasurer), R. C. Lewis, (Sales Department), H. Champelovier, (Western Representative), L. W. Simms, (President), J. O'Brien, W. J. MacDonald, (Maritime Provinces).

MUST PAY DUTY

Before sending trade catalogues and advertising matter oversea, Canadian manufacturers—in their own interests—should first ascertain the Customs regulations imposed by the country to which the trade literature is addressed. By ignoring the regulations many costly catalogues are either destroyed by the authorities or (as an act of grace) may be returned to the addressers.

The attention of Canadian firms contemplating sending catalogues to Australia is directed to the strictly enforced regulations governing the delivery within the Commonwealth of trade literature sent through the mails, as follows:

Duty is levied on catalogues, price lists, trade circulars and all advertising matter introduced into Australia through the mails, even when forwarded in single copies addressed to individuals, provided that when the duty on the total quantity posted by the consignor by any one mail to any one state of the Commonwealth does not exceed one shilling the duty is waived.

As it has been ascertained that large numbers of valuable catalogues posted by Canadian manufacturers to Australian firms have recently been returned, undelivered, owing to the refusal of the addressees to pay duty thereon, the following manner of pre-paying the duty is again brought to the attention of interested firms:

The total weight of all of the separate pieces of matter destined for each state should be first ascertained and the duty computed at the rate of 10d. (20 cents) per pound, or 44 per cent. net on the cost, whichever rate returns the higher duty. The amount so ascertained should then be remitted by money order, to the Deputy Postmaster-General in each State—concurrently with the despatch of the catalogues—in a letter stating that it covers the duty on . . . pounds weight of printed matter posted to various addressees whose names and addresses need not be given.

Each piece of matter should have written or stamped on the outside wrapper or envelope the words, "Duty paid by remittance to the Deputy Postmaster at . . . Australia" (with the names of the addressers).

There is a Deputy Postmaster-General at the capital of each State, viz.: Melbourne, Victoria; Sydney, New South Wales; Brisbane, Queensland; Adelaide, South Australia; Perth, Western Australia; and Hobart, Tasmania.

Catalogues and advertising matter sent in bulk as ordinary cargo are also dutiable at the above rates when consigned to an Australian firm for distribution.

MERCHANTS OUST ARIZONA PLAN

Continued from page 42

Court and the decision of the lower court was reversed and Campbell was unseated.

Governor Hall called a special war session of the State Legislature to provide for war time contingencies, such as soldier voting and similar measures. Trouble followed over the naming of members. George E. Adams was named as vice-chairman, and the price tag resolution was carried in the absence of the chairman. He took an active part in having the order suspended at the recent conference.

Strong Opponent

Governor Hall has been an open and avowed political opponent of the great copper companies of the state, some of which he strongly denounced in his opening address at a special session of the Legislature. The copper companies have been as open in their opposition to him. Many of these great companies operate stores of a commercial nature at their camps and it is openly charged that the price tag plan was in some measure an attempt to embarass them as punishment for political activity.

Rustless Steel in Demand

With the cessation of hostilities the British Ministry of Munitions has agreed to set aside a quantity of rustless steel for the manufacture of cutlery, and has entrusted its distribution to the rationing authority of the cutlery trade in Sheffield. The use of rustless steel in the cutlery industry was prohibited because all chromium, an essential alloy of the material, was wanted for munitions, but as conditions of the steel industry have changed, and at present there is a surplus of chromium in the country, there will be ample steel to clear off the heavy accumulation of overseas and home orders for rustless knives.

Joint Convention of Paint and Varnish Companies

The thirteenth annual convention of the Martin-Senour Company, Limited, and first joint convention of they and the International Varnish Company, Limited, was held at the head office of the former company in Montreal, November 11th, 12th, 13th, and 14th. Salesmen and district managers from all parts of Canada were present.

Sessions opened promptly Monday by an address of welcome from Managing Director A. T. Black and were continued with enthusiasm throughout the entire convention. Adjournment was made immediately after the opening address to permit of a group photograph, after which the entire staff participated in the city's Victory parade celebration.

Monday afternoon session was opened in charge of C. F. Kendall, sales manager, and entirely devoted to the salesmen's reports, discussion of trade conditions, and expansions to take care of the increasing volume of business which is already in evidence, and which will, no doubt, continue to increase rapidly due to after-war requirements.

Tuesday was factory day. The different plants were visited, all methods of manufacture explained, new labor-saving machines demonstrated, and comparisons of different lines of manufacture made, under the supervision of the company's chemists. Adjournment was made for luncheon and the entire factory, office and sales staff were entertained in the factory dining-room, after which home talent provided a pleasant program of song and story. The afternoon session was given over exclusively to advertising and was in charge of T. Houghton, promotion manager. Many plans of new and novel publicity were discussed and approved for the coming year.

Business on Wednesday was illuminated by addresses from the different district managers. Sessions were presided over by J. H. Conover, Toronto, and W. P. Walsh, Halifax.

The annual family dinner was held in the evening at the Canada Club, and if the sessions proper of the convention were enthusiastic in character, the dinner of the Martin-Senour family was none the less successful and was attended by the sales and office staffs and a few invited guests, in all about sixty being present.

General Manager Black performed the function of toast master in a highly approved manner, as was demonstrated later in a special toast proposed by C. F. Kendall and responded to gracefully by the toast master to the hearty approval of all.

The toast list closed, the toast master made the final and awaited announcement that prizes were won during the year would be distributed. In this event the winners were: Z. E. Martin trophy and gold being awarded to W. F. Ferguson, Eastern Ontario, a close runner-up being W. L. Magee of St. John, N.B. Other winners were: H. M. Borland, Middle Western Ontario; H. O. Farrow, Western Ontario; G. Tasse, Middle Quebec; C. D. Cookson, Middle Eastern Ontario; J. E. Naud, Montreal City.

TAMPERED WITH SHELLS

Lewis Elsie, a former superintendent, and Wm. Oliver, a former inspector of the London Manufacturing and Machine Co., London. Ont., were fined $800 and $700 respectively, with the option of nine months in prison, for tampering with shells. At first they pleaded not guilty, but later changed their plea and paid their fines.

AUSTRALIANS WANT

A strong development of the present season in Canada has been the growing interest in the bicycle trade of the Dominion by distributors and dealers of Australia. Within a few weeks no less than three representatives of different bicycle business houses of Australia have visited Canadian manufacturers and jobbers.

Salesmen and district managers of the Martin Senour Company, Limited, and International Varnish Company, Limited, at Convention in Montreal.

THE CLERKS DEPARTMENT

THE THIRD GENERATION AND INVESTED PROPERTY

Some Illuminating Views and Observations Upon the Handling of Estates and the Position and Attitude of Those Who Benefit

By ROBERT GRANT,
Judge of the Probate Court, Boston; Author of Women and Property, etc.

THIS article, by one of the highest authorities on probate proceedings in the United States holds a particular interest for Canadian investors apart from the subject under treatment. Judge Grant, the author, is a son-in-law of Canada's first minister of finance, A. T. Gault. It is reprinted from *Scribners Magazine*:

I recall that some years ago, when a will had been set aside by a jury, and after long delay in the settlement of the estate the hour for division among the victors had arrived, the attorney for two of them shook his head and remarked in an undertone for my ear: "I hate to pay this over; it won't last long." A glance at his clients threw light on his solicitude; they evidently belonged to the flotsam-and-jetsam order of society. It seems they were second cousins of the testator, who had not intended them to have a nickel; but after long waiting they were to receive about four thousand dollars apiece, and were correspondingly eager. Both bench and bar were powerless to prevent the transfer, for no one can be adjudged a spendthrift in advance, and the suggestion already made by their counsel that they put at least a portion of this treasure-trove in trust had been met with a suspicious "Why should we?"

The gist of the anecdote lies in the sequel. When I next ran across the attorney who made the prediction, he threw up his hands and said: "I was short of the truth. It took them less than a week to blow in the entire eight thousand. They're penniless, and they drifted into my office yesterday to see if I couldn't recover some of it." Naturally I was horrified and shocked, unspeakably so for a moment. Then I caught myself smiling. I saw their point of view, pathetic as it was. They had merely misapplied the poetic license:

'One crowded hour of glorious life
Is worth an age without a name.'"

It was easy to picture what had happened. They had embraced their first and only opportunity to live as they imagined those with large means did live—to taste all the costly and forbidden pleasures, to squander royally and be robbed in the process. Eight thousand in less than a week; Colossal; comparing favorably with whatever the plutocrats could do; they wished to be in the running just for once to see how it would feel. *Magnifique, mais ce n'est pas la guerre.* Yet I smack sufficiently of the Old Adam to be able to sympathize with them; whereas those more deeply imbued with the new freedom—shall we say respectfully those who smack of the New Eve?—would experience nothing but distress and exclaim: "How pitiable!"

Capital and Income

The importance of not exceeding one's income is a hackneyed homily engagingly elaborated by the late Mr. Micawber, who would nevertheless have enjoyed sitting in with the gentry above referred to; but even as according to our texts we divide mankind arbitrarily into sheep and goats, fat and lean, industrious and idle, we draw a line between those who do and those who do not distinguish capital from income. The obligation so to distinguish rests on no one. In this freest of countries it is permissible to make one pot of everything—and four-fifths of us are obliged to. Perhaps the most unpopular word in the lexicon of contemporary speech is "capitalist." Every one, from the executive to the tax-collector, and from the tax-collector to the man in the street, loses no opportunity to discredit it. A cynic might have convincing grounds for the belief that a capitalist in this country is any one who possesses more than the speaker or writer. Thus a dish-washer who inherits a thousand dollars becomes one in the eyes of the less fortunate pick-and-shovel man next door. But stripped of its cant, a capitalist may be said to be any individual whose support is derived either wholly or in part from the income of investments. A reprehensible status truly, yet not without its apologists. We can all recall the example of the statesman—one of our greatest Commoners—who, after forbidding us to press down the crown of thorns upon the brow of labor or crucify mankind upon a cross of gold, felt unable to live on his salary of twelve thousand dollars as United States Secretary of State, and went on circuit with yodlers and bell-ringers in order to eke it out. And why? Because he did not wish to eat into his capital, which was said to aggregate several hundred thousand dollars. What better authority could we desire for the proposition that despite stump oratory the accumulation of wealth is not deemed un-American, even by apostles of the new freedom, some of whom are adepts at it. Our savings banks, with their huge and accumulating deposits, are the best proof that thrift is still the motto of the American people; and what would become of our churches, colleges, hospitals, and diverse eleemosynary or scientific bodies, but for the income from invested property—theirs or somebody else's?—which keeps them stable? When one reads the newspapers or talks with social reformers it is sometimes difficult to believe that the practice of laying by a penny for a rainy day has not ceased to be respectable. Perhaps we were in need of just such a fillip as the Government's tiny request for three billion dollars from the savings of the people to remind us that any human panacea based on obliterating the distinction between principal and income is likely to prove an *ignis fatuus.*

Protecting Spendthrifts

The spendthrift, as we have seen, is a person to be reckoned with and protected; likewise heirs presumptive of immature years and daughters after coverture. Such has been the theory of Anglo-Saxon civilization, from which our own is derived. At the root of the English system of primogeniture, with its ban on the sub-division of landed property lies the purpose to promote the social longevity of family trees by a sufficiency of annual income. Our ancestors, deeming a practice which tended to impoverish all except the eldest son as incompatible with justice, rejected this principle from the start. At the same time they gave sanction to most of the other Anglo-Saxon devices for keeping capital intact for the benefit (or annoyance) of the next generation. The American who wishes to tie up his property so that his beneficiaries may enjoy the income but not the principal is free to do so, provided the period of restraint before it will vest in absolute possession does not exceed (according to legal jargon) "a life or lives in being and twenty-one years." In other words, he can always prevent his children and often his grandchildren from squandering his substance after he is gone. The generation beyond this can make ducks and drakes of it if they choose, unless their own parents imitate his example and, exercising the power of appointment by will which he ordinarily throws them as a sop, start the tying-up process all over again.

What are the benefits of thus tying up property? What are its disadvantages? Does the practice inure in the long run to the welfare of the *cestui que trust* (who might better be described as the one not trusted) or does it hamper him (or her) unduly by paralyzing initiative? Is it in most cases a wise precaution or does it chiefly cater to human vanity—the ambition of the accumulator to keep his name alive and defy the native saying that between shirt-sleeves and shirt-sleeves there are only three generations? Does it conflict with the new freedom or is the tying-up process for protection of the individual a neat-handled Phyllis to the social democratic code?

In Debt and Luxury

It is pertinent to note by way of preface in this connection that the United States has gone Great Britain one better in the matter of protecting the well-to-do individual who does not see fit to pay his debts. One better or one worse, according as we choose to think. It is an axiom of American society that every tub is assumed to stand on its own bottom; and in conformity with this our tradespeople are wont to remind purchasers by a persistent

"bill rendered" that monthly or at the most trimonthly settlements are a part of our moral code. On the other hand, all who buy clothes in England are familiar with the time-honored prejudice of the English tailor against prompt payment. It violates usage; he does not understand it and, detesting innovation, regards as unsophisticated any one who offers cash. Yet, nevertheless, the policy of obliging people to settle promptly by holding over their heads a social obligation, which could be inforced at law if needs be, met in a sense with a cropper as affecting the "idle rich," when the Supreme Court of the land decided firty years ago that money given in trust for the support of a son for life could not be reached by his creditors. Moreover, the court sealed the doctrine by going out of its way to say that, whatever the English view to the contrary, this is the American policy. The learned justice who wrote the opinion, arguing that it was no new thing in any of the States of the Union to exempt from seizure on execution a debtor's tools or homestead, proceeded as that much-revered student of the law, the late John C. Gray, pointed out, to "enable the children of rich men to live in debt and luxury at the same time."

In other words, it is un-American not to pay one's honest debts, but not un-American to tie up property so that one's children's creditors cannot get at it. Our courts have taken that view, or when they have attempted to modify the discrepancy by statute the remedy has been worse than the diesease. For instance, the New York court, interpreting a statute which provided that the surplus of income given in trust beyond what is necessary for the education and support of the beneficiary shall be liable for his debts, took into account that the debtor was "a gentleman of high social standing, whose associations are chiefly with men of leisure, and who is connected with a number of clubs." Commenting on this, Mr. Gray writes in the preface of his "Restraints on Alienation": "To say that whatever money is given to a man cannot be taken by his creditors is bad enough; at any rate, however, it is law for rich and poor alike; but to say that from a sum which creditors can reach, one man, who has lived simply and plainly, can deduct but a small sum, while a large sum may be deducted by another because he is of high social standing, etc. . . . is to descend to a depth of as shameless snobbishness as any into which the justice of a country was ever plunged."

Privileges for Delinquents

Yet, as Mr. Gray goes on to say, "dirt is only matter out of place; and what is a blot on the 'scutcheon of the common law may be a jewel in the crown of the social republic." It seems to be accepted theory in our country to-day that tubs unable to stand on their own bottoms should be protected against themselves whether they be poor men forced to the wall or gilded youths with a propensity to squander. Weakness in any form appeals to the neat-handed Phyllis of democracy eager to supply "first aid to the wounded." *Laissez-faire* has given away to the doctrine that mortals must do what is good for them—what society thinks good for them. This is admirable when applied to delinquents—to the maimed, the halt, and the blind of the social order. It is of the essence of modern progress to deprive conspicuously unfit parents of the custody of their children, to segregate the feeble-minded and to take away from those who waste their substance so as to expose themselves to want the control of their affairs. On the continent of Europe, where our system of tying up estates by elaborate trusts does not obtain, the machinery for safeguarding spendthrifts is more generally efficacious than here. But if we are to justify retraints on the vigorous and the self-reliant, it must be by a different set of arguments than those which convince us where the degenerate or the helpless are concerned. Yet it is still the tendency of men of property not to take a chance; they prefer to assume that their progency will be a bad lot, and to hamper them collectively by obliging them to distinguish principal from income. Undoubtedly this is salutary for the black sheep of the family, but the point whether it is for the best interests of the other kind is perhaps debatable.

Continued in next issue.

Trade Inquiries

781. **Wire Fencing, Gates, etc.**—A London firm of engineers is open to undertake the agency of a first-class Canadian manufacturer of wire fencing, gates, etc., for the sale of which they claim an expert knowledge. A partner is at present in the United States, so could advantageously conduct negotiations.

785. **Axe Handles.**—A St. John's, Newfoundland, firm is open to purchase a carload of axe handles.

786. **Broom Stails.**—An English firm inquires for broom stails. Average length 4 feet 2 inches, diameter 1⅛-inch full. Inquirer states that there is a great demand for these at present.

787. **Aluminum Ingots.**—A Japanese firm would like to receive samples of aluminum ingots (98 per cent.). Said ingots to be of first quality.

789. **Zinc Residues, Flux Skimmings and Hard Spelter.**—A Glasgow firm wishes to hear from exporters of the above with a view to post-war business.

790. **Small Petrol Engine for Farming Purposes.**—An Airdrie firm wishes to hear from manufacturers who have the above to offer for post-war business.

791. **Zinc Ore.**—A Glasgow firm, who have imported from Canada before the war, wish to communicate with exporters with a view to post-war business.

792. **Cream Separators.**—A Scottish firm asks to be placed in communication with exporters of the above for post-war business.

793. **Small Threshing Outfits.**—An Airdrie firm asks to hear from exporters who can offer the above for post-war business.

How England Saved 40,000 Tons of Tin

Just what England is doing in the way of conserving tin may be gathered from the following figures relating to savings effected in the use of tinplate for containers through the employment of salved scrap.

Biscuit Tins—In 1913 the trade used 12,000 tons. In 1918 it has had so far 515 tons. For the rest it has to use old tins or go without.

Boot Polish—In 1913 6,000 tons were used. This year none has been allotted so far. The trade has to work up scrap tin sent back from the front in France.

Tobacco—The trade wants about 16,000 tons a year. This year none has been allotted so far for civilian trade. The trade is living on old stocks.

Domestic Tinware—For this 8,000 tons were used in 1913. At present the trade is only allotted 750 tons a quarter.

Paints, Colors and Varnish—In 1913 4,380 tons were used in this trade. So far this year it has received 400 tons.

Printing Ink.—In 1913 the trade used 237 tons. This year it has so far received 31 tons.

In these six industries alone, 40,000 tons of tinplates, or nearly seven-eighths of their total normal consumption, will be saved this year.

STATES UNABLE TO COMPETE WITH ENGLAND

It is estimated that the value of property destroyed in France amounts to $1,040,000,000 — $180,000,000 in coal mines, $500,000,000 in the iron and steel industry, and the rest in textile and other miscellaneous property. "It is only natural," says the November letter of the Alexander Hamilton Institute, "that as much of this as possible will be replaced by goods produced by French labor, and it is certain that England can supply goods in many lines more quickly and cheaply than America. If we conclude that the work of reconstruction will be spread out over a period of years and that materials will be largely supplied in Europe, it seems certain that our exports for reconstruction purposes will equal only a small fraction of the trade in war supplies which we may expect to lose during the first year of peace. The good-will created by our signal achievements in industrial construction in Europe during the war will be very helpful to American exporters in getting new business in Europe after the war, but our new advantages will redound to our benefit in the longer future more importantly than during the period of depression which will immediately follow the war."

GOOD RULES FOR RETAILERS

Don't worry; don't overbuy; don't go security.

Keep a high vitality; keep insured; keep sober; keep cool.

Stick to chosen pursuits, but not to chosen methods.

Be content with small beginnings and develop them.

Be wary of dealings with unsuccessful men.

Be cautious, but when a bargain is made, stick to it.

Keep down expenses, but don't be stingy.

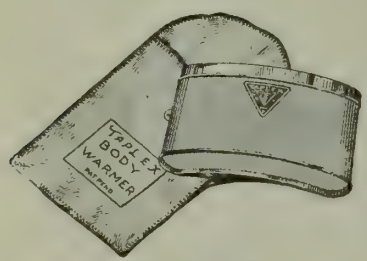
Make friends, but not favorites.

Don't take new risks to retrieve old losses.

Make plans ahead, but don't make them in cast iron.

Don't tell what you are going to do until you have done it.—*Commerce and Finance.*

The first prize of $100 for the best dressed window of a patriotic nature in the recent campaign in Montreal for Victory Loan subscriptions was won by Almy's departmental store. The second prize of $50 was awarded Dupuis Freres, who also conducts a departmental store.



NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

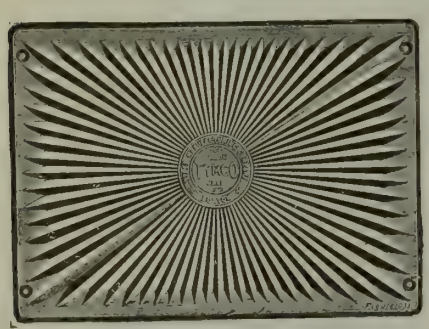
BODY WARMER

The Great West Electric Co., of Winnipeg, has been appointed agent for Taplex warmers. These warmers, it is stated, are suitable for use at home, at camp, in an auto boat or train, and may be used for the alleviation of pain or for warming feet, hands or body.

Taplex warmers are made in various sizes for different uses. One style may

Body Warmer

be carried in the pocket for warming the hands, another may be placed against any part of the body. Another style is designed for foot warming in autos, etc.



Taplex warmers, it is stated, give out heat steadily for hours, without attention of any kind.

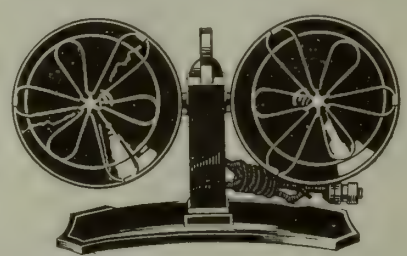
The fuel used, it is stated, is especially compounded to burn in a closed container without flame, odor or smoke and, it is claimed, may be safely used in closed rooms, in beds, and similar places.

AUTO STEP PLATE

The Tyler Manufacturing Co., 6. Pearl St., Boston, is putting on the market a new step plate known as Type C.

The difficulty with many step plates in the past has been, it is stated, that they were either not grooved deep

Step Plate



enough to accomplish the purpose intended of cleaning the boots, or they were too frail to stand the wear. The upstanding ribs on many patterns become broken from the plate after a moderate amount of use.

The design of the surface to the new style plate is such that, it is stated, there is no chance to tear away any portion of the ribbed surface, yet the grooves, it is claimed, are sharp cleaning surfaces and the clearance spaces are ample to take care of the mud that is so removed.

ELECTRIC HEATER

The "American Beauty" twin radiant electric heater is equipped with two heating elements and two reflectors, thus making it, it is claimed, virtually two heaters in one. The reflectors are adjustable, permitting the heat to be thrown in any desired direction or in two different directions at the same time. The heating elements, it is stated, are readily removable, also the wire guards which protect them. The reflectors also are removable, making it possible, it is stated, to keep the heater in the most efficient condition by keeping all parts of it clean and free from dust. These features, it is claimed, are exclusive with this heater.

This heater, which is manufactured by the American Electrical Heater Company

Twin Heater

of Detroit, is particularly adapted, it is stated, for use in the fall and spring when the furnace fire is out of commission.

It comes fully equipped with an eight foot cord, detachable plug and lamp socket attachment, plug ready for attaching to any ordinary lamp socket. The wattage of each heating element is 330, making a total wattage for the heater of 660 watts.

METAL HOT WATER BOTTLE

A new hot water bottle known as "New Era" has been placed on the Canadian market. The maker's claims state that this bottle is always dependable; cannot leak or burst, and that it can be safely filled with boiling water, which will continue to give out heat long after a rubber bottle would have become cold. It is further stated to be useful as a foot warmer for the bed or auto, or for invalids' use outdoors. For ordinary use a cup of boiling water is sufficient, the maker states, and that this will keep the bottle heated for a long time. The manufacturers are the Metal Specialties Co., Attleboro', Mass., and the Canadian selling agents Richardson and Bureau, 55 St. Francois Xavier street, Montreal.

Metal Water Bottle

FOOT REST

The G. A. C. Comfort foot rest is manufactured by the Royal Canadian Specialties (Hamilton Whip Company), 119-123 St. Marys street, Hamilton, Ont. The claim is made that it does away with leg weariness caused by keeping one's foot in a strained position on the accelerator. The Comfort foot rest, it is stated, keeps the foot in an easy, comfortable position and cuts down gas consumption by preventing constant lunges on the accelerator which wastes fuel and floods the accelerator. With the Comfort foot rest it is claimed, even, steady control is possible over the roughest roads. The rest it is stated is made of nickel steel and is easy to instal.

Comfort Foot Rest

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

A REDUCTION in the warehouse price of plate has been made in some quarters amounting to 2c per pound. The range of quotations has narrowed on galvanized sheets, some jobbers naming prices about 1c per pound lower than those effective for some time past. This is not the result of a direct improvement in the sheet situation, but in an effort to adjust prices to a level which cannot be termed fictitious.

The same conditions may be said to apply in regard to boiler tubes, a decline amounting to about 10 per cent. now being worked out. The market is practically bare of supplies.

Higher prices are again in evidence this week on turpentine, the advance this time amounting to five cents per gallon. Primary points show a continually strengthening market, and whereas there is an unloading of stocks by some interests, this is not having any bearish effect on prices. Even higher levels seem quite within the realm of probability.

Ingots show some declines, this being particularly noticeable in antimony, which is down a further 3c per pound. Peace time use of this metal is limited, and even lower levels are quite likely to be reached. Tin is down 5c in some quarters. Stocks are considered light and licenses are just as hard to get as ever. No marked change in conditions is looked for prior to the end of the year.

Manufactured goods generally show a firmer tone. This is noticeable in a sharp advance this week in sandpaper and emery cloth, which have gone up about 20 per cent. Drive well points are up 20 per cent., and an advance of $1.50 per dozen in Humpty Dumpty egg crates has been recorded.

Another line of oil heaters has reached higher levels this week; this amounts to 50c each, and on the present basis orders are being accepted for delivery up to March 1. Zinc fruit jar rings are up 10 per cent., and one line of phonographs is now priced at a figure $2 higher than that formerly in effect, approximating a 25 per cent. advance.

Many lines of auto accessories are under revision this week, the tendency being upward. Skis, petroleum faucets, roofing, building paper, cocoa door mats, compression bibbs, stop cocks and bed casters are other lines to reach higher levels. Business is very good, and the outlook for spring seems promising. Manufacturers expect to experience difficulty in supplying requirements of the trade for some few months, and this may be a factor in maintaining a comparatively high level of prices. In some quarters, however, a slight shading of prices is noticeable, and this condition may prevail until some clearer conception of probable developments is possible.

MONTREAL MARKETS

MONTREAL, Nov. 21.—Hardware markets show that several advances were made during the week. Weakness has developed into declines on antimony and spelter, while tin is also offered at a lower price. Competing grades of lead and casting copper have also been offered for less.

The week's advances include those for various auto equipment, sandpaper, handles, moulding nails in packages, horse whips, and casters. Egg crates and scythe stones are also higher, while a revision in roofing and building papers is reported. Other lines on which changes to higher levels have been made are stop cocks, compression bibbs and saw sets.

Wares and shovels, spades, scoops and steel plate lines of goods are scarce, and indications seem to be that present prices shall be in effect for some months to come.

Enamels; Foot Scrapers; Non-freeze Liquids

Montreal.

ENAMELS, FOOT SCRAPERS.—Prices on short tire lever black enamel are out, this size being quoted at 13½c trade; 13c in lots of 12, and 12c in 4-doz. lots. Discounts applying are, respectively, 25 per cent., 30 per cent., and 35 per cent., to the trade. National foot scrapers to attach to the running board of cars are priced at 57c each in single lots, 53c where 6 are taken, and at 49c in 2-doz. lots, usual discounts applying. Alcohol non-freezing liquid of Adelite make is selling at $2.80 per gallon in gallon tins, and in 5-gallon cans at $2.72 per gallon.

New Type Horn Button; Assemblies; Carburetors

Montreal.

HORN BUTTONS, CARBURETORS.—Among accessories, on which prices are announced, is that of New Type horn buttons. The trade price is 83c each; dozen lots 77c each, and 4-doz. lots 72c each; regular discounts of 25 per cent., 30 per cent., and 35 per cent. applying, respectively. Pan and hub assemblies for Ford cars are announced at $1.35 each to the trade with a discount of 25 per cent. Prices on Kingston carburetors are advanced, the ¾-inch size being raised from $9 to $9.63; 1-inch from $9.63 to $10.83; 1¼-inch from $10.17 to $12, and 1½-inch from $12.47 to $13.17.

Prices Given on Plugs, Pins, Gears, Etc.

Montreal.

PLUGS, PINS, GEARS.—"Jiffy" Ford ratchet crank pins are selling here at 37½c to the trade, or in lots of 25 at 35c. Splitdorf plugs in the various styles and in numbers 2, 4, 6, 7, 5, 3, 1, 8, 9 and 10, are priced to the trade at 80c each, or in lots of 100 at 75c each, and carry a resale price of $1.25. Drive gear for Ford cars No. 2518, are priced at $3.90, with a discount applying of 25 per cent. Holton hood clips for Chevrolet and Briscoe makes of cars, in black enamel finish, are selling at $1.60 per set where 25 sets are taken, or singly, at $1.80 per set. These are meant to resell to the consumer at $2.40 per set.

Electric Tail Lamps Assemblies; Rings Priced

Montreal.

TAIL LAMPS, PISTON RINGS.—No. 49 electric tail lamps are now priced to the trade at $2.55 each. Lower prices may be had when quantities are specified, and the resale price is $3.40 net. Front hub assemblies No. 2803C are priced at $2.25 each, with 25 per cent. discount, and the same discount applies to Standard piston rings for Ford cars, the price of these to the trade being 12c each.

Moulding Nails Up; Whips; Egg Crates

Montreal.

MOULDING NAILS, EGG CRATES.—A change is made effective in the differential for moulding nails sold in one pound packages. This has been based as a net extra of 1¾c per package, and is now advanced to 2¼c. Horse whips are higher, the advance on these totals about 10 per cent. Humpty Dumpty egg crates are up. The present price quoted is $6.60 per doz.

Handles, Sandpaper, Scythe Stones Up

Montreal.

SANDPAPER, STONES, HANDLES.—Advanced prices for sandpaper make new high levels for this line. Some are selling as high as 45 per cent. on the list. All kinds of handles are again advanced in price, the increase totalling about 5 per cent. Scythe stones are about 10 per cent. higher, some prices on this line being as follows: Quickcut, per gross, $13.20; Green Mountain, $8.80; Bay Chaleur, $8.80; No. 1 Pike's, $11; No. 2 Pike's, $6.60, and Canada Red End, $6.60.

Roofing, Papers Are Revised

Montreal.

ROOFING AND PAPERS.—Prices have been altered this week in the price of roofing and various building papers. No. 1 dry is selling at $1.10 per roll; No. 2 at 62c. The same respective grades in tarred are quoted at $1.25 and 77c per roll. Ready roofing, 2-ply, is selling at $1.20 per square, and 3-ply at $1.40. Extra dry sheathing is worth $3.05 per 100 pounds, while tarred sheathing is $3.20. Carpet felt is $3.70. Gas pitch is $1 per 100 pounds; shingle varnish $7.50 per barrel.

MARKET BRIEFS

Lower levels on steel plate are recorded in some quarters this week, prices named being $8 per 100 pounds.

* * *

Boiler tube prices are being adjusted to a level 10 per cent. below present schedule of prices. This is not due to any improvement in stocks, the market being practically bare of supplies, but in an effort to get away from fictitious values represented by recent quotations.

* * *

Antimony is down 3c in Toronto, and tin is 5c per pound lower in some quarters. Even lower levels are thought probable on antimony, but other metals are not expected to change materially before the end of the year.

* * *

Turpentine is again soaring, the week's advance being 5c per gallon. This is a direct reflection of conditions at primary points, and lower levels are not looked for.

* * *

Montreal reports linseed oil higher and adjustments in Toronto markets have been made to a higher basis. Flax seed remains high, futures showing an advance for the week which may have a bearing on situation for next couple of months.

* * *

Sandpaper and emery cloth have climbed upward at a rapid rate, this week's advances amounting to about 20 per cent.

Stop Cocks, Saw Sets, Casters Revised

Montreal.

STOP COCKS, SAW SETS, CASTERS.—Stop cocks with waste are selling here in one quarter at 47 per cent. off list. Compression bibbs are continued at 45 per cent. Perfect saw sets are revised, and the No. 1 are priced at $10.50 per dozen, and the No. 3 at $12.25. Gem casters are higher, the present prices being as follows: Nos. 351 to 356, per set, 36c; No. 451 to 456, per set, 40c; No. 651 to 656, per set, 47c; No. 751, 51c; No. 851, 76c, and No. 951, 85c. Cut lace leather has also firmed up somewhat.

Rope Basis Held; Little Doing

Montreal.

ROPE AND CORDAGE.—There has been little movement in these lines this week and the makers report just a fair amount of orders from without. It is not a selling period, and makers are looking forward to the new year with confidence. Soft fibres and jutes are still very strong, and the position of hemp is steady here. British manila rope is based still at 33c per pound; pure manila at 39c, and sisal at 27½c.

Steady Gasoline and Coal Oil Markets

Montreal.

GASOLINE, COAL OIL.—Markets are steady and firm, the basis being unchanged with motor grade gasoline on the basis of 34c per gallon. Royalite coal oil is 19c; Palacine and Electroline 22c, and for the latter line the demand in the country has developed considerably.

Stoves Hold Firm; Wares Will Hold

Montreal.

STOVES AND WARES.—Stoves have ruled steadily all season, and the trade has been reasonably satisfactory. This is the case as far as heaters are concerned, in any case. Values still are maintained on an unchanged and firm basis, material for making not being available in any larger quantities than heretofore. The announcement is made that there will be no lower prices on various wares for some months yet. There is a scarcity of material that cannot be overtaken for a considerable period.

Nail Prices Steady; Unchanged

Montreal.

NAILS AND WIRE.—There is really little new to report, a routine demand existing and supplies being fair to take care of this business. The base price remains at $5.50 per keg on standard wire nails and at $5.85 for cut. Smooth steel wire sales are light and the base is still $6.25 per 100 pounds.

Lead Products Lag; Little Sale

Montreal.

LEAD PRODUCTS.—Little sale exists for lead products and the tendency is somewhat of an easing nature. It is not improbable that some of the prices will be slightly revised, though this is likely to be gradual. The base price on lead is still unchanged, but some free lead has found its way into the New York market and is there selling at a somewhat lower figure than standard grade.

Lead pipe, lb.	$0 15	$....
Lead waste pipe, lb.	0 16	....
Lead traps and bends	Net list.	
Lead wool, lb.	0 15½	0 16

Solder wire (8 gauge)—		
40-60		0 58
45-55		0 57½
Zinc sheets, casks		....
Do., broken lots		....

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Iron Bars and Steel Steady and Firm

Montreal.

STEEL AND IRON.—The market rules without change of any kind. The attitude in some quarters is that of a

waiting one, although some of the indications point to a maintenance of values for an indefinite period.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00

Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Sheets All Held Without Change

Montreal.

SHEETS AND PLATES.—There is no new feature this week and the trade in these commodities has been a little on the quiet side, and orders are confined to immediate needs. There is some hope that improvement of delivery may be accelerated within a few months, and the trade may look for better things by spring. In the meantime, however, there is little encouragement for a lowering of values existing to-day.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$9 75	$11 50
12 gauge	9 65	11 00
14 gauge	9 00	8 20

18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Old Materials Quiet; Values Easier

Montreal.

OLD MATERIAL.—While there is no actual change this week in the buying prices of dealers, the tendency is an easier one and lower prices may be looked for. The movement has declined materially and there is less business than usual.

Dealers' Buying Prices:

Automobile tires	0 04¾	0 05

Tin, Antimony, Spelter On Easier Basis

Montreal.

INGOT METALS.—The markets are weaker for antimony. Copper, due to a freer offering of some grades, may be had at a little better price. Competing lead has also been offered for less money.

COPPER.—Some casting grade copper has been offered for less money, indicating a desire to sell on the part of some operators. Prices here are unchanged at 30c to 31c per pound.

TIN.—The cable service between here and Great Britain has been very intermittent for the past ten days, and the position on ingot tin is therefore somewhat undefined. This is offered for less, 86c per pound being the low price ruling.

SPELTER.—An easier feeling in this commodity has developed and quotations are made at 10½c per pound.

LEAD.—Some lead has been brought in from the Mexican producer and is being offered at a better price in New York. At the same time there is no change in the local price, which remains at 10½c to 11 per pound.

ANTIMONY.—This has developed a much weaker feeling, with sales made here at 12c per pound. It may go lower still.

ALUMINUM.—There is nothing new and the market is featureless. Price here remains at 48c to 50c per pound.

TORONTO MARKETS

TORONTO, Nov. 21.—Higher prices generally have been the order of the day in the markets this week. A sharp advance has been made in sand paper, egg crates, drive well points and phonographs. Another line of oil heaters is added to the list of lines to go higher along with jar rings, petroleum faucets and skis. Prices on sheets have been revised to slightly lower levels in some quarters and plates are also down 2c per pound. Fuel oil is 1c lower.

Trade generally is in a pretty healthy condition and the outlook for business seems good. Manufacturers intimate that goods will be scarce and hard to get for another six months.

Sand Paper in Sharp Advance

Toronto.

SAND PAPER, EMERY CLOTH.—A very sharp advance has occurred in sand paper and emery cloth. This is in line with information given out in HARDWARE AND METAL last week, which predicted that prices would reach higher levels. The B and A sand paper, flint, is now selling at an advance of 25 per cent. on list; Star sand paper is also quoted at 25 per cent. advance on list; and Emery cloth takes the same advance, being quoted at 25 per cent. advance on list. New net prices have been figured out; the B and A sand paper, No. 00 and No. 0 being quoted at $7.75 per ream; No. ½, $8.20; No. 1, $9.25; No. 1½, $10.80; No. 2, $12.50; No. 2½, $14.40, and No. 3, $16.40. On the next grade sand paper No. 00 and No. 0 are quoted at $7.00 per ream; No. ½, $7.45; No. 1, $8.35; No. 1½, $9.45; No. 2, $10.70; No. 2½, $12.00, and No. 3, $13.60. B and A Emery cloth, Crocus, is now quoted at $2.25 per quire for No. 00 and No. 0; No. ½ is now $2.30; No. 1, $2.40; No. 1½, $2.50; No. 2, $2.70; No. 2½, $2.90, and No. 3, $3.10.

Egg Crates Up; Jar Rings Too

Toronto.

EGG CRATES, JAR RINGS.—A sharp advance has occurred in Humpty Dumpty egg crates, this line advancing from $4.75 to $6.25 per dozen.

Higher levels have also been reached in the zinc fruit jar rings, which are now quoted for next season's delivery at 40 cents per dozen net. This represents an advance of 10 per cent. over levels formerly ruling.

Phonographs Make Sharp Advance

Toronto.

PHONOGRAPHS.—A sharp advance has been made in at least one line of phonographs, the Stewart now being quoted at $9.75 each, which represents an advance of $2.00. Manufacturers intimate that conditions in regard to getting raw material have been so uncertain and production costs have mounted to such high levels that this move was found necessary.

Petroleum Faucets Up; Well Points Up 20%

Toronto.

FAUCETS, WELL POINTS.—A revision in the price of Petroleum faucets has been made, and the present basis of quotations represents an advance over former levels. The ⅝-inch are now quoted at $8.10 per dozen; ¾-inch at $9.45; 1-inch at $10.80.

Drive Well points have advanced about 20 per cent. The increasing cost of raw material and higher levels reached in production costs are considered factors which have brought this about.

Skis Revised; Trap Prices Out

Toronto.

SKIS, TRAPS.—New prices have been named on skis for the present season and these provide for a slight revision and that is upwards. Pine, 5 foot, are now selling at $2.45 per pair; 6 foot at $3.00, and 7 foot at $3.50. Maple, mahogany finish, 6 foot are quoted at $5.40 per pair; 6½ foot, $6.00; 7 foot, $6.50; Ash, mahogany finish, 7 fot, $8.25 per pair, and 7½ foot, $8.70.

Advices in last week's issue were to the effect that mouse traps and rat traps had advanced. At that time net prices were not available, but these are now worked out, the Hold Fast mouse trap now being quoted 35 cents per dozen, and the Hold Fast rat trap at $1.65; the Out-of-Sight mouse trap is now 90 cents per dozen, and the Out-of-Sight rat trap, $1.65; the Wood Choker 4-hole mouse trap is quoted at $1.50 per dozen.

Oil Heaters Go To Higher Levels

Toronto.

OIL HEATERS.—An advance of 50c each, amounting to about 10 per cent., has been made in McClary oil heaters for next season, but immediately effective. On the new basis the nickel plated heater will be quoted at $4.75 each, and the enameled heater at $5.50 each. Orders are being accepted for delivery up to March 1 on this basis.

Trade in Stoves Quiet; Wares Steady

Toronto.

STOVES, WARES.—The bulk of business on stoves has been handled and only a little sorting is now being indulged in. The trade are watching details very carefully and hopes are expressed that some relief in the matter of supplies may materialize in the next three months or so.

Business on enamel and other wares is quite active. Dealers who have held back owing to epidemic of sickness and efforts in Victory Loan are now replacing stocks as far as possible, though manufacturers still report a scarcity of materials which may not improve to any great extent for some months.

Cordage Trade Inactive, Waiting

Toronto.

CORDAGE, TWINES. — There have been no new developments in the situation as it affects cordage. Prices have held steady and at present there is no indication of any lower figures prevailing. Adjustments which may be made to lower levels will it is thought be brought about slowly and without great disturbance to the trade. Quotations rule without change as follows: Pure manila, 39c per pound base; British manila, 33c; sisal, 27½c.

Nails Move Slowly; Wire Steady

Toronto.

NAILS, WIRE.—There has been no great movement of nails reported, trade being quiet but this is a seasonable condition. Prices are fairly well maintained though some shading of values is reported. In one or two cases some retailers have been known to buy at lower prices than basis generally prevailing, which for wire nails is $5.50 per 100 pounds. Cut nails are steady at $5.85.

Smooth steel wire follows a comparatively narrow range of trading and base price shows no change at $6.25 per 100 pounds.

Fuel Oil Down 1c; Gasoline Steady

Toronto.

OILS, GASOLINE.—A decline in the price of fuel oil has occurred this week amounting to 1c per gallon. The net price on barels is now 12½c per gallon, and in tank cars 11c per gallon.

Coal oil is firm and unchanged during the week at 18½ to 21½c per gallon according to grade. Sales are heavy and no let up in the demand is expected. Gasoline is steady and ruling at the unchanged basis of 33c per gallon, with quite an active demand in evidence.

Bars Unchanged Movement Light

Toronto.

IRON AND STEEL.—Bars are selling for immediate use and movement consequently is rather limited. Prices have held without change during the week at the following levels:

TORONTO—	Per 100 lbs.
Common bar iron	$ 5 25
Common bar steel	5 50
Refined iron	5 65
Angle base	5 75
Horseshoe iron	5 50
Tire steel	5 70
Mild steel	5 50
Norway iron	11 00 13 00
Toe caulk steel	6 25
Sleigh shoe steel	5 50
Band steel, No. 10	5 75
Do., No. 12	6 00
Spring steel	9 50 11 50
Mining drill steel	19 00 30 00
Sheet cast steel	0 42 0 45
Tool steel	0 20 0 42

Plate is Lower; Sheets May Come

Toronto.

SHEETS, PLATES. — One Toronto warehouse is now quoting $8 on plate. That is a direct cut of 2 cents per pound, as $10 has been the prevailing price for a number of weeks now. This move was not due to any great improvement in the purchasing conditions, but rather was it the outcome of a desire on the part of the trade to get below the $10 price for plate, which it is indicated, has been more or less of a fictitious value for some time past. It is understood that the War Trade Board in the United States are permitting mills to ship steel to Canada without permits any time prior to December 1. It is thought the mills may have some supplies made up for the Canadian trade for which permits had not been granted, and this measure may possibly afford some relief in the matter of supplies as shipments can be made at once. Whether extension of this time will be granted is a debatable point as yet. The announcement on Tuesday of this week that the War Industries Board had discarded the preference list means that war industries are placed on the same basis in regard to getting materials as other manufacturers. It is also reported that the tonnage of steel for agricultural industries will be materially increased. The range of galvanized sheets has narrowed somewhat and an $11.00 basis is generally existent this week.

BLACK SHEETS—	Per 100 lbs.
10 gauge	$10 00
12 gauge	$9 60- 10 00
14 gauge	8 40- 8 90
16 gauge	8 50- 8 55
18-20 gauge	8 05 8 30- 8 80
22-24 gauge	8 10 8 35- 8 85
26 gauge	8 15 8 40- 8 90
28 gauge	8 25 8 50- 9 00
3/16-inch plate	$8 00
¼-inch boiler plate	8 00

Prices shown are for full cases. An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

16	9 95	10 95
14 gauge	9 85	10 85

Prices shown are for full cases An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Situation Unchanged in Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—There is apparently nothing new to report in the situation on corrugated sheets or manufactured sheet metals. There is a fair amount of business passing, but the trade shows a tendency to wait and see what may develop. Prices rule without change at following levels:

TORONTO—	Per 100 Sq. Feet	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Boiler Tubes Decline About 10%

Toronto.

WROUGHT PIPE, BOILER TUBES. —Lower prices are being worked out on boiler tubes, which will provide for a decline approximately 10 per cent. Figures are not yet available. This is not due to any improvement in the matter of supplies, in fact the situation in regard to stock is even worse, the market being bare of tubes. However, the feeling prevails that lower prices are in order, although indications are that it will take some months before stocks are back anywhere near a normal basis.

There has been no change made in wrought pipe this week. The market has held steady and no immediate revisions of prices are looked for.

	Per 100 feet	
Toronto—	Cold drawn	Lapweld

3½ inch	77 00	60 00
4 inch	90 00	75 00

Prices shown under revision downward.

Solder Holds Unchanged; Lead Products

Toronto.

ZINC AND LEAD PRODUCTS.—A little easier feeling is reported in tin in

some quarters, but as yet this has had no similar effect on solder. The situation as regards solder seems fairly stable and no marked changes are expected prior to the end of the year. From then on any adjustment made will, it is thought, be more gradual than the result of a slump.

Lead products are steady and manufacturers are hoping there will be some lead released for commercial purposes. No acute shortage has been reported, but rations have been pretty slim. Prices on the manufactured products rule without change.

Lead pipe, lb.		0 15
Lead waste pipe, lb.	....	0 16
Lead traps and bends	....	Net-list

Antimony Lower; Metals Quiet

Toronto.

INGOT METALS.—The only marked change in ingot metals this week is that applying to antimony. More than any other is this metal influenced by war business. Copper is steady and tin holds firm. Indications seem to point to a maintenance of present basis of quotations until end of the year at least.

COPPER.—The price established will stand at least until January 1. There is no marked improvement in supplies commercially, and none looked for for some time to come. Quotations nominally hold around 30 to 32c per pound, with little trading in progress.

TIN.—Stocks are considered light and it is as yet no easier to secure licenses. There is no material change in the situation and outlook seems to be for a fairly steady market, though quotations as low as 85c and ranging up to 95c per pound are made.

SPELTER.—No new developments are recorded in this metal. The demand is principally for spot delivery, the idea begin that the future can take care of itself. No revision of prices has been made, 11c per pound being ruling quotation.

LEAD.—Production continues to go to essential consumers and there is as yet no relief commercially in lead. Sales are within rather narrow limits and prices hold nominally around 10½ to 11c per pound.

ALUMINUM.—Supplies have not yet been diverted to commercial uses and there is consequently little to say about this metal. Price holds nominally at unchanged basis of 50c per pound.

ANTIMONY.—A sharp decline has been made in this metal amounting to 3c per pound. It is indicated that use of this metal in times of peace is limited whereas war demands fall quite heavily with a resulting high price. To-day's price is 12c to 14c per pound, and further recessions may occur.

PIG IRON.—The shortage of pig iron is greater than that of steel and this has a tendency to stabilize the market. The trade generally is adopting a waiting attitude with regard to new business, but furnaces are pretty well sold up for first six months of 1919 already. There is little expectation that there will be a material decline in iron as maintenance of steel production on the current basis seems quite probable.

LONDON MARKETS

LONDON, Ont., Nov. 21.—Higher prices still continue to prevail, the markets during the week showing an upward trend in each item. Turpentine has advanced still further and now prices are out on socket wrench sets, bed casters, sliding shoes, and crumb sweepers. Quotations just issued on cocoa door mats, brass compression bibbs, stop and waste cocks, and valves show that all have followed the upward trend.

Seasonable goods are moving very freely and there has been no apparent let-up in the demand for oil heaters, axes, crosscut saws, bucksaws, horse blankets, lantern and axe handles. The outlook for the balance of the year is quite satisfactory.

Socket Wrench Sets Higher; Nails Steady

London, Ont.

WRENCH SETS, NAILS.—New prices have just been issued this week on the Mossberg Socket wrench sets. These are higher than former figures, the No. 13 now selling at $4.00 per set, the No. 14 at $13.25.

The situation in regard to wire nails is unchanged, prices are maintained on a steady basis, the wire nails selling at $5.50 per 100 pounds base, and the cut nails selling at $5.85.

Bed Casters Up; Sliding Shoes, Too

London, Ont.

CASTERS, SLIDING SHOES.—Higher prices are again in evidence on the Giant bed casters, the present basis of quotations for these being 15 cents per set.

A new discount has been named on the Onward sliding shoes. This provides for an advance in the net price of this line. The present selling discount is 20 per cent. from list.

Cow Ties Active; Game Traps Sell

London, Ont.

COW TIES, GAME TRAPS.—Sales of cow ties have been very good and there is no indication of any change in the price which remains at 10 per cent. discount from list. Stall fixtures are also moving quite freely, the price on these is unchanged, the Hollow still being quoted at $1.40 per dozen.

The movement of game traps has been quite satisfactory. Prices are holding firm at levels recently established, and it is thought that this basis will be maintained for some little time. Quotations on some of the more familiar types and numbers are given herewith: Victor, with chain, No. 0, $2.25 dozen; No. 1, $2.60; No. 1½, $3.90; No. 2, $5.45. O'Neida jump, with chain: No 0, $2.95 dozen; No. 1, $3.50; No. 1½, $5.20; No. 2, $7.60.

Glass Rules Strong; Putty Moving

London, Ont.

GLASS, PUTTY. — The situation in window glass is one of continued strength. There has been no change recorded during the week, the single and double diamond both being quoted at 25 per cent. discount from list in full box lots. Cut lights are quoted at 10 per cent. discount from list.

Putty is enjoying a very good sale. Prices remain firm, the Standard in 100 pound drums selling at $6.75 per 100 pounds, and in 25 lb. drums at $7.00. Pure putty is $2.00 per 100 pounds more than prices shown on the Standard.

New Discounts on Bibbs, Cocks, Valves; Higher

London, Ont.

COMPRESSION BIBBS, VALVES.—

New discounts have been named on the brass compression bibbs, net prices now being arrived at from a discount of 45 per cent. from list; this provides for an advance. The same discount of 45 per cent. applies to stop cocks and stop and waste cocks. This provides for an advance in this line also. Quotations now being named on the Standard globe, check and angle valves have also gone to higher levels, the present discount being 15 per cent. from list. Jenkins' Pattern globe, check and angle valves are also higher, now being quoted at 10 per cent. discount from list.

Door Mats Advance; Mitts Selling

London, Ont.

DOOR MATS, MITTS, GLOVES.—Higher prices are in evidence this week on cocoa door mats. It has been some time since any change was made in this line, but the tendency right along has been upward. There is no exception in this case, and the new prices which are now being named to the trade are for the No. 1, 14 by 24 inches, $1.05 each; No. 2, 16 by 27 inches, $1.40; No. 3, 18 by 30 inches, $1.75.

A very good sale of mitts and gloves is reported. This line has held firm and without change, the muleskin mitts with one finger selling at $4.50 per dozen pairs, and the muleskin gloves at $4.75 per dozen pairs.

Turpentine Still Higher; Linseed Oil Firm

London, Ont.

TURPENTINE, LINSEED OIL.—A further advance has occurred this week in turpentine. This amounts in this instance to 5 cents per gallon. Conditions at primary points remain very firm and the market there has continued to advance since last week. These conditions are bound to be reflected in the situation locally, and it is indicated that prices may still go higher. Prices to-day are in 1 barrel lots, $1.20 per Imp. gal.; 2 to 4 barrel lots, $1.19; 5 gal. lots, $1.30.

Linseed oil is ruling with a very firm undertone. The seed market has shown increasing strength since last week and seems to be on a fairly steady basis. This being the case, it would not come as any great surprise to see prices revised to higher levels. There has been no change this week from advance provided for and noted in last issue. Quotations are being made on the following basis:

	Raw per gallon	Boiled per gallon
1 to 2 barrels.....	$1.87	$1.90
3 to 5	1.86	1.89
6 to 9 ,, ...	1.84	1.87

Less bbls. add 10 cents gal.

WINNIPEG MARKETS

WINNIPEG, Nov. 21.—Prices on all lines of hardware are holding very firm, as is shown by the price changes for the week, all lines registering advances. Such items as expansive bits, post-hole augers, hand, rip and panel saws, vises, faucets and molasses gates are included in the list to go skyward. Baseball bats, turpentine, pipe cutters and door springs have also followed the upward trend.

Winnipeg, as well as a great many towns in Western Canada, is still in the grip of the epidemic, preventing the travellers from making their regular trips, and this has seriously affected many lines of business, trade in general being fairly quiet.

Post Hole Augers Revised Upwards

Winnipeg.

POST HOLE AUGERS. — Vaughan post hole augers have undergone a further revision during the week, moving up to higher levels and are now quoted at the following figures: 5 inch, $13.80; 6 inch, $14.55; 7 inch, $16.40 per dozen.

Base Ball Bats Are Higher

Winnipeg.

BASEBALL BATS. — Following the recent advances in other lines of sporting goods, new prices have been issued covering baseball bats for next year. These show increases over former quotations. Prices now ruling are as follows:

Base Ball Bats—No. 02, $2.35; No. 4, $3.60; No. 11B, $5.75; No. 12, $5.75; No. 15, $11.00; No. 40K, $20.00; No. 40TC, $16.00; No. 40TC Jr., $6.00; No. 40W, $16.00; No. 40FB, $16.00; No. 40EC, $16.00; No. 40HG, $16.00; No. 40L, $16.00; No. 40D, $16.00; No. 40JD, $16.00; No. 40 Tapered, $15.00; No. 40, Burnished, $15.00 per dozen.

Expansive Bits Up Five Per Cent.

Winnipeg.

EXPANSIVE BITS.—New prices have just been announced on expansive bits, due to further increased costs. To-day's prices show an advance of approximately 5 per cent. over former quotations. Prices now ruling are as follows: No. 72, $17.10 dozen; No. 71, $24.70 dozen.

Revised Prices Issued on Saws

Winnipeg.

SAWS.—Due, it is said, to the increased prices of high grade materials entering into the manufacture of saws, new prices have just been issued covering panel, hand and rip saws which show an increase of from 5 to 7½ per cent. Prices at which these are now selling are as follows:

Hand Saws—No. D20 x 26-inch, $42.00; No. D8 x 26-inch, $37.60; No. 12 x 26-inch, $49.00; No. 120 x 26-inch, $56.00 per dozen.

Rip Saws — No. D8 x 26-inch, $37.60; 28-inch, $43.00; No. 12 x 26-inch, $49.00.

Panel Saws—No. D8 x 18-inch, $28.00; 20-inch, $30.50; 22-inch, $33.25; 24-inch, $36.00 per dozen.

Vises Change, Are Higher

Winnipeg.

VISES.—Prices on Bonney vises which have held firm for some time, again show a slight advance. This, it is intimated, is due to increasing cost of raw materials and higher freight rates. New prices now effective are as follows: No. 1, $6.85; No. 2, $11.40; No. 3½, $14.80; No. 4, $27.35; No. 5, $34.20; No. 3, $20.50; No. 7, $39.90 per dozen in sets, No. B2, $18.50 per set.

Faucets and Gates Up 5 to 10%

Winnipeg.

FAUCETS, GATES. — Further advances of from 5 to 10 per cent. have just been announced by the manufacturers of Perfection faucets and molasses gates which become effective at once. To-day's selling prices are as given below:

Perfection Faucets—

Wood thread, ¾-inch, $12.25; 1-inch, $14.00; 1¼-inch, $16.20; 1½-inch, $19.25; 2-inch, $26.25 per dozen.

Pipe thread—¾-in., $13.45; 1-in., $15.40; 1¼-in., $17.80; 1½-inch, $21.15; 2-inch, $28.85 per dozen.

Petroleum Faucets—

Wood thread—½-inch, $9.60; ⅝-inch, $11.35; ¾-inch, $14.00; 1-inch, $20.10 per dozen.

Pipe thread—½-inch, $10.50; ⅝-inch, $12.25; ¾-inch, $14.85; 1-inch, $21.00 per dozen.

Stebbin's Molasses Gates—No. 1, $5.25; No. 2, $6.00; No. 3, $6.75; No. 4, $7.50; No. 5, $9.00 per dozen.

Pipe Cutters Go To Higher Levels

Winnipeg.

PIPE CUTTERS.—Prices on pipe cutters have undergone a further revision. Present quotations show an increase of from 5 to 10 per cent. This advance brings to-day's prices to following levels: Barnes pipe cutters: No. 1, $3.15; No. 2, $4.20; No. 3, $7.00 each; Barnes extra wheels: No. 1, 20c; No. 2, 23c each. Saunders pipe cutters: No. 1, $2.55; No. 2, $3.85; Saunders extra wheels: No. 1, 22c; No. 2, 30c each.

Change Recorded in Door Springs, Up

Toronto.

DOOR SPRINGS.—New prices are now effective covering Sargent door springs which again move upward. These are now selling at the following figures: Sargent door springs: No. 161, $2.50; No. 162, $3.00; No. 163, $4.00 per dozen.

Black Steel Sheets Hold Firm

Winnipeg.

BLACK STEEL SHEETS.—Prices on black steel sheets continue firm. Stocks

are reported as very broken owing to embargos. Prices now in effect are confirmed as follows: 10 ga., $9.45; 12 ga., $9.45; 14 ga., $9.45; 16 ga., $9.45; 18 ga., $9.30; 20 ga., $9.30; 22 ga., $9.30; 24 ga., $9.30; 26 ga., $9.35; 28 ga., $9.45 per 100 pounds.

Turpentine Up 10c; *Linseed Oil Steady*

Winnipeg.

TURPENTINE, LINSEED OIL.—In recent issues of HARDWARE AND METAL further advances in the price of turpentine have been predicted due to the difficulty experienced in securing transportation and possibility of overseas business developing. These predictions are fulfilled in the new prices just issued which show an increase of 10c per gallon over previous figures. To-day's prices are as follows: Full barrels, $1.20 gal.; ½ barrels, $1.23 gal.; 5 gal. lots, $1.25 gal.; 1 gal. lots, $1.25 gal., plus the usual extras for containers.

Linseed oil prices continue firm on the local market with stocks reported as normal with the usual demand. Prices still ruling are given as follows: Boiled linseed oil, $2.23 gal.; Raw linseed oil, $2.20 gal. in single barrel lots.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Nov. 21.—Reconstruction work in the iron and steel trade is in full swing, Only a small fraction of the work has already been done, but what has occurred is sufficient to indicate rather clearly in a general way the course that will be pursued.

It will be recalled that for several weeks there were circumstantial reports that the War Industries Board contemplated continuing its control of the iron and steel industry after the cessation of hostilities for the purpose of setting the industry firmly on its feet on the peace foundation. Members of the trade had also expressed their desire that this should be done, and the sentiment, while not unanimous, was decidedly preponderating. A few reactionaries opposed such procedure, either on general principles or because, perhaps, they would welcome a slump in the steel market as a means for reducing wages. The majority in the steel trade feel convinced that economic conditions are such that wages cannot be reduced because of the high cost of living and because of the shortage, more or less, of the class of labor employed at coke works, ore mines, blast furnaces, and steel works by reason of the practical cessation of immigration with prospect of an efflux, rather than an influx, of foreign-born after the war.

Opposed to Reduction

The government, of course, is opposed to wage reductions, and it is, moreover, in the delicate position that the successive wage advances that have been made in the iron and steel industry did not occur, by the showing of the public records, through any act of the government. All these advances were fostered by the United States Steel Corporation. It may be that in some instances the action anticipated, by possibly only a very few days, a movement on the part of the government, but the practical point is, that if so, the movement really was anticipated, and the public record is that the government did not bring about the advances. Naturally it could hardly be a party to reductions. Thus the situation as to costs is already fairly clear. They can be reduced somewhat, but not by so large a percentage. As to profits, the government is particularly interested in seeing profits continue for the remainder of this year at least, for the simple reason that the excess profits or war taxes, whatever may be the precise details formulated by Congress in the Bill now in committee, will be assessed upon the year as a whole, with the last dollar of profits taxed the highest percentage, hence a drop in profits in the closing portion of the year would make a big difference in the taxes secured.

War Industries Board Control Continued

Immediately following announcement of the termination of hostilities the War Industries Board invited the special committee of the American Iron and Steel Institute to meet it. The committee formally requested the Board to retain its control for the transitionary period from war-time to peace-time conditions, and the Board, having already been of that mind, immediately acceded.

Inasmuch as the legal powers of the War Industries Board are rather limited, its control in the past, having been largely a matter of voluntary co-operation on the part of manufacturers, it is important to note that the reconstruction policy is not simply that of the members of the board. The policy is that war contracts should be canceled, as far as possible, only as peace business develops, so that there shall be no interruption of work, no idleness of plant facilities, or of workmen. The Secretary of the Treasury, who must be held to speak for the government rather than for the War Industries Board as a separate body, used very plain language in a letter addressed to the chairmen of the Senate and House committees that have to deal with the pending tax measure. He said that government expenditures would be reduced, but could not be reduced greatly at once if a wise policy were pursued of keeping plants and men employed. He also gave reassuring words to business men when he urged that at this time Congress decree what shall be the taxes for the calendar year 1919, as well as the year 1918, insisting that business men must know how they are going to be taxed or they will be restricted in their business operations.

Removing Restrictions

The first important action of the War Industries Board was to cut in half the restrictions arranged with a host of manufacturing consumers of steel. Thus, for instance, the agricultural implement makers, instead of being restricted to 75 per cent. for the twelvemonth beginning October 1, 1918, are restricted to 87½ per cent. Their total normal consumption of pig iron and steel products had been estimated at 2,000,000 tons a year.

This action was followed by an action of the Food Administration, relating to the only subject on which that administration is connected with the steel industry, and removing all the restrictions arranged as to the consumption of tin plate in packing non-perishable foods. At no time had there been restrictions as to perishable foods. No provision is yet made for consuming tin plate outside of food products, except that a certain amount is allotted to the oil export trade. Tobacco, paints, oils, etc., etc., are still to be considered. Owing to the heavy food requirements next year free consumption of tin plate may not be allowed for a long time.

Cancellations

As to cancellations, the general policy is, as noted, not to cancel orders, if possible, if such cancellation would result in idleness of plants and men. So far as can be learned no cancellations of any importance have been made of orders actually in process of being filled. There have been numerous cancellations of other orders, however, an instance being the 40,000 cars recently ordered for use in France, the manufacture of which had not been undertaken as the car shops were still engaged in filling previous orders of the same general character.

Private buyers have been much less reserved than the government as they have been seeking cancellations in many cases. Millions of tons of business are on the books of steel companies, relating to steel which the regulations did not permit the mills to make and ship at all, or only in very limited quantities. Some of this business is as much above the government limits. Some of it, on the other hand, is so far below the government limits that the mills do not want to fill it. One must remember that while there was a runaway market which one might call the second or third runaway, in 917, before the government undertook regulation, it was not until March, 1917, that the average market level reached the level of the government limits afterwards prescribed. In general, therefore, orders placed prior to March, 1917, are at less than the present market prices. Thus with business on books at far above and far below the present market the mills are in a delicate position.

Peace Prospects

Government prices run, by arrangement, through the present quarter. The termination of hostilities has nothing to do with that. Producers have the privilege as formerly of shading prices, but they are quite unlikely to do so. In past years they have had much ex-

WEEKLY PAINT DEPARTMENT

Quality and Service Build Business

Quantity and Price Are Not Sufficient to Hold Customers—Salesmen Who Can Make Timely Suggestions and Know All About Goods They Are Offering Are Winners in Building Up Big Trade

WHEN a sales force is so organized that the spirit of enthusiasm and co-operation is shown by every member, the best results of team work are apparent. When this spirit is backed by the store with a stock of goods which can be guaranteed there is only one result—bigger and ever bigger business. In no department of the hardware store is this more true than in the handling of paints and varnishes. Given quality goods and store service any paint department must grow, no matter whether the store is a large one or a small one. Quality and service make a combination that always bring steady returns. They pay in satisfied customers, who not only come back to you when they are planning other work, but send their friends. Quality and service pay in winning for your store in general and your paint department in particular that much to be desired reputation of being dependable and of maintaining a high standard. They pay in the bigger business brought to you by the advertising satisfied customers always give freely.

APPRECIATED SERVICE

The salesmen who get the most consideration these days are those who show customers how best to buy and use the paints required. The salesmen who develop the buyer's knowledge of paint and varnish and who can show the customer why the goods they recommend will fill the customer's exact needs are those who are building for bigger and better business. Quantity and price are not sufficient to hold customers. Service is the great item, that not only holds old patrons of your store, but will bring you new ones and pile up profits more than any other thing. Many stores if requested have found it good policy to always exchange goods wherever possible. They have found, however, that if proper selling methods are followed this is rarely necessary. It occasionally happens though, that a customer decides to make a change, preferring some other color or some other material.

WORKS OUT WELL

Many hardware stores have a paint service department, in charge of a man who is capable of answering any questions that may be asked. This man often holds conferences with the other clerks, giving them selling talks for pushing seasonable lines or answering questions that may have come up in connection with trade. Every advantage is taken of the occasions on which paint travellers visit the store to have special sales talks and many valuable points are brought out. Remember service always walks hand in hand with sales. Always be ready to furnish ideas. Suggestions are in nine cases out of ten more effective than logic. Women especially are appealed to by clever ideas that will make their homes more attractive or better. While most men are not painters, they have a little knowledge of the value of paints and varnishes and they like to do odd jobs around the house. If you can show them the best materials to use, the best ways to do the work they plan, and suggest other work that they may not have thought of you will not only sell more goods, but you will teach them to rely upon you for advice and come to your paint department again and again. Not only this, but when they want hardware they will remember the good service they got at your store and will come again. You cannot afford not to know all about the paints and varnishes you carry, what they will do and how best to apply them. If you wish to create new business and hold old and build up your paint department you must make yourself thoroughly familiar with the goods and be prepared to render SERVICE.

The Name "Moore" Goes Far In Making a Paint Sale

A display of Moore's Paints and Varnishes in your window or on your shelves affords your prospect such a complete line of highest quality guaranteed paints and varnishes to choose from that an ultimate sale is always assured.

Moore's Paints dry hard but retain sufficient elasticity to prevent cracking or peeling. Thus they combine tip-top appearance with unbeatable wear.

The Moore Agency proposition will interest you. Write for particulars.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Nov. 21.—The big features of the week consist in higher prices for linseed oil and turpentine, and in the announcement regarding the reinstatement of paint cans in the pint and half gallon sizes. This applies as well to varnish cans.

Turpentine is scarce and higher, in sympathy with the position attained at primary points. Shipping is scarce and one of the largest local importers attributed much of the present strength in market prices to this condition. Rosin is firm, too, the increases totaling $1.25 since the first of the month. Linseed oil is higher, and is scarce, too, deliveries not having improved as had been looked for.

Higher Again Goes Linseed Oil

Montreal.

LINSEED OIL.—Scarcity of seed had the effect of putting prices up again on linseed oil and the lowest quotation on raw in this market is now $1.84, in single barrel lots. It is probable that this price will not hold a great while, although late enquiry of the crushers reveals the fact that delivery of seed has somewhat improved. It has not yet manifested itself to a great extent, however, and the remaining ten days of open navigation is a short time in which to look for huge shipments. Precedence is being given wheat shipments just now, and there will be an increasing market for oil if flaxseed delivery is held up much longer. The supplies are light, and demand somewhat easy.

Linseed Oil—	Raw Imp. gal.	Boiled Imp. gal.
1 to 2 barrels	$1.84-$1.85	$1.86½-$1.88
5 to 9 barrels	- 1.83	- 1.85½
10 to 25 barrels	- 1.82	- 1.84

Add 10c per gallon in smaller quantities.

Turpentine Up 12c; Firm Tendency

Montreal.

TURPENTINE.—There was an advance of 12c per gallon in turpentine here, the marked increase being due to a shortness of supply and a firming of primary markets. It is not expected that there will be much, if any, recession from the values obtaining to-day, for a considerable period at any rate. Shipping is very scarce and this constitutes a big problem. One large importer states that there will be more stock in hand soon, a shipment being on the way now. Declines are not looked for.

Rosins are very firm, and since the first of November the increase in quotations has totalled $1.25 per barrel of 280 pounds.

Turpentine.	Per Imp. Ga.	
1 to 4 barrels	$1 10	$1 12
5 barrels and over	....	....
Small lots	1 16	1 20

(Packages extra)

Putty to be Sold on Present Basis

Montreal.

PUTTY.—The important announcement is made that putty orders may be taken on the present basis for spring delivery. That is, those wishing to book ahead may do so at prices obtaining to-day. The present prices were in effect only until the end of November, but this decision will enable the trade to book ahead.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

White Lead in Oil Holds For Spring

Montreal.

WHITE LEAD IN OIL.—As with putty, the trade may now book white lead in oil for delivery in the Spring at to-day's prices. This is a continuation of the basis that was previously arranged to be in effect until the end of November. Quotations on pure lead are as follows: Five ton lots, per 100 pounds, $17; ton lots, per 100 pounds, $17.50; and small lots, per 100 pounds, $17.85.

Mixed Paint Containers Reinstated

Montreal.

MIXED PAINTS, VARNISHES.—The big news of the week is that of the reinstatement of paint and varnish cans in pint and half gallon sizes. In view of the expected easing of the tinplate situation, the paint makers announce this change, so that the trade may now specify their wants in the sizes they find to be the best sellers.

There are no changes of price, and none are immediately anticipated. Materials are still scarce and high in price and production is not expected to improve sufficiently to make any appreciable declines for at least some time to come.

TORONTO

TORONTO, Nov. 21. — Higher prices are again in evidence on turpentine, the advance this week amounting to 5c per gallon. A general stiffening of linseed oil prices is also noted, resulting in a narrowing of the range. The reinstatement of pint and half gallon containers for paint and varnish is announced this week. Prices now prevailing on putty and white lead in oil have been confirmed for booking date up to April 1.

The outlook seems to be for good business and a fairly well maintained basis of prices.

Linseed Oil Price Range Narrows

Toronto.

LINSEED OIL.—The range of quotations on linseed oil has narrowed during the week, the higher basis being gradually adopted in all quarters. Supplies at the present time are ample for all demands, but outlook is to some extent uncertain as regards movement of seed. However, feeling seems to prevail that operations will be fairly well maintained. Seed futures are higher for the week and this would indicate that a firm market may be looked for. Quotations to-day follow:

Linseed Oil—	Raw Imp. gal.
1 to 2 barrels, gal.	$1.86-$1.87-$1.92
3 to 5 barrels, gal.	1.85- 1.86- 1.91
	Boiled Imp. gal.
1 to 2 barrels, gal.	$1.88½-$1.90-$1.95
3 to 5 barrels, gal.	1.87½- 1.89- 1.94

Add 10c gallon in smaller quantities.

Turpentine Goes Up Another 5c

Toronto.

TURPENTINE.—Prices to the trade show a further advance of 5c per gallon this week. Locally supplies are well able to take care of the demand, which seems to be along comparatively narrow lines. Primary points in the South continue upward, and whereas it is reported that some interests are selling their holdings at present basis, this is

PEACE

Four years we have longed for it
Now it is here
What shall we do with it?

In August, 1914, Canada stood at the most important of all the cross-roads in her history.

We had to make a momentous decision—and we made it aright. We went to war—to end all war.

The period that has elapsed since then has been one fraught with much sorrow for Canadians—but correspondingly great has been our glory.

Our soldiers have fought so valiantly, endured so nobly, conquered so gloriously—that Canada has won the respect of the world as a fighting nation.

To-day we stand at another cross-road with another momentous decision to be made.

Peace has come at last to the world—bringing new responsibilities and new opportunities.

Shall Canada play the part in the world's reconstruction that Destiny has designated for her? Shall we face our peace problems as we faced our war problems—valiantly, nobly, resolutely?

Or shall we sit back and let other countries take up the burden of rebuilding French and Belgian towns and of feeding the starving millions of Europe?

On every Canadian citizen rests the responsibility of this decision.

Let each and every one of us, in thought and in speech and in deed, so comport ourselves that the world may know at once it is our intention to work as diligently for the world's construction—and our own—as we have fought bravely for the world's freedom.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

not having a bearish effect on the market by any means. In fact the feeling seems to be that higher levels may be expected. Rosin is also continuing its upward movement, further advances being recorded this week.

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 20
2 to 4 barrels (barrels included)	1 19
5 gallon lots	1 30

Pint and Half Gallon Containers Reinstated

Toronto.

MIXED PAINT.—Half gallon and pint tins, which were to be eliminated from sizes offering in mixed paints and varnishes, are to be reinstated. No material change otherwise is reported in the outlook this week. Booking business for Spring is coming along fairly well. No general change in price has been effected, nor is one looked for, manufacturers operating on high-priced materials, which may mean present basis will be maintained for some months.

Spring Prices on White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—The booking date on white lead in oil has been extended to April 1, which means present basis of quotations will be maintained until that time, or at least that orders will be accepted now for delivery up until that time. Reports from producing centres in the United States indicate that full production of pig lead is still going to essential consumers and it will be some little time before situation is relieved to such an extent that corroders will be able to draw from a normal supply. Pure white lead in oil is going forward at a price of $17.80 per 100 pounds in ton lots, and $18.15 in smaller quantities. Same prices to rule for shipment up to April 1.

Glass Outlook Not Promising; Putty

Toronto.

GLASS, PUTTY.—The feeling has been general that the cessation of European hostilities might bring about an almost immediate decline in window glass along with many other lines. Indications seem to be, however, as far as window glass is concerned that the reverse may be the case. The further curtailment of output for the season of 1918-1919, which was decided upon by the United States War Service Committee is going to be carried out. Time must elapse to develop plans for readjustment, and it should not be hastily concluded that plants can speed up to the highest point of output in so short a time as to affect present schedule of discounts. Reports are to the effect that with a diminished output, the market for the coming season looks to be secure and as there seems to be every prospect of a boom in the building trade, the demand for glass may prove greater than the output, with the consequent result of even higher prices.

Putty is ruling with a comparatively steady tone. Sales are fairly well maintained. The booking date has been extended to April 1, which will probably mean a consistent range of quotations for the next few months.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

MARKET REPORTS

(Continued from page 59)

perience in sticking to openly recognized prices without formal agreement.

Under the policy of the War Industries Board continuing its control, the board will probably announce prices for the first quarter—possibly, but not likely, the first half—of the new year, and probably well before the end of this quarter. While producers will talk about maintaining prices there would be nothing in the plan to have government control for the purpose of readjustment if there were no reductions. That would merely be shirking the work voluntarily undertaken. The prospective reductions cannot be predicted, but a rough guess, to suggest the scale of the operation, would be that there will be something like $5 a ton in steel products generally, and $2 or so in pig iron.

Auto accessories are more and more coming to the fore in the hardware merchants volume of sales. There will be a lot of automobile accessories sold during the next few weeks. Suggest accessories as Christmas presents.

Big Problems for Business in Canada

"CANADIAN manufacturers are to-day facing a great crisis.

"Are our industries to pass from their war-time activity to a state of protected idleness? Or are they to take advantage of the development of a normal decade, encouraged under the abnormal conditions which have prevailed since August, 1914, to establish export business on a new scale and win for Canadian people a substantial share of that wealth which will help to discharge the burden of war and maintain prosperity?

"These are the questions which may be answered in the events of the next few weeks or months. Immediate action, direct and practical, is necessary. The appointment of a trade mission to England is one step in the right direction which should go far towards maintaining Canada's position as a factor in the ind[illegible] world. Further government co-operation of the same practical character in securing orders and arranging transportation and finances is necessary. But this is not all."

Above is a direct quotation from the leading article in THE FINANCIAL POST of November 16th, and in THE POST of that date and of subsequent issues, you will find further information on this intensely important business situation. It will be profitable for you to read THE POST every week at this juncture. Note this list of contents of the current issue:

Terms 2% 30 days, approved credit.

Freight equalized on Chatham, Guelph, Hamilton, London, Montreal, Toronto, Welland.

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

WROUGHT NIPPLES

4" and under, 45%.

4½" and larger, 40%.

4" and under, running thread 25%.

Standard couplings, 4" and under, 35%.

4½" and larger, 15%.

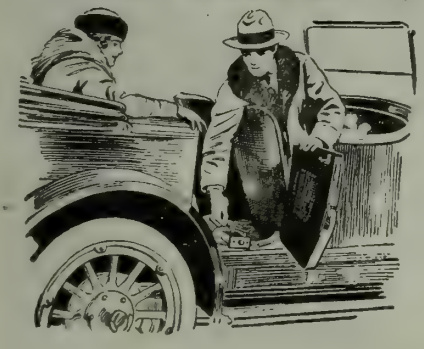
Gregg Plow Eveners Pull Big Business

Gregg Plow Eveners, like Gregg Wagon Sets, Neck-yokes and Hitches, are built for service. They are guaranteed against defective materials and workmanship.

Send for copy of catalogue describing our full line.



Any jobber in the Canadian West can supply you with Gregg Goods.

Gregg Mfg. Co., Limited
WINNIPEG

TAPLEX FOOT WARMER

TAPLEX WARMERS

Give Generous, Welcome Heat---Ready at a Moment's Notice

They are Lighted with a Match

Taplex Warmers are designed to supply continuous warmth at a moment's notice. No heating bricks or boiling water or anything of this sort required. They are simply lighted with a match and in a few seconds they are ready for use. They are made in various models and sizes, from the small, for pocket use, to the large, for automobiles. They are light in weight, convenient to carry, simple in use and, most important of all, they are safe.

MADE OF METAL AND ASBESTOS, BURN WITHOUT FLAME
GUARANTEED TO BE SATISFACTORY

MacLean Employees Early Winners of The Honor Banner

The employees of The MacLean Publishing Co. subscribed well over their quota in the big, successful Victory Loan campaign.

89% of the 192 employees in Toronto helped along the good work by subscribing for $42,500 of the 1918 Victory Bonds, representing 16% of the annual pay-roll.

As each firm was entitled to an Honor Flag when 75% of the employees took at least 10% of the pay-roll in bonds, it will be seen the MacLean employees went well ahead of the objective set. They were among the early ones to win an Honor Flag.

The MacLean Publishing Company, Limited

Winnipeg **Toronto** **Montreal**

Publishers of Canadian Grocer, Hardware and Metal, The Financial Post, MacLean's Magazine, Farmers' Magazine, Dry Goods Review, Men's Wear Review, Printer and Publisher, Bookseller and Stationer Canadian Machinery and Manufacturing News, The Power House, The Sanitary Engineer, Canadian Foundryman, Marine Engineering of Canada.

Talk Number One Hundred and Seventy-Four

Every blamed employee about the place and some of the women folks and kids all subscribed for a Victory Loan Bond. Yes, and did it all before the campaign opened. You helped do it by using "Made in Canada" Premier.

TINKER TOM.

Look for Talk No. 175 next Week.

SOLE CANADIAN MAKERS:

THE STANDARD PAINT CO. OF CANADA, LIMITED

MONTREAL TORONTO WINNIPEG VANCOUVER

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

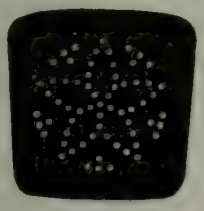
BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for the trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL



Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

CROWBARS

No. 102-A—CHISEL POINT

We offer you bars made of High Carbon Steel at the same price as you are buying the Mild Steel Bar elsewhere. Send us a trial order.

B. J. COGHLIN CO., LIMITED, Office and Factory: Ontario Street East, MONTREAL.

THE PROGRESSIVE MANUFACTURING CO.
Torrington, Conn., U.S.A.

FORSTNER BITS

bore their way right through tough, hard, knotty, cross-grained wood and leave a smooth hole and clean surface. That's performance. THEY DIFFER FROM ALL OTHER BITS, BEING GUIDED BY THE RIM INSTEAD OF THE CENTER. That's scientific construction. They bore any arc of a circle and can be guided in any direction. That's adaptability. Made for Brace—made for Machine. Packed singly, packed in sets. That's convenience. And they sell to Wood Workers, Carpenters, Cabinet Makers and others. That's why you should sell them. Only through your jobber to-day.

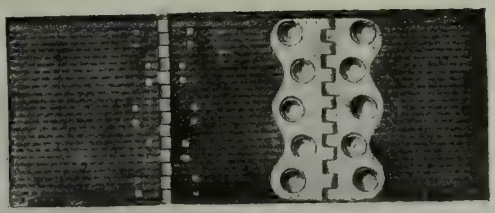
TARRED FELT

SPECIFY DOMINION BRAND

J. H. McCOMB, LIMITED Manufacturers of all kinds of Building Paper, Pitch and Coal Tar **MONTREAL**

The Peterboro Lock Mfg. Company, Limited

Peterboro, Canada



Established 1885

MANUFACTURERS OF

BUILDERS' HARDWARE

Ship Hardware, Saddlery Hardware, Padlocks, Door Checks, Brass and Iron Castings, Stampings and other Hardware Specialties.

An efficient, moderately-priced coupler for every conceivable kind of belt.

Makes any belt an endless belt.

A *good* belt coupler and a *cheap* belt coupler.

S. P. U. G.

The Society for the Prevention of Useless Giving is not organized in Canada as it is in other places, but it has a lot of adherents, particularly at this time.

With money tied up in Victory Bonds, and the problems of reconstruction facing the people, there will be fewer useless gimcracks and more useful presents given this Christmas.

The Hardware trade will undoubtedly take advantage of this opportunity, and in local advertising emphasize the importance of useful gifts.

There are few household articles, perhaps there is none, that would be more appreciated as a Christmas gift than a good washer or wringer, and if quality is the test, as it should be, the Dowswell, Lees & Co., Ltd., line will find a ready sale.

There is a Dowswell Washer for every requirement; electric or water power for city and town; gasoline, wind engine or hand-power for the farm.

Send us a list of prospective buyers and we will write them direct, referring to you as our local dealer.

HOW WE TOOK THE "L" OUT OF SO(L)DER

You may notice that we always spell it "soder" instead of solder. That's because Allen Fluxes take all the h—l out of sodering for the man who does the work. Allen non-acid sodering fluxes take a quick, sure "bite" and make sodering a quick, sure job. Send for samples. Bissett & Webb, Ltd., 126 Lombard St., Winnipeg, Man.

DOUBLE YOUR FLOOR SPACE — BY INstalling an Otis-Fensome hand-power elevator you can use upper floors as stock room or extra selling space. and increase space on ground floor. Costs only $70. Write for catalogue "B," Otis Fensome Elevator Co., Toronto.

ADDING TYPEWRITER WRITE, ADD OR subtract in one operation. Elliott Fisher, Limited, Room 314 Stair Building, Toronto.

IF YOUR HARDWARE BUSINESS IS FOR sale, who is more likely to buy it than a hardware man, be he merchant, clerk or traveller? It is only hardware men who read Hardware and Metal, and a condensed advertisement in this paper offering your business for sale, will put you in touch with the people who will be most interested.

TOOLS FOR SALE

WE ARE OBLIGED TO DISCONTINUE OUR tinshop, and have for sale the following tools which have been used very little and are in first-class shape: 1 encased setting down machine BB; 1 wiring machine, No. 1 x 167 large burr BB; 1 wiring machine, No. 1 x 168 small burr BB; 1 beading machine with crimp head; 1 encased groover, No. 3; 1 folding machine, adjustable bar, solid base 20"; 1 double seaming stake with 2 heads; 1 breakhorn stake; 1 hollow mandrel stake; 1 mandrel stake; 1 sheet iron folder, No. 7; 1 solid frame stove pipe former, No. 5; 1 squaring shear, No. 1, with table. Price complete $100.00 F.O.B. Thamesville, Ont. Write E. S. Hubbell & Sons, Thamesville, Ont.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

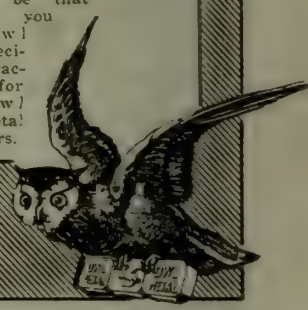
Say You Saw It In Hardware and Metal

Twelve Cents Per Word!

Several weeks ago a firm in Vancouver, B.C., telegraphed a want ad to Hardware and Metal. They wanted a clerk in a hurry and wished to catch the earliest issue.



The cost of a telegram from Vancouver to Toronto is ten cents per word, added to this was our charge of two cents per word.

This firm had faith enough in Hardware and Metal's Want Ad column to pay *twelve cents per word,* for an announcement in this column. This little story speaks for itself. Mail or wire your want ads, we will accept them until Thursday noon for the current issue.

Hardware and Metal Want Ad Dept.

OWL METALS

Somebody's selling Babbitt and kindred alloys in your locality. You would be that somebody if you pushed Owl Metals. Especially Owl Traction Babbitt for Tractors. Owl Babbitt Metal for Threshers.

OWL METAL COMPANY WINNIPEG

Getting Results

A large firm in a Western Canada city recently advertised in Hardware and Metal Want Ad. Page for a man to fill a responsible position—result 21 replies. This indicates that the want ad. page is followed closely The man YOU want to reach is reading this page.

THE STANDARD PAINT FOR HOME PROTECTION

S.W.P.

Your customers know the quality and durability of S.W.P. and Sherwin-Williams products, and have known them for a great many years for their high standard of quality, making them the by-word in your customers' homes.

Be prepared to take care of your customers' requirements. They do not want a substitute but demand Sherwin-Williams products. The merchant with a full and complete line of S-W products on his shelves will do some nice business this fall.

If you are not an S-W Agent, write us for particulars.

The Jaws Can't Spring Out

A trap turns traitor when the jaws spring out—letting valuable fur go instead of *holding it.* Just another reason why trappers everywhere use VICTORS—because the jaws *stay put.*

Victor Jaws cannot jump out. On the smaller sizes a lug holds the jaws firmly where they should be. On the larger sizes a clever bend in the end of the jaw does the work. Patented, of course,—and used exclusively on traps made at Trapping Headquarters.

ONEIDA COMMUNITY, Limited

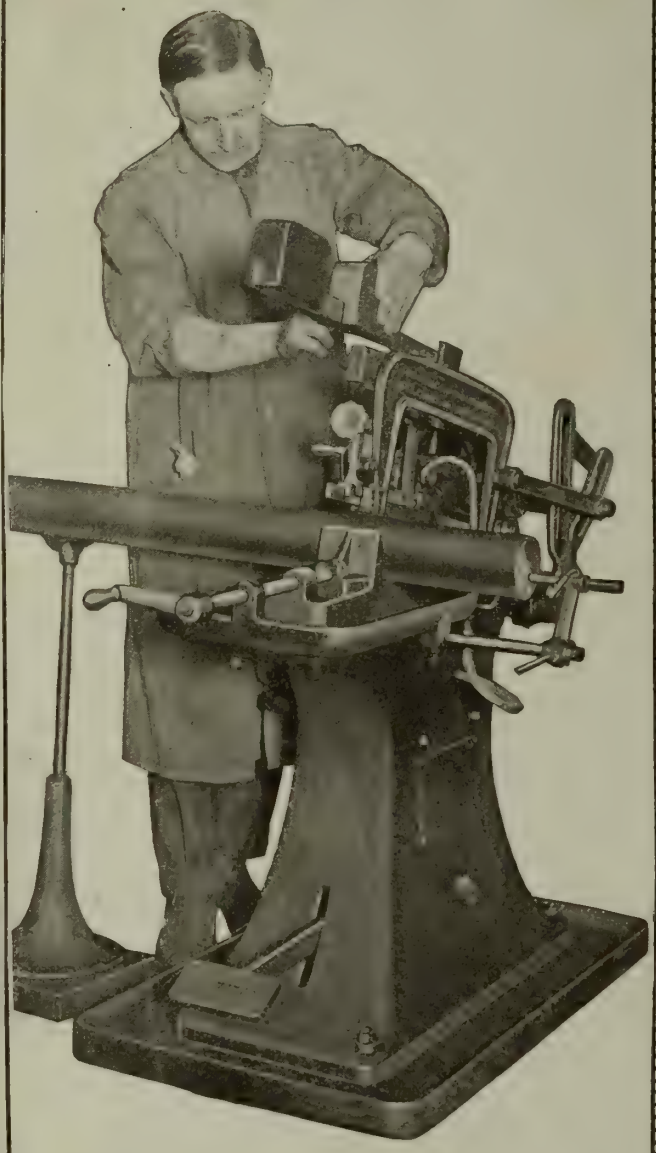
Good Looks Backed By Genuine Quality

What is **in** a paint or varnish can matters a great deal more than what is **on** it.

But there is no denying the business-pulling power of bright, attractive labels. They help your store to look its best—they make it worth your while to keep your paint department right at the front of the store.

So, we have designed new labels for many B-H products and you'll agree that they are both beautiful and dignified. The cans illustrated here are handsomely lithographed in four to six colors. How attractive your paint shelves would look, with a stock of these B-H products.



And **you know** that the quality is there, behind the label. The firm that makes Brandram's Genuine B.B. White Lead (the world's standard for 200 years) puts the same degree of superiority into all its other products.

B-H LABELS HELP YOU TO GET THE BUSINESS and B-H QUALITY HELPS YOU TO KEEP IT

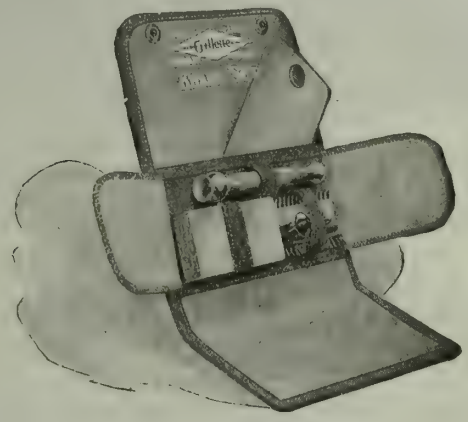
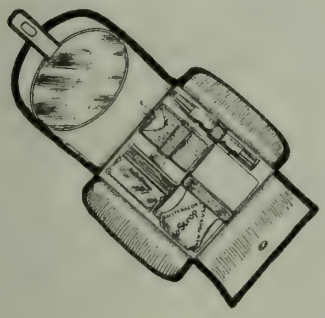
THE Gillette Safety Razor



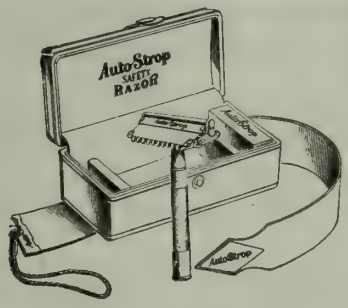
—the razor that has helped to maintain the morale of the successful Allied armies throughout the world.

The Gillette requires no introduction to the men of your town.

Sort your stock now for the Christmas season. **We carry a full range of styles.**



THE Auto Strop



—drafted by the government for overseas service —the razor that is sold on a money back guarantee. **Order your Christmas stock to-day.**

THE Gem Damaskeene

No razor stock is complete without the "Gem." It meets the demand for a popular priced article that gives absolute satisfaction. **Write for prices.**

—now for the Christmas Season

The safety razor has come in for a great deal of popularity during the past four years on account of its handiness for shaving under every condition.

This popularity will grow as the soldiers are absorbed again into civilian life.

The safety razor in its various styles lends itself to sane Christmas giving and for the next few weeks there should be a big demand. We carry a most complete stock of all kinds of razors from the old reliable type to the most efficient and up-to-date safety.

Our stock of the latter consists of the Gillette, the AutoStrop, the Gem Damaskeene and the "Eveready," the razor that sells at the popular price of $1.25. We have a style and price to suit all. **Order now for Xmas selling.**

NOTE—We also carry the widely advertised "TWINPLEX" razor blade sharpener. Simply turn the handle and all sides of the blade are sharpened automatically.

The Test That Tells

Directions For Making 2 lbs. of Merged Butter From 1 lb. of Butter and 1 Pint of Milk

1st. Pour the milk into the glass jar of the merger, then add one teaspoonful of fine salt (more or less to suit the taste).

2nd. Cut the butter into thin slices and put in jar with the milk.

3rd. Set the jar with its contents into a pan of as hot water as you can bear your hand in with comfort, and allow to remain until the butter softens, but not long enough to melt. This can best be determined by feeling the butter with a spoon.

4th. As soon as the butter is soft enough, remove jar from water, screw on top, and turn handle fast until all butter and milk is thoroughly mixed. Now remove the top and empty the butter into a bowl (do not work it), then set in a cool place to harden.

You will now have two pounds of merged butter; sweet, wholesome and nutritious, and preferred by many to creamery butter.

Should the yellow color of creamery butter be desired, add to the milk before churning, ten to fifteen drops of Dandelion Vegetable Butter Coloring Extract; for sale by most grocery and drug stores.

We now have a well assorted stock of all numbers and can make prompt shipments.

It takes mighty little effort to sell

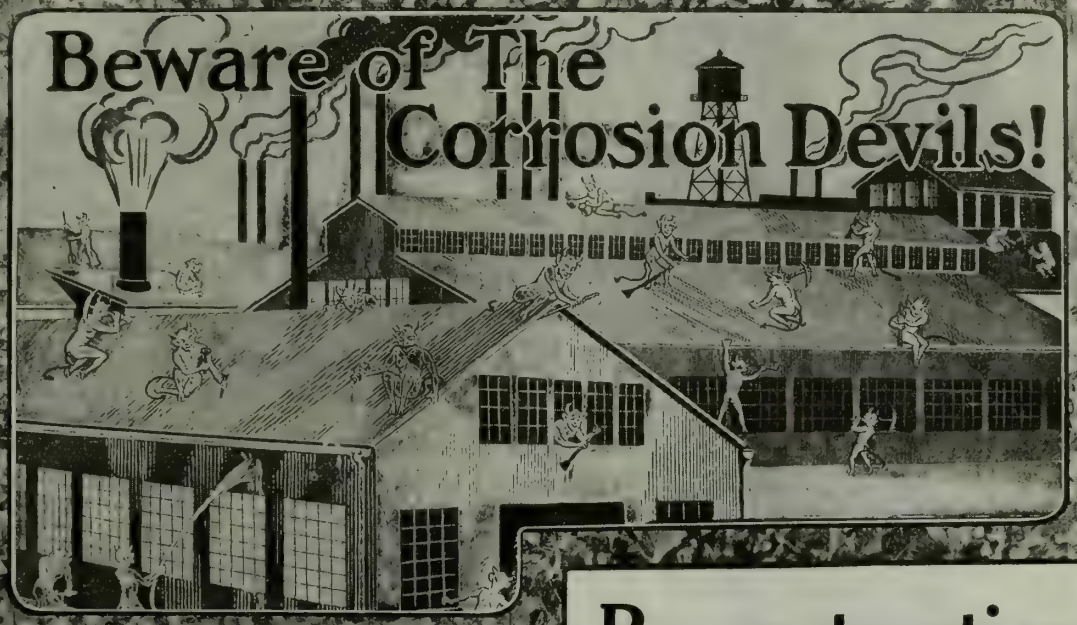
"Belleville" Hardware

A "Made-in-Canada" Product Equal to the Best in the World

We are all apt to look up to imported goods as superior to home-made lines. Pause before you concede anything to foreign products over "BELLEVILLE" HARDWARE. Here is a Canadian-made product that is as good as the best.



"Belleville" hardware is meeting the demand of the most particular architects and builders, and is recording wonderful success throughout Canada. It is a worthy Canadian product, worthy of the best Canadian patronage. All hardware looks very much alike to builders and architects until they have had experience with "Belleville."

Best line for dealers to handle. Has greatest demand. Get our proposition.

Belleville Hardware & Lock Mfg. Company

BELLEVILLE ONTARIO

Beware of The Corrosion Devils!

Corrosion Destroys
The metal. The labor for forming and applying it. The usefulness of structure or machine. Perishable merchandise — whose protection is destroyed.

Reconstruction

IN the face of war conditions and the tremendous demand for iron and for labor, corrosion has been destroying thousands of tons of metal daily and with it the labor used for forming transportation and application.

Now that the war is over, reconstruction is in order.

Where Toncan Metal was used for sheet metal work, repairs are not likely to be needed.

The use of Toncan Metal for repairs or replacements will insure their permanence.

Our book "Corrosion—The Cause—The Effect—The Remedy" tells why Toncan Metal Lasts—write for it.

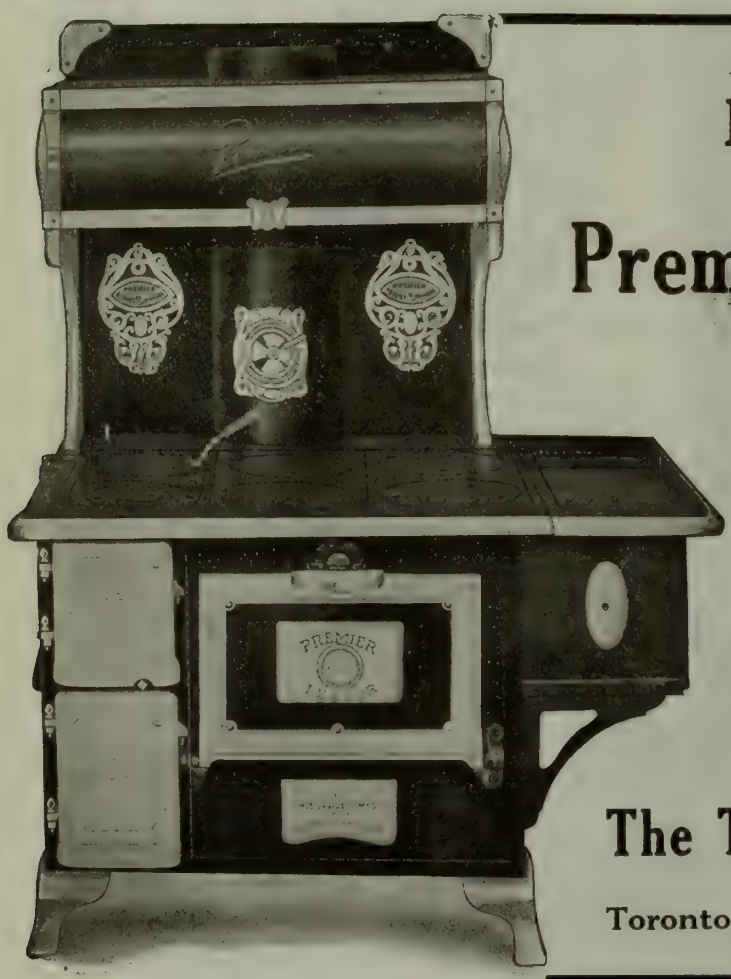
America Hangers Sell Easily and Give Life-time Service

The roller bearing tandem truck hanger is constructed entirely of steel and built to carry heavy doors.

The adjusting screw below the track is always accessible and allows increasing or decreasing the space between door and building.

The detachable drop strap permits door to swing out at right angles and prevents tearing down.



America hangers run on the famous Hatch Trolley Track, supported with corrugated brackets.

Swing in to-day. Hitch your efforts to the biggest selling, profit-making line of door hangers.

Encased in a Weather-Proof Tube

—that's the track feature of the **Allith Flush Barn Door Hanger.**

It makes a wind-proof door, inasmuch as it allows the door to swing into the opening, thus preventing wind from penetrating around the edges. The neck is storm-proof, and this is a real benefit during a Canadian winter—no ice and snow to throw or block the hanger.

This hanger is the latest idea, works automatically, may be used as an ordinary or flush hanger by a simple operation.

This is one hanger you should not be without.

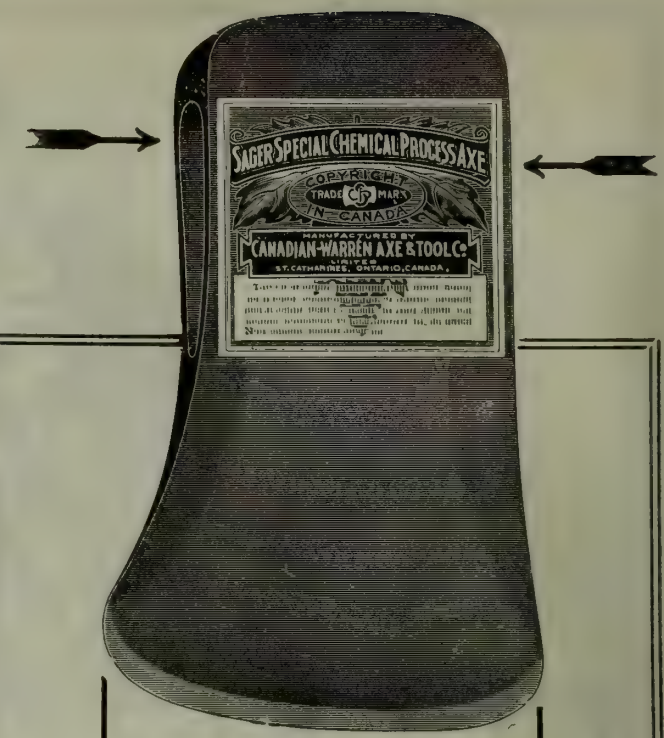
NOW THAT LABOUR COSTS ARE HIGH

Shop superintendents are seeing to it that their men don't waste time and labour with inefficient tools.

They find it much cheaper to give a mechanic a new file than to have him waste time working with a file that has passed its "efficient point."

They find it pays to buy Standard quality tools because they give the best results for the longest period of time.



They recognize "Famous Five" as the standard quality files.

Consequently the dealer who sells "Famous Five" files gets their trade.

That's why you should specify "Famous Five" when ordering from your jobber.

They are:

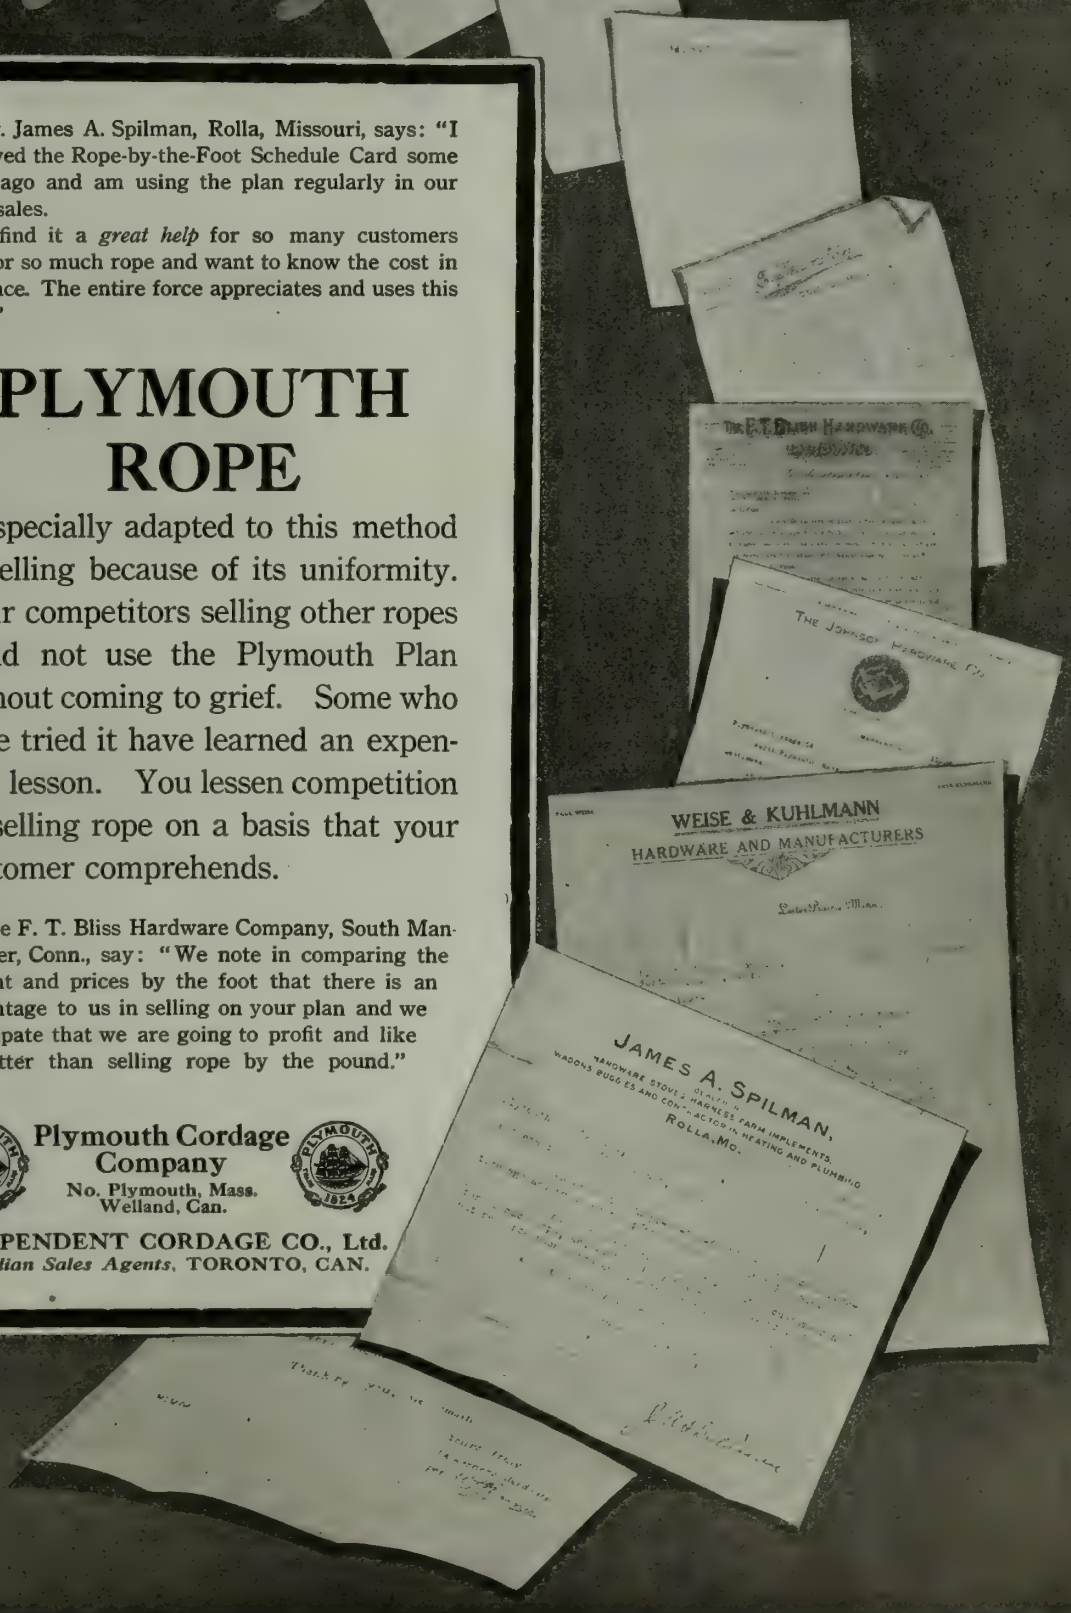
What dealers say of the Plymouth Plan

¶ Mr. James A. Spilman, Rolla, Missouri, says: "I received the Rope-by-the-Foot Schedule Card some time ago and am using the plan regularly in our rope sales.

"I find it a *great help* for so many customers ask for so much rope and want to know the cost in advance. The entire force appreciates and uses this plan."



PLYMOUTH ROPE

is especially adapted to this method of selling because of its uniformity. Your competitors selling other ropes could not use the Plymouth Plan without coming to grief. Some who have tried it have learned an expensive lesson. You lessen competition by selling rope on a basis that your customer comprehends.

¶ The F. T. Bliss Hardware Company, South Manchester, Conn., say: "We note in comparing the freight and prices by the foot that there is an advantage to us in selling on your plan and we anticipate that we are going to profit and like it better than selling rope by the pound."

ARMCO IRON Resists Rust

Charging of Open Hearth Furnaces at the American Rolling Mill Company, Middletown, Ohio.

MODERN SCIENCE AND DURABLE ARMCO IRON

Oxygen is a good thing in the air we breathe, but a poor thing in iron. It is nothing short of a vicious impurity in iron or steel, with respect to rust-resistance and working properties.

It occurs in combination with iron or with metallic impurities as a solid, or as a gaseous compound with carbon existing in the form of tiny bubbles and blowholes.

In either case it must be kept within the lowest possible limits if the iron is to be durable under conditions of exposure.

The latest scientific apparatus are employed by the Research Department at Middletown for rigidly checking the oxygen content of Armco Iron.

In this and all other respects, Armco Iron must justify the faith and confidence of the public in its rust-resisting properties as an iron that's "made to last."

Armco Iron Blue Annealed, Black Galvanized, Polished and Locomotive Jacket Sheets, Roofing, Pipe and Metal Lath

BRING the JUNKERS to JUDGMENT!

"IF William Hohenzollern and the German butchers who engineered the war are not brought to trial and the lesson driven home that the world brooks no license in the name of Kultur, then our Canadian soldiers have died in vain. No peace," declares MACLEAN'S MAGAZINE, "will be satisfactory to Canada that leaves them at large."

Read this powerful article in the December issue of MACLEAN'S, in which it is declared that Canada is a unit in demanding stern measures. "There is no mawkish sympathy here, no tendency to grant dangerous favors to a foul-fighting opponent who has taken the count."

It is asserted that Canadians as a whole want:

1. **No softening of armistice terms.**
2. **Canadian representation at the Peace Conference.**
3. **Banishment of all Hohenzollerns from Germany that the seeds of autocracy may be uprooted.**
4. **The punishment of the criminals who started the war and conducted it so ruthlessly.**
5. **The payment of an indemnity to Canada to cover our war bill.**

It is an unsparing, outspoken expression of Canadian opinion—an article that deals hammer-blows at the tendency abroad to shield Germany.

Boosting Christmas Business

Center Every Effort From Now Until December 24 on the Holiday Trade—Make Your Windows Sales Boosters, Your Whole Store an Invitation to Buyers and Your Advertising Matter "Pull"

FROM now until midnight on December 24, hundreds of thousands of people all over Canada will be trying to solve the problem, "What shall I buy for Christmas?" This will be one of the questions that is uppermost in the minds of the great buying public and in helping them solve it the hardware dealer can turn the next three weeks into one of the busiest and most profitable seasons of the whole year. From now on he will devote ever-increasing space in his advertising to goods that are suitable for gifts and arrange his windows with a view to attracting not only the thousands of people who have been educated to doing their Christmas shopping early, but also those who like to look around for a couple of weeks and make up their minds what they are going to buy. Every year sees an increasing number of people who have learned by experience that it pays not to leave their Christmas buying until the very last minute. A great percentage of these people are among the better buyers, the people who have the money to buy gifts that are really practical and useful and to whom the great number of sensible things to be found in the stock of a hardware dealer carry a strong appeal. If you let them know by your ads and by your window displays all about the attractive lines you are featuring they will be only too glad to buy.

Up to the Dealer

Remember from now on nearly everybody will be looking high and low for gifts. Cheap, useless presents will not be given to any extent this year, perhaps never again. People have learned too well the lessons in conservation taught by the war. The gift that appeals to them as useful, practical and attractive will be the only thing that will satisfy. Right here is where the hardware dealer has a field in which no other retailer can beat him. His store is stocked with scores of articles of this kind. All he needs to do is to show them and let people know he has the goods to bring them in.

Many dealers have found that it pays in addition to featuring various appropriate lines of Christmas stock in their advertising and windows to also send out circulars on which are printed lists of suggestions. These are carefully divided into gifts suitable for men, for women, for boys and for girls. The way in which some of these lists are brought back to the stores, carefully marked, shows how much appreciated they were and how much they helped the customer to make up his or her mind in selecting the gifts desired.

How to Distribute

Some dealers arrange for a general distribution of such lists so that every home in their territory will be reached. Other dealers mail lists to persons they think would be interested. Other firms not only distribute a great many circulars but have one wrapped with every parcel they send out.

Here is a sample list, which may be gotten up at small expense and will prove invaluable to your customers in helping them make a selection of really useful articles:

For father, thermos bottle, exercisers, match boxes, smoking set, table lamp, alarm clock, shaving mirror, military brushes, cigar cutter, flashlight, tool cabinet, carving set, gun or rifle gun case, game bag, shaving set, waste basket, thermometer, collapsible cup, andirons, thermos lunch box, steel box in which to keep Victory bonds or papers that are valuable, fishing tackle, manicure set, work bench, Ingersoll watch, hunting knife, sweater, a good pocket knife, shears or scissors, key hook or rings, pocket tool kit, electric heater for den, dumb bells or perhaps even a flask.

Things for Mother

There are always a long list of things that can be selected for mother, any one of which will delight her and prove of real use and value to her for a long, long time. Among other things are casserole, carpet sweeper, electric toaster, food chopper, a nice serving tray, tea or coffee pot, percolator, crumb tray, a nice electric lamp, salt and pepper set, cut glass, a nice clothes hamper, washing machine, an electric iron, chest of silver or some pieces of silver, a bird cage, cutlery, a refrigerator, aluminum ware, bread or cake maker, afternoon tea kettle, electric grill, nut picks, chafing dish, pudding dish, fireless cooker, electric heater, mayonnaise mixer, manicure set, reading lamp, a new stove, manicure set, reading lamp, a new stove, baking dishes, scissors, bread or cake tray, electric curling iron, grape fruit sets, fancy molds, electric vacuum cleaner, hot water bottle, cooker, or toilet articles.

For the Children

When making up your advertisements, your windows and your lists do not for one minute forget the children. Hardware dealers are selling more toys every year and many of them are featuring toys more and more each season as they find it a most profitable line. Here are some things to suggest for the boys and girls: kiddie car, tool chest, doll buggy, ice skates, roller skates, watches, pocket knife, dolls, boy scout outfit, games, electrical or mechanical toys, sleds, velocipedes or tricycles, express waggon, basket ball, foot ball or indoor baseball, toy guns. Besides these there is very often a big brother or sister to buy for. Gen-

erally speaking something suitable for the young man or woman can be found in the above list.

How to Boost Sales

There is another way in which you can boost sales. That is by the use of a few attractive cards. Take for instance a toaster, a percolator, or any one of a dozen different things. Leave them on your counter just as they are and seventy-five out of eighty men who come in to your store will probably never think of them as appropriate gifts at the moment. If you bring them out and display them in your window or in some conspicuous place in your store and put a nice card on them, "How Would The Wife Like One of These for Christmas," or "Here is Something Your Wife Will Like," it suggests it to the man at once and he says to himself "By jove that's a good idea, she would like one of those and I'll get it for her." Little plans like this often help immensely in boosting sales.

Your show windows are always most important, but for the next four weeks they are perhaps more valuable than at any time in the whole year. This is because such a large volume of buying is centred in this period. Remember from now on everyone is a potential purchaser, is on the look-out for something to buy for a Christmas gift. Show them what you have and keep showing it to them. Change your windows regularly and don't forget to put prices on the goods. Make your windows work to capacity and you will be rewarded. Make whole store work to the limit. Some firms arrange special displays on tables, on the counters and at special points of vantage in their stores. They take every pains to see that these are kept neat and attractive and in keeping with the holiday season and their reports on these methods as sales producers are that "they bring in the money."

Good for Business

Attractive arrangements of holiday goods very often prove leaders for other business. A man for instance attracted by something in the window which he has selected for his wife will enter the store to find the very thing he has been looking for for his boy or girl. There is nothing like displaying your goods at any time, but displaying them all the time from now until Christmas, means either more money for you in the bank to start the year with, or just an ordinary business.

HUGE DEMANDS FOR BUILDING MATERIAL

Reconstruction work will tax the productive capacity of the country for lumber and other materials for years, Edwin B. Parker, Commissioner of Priorities of the War Industries Board, told members of the National Lumber Association in convention at Chicago. He predicted it would take twenty years to rebuild France.

The speaker said he understood construction permits for new work in New York soon would total $200,000,000.

Says Cash Basis is Working Out Well

Secretary Macpherson of Ontario Retail Hardware and Stove Dealers' Association Tells How Eliminating Credit Has Helped His Business—Simplifies Bookkeeping and Gives Him Ready Money Needed For Buying New Stock

W. A. MACPHERSON, of Prescott, secretary of the Ontario Retail Hardware and Stove Dealers' Association, has been conducting his hardware business on a cash basis for one month. Would he go back to the old system of credits? Mr. Macpherson states most emphatically that he would not.

"I notified all my customers," he stated to HARDWARE AND METAL, "that on November 1 I was going to do a cash business. It has worked out splendidly. I have cleaned up a number of accounts that had been standing for a long time. Some of them had been running for years and I had given up all hope of ever getting the money. The notices I sent out, with accounts showing the amounts owing, resulted in nearly all of these being settled up by November 1. Many people who owed small amounts, but which in the aggregate made quite a nice sum, came in and paid up. In several cases I found that people who had been owing me money for a long time and had not been coming to the store because they knew they owed me money, came in and settled up and are now regular customers again.

I did not have the slightest trouble in putting the cash system into effect. In several instances people who came in to make purchases said that the goods were to be charged. I explained to them that I was doing business under a new plan which made it impossible to send out goods that were not paid for. They settled up then and there with one or two exceptions. These people asked me to let the goods stay until they went home to get the money. They came back later and got them.

"Doing business on this plan means that I have got in a lot of money that I never expected to get. It means that I have the money in hand that I ought to have, and that I need. I can put it right back into the business. It means also that several people who were avoiding the store because they owed money and did not like to come in until they paid up are again buying as usual."

Mr. Macpherson states that he has had many inquiries from merchants all over the country as to how the cash basis is working out. To all he is recommending it in the highest terms.

"From a bookkeeping standpoint it has simplified matters tremendously," he says. "By the new plan we do not have a lot of old accounts to keep track of or send out statements month after month. This in itself meant a lot of work."

It is interesting to note the steady swing, as reflected in the advertisements of retailers all over the Dominion, to the cash basis idea. A study of the ads. appearing in Canadian papers each week shows that not only hardwaremen but many retailers, grocers especially, are cutting credits to the limit. This week two hardware firms announce a change in their policy. "Cash is king," says J. S. Finkleman, of Qu'Appelle, Sask., in big display type at the top of his ad. Then follows: "I am running a cash business. That means no books to keep and no bad debts, consequently lower prices. My customers are getting all the benefit. There's always something in hardware you need to make things easier in the kitchen. I am giving a straight ten per cent. discount—just figure how quickly that mounts up."

Another firm to make a change is the Fraser Hardware Co., of Galt. A statement of what they are doing appears on page — of this issue.

Make Windows Work Overtime

Removal of Lighting Restrictions Will Help Retailers—Record Xmas Trade is Expected This Year—Don't Forget You May Win Cash Prize by Sending Photo of Your Christmas Window to "Hardware and Metal"

ONLY three weeks more before it is time for your big Christmas window display. An attractive window filled with a line of seasonable goods will go a long way toward making your Christmas business very profitable. There is no more effective way to bring the crowds of buyers, who are on the streets shopping, with their pockets full of money, right into your store, than to have a window full of goods that are appropriate. Every one of those Christmas shoppers is out looking for some suitable gift and if you put in your window the lines that appeal they sell themselves. Right there, Mr. or Mrs. Shopper, who has been looking around perhaps for hours wondering what to buy says, "Just the very thing I wanted," and walks into your store and buys. There are so many articles in stock in the hardware store that make real Christmas gifts, the kind that are thoroughly appreciated, and give years of service, that there is not the slightest excuse for the hardware dealer not cashing in on this opportunity.

WIN A PRIZE, TOO

He can not only make a big turnover of stock and handsome profits but he can win one of the cash prizes offered by HARDWARE AND METAL for the best Christmas windows. The only condition of the competition arranged by HARDWARE AND METAL is that the goods displayed be for the Christmas trade. Your ingenuity and skill in arrangement of window and goods is the test. Dealers from coast to coast are busy now planning for their Christmas windows and trying out various ideas that they think would prove winners. Every one of them has an absolutely equal chance to capture a cash prize and at the same time make his Christmas trade a record-breaker. Remember it is the window that sells the goods that counts in your business. The "pretty" window with nothing in it that brings the Christmas shopper into your store, is wasted effort as far as a merchant is concerned. If ten thousand people stop to look in after they are attracted because your window is "pretty" and then find nothing there that appeals to them as being suitable for buying and pass along, what good has your display been?

MADE SPLENDID SALES

Hardwaremen all over the country have proved for years that the right kind of window displays at Christmas or any other time bring immediate results. At Christmas time, though, the appeal is general. Everybody is out to buy something and the hardwareman can get a big share of the business because he handles the classes of goods that make ideal gifts. This Christmas is going to see a record trade. The war is over and hundreds of thousands of people feel now that they are free to spend a little money. Before, they were inclined to give any money they had to spare for patriotic purposes before they considered either themselves or their friends. They have the money, and this year they will spend it. Canada was never so prosperous. Are you going to get your share? Also, are you going to win one of the cash prizes offered by HARDWARE AND METAL by sending in a photo to this office not later than January 1 of the window display of your Christmas goods?

WILL HELP RETAILERS

Don't forget that now that the restrictions in regard to illuminating your windows at nights are removed you have a chance to display your goods for many hours longer than was possible until this week. A well-lighted window, with an attractive display of hardware lines suitable to the holiday trade, will prove a splendid ad. for your store and by it you will reach scores of the real buyers, the fathers and mothers, and give them ideas that will help them in getting their Christmas purchases made. It is surprising the number of people who for one reason or another are out at nights. That they are interested in buying is shown by the number of people one can nearly always find looking into the well-lighted windows of stores. Many of the larger firms recognized long ago the value of keeping one or two windows especially arranged for display purposes at nights, not only at Christmas time but all the year round. When the restrictions in regard to power went into effect some of these firms in order to comply with the regulations and not wishing to take any risks of losing the business they trace to night displays secured oil lamps and kept them lighted. There will be no need of doing this this year and that it pays well to use night displays is shown by the number of merchants who urged that all restrictions regarding lighting be removed in plenty of time for the holiday business.

"CASH BASIS" ADOPTED BY CANADIAN RAILWAYS

BIG shipper and little shipper alike must, after New Year's Day, pay cash to the railways for service rendered, or furnish a bond covering the amount involved. Under the bond, however, only 96 hours' credit will be allowed. An order bringing the Canadian railroad system in line with the American railways in this respect is about to be issued by the Canadian Railway War Board.

"The Canadian Railway War Board was reluctant to make any change," said General Secretary Neal, "until we had an opportunity to observe the working out of the system in the United States. We are now satisfied that 'cash settlement' is good business for all concerned. The new order goes into effect next New Year's Day."

RETAILERS PERMITTED TO LIGHT UP WINDOWS

RETAILERS are again permitted to light up their store windows at night. As far as Ontario is concerned it is not known how long this will be permitted but indications are that the windows may be illuminated until the New Year at least. Shortage of coal and electricity may make it advisable to make other changes in regulations after the holiday business is over. In Ontario the Power Controller requests that the utmost conservation in the use of electricity be practised. He asks that no more power be consumed in lighting the windows than was used during the months the prohibitory order was in force, pointing out that the manufacture of munitions is still going on, and will be for some time to come.

EXPRESS COMPANIES MAY INCREASE RATES

SOME weeks ago HARDWARE AND METAL predicted that the express companies, in order to meet increases in wages, higher costs of operation and other conditions, would ask for permission to increase express rates. This week the Express Traffic Association of Canada, representing all the express companies operating in the Dominion, applied to the Board of Railway Commissioners at Ottawa for permission to increase express rates of 25 per cent. over present rates per hundred pounds west of Sudbury, and by 37 per cent. over the present rates per hundred pounds east of Sudbury.

RESTRICTIONS LIFTED ON HARDWARE IMPORTS

FURTHER relaxation of restrictions on exports which will affect Canada is announced by the United States War Trade Board. Several hundred commodities have been removed from the export conservation list, effective immediately.

The latest list of removals includes various alloys and metals; tin in certain forms; iron and steel of certain kinds; machinery and tools; aeronautical machines and instruments and marine engines, instruments and appliances; dental and surgical instruments; locomotives; blast and steel furnaces; hardware, including pipe, wire and nails; railroad building materials and certain appliances; chemicals and drugs; animal hair, and articles manufactured from rubber.

The board also made some modification in the rules governing the kinds of iron and steel, vegetable fibre, except cotton, hemp and other fibres, which may be exported.

EXPECTS REDUCTION IN PIG IRON PRICES

STOVE manufacturers are looking for a drop in the Canadian price of pig iron. One manufacturer stated to HARDWARE AND METAL that the Canadian price of pig iron now is several dollars higher than it should be compared with the American price, due to the American embargo now on the exportation of pig iron. This embargo will be lifted, he expects, before the first of January and at that time Canadian prices, he believes, will automatically drop.

MAKING NO CHANGE IN RELATION WITH FRANCE

OFFICIAL notice is given from Ottawa that the convention respecting commercial relations between Canada and France is to remain in force till September 10, 1919. The question of continuing the convention in force after that date is under consideration. Many inquiries from France for materials are being received by Canadian firms it is stated.

WORKING TOGETHER TO FACILITATE BUSINESS

THE Canadian War Trade Board has arranged with the War Trade Board of the United States to co-ordinate their respective policies of export and import control. New regulations have been adopted for the purpose of simplifying the procedure for the licensing of goods in transit from Canada or to Canada through the United States.

NO INDICATIONS OF CHEAP TURPENTINE

REPORTS from the South state that turpentine continues to occupy a very strong position in the market with many orders from overseas and from home consumers. A late dispatch from Savannah says:—

"With turpentine at 75 cents and rosins commanding the prices they do no one is complaining, especially with the prospect of higher values for rosins, and the trade as a whole looks forward to the remainder of this season and the season of 1919-20 with a feeling of assurance that a very high level of prices will be steadily maintained by force of increased demand and supplies small enough to force active competition."

LONDON HARDWAREMEN BANNING HUN GOODS

"At a meeting of the London, Ont., Hardware Association, held Tuesday evening, it was unanimously decided that the members would not handle any goods of German manufacture, nor would they buy from any jobbing house that handles German goods. Signed by: Purdom Hardware Co., Steele Hardware Co., J. A. Page, O'Dell and Mitchell, J. A. Brownlee, London Hardware Co., Kilpatrick Bros., Summers and Sons' Hardware, Chown Hardware Co., Cowan Hardware Co."

"NO GERMAN GOODS" IS CONTRACTORS' SLOGAN, TOO

RIGHT in line with the above resolution comes a similar one from Ottawa passed by the newly-organized "Canadian Building and Construction Industries." This is an association just formed by builders and contractors from all over Canada and they decided to advocate the use of Canadian materials wherever possible, raw or finished, on all public buildings. Some interesting discussion followed the recommendation that the conference pledge itself never to use again German or Austrian made goods. The builders of Canada and the hardware men are very closely associated and that they are working along this line entirely independent of one another will mean much for its success. While in conference the builders adopted an aggressive policy and are looking forward to a great deal of new work. Much of this will not, of course, get under way before next year owing to winter coming on but in the meantime a revival of building is already reported from many points. This, of course, will be directly reflected in increased demands for hardware.

STEEL SITUATION IS WATCHED WITH INTEREST

THE steel situation, especially across the line, where already over two billion dollars' worth of government orders for war purposes have been cancelled, continues to be one of keen interest to the trade. From the States, also, comes the news that the entire priority and preference system is wiped out, there being no need for it now. These conditions may have very important bearings on Canadian trade. A steady and insistent demand for steel is reported from builders of automobiles. From Montreal comes the report that shipbuilding and marine interests are not only placing large orders out are also absorbing great numbers of men who were until recently engaged in shell making.

RESTRICTIONS REMOVED ON IMPORTS OF TWINE

THE War Trade Board announces that applications for export licenses covering linen and hemp thread and twine from the United Kingdom to Canada will in future be considered irrespective of purpose for which goods are required, but will continue to be subject to restrictions as to quantity based on 1916 exports of each individual exporter.

Current Events in Photograph

Where Peace Terms Will Be Arranged

It was in the Palace of Versailles that the terms of the Armistice which brought hostilities to a close were framed by the Allies. In the same historic building will be arranged peace terms which the world hopes will make any such wars as that which has raged for the past four years impossible. It is here that Prussian Militarism will be shorn of its power. It is interesting to note that in 1871 the Prussian King was saluted in this palace as Emperor of Germany.

This Week's Hardware Windows

Sarnia Firm Gets Many Inquiries and Sales After Showing Brass Goods—Peterboro Firms Unable to Get Enough Heaters to Keep Up With Demands—New Brunswick Firm Features Goods For Hunting Season

Mackenzie, Milne & Co., Ltd., Sarnia, Ont., this week are displaying brass goods in their show windows along with fireplace sets. The brass goods include smoking sets, ash trays, jardinieres, brass and black iron fire sets. The goods are displayed on the bottom of the windows with the smaller articles raised up. The displays have not only had a direct result by making a number of sales, but there have been a great many inquiries, a number of which will likely result in sales in the next week or two.

J. A. Rollefson, Swift Current, Sask., starts a strikingly-arranged quarter page ad. as follows: "Mr. Farmer, let us shows you our 'Bull Dog' fanning mill. This mill will pay for itself in one year." A good cut of the mill is shown, and then some points made regarding the value of the mill. Further down in the ad. is a seasonable tip to householders, "Let us replace your broken windows and supply the weather strip for your doors. We always carry a full line of shelf and heavy hardware and a big stock of harness and harness sundries."

Buchanan and Tait, of Galt, Ont., have two seasonable window displays this week. One window is devoted entirely to gloves and mitts, each pair bearing a price ticket. The window has not been overcrowded, and the display catches the eye quickly. In the opposite window there are exhibited interchangable ranges, surrounded by gas heaters, all bearing price tickets.

The coal shortage has been responsible for a very large sale of small stoves, electric heaters, and other forms of auxiliary heating apparatus by Peterboro' hardware dealers. For days at a time the stores have been completely sold out of electric heaters, and have found it difficult to renew their stocks owing to the heavy demand all over the province. For some days past the Peterboro' Hardware Company has been making a special display of electric heaters, steel stoves, oil heaters, and similar lines. It is a seasonable reminder, and has resulted in a number of extra sales. The other display window of the company is filled with an attractive line of enamelware and kitchen utensils.

The Brown Hardware, and Campbell & Best Hardware Company, are also showing similar lines and report good results. A good stock of Christmas goods has been secured and a big trade is anticipated.

T. McAvity & Sons, St. John, N.B., are pushing sporting goods for the hunting season. A triple window display this week contains an attractive lay-out of guns, cartridges, and other equipment for the hunter, and display cards featuring these lines furnish an attractive background. Another window is planned to catch the eye of the small boy, with its contents of small express carts and other toy vehicles. The silverware department has commandeered another window, and the gleaming display on a ground of black velvet has attracted much attention. The remaining window contains a striking group of brasses—jardinieres, fern dishes, umbrella stands, etc. In the midst of the brasses stands a silver cup, presented by Clifford McAvity to the winning team of the McAvity Bowling League.

In the windows of W. H. Thorne & Company the same plan of giving various departments a show has been followed. In one window is a fine collection of ladies' handbags from the fancy goods department. Another has a few selections from the stock of gramophones which this company features. Other windows show selections of tools, carpet sweepers, house-cleaning utensils, and kitchen tinware.

In none of the windows are prices conspicuous.

Combination Sale By Galt Firm This Week a Splendid Success

THE Fraser Hardware Co., of Galt, Ont., has just concluded a unique combination sale, which was on for one week, November 21 to 28, of aluminum products and the Combination Gas and Coal stoves. The manufacturers had demonstrators present for this sale.

In having this double sale, the Fraser Hardware Co., demonstrated to people of this district that the much-complained of Tilbury gas did not injure the aluminum articles and that the stoves they sell make the gas odorless.

In connection with the sale of aluminum, the Fraser Hardware Co., made a special feature in kettles, and speaking of the double sale, J. A. Fraser, of the firm, declared they had found it very profitable, selling 200 kettles and $150 of other lines of aluminum, besides a number of stoves.

In addition to extensive advertising in the press to launch demonstration sales, the firm made good use of its three windows for displays. The center window was devoted to kettles, with the price in large figures. The other two windows were devoted to stoves and granite-ware, all articles being price marked.

At this time the Fraser Hardware Co. has put up placards about the store, announcing that anyone wishing credit would be charged 5% extra over the cash sale price, with the exception of manufacturers. This is only a credit system for the present, made necessary by war conditions.

Linseed Oil Users Oppose Cash Basis

At a meeting of large American consumers of linseed oil held in New York, the following resolutions were adopted:

Whereas, The crushers of linseed oil have arbitrarily changed their terms without due consideration being given to the interests of their best customers, be it resolved that it is the sense of this meeting that a protest be entered against these new terms for the following reasons:

1. That it is absolutely impossible for consumers to take care of sight drafts against B/L without restricting credit in our industries.

2. As all successful merchandising is based on credit it is absolutely unjust to place a buyer on a cash basis.

3. That the terms published under date of October 15, 1918 shall not be adopted and that the old terms of 30 days net or 1 per cent cash 10 days shall remain in force.

Many firms signed the protest.

TO STOP BICYCLE THIEVING

The police of Chatham, Ont., have instituted a rather unusual method to make citizens careful with their bicycles. Constables are instructed to "take up" any bicycles which have been "parked" on a kerbing for a considerable length of time. The wheels are brought to the station, where they are held until their owners call for them. Then the department charges a storage fee of twenty-five cents. Bicycles are not being left around as much as formerly.

Xmas Store and Window Suggestions

The toy department of Goodwins, Limited, of Montreal, shown above contains many ideas that may be followed out by hardwaremen in arranging either a store or window display. The white in the foreground in which the tracks are laid was an excellent imitation of snow.

Here is a window display by Walbridge & Co., of Buffalo, which will go a long way in helping small boys and girls, and incidentally their parents, in deciding what to buy. It offers many valuable suggestions for the hardware dealer in arranging a display of toys.

How Hardwaremen Boost Toy Sales

Thousands of Children Out to Welcome St. Nicholas on His Arrival at St. Thomas, Led to Toy Department of Hardware Store—Splendid Means of Bringing Women Into Store—Sales in Other Departments Increase

MORE toys will be handled in Canadian hardware stores this season than ever before. Many firms who until the last three or four years only handled toys in a small way have been steadily increasing their stocks. Instead of selling toys only as a side line in the Christmas trade, they have found that they have been able to make it an all year business that pays well. Many firms made an exceedingly small beginning in handling toys as an experiment, only to find that the business steadily grew. It not only grew, but it helped other departments to grow. It proved a most successful means of bringing women and children to the store, and the clerks by suggesting or showing other goods to the women made many extra sales.

Do Big Business

Some of the hardware stores with large toy departments do an enormous business during the Christmas season. They go after this trade aggresively, and always get results. They commence advertising their toy department as early as the second week in November, and continue their campaign right up to Christmas.

Some firms announce a grand opening. They arrange for the arrival of Santa Claus and announce his coming well ahead and by cleverly worded advertising, work up great enthusiasm among the young people. A hardware firm that has been particularly successful in steadily expanding its toy business is Ingram and Davey of St. Thomas, Ontario. This firm has made the sale of toys an all year business. In selling toys as in selling other lines of hardware it follows certain well considered plans.

Consistent Advertisers

Ingram and Davey have always been consistent advertisers. They use newspaper space freely and intelligently. Their ads are always well arranged, and well illustrated. They back their advertising by timely window displays. Some firms advertise one line of goods and then show another line in their windows. Ingram and Davey have found that co-operation pays in advertising just as much as it does in anything else. Just now they are featuring toys for the Christmas trade. They are going after the business in true Ingram and Davey style. They have a splendid stock of toys and they plan to let every father, every mother and every child for many miles around know that Ingram and Davey's is the place to buy toys. They advertise toys, they show toys in their windows, and their toy department on the second storey of their store is the delight of children. They dream about being taken there. They talk about their visits to the toy department for weeks and they look forward to going again.

Good For Business

All this of course is the best kind of advertising the store can get. Mothers and fathers remember Ingram and Davey's store whenever they want other goods than toys. The children remember Ingram and Davey's, and the great times they had in the toy department, and they tell other children. This sort of thing has been going on for some years, with the result that Ingram and Davey's toy department and toy opening is looked forward to with as much eagerness as the annual visit of the circus or the district fair. It has resulted in toys becoming one of the big departments in a steadily growing store, and it has brought in a lot of other business to the firm.

How They Do It

Ingram and Davey realize fully the value of getting off to a good start. There is nothing like being timely, especially in working up enthusiasm in connection with the sale of Christmas toys. Last Saturday was the day set by the firm for the formal opening of their Christmas toy selling. The arrival of St. Nicholas had been well advertised, and thousands of children were looking forward to his arrival. Scores of youngsters drove in from the country to see him. Many of them came long distances. It is a pretty safe bet that they will remember not only Santa Claus, but Ingram and Davey's store and the visit they made to the toy department to welcome old Saint Nick. It is a pretty safe gamble also that when they get home they will be so full of what they saw that father or mother will not have to do any great amount of thinking to know just exactly what Willie would like for Christmas, or little Mary would give anything to find Santa Claus had left her a doll and pretty nearly where to go in Ingram and Davey's store to find it.

Hundreds of Kiddies

Hundreds of youngsters were out to welcome St. Nick. His arrival for them meant far more than the celebration that marked the signing of the armistice only a week before. Ingram and Davey saw to it that Santa was there with his big bag, and that his triumphal march to their toy department was properly celebrated. His march through the city was heralded by two gaily costumed pages on horseback, who blew lustily and long on golden toned cornets, to the infinite delight of a collection of children that completely blocked the street. Right behind the pages in a big, gorgeously decorated carriage came Santa Claus, surrounded by toys of all kinds. The little ones shouted themselves hoarse as old St. Nick in his red costume, with his snow white beard and hair streaming in the breeze, waved a smiling welcome to them. To the children it was perhaps the greatest and most unforgetable day of the whole year. In the crowd too, were hundreds of older people, and these also caught the enthusiasm of the welcome. Incidentally they had impressed upon their minds in a way they will not forget when the time comes to buy, that Ingram and Davey's is the place to buy toys.

Steadily Growing

It is going out after business in this aggressive manner that has made the toy department of Ingram and Davey grow steadily bigger each year. The four weeks before Christmas sees of course the record volume of sales, but the firm sells toys all the year round and sells lots of them. During the summer, for instance, more than 500 doll buggies were sold to the little girls in and around St. Thomas. Twenty-five kiddie cars were sold in one month, and during the year more than two hundred lads were made happy with express wagons bought from Ingram and Davey. The toy business has grown so steadily that the firm has now reached the stage where it can buy in large quantities. This gives it an added advantage in being able to sell at the best prices. The firm has something that will appeal to every pocket-book. If a mother cannot afford an expensive doll, or kiddie car, there is a more reasonably priced one that will suit her.

Not Only in Toys

Ingram and Davey put into practice in all their departments the aggressive policy that is in force in their toy store. Service, good goods and reasonable prices, backed up by aggressive advertising have won for them a splendid trade in the face of keen competition. St. Thomas, Ont., only has a population of 17,000. Eighteen miles away is London with large stores and a radial rail-

OPENING OF TOYLAND

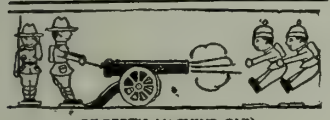
SANTA CLAUS
Coming Saturday Morning About 10 o'Clock

It is now a year ago since Santa visited St. Thomas. The Dear Old Man he never disappoints the children and will be here for a few hours. Just to let them know he is well and ready to receive their letters for Xmas.

Children can write their letters addressed to Santa Claus. Post them in our letter box (2nd floor) (no stamp required.) They will be forwarded to him.

Santa will be met with a beautiful carriage, drawn by a span of prancing horses harnessed in gold and silver. The Royal Carriage with his majesty will be preceeded by riders in costume to announce his coming, he will be met at the station. Procession will start from Balaclava St. proceed west on Talbot St. to Wilsim to Wellington, then east to Ross, south to end of Ross then back to station.

Christmas 1918



Should be the brightest and best we have ever had, let old and young give thanks to the Almighty that we are spared to see the Great War end with a glorious victory for the Allies. Many homes will be brightened with the return of brave fathers, husbands and brothers who have spent the last four Christmas' in the trenches. Let us all unite to make this Xmas one never to be forgotten.

AMERICAN FLYER TRAINS
$1.25, $1.65, $2.50, $3.50, $3.90, $4.25, $4.75 and $8.00 each

SHOO-FLY ROCKERS
Just the thing for the little folks, splendid assortment $1.75, $2.25, $2.75, $3.00, $4.00, $5.00.

GILBERT'S MACHINE GUN
Complete with ammunition $4.00.

DOLL CARRIAGES
Here you will find the largest assortment ever seen in St. Thomas bought last January at prices much lower than today's prices.

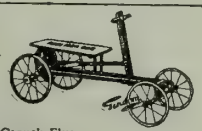
Wood box, dark green finish with hood and rubber tires $3.40, $4.25, $5.50, $6.25 and $8.50.

WICKER CARRIAGE
Just like the real Carriage $6.25, $6.75, $7.50, $12.00 $15.00 up to $20.00 each.

JUST A WORD

On account of the war it has been very hard to get Xmas Toys. We bought early in the spring in order to make sure of our supply. We have received a large part of it, but not all, we hope to get more, in the mean time we would advise people to buy early while the goods can be had. By making a reasonable deposit we will put aside anything.

DOLLS, DOLLS.
Dolls of every size and price, never was such an assortment shown in St. Thomas. No store in Canada can show a more complete assortment. Dolls at 25c, 50c, 75c, 85c, $1, $1.25, $1.50, $2.00, $2.50, $3.00, $4.00, $4.50, $5.00, $6.00 up to $8.00 each.



DRUMS
Large assortment at 25c, 35c, 50c, 75c, $1.00, $1.50 $2, $2.25, $3.50, $4.50, $6.

Complete Table and Two Chairs $1.50 set. $2.75 set, $4.50 set.

Children must be accompanied by their parents

SLEIGHS
Sleighs at last year's prices. While our present stock lasts will put away any one of our large assortment at old prices at 25c, 30c, 45c, 60c, 70c, 75c, 95c, $1.50, $1.65, $1.75, $2.00, $2.25, $2.50, $3.50, $4.50.

Ingram & Davey, Limited

Toyland 2nd Floor. Largest Toy Department in Western Ontario

way running to St. Thomas. Within easy distance is Toronto, and the Ingram and Davey firm have to meet the competition of the mail order houses. They meet the mail order firms and beat them at their own game. The firm pays freight on all cash purchases of $10 and over, for a distance of one hundred miles. They stand ready at any time to meet the prices of the mail order firms, not only meet them, but in many cases offer better prices.

Going in For Toys

A firm which only recently decided to go in more extensively for toys than ever before, is the Bond Hardware Company of Guelph. In order to make room for toys on the scale desired, the firm is discontinuing the sale of linoleums.

"We did not discontinue the sale of linoleums because they were unprofitable," said J. S. Millar, secretary-treasurer of the firm, to HARDWARE AND METAL, "but we think toys are more easily handled and more profitable."

Where the firm formerly had its linoleums displayed there is now shown an excellent range of toys, kiddie cars, doll carriages, rocking horses and so on. One of the firm's display windows is also given over to a toy display. It is changed regularly and is the center of keen interest for the children of Guelph.

The Bond Hardware Co. is another Ontario firm which believes in consistent advertising, and by backing this up with attractive window displays.

"We always find we get direct results from both our windows and our ads," said the manager.

Other Plans

In addition to advertising and window displays some hardware firms stimulate interest in their toy department at Christmas time by other plans. One is to have their children write letters to Santa Claus, in care of their store, telling him what they want. They often get a number of these letters and then follow them up by sending to the parents, prices and descriptions of the goods.

Another plan is to offer a prize for the best written letter by a child under a specified age.

Some dealers have found it advisable to keep mechanical toys under glass, owing to an irresistible tendency many adults as well as children have to try them out. This has sometimes resulted in injury to the goods, and has a tendency at best to render them shop worn, and therefore not so saleable.

CANADIANS BUYING COPPER

From Butte comes word that the Anaconda Copper Mining Company has closed a contract to furnish the British government with 1,200,000 pounds of quarter-inch copper rods, delivery of which at English ports will begin at an early date, according to the company's general sales manager. Orders for large amounts of rods and wire are coming in from Toronto and other Canadian cities.

EDITORIAL COMMENT

NOT A COPY OF HARDWARE AND METAL

A CANADIAN paint manufacturer recently mailed to a list of Canadian firms a publication gotten up like a regular edition of HARDWARE AND METAL bearing our registered name, "HARDWARE AND METAL, Volume XXX., No. 39, September 21st, 1918. Published every Saturday since 1888. The MacLean Publishing Company, Limited, Publication Office, Toronto, Canada," prominently displayed on the outside front cover.

Included in the cover were eight pages of advertisements which have appeared in HARDWARE AND METAL from time to time.

The outward appearance of the publication gave it the appearance of a regular issue of HARDWARE AND METAL, although in the contents there were none of the regular features of our paper. This publication including covers, consisted of 12 pages, whereas the Sept. 21 issue of our paper consisted of 160 pages. We have been severely criticized for allowing the name of our publication to be used for advertising purposes by an advertiser.

We wish to state that we did not give the firm in question permission to use the name of our paper which is our registered trade mark, nor did we have any knowledge that the name of our paper or the name of the MacLean Publishing Company was to be used in the manner described.

The manager of the firm in question states that they did not intend to mislead the hardware trade to whom the publication was sent, but merely wanted to send out reprints of advertisements which have appeared in HARDWARE AND METAL.

The cover of the publication bearing the name of HARDWARE AND METAL, and also the name of the MacLean Publishing Company, with publication office given as Toronto, was not printed by HARDWARE AND METAL or the MacLean Publishing Company, and was certainly printed without our knowledge or consent.

We take this opportunity of making clear to advertisers and subscribers that we do not publish advertisements in our reading matter section unless same are plainly labelled "advertisement." We believe our readers have a right to know whether announcement comes from the publisher or from an advertiser.

We are anxious that advertisers and subscribers should know that we have a very definite policy regarding the way in which our paper can be used by advertisers and under no circumstances do we depart from it.

BOOSTING CANADA

THE Minister of Trade and Commerce has applied for thirty booths at the next Lyons Fair, which opens on March 1, 1919, and continues for two weeks. A few of the booths will be used for a general Government exhibit of agriculture, forestry and fisheries, minerals and metals, but most of the booths will be placed at the disposal of the Canadian Manufacturers' Association for display of samples and catalogues or photographs of articles which will be available for exportation to France.

The Department of Trade and Commerce will pay for the booths and will also pay the freight upon the exhibits from the port of embarkation to Lyons.

The Lyons Fair is not a mere exhibition. The firms represented are encouraged to accept orders and the orders actually taken in 1918 were valued at 750,000,000 francs.

For many years before the war the famous Leipsig Fair of Germany annually attracted buyers from all parts of the world. France hopes that the Lyons Fair will make France a buying centre fully as important as Leipsig was in its best days.

CANADA'S LOSS HEAVIEST

NO nation is able to maintain a worthy position in industry and commerce if it permits the wealth it has created to be wantonly and needlessly destroyed. Yet, for many years, Canada has permitted heavier fire losses than any other country in the world, a proof of unrestrained carelessness that amounts to a national disgrace. Nero was properly despised for enjoying himself while Rome, his imperial patrimony, burned. But there is no essential difference between his action and that of the thoughtless Canadian citizen who refuses, or at any rate neglects, to do all in his power prevent the destruction of millions of property every year. Citizens are individually responsible, retailers especially, for the creation of a public sentiment that will demand legislation to fix responsibility and punishment for fires: that will insist on better building construction and the enactment of saner insurance legislation. These advances will only be made when an aroused and insistent public opinion demands that legislatures take action.

CANADA'S NEW OUTLOOK

EVEN before the war Canada held a prominent and increasingly important place, not only in the Empire, but in the world. The work of the Dominion during the past four years has given this country an entirely new and much broader status than ever before. This is due to the splendid valor of the Canadians on the firing line and to the surprising work done by the people at home. The splendid way in which manufacturers responded to the great calls made upon them has turned the eyes of the world to this country. Now that peace has come, will we retain and improve our position or not? There is every indication that Canada will improve her position. Already inquiries are coming in in large number for manufactured goods and raw materials. This is not alone in the line of foodstuffs, for which there will be a market for years to come. This means that Canada's factories are going to remain busy and that her exports will continue to grow. A great agricultural country with a ready market for everything it produces, has a stability that makes for soundness and national prosperity. Canada has this and when it is backed by busy manufacturing plants from coast to coast sending their goods to all parts of the globe, there should not be the slightest reason to fear for the Dominion's future.

GOING ON A CASH BASIS

ANOTHER move which indicates the steady trend of business toward eliminating unnecessary credits is being made by the Canadian Railways, who announce that commencing January 1, 1919, all shippers must pay cash to them for service rendered or furnish bonds to cover the amount involved. Even under the bond only 96 hours is allowed for cash settlement. This is merely another step in the path that many firms all over the country have been following for some time. It has been made necessary by conditions resulting from the war. In many business circles it is believed to be only a question of time when the majority of transactions will be reduced to a cash basis. It is fully recognized that in some instances it is impossible for everything to be conducted upon an absolutely cash principle, but in cases of this kind the credits extended are limited to a minimum period. There is a good deal of interest attached to this change in business methods to the retailer. Many of the best firms all over the country are giving it a lot of consideration in view of conditions they are now called upon to meet. Some hardwaremen have made the move already and state that they are more than satisfied wih results. Others are still wavering on the brink, uncertain whether to make the step or not until they make further inquiries as to how it is working out. Still others are content to go along and have the trouble and uncertainty of looking after a lot of "Carry" accounts.

WANT CANADIAN PRODUCTS

EVERY incoming ship that reaches Canadian ports brings inquiries for goods of all kinds. Many manufacturers state that they are receiving letters that should result in a large amount of splendid business. They expect more letters of inquiry and are preparing to take care of all the export business they can get. A significant fact appeared in the Trade and Commerce bulletin issued at Ottawa last week when no less than fourteen firms asked to be put in touch with Canadian firms who could supply them with lumber. Many of them want large quantities. The indications are that much of this will be required for reconstruction purposes in Europe. If there is an opening for Canadian lumber there is an opening for Canadian hardware goods, paint, steel goods, farm implements, electrical goods and many other lines. The Canadian Trade Commissioner, Mr. Lloyd Harris, says he can get all the business Canadian firms can handle, provided the firms are able to arrange for proper credit terms. Canada accommodated the Allies in this respect and as a result received huge war orders. It is not thought that there will be any serious difficulties in arranging for commercial credit with nations overseas who want supplies, but are not able to pay spot cash for the goods.

COMMERCIAL AVIATION

THE possibilities of commercial aviation are receiving a great deal of attention by the governments of France, England and the United States. Now that the war is over and thousands of aeroplanes and thousands of specially trained aviators are available, the question of employing these men and speedy machines in facilitating commercial projects is being careful investigated. The delivery of mails in Canada and in some parts of the United States has been accomplished most successfully. If aeroplanes are useful for this purpose, why not for delivery of merchandise and other things is the question that is asked. It is not at all impossible that before very long regularly organized air routes may be established between important points. Such a service, it is argued, would greatly facilitate the delivery of important letters, and small shipments of goods. The latest developments in aeroplanes has resulted in some remarkable carrying power being obtained and speed which makes even the fast express trains seem like mere snails. All sorts of projects have been suggested to the governments, but in the meantime, reports from investigating committees have not been made.

EVENTS IN THE TRADE

Business Changes

Creelman, Sask.—J. E. Wright, hardware, has sold out to S. M. Stone, implement dealer.

Brighton, Ont.—S. D. Ross, hardware, has sold his business to F. C. McMaster.

Obituary

The death occurred at Kamsack, Saskatchewan, of J. G. Hallson, hardware.

The death occurred at his home in Argos, Indiana, of M. L. Corey, for many years secretary of the National Retail Hardware Association. He was 64 years old.

C. A. Knapp, president of the National Hardware Association, and head of the Knapp, Spencer Company, died at his home in Sioux City, Iowa. He was a 32nd degree mason.

Frederick C. Ansell, hardware merchant, of Galahad, Alberta, died in the hospital at Killam after an illness of one week with pneumonia, following an attack of influenza. Mr. Ansell spent six years with A. E. Fee in the hardware business at Killam, and for the past two years has been located at Galahad. He was a son of the late Frederick Ansell, of Sarnia, Ont. His death is particularly sad following the illness and death of his two sisters in Edmonton, Mrs. Earl Yuill and Mrs. Tom Jones.

Personals

C. S. Coates has joined the staff of the hardware store of S. Loraas at Vanscoy, Sask.

James Cowan Jr., of London, who has been ill with influenza, is making good progress toward recovery.

George Beatty, senior member of Beatty Bros., Limited, Fergus, Ont., has returned from an extended trip through the West.

The marriage took place in Hamilton, at the First Methodist Church, on Thursday, November 21, Rev. C. L. McIrvine officiating, of Alice Kathryn, only daughter of Joseph H. Peart, Hagersville, Ont., to Leslie A. Smith, of W. J. Smith and Son, hardware dealers, Hagersville, Ont.

Trade Notes

The De Lorimier Broom Co., Montreal, has been dissolved.

The Canadian Veneering Co., Inc., has been registered at Montreal.

S. McGee, Amherstburg, Ont., bought the glassware and household hardware stock of Messrs. Barlow and McCormick.

The Stanyon Rubber Company Limited of Toronto, capital $40,000, has been granted a provincial charter.

A "housewarming," which took the form of a dance tendered to the employees by the firm marked the opening of the new factory of the Buffalo Forge Company at Buffalo. More than 1,800 of the employees and their friends attended and enjoyed the evening.

C. W. Stephens has been appointed manager of sales of the Detroit Twist Drill Co., Detroit, succeeding Nelson J. Smith, who becomes assistant to President Muir B. Snow.

J. S. MITCHELL

Of J. S. Mitchell & Co., Sherbrooke, Quebec, who has been elected a director of the Canadian Bank of Commerce.

The Massey-Harris Company have bought the Structural Steel Company's plant at Weston and will, it is reported, remove their gasoline engine manufacturing department from Toronto to the new factory. Besides the gas engine, the company will manufacture at the new factory cream separators on a large scale for the increasing European trade, and farm tractors, for which there is now a great demand in the West.

It is expected that nearly a thousand hands will be employed, most of whom will be skilled mechanics.

H. Nobert, hardware dealer, Three Rivers, Quebec, has come out with the statement that he expects to double his sales of bicycles for 1919. He has only been selling bicycles for two years, and with peace here looks for a record business.

The National Varnish Manufacturers' Association will hold its 16th annual meeting at the Hotel Astor, New York, on December 10. This meeting will be preceded by an informal dinner Monday evening, December 9.

Montreal News

J. E. Bureau, of Richardson & Bureau, is this week in Toronto.

Mr. Archibald, of the Nicholson File Co., Port Hope, was in Montreal this week.

Herbert Seybold, of Starke-Seybold, Ltd., was in Alexandria, Ont., for several days recently.

Armand Thibeault has opened a hardware and plumbing store at 276 St. Antoine Street West.

John Irwin, Vice-President of McArthur-Irwin, Ltd., was in New York during the week.

Spielman Agencies, Reg., have removed from No. 205 Read Building to 506 Read Building.

F. B. Leslie, of A. C. Leslie & Co., wholesale metals, Montreal, was in New York this week.

Laurence W. Watt has been appointed to succeed R. B. Hughes, resigned, and late on the Lead Works Staff of Brandram-Henderson, Ltd.

R. F. Warren, with the Richards-Wilcox Company for several years, has accepted an appointment with Lewis Bros., Ltd., and will represent them in Montreal city.

G. L. Griffith & Son, makers of horse specialties, Stratford, Ont., have appointed Richardson & Bureau their Montreal selling agents.

Steel Developments Expected At Ojibway

The Windsor, Ont., correspondent of HARDWARE AND METAL says:

"All eyes are now centered on developments expected in connection with the Canadian Steel Corporation, Limited, at Ojibway, which is the basis upon which future activities of manufacturers of metal products in the border cities will depend to a large extent. General Manager Perley returned Thursday from a business trip to New York and Pennsylvania, and important announcements are anticipated in the course of a few days.

James Glenister is Victim of Influenza

James Glenister, aged 39, manager of the plumbing and heating department of the J. H. Ashdown Hardware Company, died at Winnipeg on Wednesday, after a short illness with influenza. Prior to going to Winnipeg, Mr. Glenister was with Metals, Limited, at Lethbridge and Edmonton. He learned his trade in Toronto with Bennett and Wright, and then went to Galt with the firm of Scott and Bennett. He became a member of the firm, and later sold out

The late JAMES GLENISTER

Manager of the plumbing and heating department of the J. H. Ashown Hardware Co., Winnipeg, who died from influenza, on Wednesday.

his interests and succeeded Walter Fulton as Western Ontario representative of the Dominion Radiator Co. For five years he covered this territory before going to Lethbridge. Mr. Glenister was a keen sportsman, and was a former president of the Alberta Trap Shooting Association.

Lieut. W. Neil Hanna, R. A. F., only son of Hon. W. J. Hanna, of the Imperial Oil Co., was killed on November 20 while serving in Italy. He enlisted in an artillery unit at London, Ont., and went overseas in 1915. He was 23 years old.

Pte. T. L. (Bert) McKenzie, of Toronto, is in the casualty list, having been gassed on November 7. Before going overseas two years ago with a cyclists' unit he was employed with the Aikenhead Hardware Co. His sister, Nursing Sister Nan McKenzie, was lost when the Huns torpedoed the British hospital ship Llandovery Castle.

MORE STEEL STEAMERS ORDERED BY GOVERNMENT

An order-in-council authorizing the Minister of Marine to enter into a contract with the Halifax Shipyards, Limited, for the construction of two steel cargo steamers of approximately 10,500 tons deadweight, three-deck type, has been passed. The price to be paid is $197.50 per long ton deadweight. The vessels are designed to Lloyd's highest class, British Board of Trade and Candian steamship requirements.

The order states that the company offered last May to construct three vessels at a cost of $195 per ton. The increased cost of materials and labor, however, has caused an advance of $2.50 in the price.

George B. Dowswell Dies at Hamilton

George B. Dowswell, president of Dowswell, Lees & Co., Limited, Hamilton, Ontario, died at his home on November 22. A little over a year ago he sustained a severe illness and since that time had been confined to the house a great deal of the time. He was born on Sept. 23, 1850, and for the past thirty-three years had been in business in Hamilton.

The late GEORGE B. DOWSWELL

President of Dowswell, Lees & Co., Limited, who died at Hamilton.

He commenced the manufacture of washing machines and wringers with his brother, Fred Dowswell, under the firm name of Dowswell Brothers. This was changed to the Dowswell Manufacturing Co., Ltd., then to Cummer Dowswell, Ltd., and about a year ago to Dowswell, Lees & Company, Limited. The late Mr. Dowswell, although president of all these firms, spent a great deal of his time on the road. He was widely known among hardwaremen all over Canada and had a host of friends also among the travellers.

His passing was most peaceful. He retired as usual went to sleep an never awakened.

Mr. Dowswell was a great lover of roses. Rose growing was his chief hobby and this summer his rose garden was his pride and was more beautiful than at any time since it was planted. The day before the funeral, the last rose in the garden, a tiny white bud, opened. It was picked and placed in the lapel of Mr. Dowswell's coat and was buried with him. Mr. Fred Dowswell, vice-president of Dowswell, Lees & Company, Limited, is still engaged in the business. He and Mr. George Dowswell were the last members of a family of thirteen.

Annual Convention of the Sherwin-Williams Co. of Canada, Ltd., Eastern Representatives

THIS year it had been planned that a large general Convention would be held, combining both the Eastern and Western selling forces, but unfortunately owing to an epidemic of the Spanish Influenza, all arrangements had to be postponed. As soon as the ban was lifted immediate arrangements were made to hold an Eastern Convention; there was not sufficient time to bring the Western managers and representatives.

Despite the shortness of time, the Sherwin-Williams lunch-room was turned into a Convention Hall, which was very prettily decorated. The Convention was attended by all the Eastern managers and representatives, and all the Sessions proved to be very interesting, and every meeting was an enthusiastic gathering.

The Convention opened on Monday, November 18, and continued until Thursday noon. Mr. W. S. Fallis, Managing Director of the Sherwin-Williams Co. of Canada, Ltd., and its subsidiary companies, acted as General Chairman.

Mr. W. H. Cottingham, President of the company, was unable to attend the opening meeting owing to business engagements in the United States, but was able to spend a few days at the Convention during the latter part.

The slogan for the Convention this year was "Action." The address of the Managing Director, Mr. W. S. Fallis, followed a confident and optimistic strain. Viewing the past in retrospect he gave the officers of the company a prospective vision that promised better things in the year ahead, because the

THE CLERKS DEPARTMENT

ALBERT BALLIN, CALLED "THE GREATEST GERMAN"

An Intimate Sketch of the Director of the Hamburg-American Line, Whose Tragic Death Followed Signing of Armistice

Albert Ballin, for many years general director of the Hamburg-Americacn Steamship line, whose tragic death came following the announcement of the peace terms of the Allies to Germany, was a dominant figure in the shipping world of the Fatherland.

After the world war began Ballin was generally considered, as no warm supporter of the Imperial German war programme, and in several instances he was reported to have called it a senseless conflict.

Confusing reports and rumors filtered through the German lines about the shipping lord's activities and expressions of sentiment on the war. When the United States entered the war it was reported through English sources that a letter written by Ballin to Dr. Rathenau, Privy Councillor, had been intercepted. One of the most interesting passages in that letter follows:

"You and I, dear Herr Privy Councillor, were never advocates of this fatal policy of unrestricted submarine warfare. You will remember how I went to Berlin to seek to stay the hand of the authorities. I begged them to reflect, and they told me the country insisted upon it. This was not true. I pointed out how it would inevitably draw the United States into the conflict. They pooh-poohed me, smiled at the States and scorned her threat. Do they smile now? Let me tell you that in my opinion the entry of the United States into this struggle may spell absolute disaster for us."

When the different political leaders in the German War party were being advanced and deposed rapidly there were persistent rumors that Ballin, who had resigned from the Hamburg-American line, would be appointed to various important posts. For a time he acted as Director-General of German Railroads, then he was reported as a probable successor to Dr. Richard von Kuhlmann. Still later despatches stated that he had been exiled because of his Anglophile sentiments.

Albert Ballin, dominant figure in the German shipping world, was born in Hamburg, August 15, 1857. His early education was obtained in the local institutions, and when he finished the elementary courses he was sent to a school for commercial training.

Upon the completion of the schedule maintained by that school he went to England, where he continued his general study of business. In 1886 after several years of English training Ballin returned to Hamburg and entered the employ of a traction company in Hamburg.

One of "Men Around the Kaiser"

Ballin was one of the national German figures described by Frederic William Wile in his "Men Around the Kaiser—The Makers of Modern Germany." Wile wrote:

"Who is the greatest German?" was the poser once fired at a young Pomeranian giant undergoing a peremptory cross-examination in history with his fellow-recruits at a Prussian garrison. "Ballin!" was the flashing reply. That is what several million perspicacious Germans think about it. No other man in the country, King or commoner, has a stronger claim to membership of the immortals of Emperor William's day. He is one of the real Makers of Modern Germany. Ballin of Hamburg stands in the same relation to the Kaiser as did those counsellors of another generation to their sovereigns and governments—Rothschild of Paris to Napoleon III., and Bleichroeder of Berlin to Emperor William I. and Bismarck. Having tried and failed repeatedly to make him a Cabinet Minister, William II. advises with the Director-General of the Hapag. Ballin always insists he can be of more service to the Fatherland on the Alsterdamm than in the Wilhelmstrasse. He would be ludicrously out of place in a bureaucratic environment. On one of the various occasions when the Kaiser sought to saddle a Ministership on Ballin, or tack von on to his plebeian name, or give him hereditary membership in the Prussion House of Peers, Ballin compromised by accepting his Majesty's photograph. The Kaiser inscribed it: "To the far-seeing and tireless pioneer of our commerce and export trade." That is a title of which Albert Ballin, long the uncrowned king of his native Republic of Hamburg, is prouder than Von, Excellenz, Staatssekretar, Geheimrat or any of the other elongated tags, to the acquisition of which the average Teuton devotes his life.

Ballin is a thoroughly self-made man. He was born into the trade in which he was one day to be a world-figure, as the son of an humble Hamburg emigrant agent. Following the practice still in vogue among ambitious young Germans, Ballin went to England as a lad to serve his commercial apprenticeship. The irrepressible Hamburg "volunteer" went in to master the most infinitesimal details of the navigation business, and specialised in emigrant traffic, the gold-mine from which Transatlantic lines extract their richest gains. On his return to Germany Ballin entered the employ of the Carr Line, and was presently entrusted with the minor duty of conducting emigrant cargoes from Galicia, Poland and Hungary to Hamburg,(and embarking them for the Land of Promise oversea. His eminent organizing talent and sleepless zeal speedily made his superiors see that he was fitted for far more important work. They appointed him manager of their entire imigrant service. He was barely twenty-five when these, the first honors of his chosen career, came to him. It was not very long before the Hamburg-American Line began to take notice that for some mysterious reason the Carrs were getting the cream of the emigration business. Somebody, or something, was causing the pilgrims from Southern and Eastern Europe to flock to the smaller rival's steamers. It was discovered that a certain Ballin was the culprit. The only way to suppress him, it appeared, and to annihilate the competition, was to buy out the Carr Line bodily. In 1886 it passed into the Hapag's possession, and Ballin with it. The history of the Hamburg-American's development dates from the hour it annexed the young man who had cornered the emigrant market.

Figures talk. In 1886, when Ballin joined the Hapag, its capital was £750,000. Its gross profits were £125,000. In 1912 they were £2,825,000. In 1886, 26 ocean-going steamships flew the company's blue-and-white pennant. To-day it flutters from the peaks of 180. In the ante-Ballin era the Hapag's total tonnage was 60,000. This summer a single vessel of 50,000 tons, the peerless Imperator, is in her maiden season. With a sister ship and other leviathans under construction, the Hamburg-American's gross tonnage will aggregate roundly 1,500,000—a total which dwarfs the merchant fleets of half a dozen European States.

The secret of Ballin's greatness lies in his card-index mind. He has an incorrigible habit of laying stress on the unconsidered trifles, and storing them up systematically. When he was a shipping clerk in England, at nothing a week, he worked overtime absorbing the quips and tricks of the business. He was a stickler for the little things. Nothing escaped him. He developed a fabulous memory. As soon as he learned a thing,

he numbered, labelled and filed it away in the well-ordered archive which serves him as a brain. When he meets the shipping magnates of Britain, America, France, Holland and Scandinavia in conference nowadays, he staggers them with his first-hand knowledge of what others mistakenly consider the bagatelles of the game. When the Hamburg-American Line acquired Ballin, along with some minor assets in the shape of emigrant steamers and goodwill, he brought to them, ready-made, the far-reaching plans which were to make the German merchant flag familiar and formidable on the high seas.

The new director, not yet out of the impetuous twenties, did not find it easy to impose his progressive ideas on the Hanseatic patricians in control of the Hapag. His demand for twin-screw steamers shocked them. His insistence that the day had come to give ocean-travellers luxuries instead of mere comforts sent cold chills down their conservative spines. Seven-day boats seemed to them as visionary as flying machines. Ballin anticipated all that. He bided his time. By degrees, almost before they knew it, the greybeards of the directorate found themselves succumbing enthusiastically to the indomitable will and inexhaustible initiative of their colleague of the fiery spirit, restless energy and overweening self-confidence. They saw he was predestined to lead. Gradually they gave him full sway. In 1900 he was appointed Director-General of the entire organization. Since then his power has been autocratic.

Ballin's plans for developing the Line were separated into two distinct divisions. As the elementary essential, he equipped it with a fleet of modern vessels and replenished it periodically with newer ships. He saw from afar the approach of the luxury age and met it more than halfway. He recognized the moral value of the conquest of the blue ribbon of the Atlantic and built the Deutschland, which captured it on the New York-Plymouth route in 1900, with a passage of five days, seven hours and thirty-eight minutes. The North German Lloyd snatched the record three years later, but it remained in German keeping until the Lusitania re-won it for England in 1907. Ballin's next move was to extend the services of the Hapag until they literally spanned the earth. His latest project in that direction is about to be inaugurated—a service between the Eastern and Western coasts of the United States via the Panama Canal. The material accoutrements of a world-wide maritime organization having been provided, Ballin now occupied himself with the no less important question of strategy and tactics, with that phase of business known as policy. In this realm, too, he was destined to display acumen and capacity of a high order. He early proclaimed himself an adherent of the pool system, and helped to found the North Atlantic Union, which still regulates Transatlantic traffic. Conciliatory by nature, he has always opposed rate fights and other forms of ruinous competition, but, being in them, has not shrunk from making war to the knife, as Liverpool and Southampton know.

Of the left-handed compliments Lord Palmerston was fond of paying Germany, none ever left a more burning sting than his famous taunt that though the Germans might till the soil and build castles in the air, they had never, since the beginning of time, had the genius to cross the high seas or even navigate narrow waters. Before Palmerston's century ended, Britain was to recognize her mightiest rival in despised Germany, both in the merchant trade and in the naval realm. Ballin will tell you that the Lusitania and Mauretania themselves were Made in Germany. He means to say that Great Britain, in order to regain the pre-eminence which German shipping had usurped, resorted to the policy of subsidizing or semi-subsidizing the Cunard Line and enabling it to build a class of vessels which no unassisted navigation company could afford either to construct or operate. Ballin is an uncompromising foe of subsidies in whatever form garbed. He calls the Cunard giantesses "hot-house plants." He considers State subsidies insidious, because of the impulse they must inevitably give the nations to outbid one another. He says they spell demoralization. Ballin strongly advocates the assembling of a conference to abolish shipping subsidies by International agreement, as was done in the case of sugar bounties. He makes a reservation with regard to the United States. Shipbuilding is 33 1/3 per cent. dearer there than in England or Germany and he thinks the United States Government could justify a sane policy of temporary subsidies.

Since the Deutschland, Ballin has built no fast ships. He was frankly sceptical of the virtues of the turbine, but acknowledges its unqualified success in the Cunard flyers. He still inclines to the belief that six or seven days on the Atlantic is not too much for any globe-trotter, but Ballin is not the man to rest content indefinitely with second place, and it is safe to predict that one of these days he will again take up the British challenge for the speed championship.

Two years ago was the silver anniversary of Ballin's connection with the Hamburg-American Line. Germans of all classes are accustomed to celebrate jubilees with pomp and circumstance. Hamburg would have delighted to honor its favorite son. A week before June 2nd, which marked the twenty-fifth anniversary, Ballin went cruising in a yacht. He left no address, and he did not return until people had forgotten all about his "jubilee." Then he drove up to his office one day and went back to work.

SHERWIN-WILLIAMS CONVENTION

(Continued from page 49)

Allies have earned a great and glorious victory. In fact, if the Convention had a second theme, it was that of "Optimism." Lieut.-Col. Hon. C. C. Ballantyne, Vice-President, also addressed the opening meeting.

Following the usual plan, the various sessions treated of the problems that had been met by the travelling men; the consideration of sales plans, and many special subjects received attention. Altogether, the delegates had their usual profitable assembly, and returned to their territories the better for this closer contact with the home office.

Of a different nature this year, the social gathering on Thursday night proved to be successful in every way. Departing from the banquet idea, an entertainment was provided in Victoria Hall, Westmount. Decorated with patriotic bunting and flags, the hall proved to be a pleasing setting for the large gathering, for not only were the sales staffs in attendance, but the factory staff had been invited, and with them their wives and lady friends.

Mr. Fallis delivered the opening address at the social evening. The gathering was also addressed by Mr. Cottingham, who presented prizes and certificates for long service to some seventeen or eighteen employees, who had been with the company for a considerable time. The room was then cleared of seats and dancing followed. Refreshments were provided, and the interspersed music of the orchestra, composed of members of the staff, brought to a close this year's Convention.

LETTERS TO THE EDITOR

These columns are open to contributions upon any topic of interest to the trade, it being understood that the views expressed are those of the contributors, and do not necessarily imply editorial indorsement. Names of contributors will be withheld, if desired, but name of writer must accompany correspondence as an evidence of good faith.

THE GASOLINE SITUATION.

Editor,
Hardware and Metal,
Toronto.

Nov. 26, 1918

Dear Sir:—

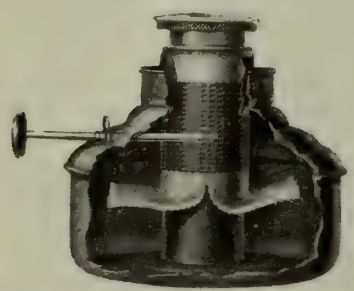
There seems to be some controversy over the question of gasoline regulations proposed by the Fuel Controller.

What is the object of a license for dealers for this particular line, any more than for many others? Is it because the Department requires more money, which seems to be the only feasible reason, and no doubt they do, and will for some time to come, but why license the dealer, therefore paying a good portion of the fees for the clerical work and staff in looking after this item, thereby losing part of the object, while if a tax is placed on this line at the port of entry, it would bring in a considerable income, without any extra expense and the public would be no worse off.

As to regulating the profit, why should this be done by the Department on this item any more than many others? And why the necessity? Competition, if left open, will look after the profiteering end of it. In many cases 10 per cent. will not commence to pay the cost of doing business, while in others where large quantities are sold daily, this might be a good thing, and as to 20 per cent. I do not think there is a dealer anywhere getting this, and no chance, so if the matter is left as it is competition is so keen in this line the dealers themselves will see that no one is going to get any too much profit.

Leave the matter as it is, and if revenue is required for war purposes, or after-war purposes, get it, but do not spend half the revenue in collecting same.

Yours truly,
Dealer.

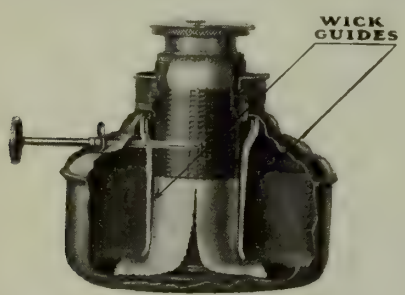


NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

NEW PERFECTION WICK DEVICE

A new device, which, it is stated, controls the operation of the wick inside the reservoir of Perfection oil heaters, has been developed by the Perfection Stove Company, Limited, of Sarnia, Ontario, manufacturer of these heaters. It is termed the "wick guides."



The accompanying illustration pictures "Wick Guides," which, it is claimed, pre-

Old style reservoir without "Wick Guides"

vents the wick curling away from bottom of reservoir.

These guides extend down into the reservoir on each side of the wick, and their purpose is to overcome the tendency of the wick to remain in a spread-out position and raise away from the bottom of the reservoir as it is turned up. This tendency of the wick has made

With Wick Guides

it necessary to fill the reservoir oftener in order to keep the wick in the oil. The new wick guides, it is stated, do away entirely with this inconvenience.

GARAGE HEATERS

It is now generally recognized that if you want your motor car to stay healthy in winter and want to avoid spring repair bills, you must warm your garage. A heater that, it is claimed, can be safely used in a garage full of gasoline vapor, and that itself uses kerosene, gasoline, or fuel oil, is a recent development marketed by the Scientific Heater Co., of Cleveland. The heater is essentially a small, sheet metal, warm air furnace

Heater for Garage

that warms and circulates the air in the garage, thus giving protection to the motor, the radiator, the battery, and every other part affected by the cold. Its construction, it is stated, permits it to be placed within a few inches of the car without danger of blistering the varnish. The safety feature is obtained, it is claimed, by an application of the miners' safety lamp principle.

ELECTRIC HEAD LAMP

The Guide Motor Lamp Manufacturing Company, Cleveland, Ohio, have developed a special new type heavy duty electric truck headlamp. This lamp is of the same size as has been used on class "B" U. S. trucks, but, it is stated, is of much simpler construction, much cheaper, and is equipped with a special front lens.

The most important feature about the lens, it is stated, is that it is designed to project a clear, wide ray of light directly on the ground, eliminating the glare above the three-foot limit, and with the one hundred and eighty degree spread to the sides, it is claimed, it gives the desired light on the sides for turning, getting into difficult, dark alleys and driveways, etc. It is absolutely dust, water, and rattle proof, it is stated.

While the brackets are of the standard fork type of 6-in. centers, it is subject to a small range of latitude; if necessary it can also be provided with the Class "B" type of brackets.

COMBINATION DOOR

"Stays on the year round," is the claim made for the combination screen and storm door made by the Sanderson Harold Co., Ltd., of Paris, Ontario. The door it is stated, is made of selected,

Combination Door

clear, seasoned pine in two finishes, either natural finish, with two coats of special varnish, or grained, filled, and varnished. Both screen and sash frames it is stated are removable, and can, it is claimed, be changed from screen to storm door in one minute.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LOWER prices have been reached on linseed oil this week, amounting to as much as 10c per gallon in some quarters. This is a direct reflection of the declines recorded in flax seed late last week and early this week, and the strengthening market of the last two days, if continued, will react towards higher prices again.

The seed market is an uncertain one these days. Receipts are small and the demand fairly active, a condition which usually makes for a firm market. Crop reports just available indicate that early estimates of the yield will not be reached by a considerable figure. However, there is enough seed for some months, and the problem really facing the crusher to-day is getting transportation. Navigation closes shortly, and if dependence has to be placed on rail accommodation for supplies, the outlook is, to say the least, uncertain.

Turpentine in Southern markets has suffered a slight break. Buying interest seems lacking, and this may be a move to stimulate sales, at which time the market may go up again. Sellers are eagerly awaiting the time when overseas shipments can be made, for when these markets open up prices are almost sure to soar, and stocks will rapidly decline. There has been a decline locally this week amounting to 1c per gallon.

Black steel sheets have been revised to lower levels in some quarters this week, the decline amounting to 50c per 100 pounds. This is not a direct result of an improvement in supplies, but is really an effort to get away from values which could in any way be termed fictitious. Orders for later delivery are being accepted on the basis thus established, which would indicate that little, if any, further lowering of prices is looked for in the immediate future.

Manufactured goods still show a tendency upward. This is reflected in an advance in oil stones, combination stones, knife sharpeners and kindred lines, which are up about 25 per cent. A sharp advance has also been recorded in tube expanders, which go up about 33 1/3 per cent. this week over prices formerly in effect.

The market on broom corn is one of decided strength. The crop of corn has been seriously affected by rains and snow. These conditions have materially decreased quantity of good quality corn, and prices on this latter, now largely held for higher prices, may soar upward to unprecedented levels. Already some sources report an increase in price of brooms, and this may be general.

Advances during the week extend to belt hooks, spring butts and blanks, wire lawn rakes, pipe stocks and dies, pliers, glass cutters, pipe cutters, oil measures and tinners' hammers.

MONTREAL MARKETS

MONTREAL, Nov. 28.—Advances have been made this week for some lines of corn brooms. Some lines of saws on which changes were made some few weeks ago by the withdrawal of prices, have now taken on a new price list. A decline of one cent per pound has been made for ingot tin, but beyond a somewhat quiet market there were no further changes in these lines. Black steel sheets are easier, and in one quarter are reduced 50c per 100 pounds. Galvanized holds steady without change.

Declines are recorded for old material in heavy machinery cast and old busheling, as also for scrap copper and brass. On the other hand, the old scrap rubber market is firmer. Fuel oil is easier, one cent per gallon less being quoted. This is due to a better supply being made possible through the cessation of munitions manufacture. There is still a fair amount of trade, and the outlook is promising.

Some Brooms Higher; Sandpaper Prices

Montreal.

BROOMS, SANDPAPER.—Some advances are made in brooms aggregating about 5 per cent. The following prices are given: No. 2 Carpet, $11.60; No. 4 Mother's Own, $10.60; No. "C" Light, $8.50, and No. 2 Cable, $13.20. The new list on sandpaper, and also on emery cloth, are as follows: Sandpaper, No. 000 to 0, per ream, $5; No. ½, $5.30; No. 1, $6; No. 1½, $7; No. 2, $8.10; No. 2½, $9.30; No. 3, $10.60; No. 3½, $11.90, and No. 4, $13.60. Assorted lots are listed at $7. The advance to the trade over list is 45 per cent.

Emery cloth lists are as follows: No. 0, $30; No. ½, $31.20; No. 1, $32.75; No. 1½, $34.30; No. 2, $36.50; No. 2½, $39.40, and No. 3, $42.50. The advance over list for this is 37½ per cent.

Steady Rope Basis; Trading is Fair

Montreal.

ROPE AND CORDAGE.—The undertone of the market is steady and unchanged. A fair amount of business is reported, but at this time there is not much movement expected. Prices are based at 39c per pound for pure manila; 33c per pound for British manila and at 27½c for sisal.

Stoves Selling Yet; Wares Sold Well

Montreal.

STOVES AND WARES.—The season is well along and while the bulk of the big business has been taken care of the manufacturers are still working on deferred contracts, material having been received for this. Some stoves and

ranges still move out to the country dealers, and the season has been satisfactory, all obstacles considered. Coal hods, stove boards and shovels have bulked large in the movement of wares, and a steady trade was experienced for many weeks and down to present time. Snow shovels have been a big feature in the recent sales of the makers.

Gasoline, Coal Oil Hold; Fuel Oil Down 1c

Montreal.

GASOLINE, COAL OIL, ETC.—The position on gasoline is steady and unchanged. A fair amount of business has been done, but the demand now falls off gradually, with the return of colder weather. Price on motor grade is 34c per gallon. Coal oil sales have been steadily increasing and the price basis is unchanged with Royalite at 19c per gallon, and Palacine and Electroline at 22c. The only change recorded is that of 1c decline per gallon in the price of fuel oil. With munitions manufacture cut off there will be an easing of the market for this line.

Wire Nails Steady Without Change

Montreal.

NAILS AND WIRE. — Supplies of nails are ample for the requirements of the trade at this time and there has been a steady amount of seasonable business from some quarters, other parts being on the quiet side. There is no quotable change for wire nails which still sell at $5.50 per keg, and cut nails still are based at $5.85.

Smooth steel wire is not much of a factor these days and the price holds unchanged at $6.25 per 100 pounds.

No Changes Made in Lead Products

Montreal.

LEAD PRODUCTS.—The situation is what might be termed a waiting one. Much depends upon the position which lead will take on in the immediate future, and as yet there is no change in this basic metal. Sales are naturally light, and the position is quite unchanged.

Lead pipe, lb.	$0 15	$....
Lead waste pipe, lb.	0 16	....
Lead traps and bends	Net list.	
Lead wool, lb.	0 15½	0 16
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 13¼
Lead sheets, 4 to 8 lbs., sq. ft.	0 12½	0 13
Cut sheets, ¾c lb. extra, and cut sheets to size. 1c. lb. extra.		
Solder, guaranteed, lb.		0 52
Solder, strictly, lb.		0 45
Solder, commercial, lb.		0 41
Solder, wiping, lb.		0 41
Solder wire (8 gauge)—		
40-60		0 53
45-55		0 57½
Zinc sheets, casks		....
Do., broken lots		....

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Iron and Steel Bars Hold Unchanged

Montreal.

IRON AND STEEL. — There is a steady but small volume of business in these lines. The season is well advanced and not a great deal of movement is anticipated during the late months. With the war finished it is probable that supplies will be available in fair quantities from now on, although relief will not come quickly.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05

Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Easier Prices For Black Sheets

Montreal.

SHEETS.—The easier feeling of fifty cents per 100 pounds for black sheets developed during the week as a result of the desire to stimulate selling. There is little improvement in the supply situation, but with some qualities to offer sellers are willing to make favorable prices.

There has been no change in the situation with regards to galvanized sheets, although the market is no stronger. Some business is passing, in a small way.

	Per 100 lbs.	
BLACK SHEETS—		
10 gauge	$9 25	$11 50
12 gauge	9 15	11 00
14 gauge	8 50	8 20

18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Heavy Scrap Tumbles; Old Rubbers Up

Montreal.

OLD MATERIALS.—The week has recorded lower prices for heavy iron scrap, No. 1 machinery cast being quoted at $35 to $36 per ton. It is very probable that there will be a further revision downward, for the main use of the metal has been now shut off for the time being.

Lower prices also obtain for scrap copper and brass and for No. 2 busheling. A drop of $1 to $1.50 per ton is recorded. Old rubbers are up, and the market is a more active one.

Dealers' Buying Prices:		
Tea lead		0 05½
Heavy lead pipe		0 07¼
Yellow brass		0 13
Red brass		0 21½
Light brass		0 08

Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Tin Quoted at 85c; Ingots Are Quiet

Montreal.

INGOT METALS.—The markets are quiet, with tin easier in London and a shading of price here brings the quotation at 85c locally. In a general way the market is a little uncertain. No definite price changes have been made, aside from tin.

COPPER.——The position of copper is without change, excepting that the volume of business is light. Price is unchanged still at 30-31c per pound.

TIN. — In London, the market has ruled somewhat easier. This has had the effect of reducing prices here somewhat and the commodity may be bought at 85c per pound.

SPELTER.—This metal holds steady, little change being recorded in primary

BRIEFS FROM THE WEEK'S MARKETS

Montreal and Toronto markets showed declines in some quarters on black steel sheets amounting to 50c per 100 pounds.

* * *

Linseed oil came down 11c per gallon in Montreal and 10c in Toronto following the drop in the seed market. Seed is again moving upward, and the effect on linseed oil may be determined quite easily.

* * *

Fuel oil has registered a decline of 1c per gallon.

* * *

Turpentine went up 5c in Winnipeg, 5c to 6c in Montreal, and down 1c in Toronto and London this week.

* * *

Corn brooms show an advance during the week and best quality brooms seem likely to go even higher.

* * *

Sand paper and emery cloth prices, just put into effect, show a very substantial advance.

* * *

Galvanized sheets declined $1 per 100 pounds in Winnipeg this week.

* * *

Belt hooks climbed up 10 per cent., and a 5 per cent. increase in the price of pipe stocks and dies has also been recorded.

* * *

It may be said, practically speaking, that the entire priority and preference system in the United States is wiped out.

* * *

A sharp advance has been recorded in oil stones, combination stones, knife sharpeners, and other abrasives.

markets and the local position unchanged at 10½c per pound.

LEAD.—With price and distribution still controlled there is no new feature and the local trading, light though it is, is transacted at 10½ to 11c per pound.

ANTIMONY.—While there is naturally a smaller demand for this in a big way since the close of the war, there has been a holding of the market in the States. Local trading is light at 12c per pound.

ALUMINUM. — No new interest is taken in this line and enquiry is generally for small lots. Price holds at 48-50c per pound.

TORONTO MARKETS

TORONTO, Nov. 28.—Oil stones, sharpening slips, combination stones and knife sharpeners are included in a list of abrasives to register a stiff advance this week. A decline of 50c per 100 pounds in black sheets has been recorded in some quarters. New prices issued on tube expanders, tinners' hammers, pipe cutters, chucks and blind staples show levels higher than those formerly ruling.

Business is reported very good, sales of axes, cross cut saws and other seasonable lines proceeding satisfactorily, with marked interest now developing in Christmas lines.

Oil Stones in Stiff Advance

Toronto.

OIL STONES.—A sharp advance in the Pike Mfg. Co., line of oil stones has been recorded. The costs of raw material which have been steadily mounting along with the advance in manufacturing expenses are factors which it is indicated have contributed to this advance. On the new basis, list prices now in effect on oil stones are per dozen: Lily White Washita, No. 7, $10.20; No. 8 [illegible] Rosy Red, No. 7, $10.20; Ext[illegible], No. 6, [illegible].80; No. 7, $9.00; No. 1 Washita, No. 6, $5.40; No. 7, $6.00; No. 8, $7.8[illegible]. On all the above a discount of 15 per cent. applies. India oil stones are also higher, new list prices, per dozen, being: No. 0, $19.20; No. 1½, $1[illegible].20; No. 2, $9.60; No. 3, $6.00; No. 4, $6.00; No. 6, $6.00, these are also subject to a discount of 15 per cent. India combination stones, No. 0 at $1.90 each; No. 1 at $2.15 and No. 1½ at $1.60, less 15 per cent., are also higher.

Knife Sharpeners, Slips Also Up

Montreal.

KNIFE SHARPENERS, SLIPS. — In line with advances on other lines of stones, new prices are out on the Kantbreak knife sharpeners which are selling to the trade at $7.20 per dozen, less 15 per cent. Sharpening slips are included in the list also, list prices being as follows, per dozen: Lily White Washita, size 3, $3.00; size 4, $3.60; size 5, $4.80; Rosy Red, size 3, $3.00; size 4, $3.60; size 5, $4.80; No. 2, size 3, $1.20; size 4, $1.80; size 5, $2.40; No. 1, size 3, $2.40; size 5, $3.60. These prices are subject to a discount of 15 per cent.

Bicycle Sundries Under Revision

Toronto.

BICYCLE SUNDRIES.—Many items in bicycle sundries have undergone revision, and list prices now prevailing on which regular discounts apply are given on grips, valves, valve cap rubbers and valve interiors as follows: No. 823, Grips, sewn leather, pair, 60c; No. 896, Grips, nipple, "Stay There," $1.56 dozen; Rims, S. P. Dunlop, 26 and 28, $3.60 pair; No. 2503, Valves, Schrader rubber base, $3.50 per dozen; No. 2520, Valve cap rubbers, $2.50; No. 2521, Valve caps, $8.36; No. 2535, Valve interiors, $11.40.

Lamp Prices Show List Changes

Toronto.

LAMPS.—Revisions are the order of the day in bicycle lamps, and quotations now being made to the trade show several changes. List prices appear on the following to which regular discounts are applicable: "Old Sol" lamps: No. 10, $8.00 each; No. 3, $10.90; No. 23, $10.90; No. 55, $7.80; No. 4, $5.50; No. 35, $7.30; No. 17 B. & N., $11.80; No. 17 Nic., $12.70; No. 8 B. & N., $12.70; No 8 Nic. (discontinued); No. 13, $8.20; No. 16 B. & N., $10.90; No. 16 Nic., $12.70; No. 15 black (green discontinued), $3.70; No. 15 red (discontinued); No. 40, $8.20; No. 5 generator, $10.90; No. 2, $12.20; No. 64, $3.70.

Tube Expanders in Sharp Advance

Toronto.

TUBE EXPANDERS.—Higher prices, and substantially so, are reported during the week in Dudgeon tube expanders. This is the first change to be recorded for some time, but the new prices named are up from 25 to 33 1-3 per cent. over former figures. The present range of quotations is as follows: 1¼ inch, $7.50 each; 1½ inch, $7.50; 1¾ inch, $7.50; 2 inch, $7.50; 2¼ inch, $9.00; 2½ inch, $10.50; 2¾ inch, $12.00; 3 inch, $13.50.

Blind Staples Revised; Plow Lines

Toronto.

BLIND STAPLES, PLOW LINES.—New net prices just issued on coppered blind staples show that these have reached higher levels. The present range of quotations in 10 pound boxes is as follows: ⅜ inch, $19.50 per 100 pounds; ½ inch, $18.50; ⅝ inch, $17.25; ¾ inch, $16.75.

Revised prices have been issued on plow lines which show a higher level than that formerly effective.

Chucks, Tinners' Hammers Are Up

Toronto.

CHUCKS, TINNERS' HAMMERS. — A revision in the price of Jacob's chucks has been effected, the No. 3 now being quoted at $9.90 each to the trade. Brades' tinners' hammers, No. 1672, 4 oz. at $9.75 per dozen; 8 oz. at $10.50 and 12 oz. at $12.25 have reached higher levels. Barnes' pipe cutters are being quoted at the following revised figures which represent an advance: No. 1, $3.15 each; No. 2, $4.20, No. 3, $7.00; No. 4, $14.00. Single bit axe handles, 2nd growth hickory, 36 inches are selling at $6.60 per dozen, a higher figure.

Stoves Outlook Good; Wares Moving

Toronto.

STOVES, WARES. — The feeling among manufacturers generally is that the outlook for stoves is very good. There is a comparatively small number moving to the trade at the present time, a seasonable condition, but the situation is one which can be considered fairly promising. Supplies are, it is thought, more likely to come through in better time and manufacturing conditions should in a few months show improvement.

Sales of all lines of wares are being maintained at a level considered satisfactory at this time of year. Manufacturers are looking forward to the time when supplies may improve and the market is expected to rule with a firm undertone for some time to come.

Normal Business Reported in Cordage

Toronto.

CORDAGE.—The business being done is considered normal, considering the season, and the outlook seems to be for a fairly steady and maintained market basis. Quotations are unchanged for the week, pure manila selling at 39c per pound base, British manila at 33c, and sisal at 27½c.

Nails Quiet, Wire Unchanged

Toronto.

NAILS, WIRE.—With navigation now closed there is little moving in nails just now to outside points. There is some trade being done locally, supplies moving forward into consumption at a very good rate. There has been no change from price adopted some time ago which is $5.50 per 100 pound base on the wire nails and $5.85 on the cut nails.

There is little to say about wire. Sales are comparatively small and interest in this is hard to find. Prices are steady

and unchanged on the smooth steel wire which is based at $6.25 per 100 pounds.

Motor Oils to Advance? Gasoline

Toronto.

OILS, GASOLINE.—There seems to be a feeling that a further advance in motor oils may be effected, but there is no definite information available on this as yet. Coal oil is ruling on an unchanged basis with sales maintained at a level totalling a big volume of business. Prices are steadily maintained and unchanged at 18½ to 21½c per gallon according to grade. Gasoline moves forward in very good quantities with prices firm and without change at 33c per gallon.

Bars Steady, Little Moving

Toronto.

IRON AND STEEL.—The market is steady and without change locally. It is stated that orders for bars are now being booked by United States manufacturers at Government price levels which will mean in time that lower prices will prevail. However, orders already on hand and being shipped are being invoiced at higher levels, so indications are that this high priced material must be worked off before any change to lower levels can be brought about. Quotations locally range as follows:

TORONTO—	Per 100 lbs.	
Common bar iron	....	$ 5 25
Common bar steel	....	5 50
Refined iron	....	5 65
Angle base	....	5 75
Horseshoe iron	....	5 50
Tire steel	....	5 70
Mild steel	....	5 50
Norway iron	11 00	13 00
Toe caulk steel	....	6 25
Sleigh shoe steel	....	5 50
Band steel, No. 10	....	5 75
Do., No. 12	....	6 00
Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Tin Basis Easier; Spelter Firm

Toronto.

INGOT METALS.—A lower basis on tin has generally been established. Supplies seem to be quite ample for all demands and there is very little movement. Spelter seems to have firmed up, supplies being offered being picked up quite quickly and it has developed now that stocks are none too plentiful. Antimony is down another cent per pound.

COPPER.—The situation is without any material change. There is very little being released for commercial purposes as yet, and as the fixed price stands until January 1 it is known definitely there is no need for shading the quotations on this metal. Locally the prices hold at around 30 to 32 cents per pound.

TIN.—A basis of 85c per pound generally has been established on tin. The range runs up to 90c, but the lower figures are most generally accepted. Supplies are considered ample for the demand, and there is comparatively little trading going on.

SPELTER.—Offerings which seemed to be quite liberal a few days ago have been snapped up quite quickly, and the market is none too free of supplies. This has had a tendency to stiffen the tone of the market somewhat, although no quotable change has been reported, 11c per pound being the figure generally prevailing.

LEAD.—There is no material change in the situation on lead. Supplies are still scarce and commercial interests are not obtaining allotments freely. This situation is expected to obtain for some little time. Quotations hold at around 10½ to 11 cents per pound.

ALUMINUM. — Commercial requirements are still held in abeyance. There does not seem to be any immediate opportunity of securing big supplies, and the market is expected to come back to more nearly normal conditions gradually. Quotations nominally may be said to range at 50c per pound.

ANTIMONY.—A further decline of one cent per pound has been made in this metal. This brings the quotations down to 11 cents, and there is no indication that the bottom has yet been reached. However, it is expected that the prices wil go down a little more easily than they have been doing from now on.

PIG IRON.—The situation in regard to iron is really unchanged. The furnaces are pretty well sold up for the first half of next year, and this will have a tendency to stabilize the markets as well as prevent any possible glut of supplies. However, it is expected that it will be somewhat easier to secure pig iron and maintain production on a more nearly normal basis. In the meantime the situation is without any special features.

Black Sheets Decline 50 Cents

Toronto.

SHEETS, PLATES.—New prices have been established on black steel sheets in some quarters, which represent a decline amounting to 50c per 100 pounds. Supplies are still light in some gauges, but orders for delivery at a later date will be accepted on basis thus established. The outlook seems to be improving as far as securing supplies are concerned, and indications are that a fair movement will soon be in progress which take care of the most pressing needs of the trade. Galvanized sheets are steady during the week, with prices ranging from $11 to $12 per 100 pounds for 10¾ oz. Whether this basis will be maintained when supplies are freer is a question, but it seems possible that another $1 may be taken off the price in a few months, when stocks are more nearly their normal level. The demand for immediate requirements is considered fairly satisfactory.

BLACK SHEETS—	Per 100 lbs.
10 gauge	$8 50-$10 00
12 gauge	8 35- 9 60- 10 00
14 gauge	7 90- 8 40- 8 90
16 gauge	8 00- 8 55- 8 55
18-20 gauge	7 80- 8 05- 8 80
22-24 gauge	7 85- 8 10- 8 85
26 gauge	7 90- 8 15- 8 90
28 gauge	8 00- 8 25- 9 00
3/16-inch plate	....- ....- 8 40
¼-inch boiler plate	.... 8 00

Prices shown are for full cases. An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$11 00	$12 00
U.S. 28	10 70	11 70
U.S. 26	10 40	11 40
22 and 24	10 25	11 25
18 and 20	10 10	11 10
16	9 95	10 95
14 gauge	9 85	10 85

Prices shown are for full cases An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Corrugated Sheet Outlook Unchanged

Toronto.

CORRUGATED SHEETS.—The situation in corrugated sheets shows no material change, orders coming to hand being largely for immediate consumption, it is felt. There have been no new developments in eavetrough or conductor pipe either, prices holding steady and without change. Manufacturers are in hopes that supplies of sheets will be released with greater freedom so that production can be speeded up as demands warrant it, without being held back, owing to shortage of stocks. The outlook for future business can be termed hopeful. Quotations on corrugated sheets are held nominally at following figures:

SHEETS WILL BE MORE PLENTIFUL

One of the best authorities on black and galvanized sheets, on a return from a visit to United States sheet mill districts, advises HARDWARE AND METAL that, in all probability, there will be a good supply of black and galvanized sheets available in the near future. Mills have a considerable amount of business on their books, and are not allowing cancellations. They have adopted a firm attitude in this respect. Regarding prices, this authority expects that prices will hold around present levels for some time to come. Government fixed prices will prevail until Jan. 1, after which, it is said, there is a possibility of a renewal of Government regulations. Even though no further action is taken by the Government, it is thought that prices at the mills will maintain strength for some months to come. It is felt, however, that some distributors of sheets will have to forego in the future some of the premium which they have enjoyed during the past few months and that price re-adjustments will be necessary in a few instances. Present mill prices, it is said, do not justify some of the high prices which have been asked by some jobbers. In justice to other jobbers, however, it should be stated that in most cases profits have been very moderate. Back of all is pig iron, and this authority states that in his belief, and from his observations, pig iron prices will continue at present levels, or even higher, for some months in the future.

TORONTO—	Per 100 Gal'zed	Sq. Feet Painted
Corrugated Sheets—		
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50

No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Boiler Tube Prices Not Determined; Pipe

Toronto.

WROUGHT PIPE, BOILER TUBES.—New prices, which it was expected would be available on boiler tubes by this time, are still in abeyance, but as stocks are practically exhausted and there is no news of further shipments rolling, this omission is not felt particularly. Figures given below can be still termed under revision downward. The situation in wrought pipe shows no material change as yet. Some relief in the steel situation may develop, and as this becomes more pronounced supplies of pipe will show a corresponding improvement. Prices shown in current market quotations hold without change.

Boiler Tubes— Toronto—	Per 100 feet Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00

2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Lead Products Hold Without Change

Toronto.

ZINC AND LEAD PRODUCTS.—Manufactured lead products are held in a market that is steady and without change. Pig lead is still hard to procure for commercial purposes, and improvement in this regard may be rather slow. There is no indication of any immediate change in prices shown below. Solder is without any element of particular interest. Prices are well maintained, and it is thought possible that two months anyway must elapse before conditions will provide a basis for any change, if they do then.

Lead pipe, lb.	....	0 15
Lead waste pipe, lb.	....	0 16
Lead traps and bends	....	Net-list

Solder, wiping, lb.	0 40½	0 50
Solder wire, lb.	0 56	0 70
Zinc sheets, lb.	....	0 26

Market on Old Materials Featureless

Toronto.

OLD MATERIALS.—Conditions are unchanged, the market being featureless. Buying interest is lacking and trading is at a standstill. That a change may be made seems possible, and lower prices seem to be the most like trend. In the meantime, nominal quotations are given as follows:

Dealers' Buying Prices—		
Tea lead	$0 05¼	....
Heavy lead pipe	....	0 08
Yellow brass	0 12	0 13
Red brass	....	0 21

No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Wash Boards In Strong Position

Toronto.

WASH BOARDS.—There seems to be some belief that zinc may undergo another advance in price. It is expected that peace demands will be enormously increased, the varied uses of this being a factor. This may be reflected in higher prices on wash boards, though no definite action has been taken as far as can be ascertained, along these lines.

LONDON MARKETS

LONDON, Ont., November 28.—Prices generally show an advance this week over previous figures. This is particularly noticeable in sand paper, which records one of the sharpest advances yet reported. An advance of 50c has been made in another line of oil heaters. Other lines which have been revised to higher levels are automobile oil measures, Chicago spring butts and blanks, and wire lawn rakes.

The colder weather here has stimulated business, and sales on axes, cross-cut saws, ash sifters, stove boards and other seasonable lines have been very satisfactory. Christmas goods are also moving forward quite steadily, and a good business is looked for on these lines.

Sand Paper Goes Up; Butts, Blanks Too

London, Ont.

SAND PAPER, SPRING BUTTS.—New discounts have been named on B and A. sand papers and emery cloth. These provide for very sharp advances in both of these lines, but definite figures have not been yet worked out. These will be available in a few days and will appear in these columns.

Higher prices are announced on Chicago spring butts and blanks. Net prices are figured by adding 40 per cent. to the list price. This is a substantial increase over former figures.

Sinks Higher; Stove Boards, Sifters Selling

London, Ont.

SINKS, STOVE BOARDS, ASH SIFTERS.—Higher prices are again the order on the cast enamel sinks. New prices have just been issued which show a substantial gain over figures formerly in effect. On the new basis the 16 by 24 inch sink is quoted at $6.30; the 18 by 30 inch sink at $8.10, and 18 by 36 inch sink at $9.72 each.

Sales of stove boards continue to be made quite readily. There has been no change in the discount, and the Elite remain at 30 per cent. off list. Ash sifters are also moving forward freely at unchanged prices. The Banner at $3.45 each, the Rocker No. 1 at $5.50 each, and the Daisy at $15.00 per dozen are prices ruling in this market.

Oil Heaters Up 50c; Oil Measures Higher

London, Ont.

OIL HEATERS, OIL MEASURES.—An advance of 50c each has been made in the McClary oil heaters. On the new basis the price of the No. 860 nickel plated, is $4.75 each, and the No. 860 blue enamel, $5.50. This follows on the heels of advances made in other manufacturers' lines.

New prices have been issued on automobile oil measures. These are higher than those formerly ruling. The one pint are now selling at $7.37 per dozen; the one quart at $10.24, and the one-half gallon at $12.65, stamping included.

Lawn Rakes Up; Axes, Saws Moving

London, Ont.

LAWN RAKES, AXES, SAWS.—A further advance has been reported in the wire lawn rakes as will be noted in the new prices out; the 24 tooth size is now quoted at $10.75 per dozen.

A very good sale of axes is reported at the present time. There has been no change in price. Handle axes, Eagle brand, are selling at $15.75 per dozen; Cherooke at $17.50, and True Set at $19.00. Axe heads are also firm and unchanged, the Cherokee selling at $15.00 per dozen; Keystone at $13.25; Hand made at $15.50; W. V. Special, $14.75; Black Diamond, $16.00, and True Set, $16.00.

A very good sale of cross-cut saws is also in evidence and prices are as given herewith: Simonds, Premier, Maple Leaf, Lance, Racer, Pangburn, Arrow Head, 5 feet, $4.95 each; 5½ feet, $5.85 each; 6 feet, $6.60 each; Champion, 57c per foot; Philadelphia Lance, 57c per foot.

Skates, Sticks, Sleds Now Moving

London, Ont.

SKATES, HOCKEY STICKS, SLEDS.—A large proportion of booked orders

for skates have gone forward and retailers report there is some interest now being shown by the consuming public. There has been no change in prices to the trade, the Starr lines still being quoted at 30 per cent. discount from list.

Hockey sticks are another line which are becoming more interesting, and prices on these show no change whatever. On the present basis the Boys' Red or White remain at $1.25 per dozen; the Rock Elm remain at $3.20; Spalding at $5.75 and the Rex at $7.25.

Sleds are also unchanged and some inquiry for these is also being experienced. The Canadian Buffalo Sled Co. line is unchanged in price at 35 per cent. discount from list.

White Lead in Oil Firm; Putty Moving

London, Ont.

WHITE LEAD, PUTTY.—There has been no change in the situation on white lead in oil. Prices are firm and remain unchanged and no revision is looked for for some time to come. The booking date has been extended to April 1, and this will probably mean a very firm market during the intervening period. The price on the pure white lead in oil in ton lots is $17.80 per 100 pounds, and lots less than tons, $18.15. Pure Elephant white lead in oil is quoted at $18.30 per 100 pounds in ton lots, and $18.65 in less than ton lots.

A very good sale of putty is still being maintained at unchanged figures. The Standard in 100 pound drums is quoted at $6.75 per 100 pounds, and in 25 pound drums, $7.00. Pure Putty in 100 pound drums is $8.75 per 100 pounds, and in 25 pound drums, $9.00.

A fair sale of glass still continues to be made. There has been no change in the discount, both single and double diamond selling at 25 per cent. discount from list, in full box lots.

Linseed Oil Down; Turpentine, Too

London, Ont.

LINSEED OIL, TURPENTINE.—After two or three weeks of advancing prices, the market on linseed oil seems to have taken reverse action. The seed market is still rather excitable, declines towards the latter part of last week and first of this week being followed by advances which seem fair to overcome the declines reported. In the meantime the market locally is ruling at prices which show a decline of 10c per gallon.

Southern markets on turpentine seem to have been stopped in their upward trend and whether this really means that the peak has been reached or just a temporary lull in the upward movement, is still somewhat uncertain. Prices locally have declined 1c per gallon to reach levels below:

Linseed Oil—Raw, 1 to 2 bbls., $1.77 per gallon; 3 to 5 bbls., $1.76 per gallon; 6 to 9 bbls., $1.74 per gallon. Boiled—1 to 2 bbls., $1.80 per gallon; 3 to 5 bbls., $1.79 per gallon; 6 to 9 bbls., $1.77 per gallon. Less bbls. at 10c gallon.

Turpentine—1 bbl. lots, $1.19 imp. gallon; 2 to 4 bbl. lots, $1.18 imp. gallon; 5 gallon lots, $1.29 imp. gallon.

WINNIPEG MARKETS

WINNIPEG, Nov. 28.—Among the articles to advance during the week appear turpentine, resin, belt fasteners, pipe stocks and dies, pliers and glass cutters, all of which lines show only a moderate increase. Markets in general show a steadier trend than at any time during the past year, due, no doubt, to the cessation of hostilities, and similar conditions are expected for some time to come.

Business is reported as quiet in all lines, with the exception of Christmas goods. This is due to the epidemic of influenza, however, and as soon as conditions are again normal business conditions will, it is thought, improve.

Belt Hooks Move Up 10 Per Cent.

Winnipeg.

BELT HOOKS. — Due to increasing costs new prices have just been announced on steel belt hooks or fasteners. These move up approximately 10 per cent., making to-day's selling prices as given herewith: No. 10, 27c; No. 9, 31c; No. 8, 39c; No. 7, 47c; No. 6, 66c; No. 5, 85c per 100.

Wrench Prices Holding Steady

Winnipeg.

WRENCHES.—Market prices on nut and pipe wrenches are holding firm at former quotations, with the stocks reported well assorted. To-day's ruling prices are herewith confirmed:

Nut Wrenches—Agricultural— 6-inch, $7.00; 8-inch, $8.40; 10-inch, $9.80; 12-inch, $12.60; 15-inch, $16.80 per dozen. Perfect Handle—6-inch, $15.00; 8-inch, $18.00; 10-inch, $21.00; 12-inch, $27.00; 15-inch, $36.00; 18-inch, $48.00 per dozen.

Pipe Wrenches—Stillson—6-inch, $1.10; 8-inch, $1.25; 10-inch, $1.40; 14-inch, $1.95; 18-inch, $2.75; 24-inch, $4.00; 36-inch, $7.45 each.

Pipe Stocks and Dies Up 5 Per Cent.

Winnipeg.

PIPE STOCKS AND DIES.—Following the recent advance in Butterfield's products, new prices are now effective on their pipe stocks and dies, which move up from 5 to 7½ per cent. To-day's selling prices figured on the new basis are as follows: Butterfield pipe stocks and dies, No. 1, $8.25; No. 1½, $7.50; No. 1¾, $7.50; No. 2, $11.00 per set.

Sand Paper Due For Advance

Winnipeg.

SAND PAPER. — Manufacturers of sand paper have withdrawn prices, due to increasing costs, and new quotations representing an advance will no doubt be announced at an early date. Prices in the meantime remain firm locally at former quotations which are confirmed as follows:

Sand Paper—	Star. Quire.	Star. Ream.	B. & A. Quire.	B. & A. Ream.
No. 00	38c	$7.20	45c	$8.50
No. 0	38c	7.20	45c	8.50
No. 1½	38c	7.20	45c	8.50
No. 1	39c	7.50	47c	9.00
No. 1½	43c	8.10	50c	9.60
No. 2	46c	8.70	55c	10.50
No. 2½	49c	9.30	60c	11.00
No. 3	57c	10.80	67c	12.75

Pliers, Glass Cutters Revised; Up

Winnipeg.

PLIERS, GLASS CUTTERS.—Prices on a few lines of Red Devil pliers as well as glass cutters have been revised during the past week, registering advances of from 5 to 10 per cent. Prices now ruling are as follows: Fence pliers, No 1001, 6 inch, $8.25; 8 inch, $10.00; 10 inch, $11.50 per dozen; Side cutting pliers No. 3700, 6 inch, $8.50; 7 inch, $12.75; 8 inch, $14.25 per dozen; Circular glass cutters, No. 033, $5.40 per dozen.

Prices Maintained on Shovels and Scoops

Winnipeg.

SHOVELS, SCOOPS.—No change is reported during the week on shovels and scoops, all prices holding firm at former levels. Stocks are reported as satisfactory. To-day's ruling prices are given below:

Shovels—Olds and Fox, D. H., Sqr. Point, $15.05 per dozen; L. H., Sq. Pt., $15.05; D. H. Rd. Pt., $15.05; L. H. Rd. Pt., $15.05. Bull Dog and Jones—D. H., Sq. Pt., $16.30; D. H., Rd. Pt., $16.30; L. H., Rd Pt., $16.30; L. H., Sq. Pt., $16.30. Scoops—Black Cat and Crescent—No. 4, $19.00; No. 6, $19.50; No. 8, $20.00; No. 10, $20.50 per dozen. Moose and Jones—No. 4, $19.90; No. 6, $20.90; No. 8, $21.40 dozen.

Coil Chain Firm, Unchanged

Winnipeg.

COIL CHAIN.—Coil chain prices still hold firm on the local market, with stocks reported about normal. Prices still ruling are confirmed herewith: Coil chain, 3-16 inch, $18.40; ¼ inch, $16.00; 5-16 inch, $13.60; ⅜ inch, $12.40; 7-16 inch, $12.20; ½ inch, $12.00; 9-16 inch, $12.00; ⅝ inch, $11.75; ¾ inch, $11.50; 1 inch, $11.25 per 100 pounds. Logging chain, 5-16 inch, $15.40; ⅜ inch, $14.20; ½ inch, $13.80 per 100 pounds.

Turpentine Up 5c; Rosin Higher

Winnipeg.

TURPENTINE, ROSIN.—Turpentine prices this week again register a further advance of 5c per gallon over former quotations. Stocks are reported very low, and show no signs of any improvement in the near future. Present stocks are selling quite freely at to-day's prices which are as follows: Turpentine, barrel lots, $1.25 gal.; ½ barrels, $1.28; 5 gal. lots, $1.30 gal.; 1 gal. lots, $1.30 gal.; plus the usual extras for containers.

The price of rosin has shown a further

revision during the week after holding firm for the past six months. This is now selling at 8c per pound.

Linseed Oil Rules Unchanged

Winnipeg.

LINSEED OIL.—Although linseed oil prices are still holding firm on the local market, higher prices are looked for in most quarters, as flax seed continues to advance. Indications all point to higher levels for this commodity. To-day's ruling prices are confirmed as follows: Raw linseed oil, $2.20 gal.; Boiled linseed oil, $2.23 gal. in single barrel lots.

Galvanized Sheets Decline $1.00

Winnipeg.

GALVANIZED SHEETS.—A decline in galvanized sheets amounting to $1 per 100 pounds has been recorded. On the new basis prices now in effect are as follows: 10¾-oz., $11.50 per 100 pounds; 28-ga., $11; 26-ga., $10.70; 24-ga., $10.55; 22-ga., $10.55; 18 and 20-ga., $10.40; 16-ga., $11.25.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Nov. 28.—The policy of the government as to reconstruction is probably as well defined as such a thing can be only a fortnight after the sudden cessation of hostilities, but it does not follow that the course of affairs will follow the desires of those who have undertaken to regulate matters. Necessarily, the powers of the government are much more limited than they were in the war period.

As to cancellations of war orders, the government continues to follow the policy outlined in last report, of refraining from cancelling orders on which work is being done, if that would result in idleness of plants or workmen. How long this policy can be continued is naturally a question, for the object is to allow activities to change from the making of war to the making of peace material, and it cannot be determined how soon a sufficient volume of peace work for the iron and steel industry will develop. The government can keep up the war work for a time, but of course not for any great length of time.

Cancellations of orders on which work had not been started has proceeded very rapidly. The cancellations and readjustments to date, including all classes of material, probably amount in value to $1,500,000,000 or more.

Priorities and Preferences

Practically speaking, the entire priority and preference system is wiped out. The formal order is that the preference list is discontinued and the priorities, both individual and automatic, are annulled, except orders for the Navy Department, the Fleet Corporation, and railroads and telephone and telegraph lines. With the pressure removed by other priorities being discontinued, no producer will have any difficulty in making deliveries at times desired by the activities still accorded priority, hence those priorities are merely a safeguard, and deliveries would probably be made just the same if there were no priorities at all. If demand should remain such as to keep the mills continuously busy, the decision as to which material shall be shipped first is left to the mills, thus restoring the old order of things. In normal times the mills do not fill their orders in rotation, but in accordance with their knowledge of the needs of their customers, the object being to maintain the operations of all customers as equitably as possible.

Character of Present Demand

There has developed what appears to be quite an insistent demand for steel, but this demand may be misleading if it is not scrutinized carefully. Naturally the first flash of demand, after the mills have been crowded to capacity, and more, for a trifle over three years, many consumers have been starved as to steel, and prices were at a war-time rather than a peace-time level, cannot be expected to reflect in either volume or character, the demand that is to be experienced in settled times over a period of years. That there will be for quite a while say from two to five years, a demand for approximately all the steel the industry can produce, is the common opinion, but this demand cannot necessarily be expected to develop at once, because the matter of price plays such an important part. There are all classes of buyers as to the period in which they expect to liquidate their purchases. As illustrative, two extremes may be cited, the jobber who has customers demanding material at once, and who can, perhaps, buy from a mill and have the material sold and paid for within thirty days, and the investor in a highway bridge, certain to bring in revenue for 20 years, and which, therefore, can be undertaken with the idea of its returning the capital invested in installments over a period of twenty years. The one buyer of steel need scarcely look ahead thirty days, while the other is disposed to look ahead twenty years. A well rounded-out demand for steel requires that there be buyers of all descriptions.

To-day the particularly insistent demand for steel comes from jobbers and from automobile builders. Other classes of buyers are not conspicuous in the market. The jobbers are importuning the mills and mulling over stock lists, being glad in some cases to take even a single ton of material that may chance to be in a mill stock. The jobbers show no disposition to build up their stocks except in items that are very deficient, and their general policy is to have their inventories as light as possible on January 1 for several reasons, one being the manner in which profits and taxes for 1918 must be computed. As to the automobile builders, there is believed to be a heavy demand for cars, and the makers have notified the public that they must not expect reductions in prices of cars before the end of the spring selling season. For the cars to be built in the next few months the automobile builders need not be particular as to prices paid for steel, for they know they can make a profit in turning into cars the steel they can buy on the present market.

The present flash of demand, therefore, does not bear the earmarks of permanence. The real issue is as to when the investment buyer will come into the market, when there are buyers of steel who expect to secure the return of their capital in periods of five, ten and more years. Such buyers will wait if they think the investment will cost them 10 per cent. less six or nine months later. They want to see a rising market rather than one which is likely to decline if it moves at all.

Price Prospects

Steel makers presumably know their own business, and for several weeks past their talk has been that the government ought to set minimum prices for steel, for the transitionary period, to replace the maximum prices that have hitherto obtained. There is every evidence that the steel trade expected a slump in prices if there were not artificial control. It has become established, however, that the government will not and cannot set minimum prices. At first it was thought the Sherman law, against conspiracies in restraint of trade, might stand in the way, but the second thought has been that even if it were not for that law, the United States government cannot set minimum prices when it has no means of punishing anyone who would cut prices and thus violate the order. The government has been rather strenuously engaged of late in an effort to prove to Germany that it was not "bluffing," and it would hardly be in keeping with its traditions for it to undertake now to issue orders which it could not enforce. This new thought leaves it that the War Industries Board may continue to fix maximum prices for a time, as it has done hitherto. The present limits were set to run for deliveries through December 31, and prices might therefore be fixed in the next few weeks to run for the first quarter or first half of the new year. The common expectation in the past few days has been that this will be done.

OVERSEAS DEMANDS FOR GASOLINE CONTINUE

A steady demand prevails for gasoline and with no great difficulty experienced in fulfilling requirements, the occasion for further regulation of supplies for private use is being steadily discounted. No early relaxation of government authority over the overseas movement is, however, expected, as the need of motor fuel for transportation and other purposes incidental to the restoration process abroad is still keen. For aviation requirements the demand has been curtailed.

WEEKLY PAINT DEPARTMENT

Why Not Co-operate in Paint Selling

Dealer of Many Years' Experience Urges Retailers to Get Together in General Campaign of Paint Publicity—Thousands of Buildings All Over Canada Need Paint, Many Not Having Been Touched Since War

A SUGGESTION comes from a retailer of many years' experience in paint selling that the hardware men of Canadian towns and cities might co-operate advantageously in a general campaign of paint publicity. In a broad way, he states this might well be conducted with individual as well as collective benefit to the trade of the places following the plan.

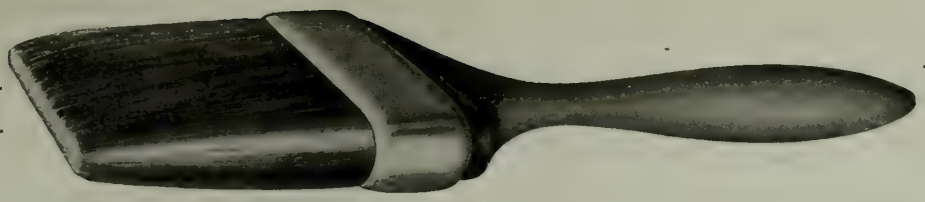
The war has kept many from painting during the last four years. This would be a logical start for arguments of a more general painting of buildings that need the preservative qualities embodied in good paint. It would be considered good business by many, no doubt, to engage in a campaign of publicity on a larger scale than an individual dealer would feel justified in planning for himself. To do so on his own account would be costly, that is, if this were done in a big way.

VALUE OF CO-OPERATION

Every hardwareman to-day has his line of paint on which he has sought to build a trade worthy of his attention and cultivation. To engage with his fellow hardwaremen in stirring up the citizens of his town and district would enable the trade to reach all the prospects within a wide area. Larger space might be taken in the local paper. The combined effort would secure this publicity at a relatively small cost to each, and the eventual results would be greater. The various ideas to be pooled in such a scheme of education as to the preservative and beautifying value of good paint, would bring out many points that might not be developed when one was conducting his own campaign. The concerted effort, the correspondent believes, would more widely develop the better spirit of friendliness which is, he fears, quite lacking in some parts of the country.

GOOD TIME TO PLAN

It is early to plan for a campaign along these lines. It is not too early to give attention to tentative arrangements, and with winter approaching, a get-together series of meetings might be planned, having in mind the launching of a big campaign toward spring.



There is unquestionably a big field open all over Canada for a paint campaign in the spring. For more than four years sun, wind, rain and frost have had uninterrupted opportunities to work on thousands of buildings. Thousands of other buildings have been given only one or perhaps two coats of paint in that time. If they are to be saved from becoming a prey to the destructive forces which are constantly at work they should be gone over again.

If dealers get together and present this side of the case forcibly they should be able to turn over a lot of business, and if the manufacturers co-operated also in their advertising would help matters along very materially.

EXPENSE NOT HEAVY

The expense of a campaign that should produce effective results need not be heavy. Distributed among the merchants the outlay would be comparatively small for the increased sales that might reasonably be expected to follow. In various "Clean Up" campaigns inaugurated in different Canadian cities and towns, the merchants have many times co-operated with most satisfactory results to themselves and at an outlay that was comparatively insignificant.

Any amount of evidence regarding the need of painting may be gathered all across Canada and a series of advertisements strikingly illustrated, and filled with facts of the most convincing nature, could be prepared in a short time.

A Record of More Than 60 Years As Makers of High Class Brushes!

IN connection with good brushes and good brush service, the name Boeckh is famous throughout Canada wherever Brushes are used. You can sell a Boeckh Brush **quicker** and you can sell **more** Boeckh Brushes than any other make, and you can rest assured that your customers will remain good customers as long as you remain in business.

Boeckh Brushes are "Steel Grip-Rubber Set"—they're built to serve and last—to give absolute satisfaction and hold your customers' trade.

Build your business upon a rock—sell Boeckh's.

The Boeckh Company, Ltd.

TORONTO, ONTARIO

The Logical Answer to The Paint Question Is---

MOORE'S

When a customer asks for paint, what do you sell him?

Do you sell him **just Paint,** or is it Moore's Paint?

Painters and Householders everywhere are insisting upon Moore's.

Hardware dealers are thus making more and larger profits, besides creating a steady supply of satisfied customers.

Moore's Paints, Varnishes and House Colors stand up under all weather conditions, are 100% efficient, and unsurpassed in wearing qualities.

We also manufacture the famous Muresco Wall Covering.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Nov. 28. — Lower prices for linseed oil and higher for turpentine are the outstanding events of the paint market this week. Oil reacted to the extent of 11c per gallon in some instances, but with the closing of navigation in the immediate future a strong probability it is expected that there will be no further reaction. The flaxseed market, after a downward movement for several days, reacted again early in the week and is firmer at this writing. Turpentine is much higher and scored advances of 5c to 6c per gallon. There is very little to be had at this increase of price, and for small lots as much as $1.30 per gallon is asked. In a general way the amount of business coming forward is very satisfactory, and the outlook indicates a big season's business in 1919.

Linseed Oil Down 11c; *May Hold Here*

Montreal.

LINSEED OIL.—From the quotations of last week a decline of 11c per gallon has been recorded. This was a direct result of a lowering flaxseed market, and the reaction was brought to a standstill early in the week, and prices rose a few points. There is little indication that prices will further decline, say the crushers. This seems to be the more likely because the lake insurance rates cease at the end of this week, and water routes are likely to close at any moment.

LINSEED OIL

Raw, Imp. Gallon—	
1 to 4 bbls.	$1 73
5 to 9 bbls.	1 72
10 to 25 bbls.	1 71
Boiled, Imp. Gallon—	
1 to 4 bbls.	1 76
5 to 9 bbls.	1 75
10 to 25 bbls.	1 74

Five to Six Cents Added to Turps.

Montreal.

TURPENTINE.—There has developed a very strong feeling in the turpentine market and the price had risen from 5c to 6c per gallon. This is due to the increased scarcity of the product. Paint companies are using much and are not seeking business, desiring to husband what they have for their own use. The outlook is for a maintenance of the firm market now obtaining.

Turpentine.	Per Imp. Gal.	
1 to 4 barrels	$1 15	$1 18
5 barrels and over	....	....
Small lots	1 21	1 30

(Packages extra)

Putty Business is Now Seasonable

Montreal.

PUTTY.—There is no change in this commodity, the prices for any business being booked from now on holding as quoted hereunder. The bookings coming to hand are satisfactory, and the present business is seasonably good.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Steady Position For White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—There is nothing of new interest in this market, and the sales are just about what might be expected for this late season of the year. The manufacturers' needs are large, and a great deal of the supply finds its way into the manufactured paint products. Ton lots are selling on the basis of $17.50; five-ton lots at $17, and small quantities at $17.85 per 100 pounds.

Mixed Paint Orders Are Satisfactory

Montreal.

MIXED PAINT.—The market is a steady and unchanged one. The immediate business being accorded the manufacturer is naturally lighter, in accordance with the advance of the season. As regards future business, the trade expresses its satisfaction with the outlook. While orders are carefully made up and of moderate quantities, in many cases there is still a big lot of them. The outlook is for a firm maintenance of the present price basis.

TORONTO

TORONTO, November 28.—Lower prices on linseed oil amounting to 10c per gallon, and on turpentine of 1c per gallon, have been recorded during the week. The decline in flaxseed late last week and early this week brought about this result, and the higher prices now developing in flaxseed may bring the price of oil up again. Southern markets on turpentine are quiet, and opinions are unanimous that high prices will rule for some time to come. Mixed paint orders are coming along quite well, and the outlook for spring considered good.

Linseed Oil Comes Down 10c

Toronto.

LINSEED OIL.—Declines amounting to 10c per gallon on linseed oil have been recorded in some sources, while lower prices named early this week by others have been overcome by advances to-day. The seed market is very erratic, and late last week experienced marked declines, which extended to Monday of this week. Since Monday prices have started on the upward trend, and a continuation of this movement will mean that higher prices on oil must come. It is difficult to gauge the market just now, supplies coming to hand being comparatively small owing to sickness, which is keeping farmers back from marketing their seed. Latest crop estimates show that results secured and expected are at wide variance, the crop falling considerably below early estimated. However, there is enough seed for some months, the problem facing the crushers being to get it along in sufficient volume to maintain operations at production point wanted. Quotations this week follow:

Linseed Oil—	Raw Imp. gal.
1 to 2 barrels, gal.	$1 77-$1 86
3 to 5 barrels, gal.	1 76- 1 85
	Boiled Imp. gal.
1 to 2 barrels, gal.	$1 80-$1 88½
3 to 5 barrels, gal.	1 79- 1 87½

Add 10c gallon in smaller quantities.

Turpentine Makes Decline of 1c

Toronto.

TURPENTINE. — Southern markets record a slight break, and the market rules with an easier tone. It is believed this is a move to stimulate buying, and once buying interest is again in evidence prices are looked to keep going upward. The trade are looking for some movement overseas, and once space is available there will probably be a strong market develop. Locally supplies are considered very fair, though some interests report a scarcity. The demand at the present time is rather limited, and being well taken care of. Range of prices to-day follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 15-$1 19
2 to 4 barrels (barrels included)	1 14- 1 18
5 gallon lots	1 25- 1 29

MARTIN-SENOUR
PAINTS AND VARNISHES

MADE IN CANADA—SOLD ON MERIT

PIONEERS
of
PURE
PAINT
and
STILL FIRST
in the estimation of
PAINT USERS.

The Paints and Varnishes that fortify you against complaints and make a Big Advance in your turnover.

The exclusive Agency for this line is a most valuable asset to any merchant's business. Martin-Senour Paints and Varnishes are now so well known for their unsurpassed quality and from the fact that they are so extensively advertised, that more and more people are attracted to the store where they are handled, and consequently they are the easiest and most profitable to sell.

The high quality of each and every Martin-Senour Product is such as to retain and increase the demand of those who have once tried them.

Martin-Senour sales help and co-operation is the strongest, consisting of the most effective features of Interior and Exterior Displays, Mailing Campaigns, Follow-Up Systems, and direct help of Salesman.

This policy will not be curtailed.

It will be **continued** and **strengthened.**

Drop a line for our Proposition, but do it to-day.

The MARTIN-SENOUR Co.
LIMITED
PRODUCERS OF PAINTS AND VARNISHES
WINNIPEG VANCOUVER MONTREAL TORONTO HALIFAX

Mixed Paint Orders Coming

Toronto.

MIXED PAINT.—Advices from manufacturers generally indicate that retailers are booking quite readily for their requirements for spring. The outlook for next year's business is considered excellent, and the feeling prevails that the paint trade should experience one of the best years in its history. New work coming on and painting which has been put off, present opportunities for sales which the retailer will push for aggressively.

White Lead in Oil Remains Unchanged

Toronto.

WHITE LEAD IN OIL.—There has been no material change in the situation as it affects white lead in oil. Retailers are placing for their needs, and that there will be a good movement experienced in the spring is the consensus of opinion. Prices during the week show no change, pure white lead in oil ruling with a firm undertone at $17.80 per 100 pounds in ton lots, and $18.15 in smaller quantities. The various brands are shown in current market quotations.

Broom Outlook One of Strength

Toronto.

BROOMS.—Latest advices received, relative to the broom corn crop, indicate that severe damage has resulted from the heavy rains, and even snow getting into the corn when it was stacked up. This has caused rust, and a very large percentage of the corn can be called defective, with some utterly useless. These are factors which may result in good corn going much higher. Already it is noticeable that there is very little for sale, which would indicate that holders of good quality corn are looking for higher prices.

Glass Outlook Steady; Putty Moving

Toronto.

GLASS, PUTTY.—The market on window glass rules without any material change. There is some movement to the trade, but this is not heavy by any means. Stocks, though not considered heavy, are equal to present demands. Prices are firm and rule with a strong undertone at discounts shown in current market quotations. Putty is moving along fairly well and the tendency is towards a very well maintained market. Quotations rule at following levels:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

IMPERIAL MUNITIONS BOARD PUTS LOTS OF TOOLS ON THE MARKET

THE Imperial Munitions Board has made the announcement that they are going to liquidate their entire business properties as soon as possible. In fact, some days ago at Ottawa, Sir Joseph Flavelle stated to this paper that the Imperial Munitions Board existed now simply for the sake of going out of business.

The first break will likely to made in the aviation department, which has a number of well-equipped establishments, where a large amount of machine tools and supplies have been put in. As a matter of fact the lists are being prepared now, setting forth the machinery that is contained in these shops. These lists will be forwarded to the various places where purchases will most likely be made in the near future. When the dismemberment of the big establishments also starts, the chances are that there will be some crowding of the machine tool market.

Offers to Sellers

A representative of HARDWARE AND METAL talked with one of the officers of the aviation board.

"We are getting ready now to offer the equipment in all the shops that are under the direction of this department," stated the official.

"How about the dealers who sold the equipment? Were there any cancellation provisions with them?"

"In some cases," replied the official. "As a matter of fact we followed the following programme in every case: The manufacturer of every machine had a chance to take the machinery back, but in no case was this done. They claimed they did not want them, and so we are going ahead to dispose of them by ousting them."

General Purpose Material

There is considerable general purpose machinery in the lot, and the chances are that the throwing of it on the market at this time will have a tendency to flood the situation for a time. Speaking of this aspect of the case, Mr. F. W. Evans, the Toronto manager of the Canadian Fairbanks-Morse Co., stated to HARDWARE AND METAL that there was no way out of the situation. "We have to look at the thing as it actually is and face it. We have been at war for four years. All the firms have done a big business. They have not lost money. On the other hand they have made it. Now, in a period such as we are passing through we can expect to encounter situations where we are not going to make money. On the other hand we can expect to meet situations where we will lose money. But then, take the whole four years, put your gains down one side and your losses below them and subtract, you will find that you have a good margin left, and that is the only way to deal with the present situation."

"Here is something you should have," remarked the manager of one of the big Toronto concerns to HARDWARE AND METAL to-day. "A number of the munition plants around the country that have had their contracts cancelled are writing to us asking if they can be relieved of the supplies that they have left over, and their accounts credited with the amounts.

"The munitions plants," stated this dealer, "should be prepared to shoulder their share of the losses. We certainly do not intend to take back any of these goods where a bona fide sale has been made. We took the big chance in carrying a big stock of this stuff all the time so that the munitions plants would have a good supply to draw from all the time and delays avoided in production. Now that the demand is off for these special kinds of supplies, it's up to them to shoulder and absorb their small loss, and we will have to do the same in a much larger way."

NATIONAL CONVENTION TO OPEN DECEMBER 11

The annual conventions of the National Hardware Association and the American Hardware Manufacturers' Association, which were postponed by the action of the health authorities of New Jersey, will be held at Atlantic City, N. J., on Dec. 11, 12 and 13.

Editorial Note—The following poem was written by William Jeffery, one of the oldest and best known travelers of the McClary Company, prior to the Victory Loan campaign.

The dawn of peace is breaking;
We're nearly "over the top";
It is no time to falter;
It is no time to stop,
But with redoubled fierceness
We must carry on the fight,
Since "Victory" complete and final
Is even now in sight.
We must conquer, smash and break them:
We must beat them to their knees,
Until each brutal, blinded Vandal
His sins and vileness sees.
We are going to rip up Hunland;
We are going to cross the Rhine;
Through Berlin's streets we will soon parade
In proud triumphant line.

Every ammunition factory,
Every place where guns are made,
Every plant that moulds the cannon
Or tempers warriors' blade,
Must be turned to better purpose
Or levelled to the ground,
And where war's works were rampant
Peaceful avocations found.

'Tis said we lose many battles
But always win the last,
And Britain's sons once more must hold
Their record of the past,
And money, yet more money,
We need to carry on.
Shall we hold back and hamper
Those who have so nearly won,
While they fight and die
That we may safely live?
Let us double up on the Victory Loan
And still more freely give.

Facing the Problems of Reconstruction

"THE end of the war has not in itself relieved the world shortage for foodstuffs, clothing, etc., and the supplies of raw materials have been reduced to such an extent that it will take some time to reach a normal balance. Then there are the needs for reconstruction in Europe to be taken into consideration and the requirements of an army slowly returning to civil life, not to mention that Central Europe is almost bare of commodities. It will take time to make up the shortage.

Prices to Come Down Slowly

"The trades generally have been looking for lower prices since the armistice was signed. They argue that as the war sent prices up so peace would bring prices down. Undoubtedly there will be a gradual lowering of prices. In the majority of lines, however, present prices will probably prevail and in some cases there will still be further advances."

The above is quoted directly from an important article on the front page of THE FINANCIAL POST of November 23rd. Questions of labor and wages are dealt with most interestingly in the same article which is of real constructive value at this time. Note also the importance of these other contents of THE POST of November 23rd:

End of War Does Not Mean End of War Financing.
Investigating the Possibilities of Lignite Supply.

THE large and constantly growing demand for Berry Brothers' varnishes is based upon a foundation that cannot be shaken. Their earned record for high and uniform quality has created confidence in all "Berry" products.

For over half a century Berry Brothers' label has been universally accepted among buyers and users of varnishes, enamels and stains as a guarantee of dependability, and protection against inferior finishes.

You can increase the volume of your varnish business by making a leader of Berry Brothers' line.

Jamieson Sales Mean Larger Profits

ASK

the dealer who has been selling our line.

"HE IS A SUCCESS"

The veteran painter, tried and proved, the man who does paint well.

"HE KNOWS"

The chemist, who can analyze,—he smiles and says

"ALL RIGHT"

Because

It goes farthest.

Covers more space at less cost.

Encourages the inexperienced to paint and brighten up.

It would be a wise thing to stock them now.

You Have Many Times Heard About

Dougall Varnish

You are undoubtedly familiar with the expression, "only reliable products can be continuously advertised."

For years we have been advertising and manufacturing Varnish. We have told the trade how we are ready to co-operate with them in every respect, how our facilities are the most modern, and how our workmanship's the most critical.

Our many customers always stand ready to back up our advertised statements.

Let us show you how you can profitably be a Dougall representative.

The Dougall Varnish Company, Limited

What a Leading Retailer States—

"We have made a huge success of our paint department," stated a leading Ontario retail hardwareman (name on request), "because we are convinced of the superior quality of Lowe Brothers Products; because Lowe Brothers have co-operated with us, and through conferences in our store have taught our clerks how to become better salesmen; because Lowe Brothers make a complete line of products for every painting purpose; because we get prompt shipments, and courteous treatment; because Lowe Brothers dealer helps are of the practical kind that develop sales; because Lowe Brothers packages are so exceptionally neat and attractive that they command attention, make the paint department attractive and have the ideal necessities for making attractive window and interior displays."

You can safely recommend Lowe Brothers products to your most critical customers.

You will find that one sale will create another.

(Continued on second page)

Don't Underestimate The Importance of The Name Behind the Product!

THE name "Silkstone," when used in connection with wall coloring acts like magic in making a sale.

Silkstone is one of the few really good wall colorings that will stand washing.

Silkstone lasts longer, looks better, **is much cheaper than wall paper, and is more sanitary.**

Be sure and see that your customers are supplied with no other.

There's a reputation behind it, which will make it prove more profitable in the long run.

Write for our agency proposition to you.

Ask the man who sells them.

"I'll tell you why I Sell Lucas Imperial French Green-in-Oil."

When you meet up with a Dealer friend who has sold Lucas Greens for any length of time, ask him why he prefers to handle them. He has plenty of reasons,---good sound reasons that should influence you as much as they do him. He'll tell you that he sells Lucas Greens

Because they are always standard.
Because of their unusual brilliancy.
Because of their strength of coloring.
Because of their smoothness.
Because of their covering capacity.
Because they are free from poison.

And he'll tell you also of the satisfaction that comes from passing on to his customers the best colors in the world. He'll tell you of increased sales and profits, of confidence engendered, and of the entire absence of complaints.

Port St., Manchester, Eng.

CARTER'S

QUALITY THE BEST

Your customers will need Red Lead to protect the iron work around their homes.

The Painters want a Genuine Red Lead for their work. Are you prepared for this demand? If not, put in a good stock of

Carter's Genuine Dry Red Lead
and
Carter's Genuine Powdered Litharge

They are the best quality you can buy.

Made in Canada from the best grade of Canadian Pig Lead.

Do you know the quality of these goods? Your customers know it and will insist on using Carter's Brands. Look over your requirements and order now.

Manufactured by
The Carter White Lead Company
of Canada Limited
91 Delorimier Ave. Montreal

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

No. 19

Dazey Churns

The Dazey makes more butter from a given quantity of cream than any other churn on the market. The butter is better worked and when the churning is completed all the globules are gathered together on the dasher which saves the trouble of gathering them from the buttermilk. The square corners of the dasher produce more agitation, resulting in the butter being churned more quickly The whole churn is easily removed and washed. We have them in glass in three or four quarts, and in steel in two, three, four, six and ten-gallon sizes. We can furnish the six-gallon with power attachment to run with a groove pulley.

"Delta" Files

— we'll help you sell them

TRADE MARK DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

Why You Should Be A Michelin Dealer

No. 33

You Will Be Sure to Develop *New Business*

Have you, Mr. Dealer, sometimes said to yourself, "If I only had the time to plan and get out after new business, I'd get ahead faster!"

Our experience shows that many tire dealers do not have time to develop their business properly because they are tied up with the work involved in holding their present business.

This is not as it should be.

It is a trouble from which Michelin Dealers do **not** suffer; for the service which Michelin users get from Michelin Tires is so superior that the Michelin Dealer holds his trade without any difficulty.

If you feel that your present tire trade does not allow you the time you ought to have for development, then write now for Michelin's Dealer-Proposition.

Michelin Tire Co. of Canada, Ltd.
782 St. Catherine Street W., - Montreal

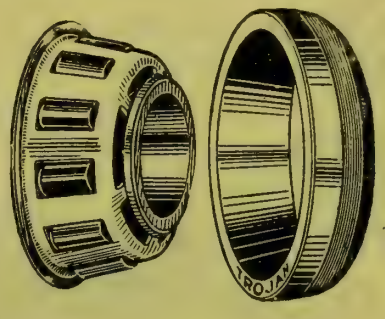
YOUR BEARING PROBLEMS SOLVED!

Simply knock out the old troublesome ones and slip in the new—



FOR FORD CARS FOR CHEVROLET CARS

"TROJAN" ROLLER BEARINGS

It's so easy, thirty minutes will do the trick. You use the same old lock washer, nut and cotter pin.

FORD and CHEVROLET owners will welcome "TROJAN" bearings because they eliminate break-down. Being designed on the same principle as the bearings used in high priced cars their load carrying capacity is many times greater than the old style cup and ball bearings.

"TROJAN" Bearings are an absolute economy in gasoline and on tires. When properly mounted they hold the wheels rigidly in line and parallel with each other, thus avoiding slipping and rubbing.

TRY A SET NOW!

They will repay you many times over by less inconvenience, additional comfort and perfect safety.

Useful and Practical Christmas Gift

CLARK FOOT WARMERS

For Automobiles, Sleighs and Vehicles of all Kinds

Attractive Models Retail at $3.50 and $4.00

3D—Clark Heater. Durable and Attractive. 14 in. long. Weighs 7 lbs.

Some Special Uses

In offices where the floors are cold or drafty.

By Shipping Clerks.

In the home. Appreciated by old folks and invalids.

In sanitariums and hospitals. Convalescents find Clark Heaters a great comfort when sitting out of doors.

In hotel and school 'busses. In florists' wagons.

It costs less than one cent per hour to operate a Clark Heater and get a dollar's worth of real comfort.

Sell the old reliable line—

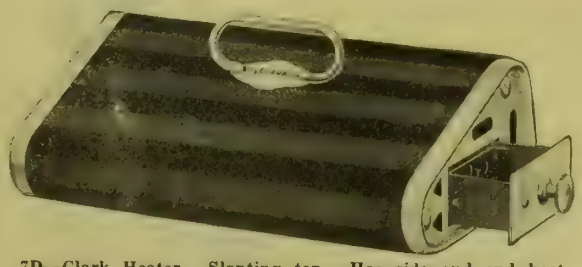
Clark Heaters

and

Clark Carbon Fuel

Used for over 25 years and noted for efficiency and reasonable price.

Over 90 per cent. of all heaters and heater fuel sold in the past 25 years have been **Clark,** and the demand now is greater than ever.



Don't sell untried heaters that are slow to heat up and do not get hot enough to be a real comfort.

A **Clark Heater** makes a practical and attractive Christmas gift.

Now is the time to show the line.

Your jobber can supply you.

Catalogue mailed on request.

7D—Clark Heater. Slanting top. Has side and end heat reegulators. Covered with high-grade material. Metal parts nickel-plated and polished. A very attractive heater and a big seller. 14 in. long. Weighs 9 lbs.

Chicago Flexible Shaft Company

Twelfth St. and Central Ave.

Chicago, U.S.A.

Priming Mixture secured since gasoline is brought directly to the sparking points. Center Automatic-seating needle valve easily operated. No leaky Petcock or side valve to break or interfere with the wrench grip. Ebony finish.

Price, $1.50 Each

Dealers Write For Discounts

Reflex Spark Plugs are guaranteed to be perfect in material and workmanship. Any plug that proves defective will be repaired or replaced free of charge. Money back if not satisfactory.

Royal Canadian Specialties, Hamilton, Canada

Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

Why It Pays!

ADVERTISING in HARDWARE AND METAL is economical because it reaches, and the advertiser only pays for, a circulation of tremendous buying power, which is always on the lookout for new lines and information regarding goods which are already in stock.

Manufacturers and wholesalers cannot afford to side-step the dealers. In nine cases out of ten, the customer accepts the retailer's recommendation.

Ever-Tyte

PISTON RINGS

SAVE GAS AND OIL, AND STOP 90% OF MOTOR TROUBLES

Power saving is imperative. Duty and sound sense both demand "Stop that waste in leaky cylinders".

Show your customers the 15% to 25% saving effected by fitting Ever-Tyte Piston Rings. They are gas-tight, oil-tight, elastic.

Conform precisely to out-of-round cylinders; insure perfect compression and effective suction; prevent power loss, carbon deposits and smoky exhaust.

Ever-Tyte Piston Rings satisfy your customers and pay you a good profit.

Cannon Oilers

Easy Seller Because—

It is exceptionally convenient, quick-acting and an oil saver. Just what meets a long-felt, demand for an oil can in which oil is entirely controlled by the operator in whatever position the can may be held. Not a drop of oil need be wasted, as the flow of oil stops the instant the pressure on the plunger stops.
Ask any Thresherman, Mechanic or user.
A sure good sale and splendid profit.

METALS · CHEMICALS · GLASS
B&SH
Established 1790

Canada's chemicals and metals have helped to win our great victory and as leading distributors of heavy chemicals and metals we have helped to keep Canada's munition plants supplied.

To us, however, PEACE will bring great satisfaction but no rest. The VICTORY is won but the service our firm has carried on for over one hundred years will still go on. More than ever our motto will be Service, which for us means the delivery of the needed quality and quantity, at the appointed time and at the right price.

WE STILL WILL CARRY ON

The Most Popular Ratchet Combination

The "Keystone" Reversible Ratchet combination No. 200 has been proven by many hardware dealers to be the best seller in their localities. It consists of ratchet for taper shank drills, sleeve for square shank drills, and short boiler socket for square shank drills, sockets are interchangeable. All working parts are enclosed, preventing dust and grit from clogging up mechanism.

"KEYSTONE" Drilling Post or "OLD MAN"

Sales of Keystone Ratchets open the way to sales of Keystone drilling posts—the time-saving brace.

"Keystone" tools are known the world over for high quality. Sell them for profit and prestige. Let us know if your jobber can't supply you.

The Keystone Manufacturing Co., Postal Station B, **Buffalo, N.Y.**

The Real Ankle Support That Makes Others Look Like Imitations

Sell Perfection Ankle Supports—the only sure and comfortable ankle support on the market.

Made from the best quality of steel, and is so devised that by means of a hinge and sliding attachment the ankles may bend forward or backward, but simply can not bend sideways.

You'll sell more skates this winter as well as supports if you handle this line.

Write us for prices.

Wanted

Experienced man to represent hardware house. Reply stating experience and connection, if any. Good opportunity for bright party. Lyons & Marks, 38 Yonge Street, Toronto.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

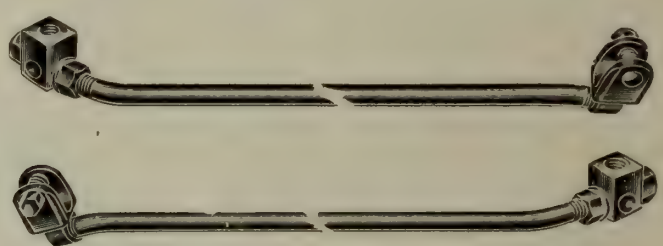
Improved No. 1 Valve Spring Lifter



For Ford Cars

A FEW FACTS:

1. Specially designed for Ford Cars.
2. This Lifter is made of strong, tough, malleable iron.
3. Can be folded together, occupying very little space in tool chest or roll.
4. The improved ratchet holds the lifter in any desired position when compressing a valve spring.
5. You have the free use of both hands.
6. The springs are made from selected spring stock.
7. The slot at the end of arms is **WIDE** and the stock heavy.
8. Length overall, 8¾ inches.
9. Weight for mailing, approximately 1 lb.
10. Carefully packed in carton properly labelled.

LIST PRICE

No. 1 ..... 65 cents each

Auxiliary Radius Rod

for Ford Cars and Ford One-Ton Trucks

You will add 100% to the strength of Axle and Radius Rod already on Ford Cars. The Clamps are Solid and of Selected Malleable Iron. The Bar is **SOLID** ⅝-inch, carefully selected material and machine threaded. The finish is black Japan, properly baked on.

NOTE, **Mr. JOBBER:**

All "Ford" One-Ton Trucks should be equipped with McKINNON HEAVY RADIUS RODS.

WEIGHT ..... 8 lbs. per Set

1,000,000 Motorists Use It 4,000,000 More Need It

The limited supply and high cost of inner tubes makes it necessary for motorists to repair punctures, cuts, tears and cracks—to keep their tubes in good repair.

The present conditions make it imperative for motorists to stop the easy-going, wasteful habit of carrying $5 to $15 worth of spare tubes—that deteriorate quickly—and scrapping perfectly good inner tubes that merely have a puncture, cut or tear—which can be repaired *permanently* with a Shaler 5-Minute Vulcanizer, quicker than a new tube can be inserted.

Saves Tubes–Saves Repair Bills

Easy to Use

Repairs tubes—as good as new. It's easy and inexpensive. *The Shaler works automatically*—and without fail. Just touch a match to the non-flaming chemical fuel. In five minutes you have a firm, flat, "feather-edge," permanent repair—stronger than any "stuck on patch"—stronger than the tube itself. No gasoline, cement or flame, and no danger of injuring the tube. Carry it in your tool box for emergency use. It works in the wind, in any weather, anywhere. The heat is applied directly to the pure gum patch and does not extend to the tube itself.

Easy to Sell

A five-minute demonstration sells the Shaler Vulcanizer easily. Every sale gives you a good profit. The large resale of Patch and Heat Units is profitable and brings new customers into your store, who will also buy other accessories.

Over 1,000,000 Motorists now use the Shaler 5-Minute Vulcanizer for repairing tube punctures, cuts, etc.; 4,000,000 more need it. Every motorist is a prospect for this handy tube vulcanizer—it should be in every car owner's tool box, for emergency use on the road or repairing tubes at home.

Complete Outfit Only $2.00

The outfit includes, the Vulcanizer—12 Patch & Heat Units (6 round for punctures. and 6 oblong for cuts)—complete $2.00. Extra Patch and Heat Units $1.00 per dozen.

Sold By All Accessory Dealers and Jobbers

TO DEALERS—To insure shipments—it is advisable to order from your jobber now. The great demand has exceeded our factory capacity, and shipments will be made according to priority in receipt of orders.

Catalog of the Complete Shaler Line of Vulcanizers for Motorists, Repair Shops and Garages mailed on request.

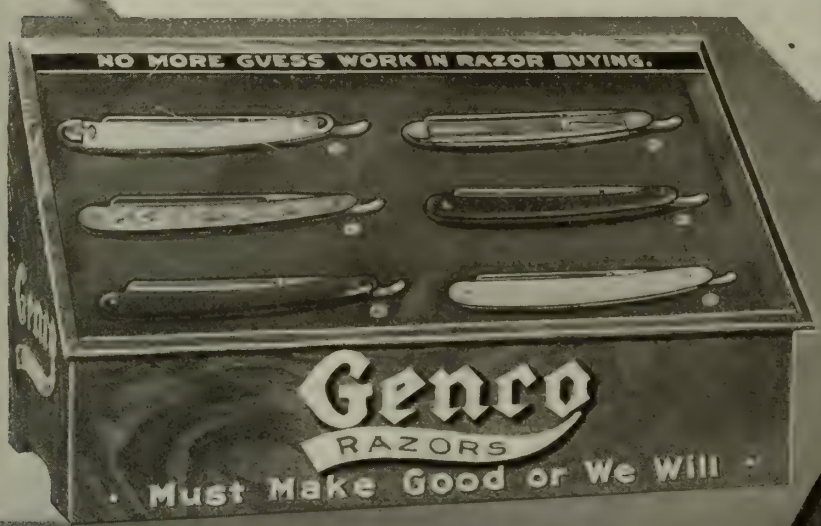
Genco RAZORS

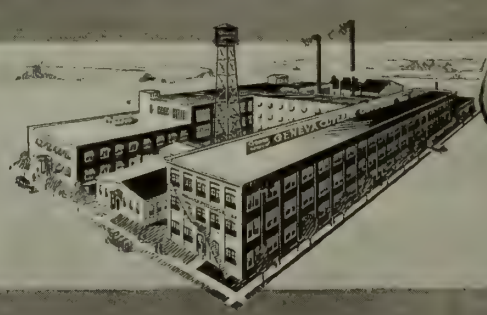
A Square Foot of Selling Space

That Can Be Made Very Profitable In Your Store

THE space occupied by this Genco Razor Display Case is about one square foot. Besides containing and protecting the razors, it catches and holds the eye and gives the goods a pleasing display. As a salesman it is on the job every minute.



The case is made of pressed steel, with handsome Circassian walnut finish. It holds six Genco Razors of different design on constant display against a background of Royal Purple plush and there is ample room beneath for carrying stock.



All current Genco Razor advertising features this case prominently. It goes to work for you the minute it appears on your counter. Let it be a reminder to your customers of the 500 master cutlers who, in the largest high grade razor factory in the world, grind the quality in and the guess work out of Genco Razors.

We are making a special proposition which included one of those display cases free with your first order. Write for the details of this offer now, while the matter is fresh in your mind. It's quite a good thing. Mention the name of your jobber when writing us.

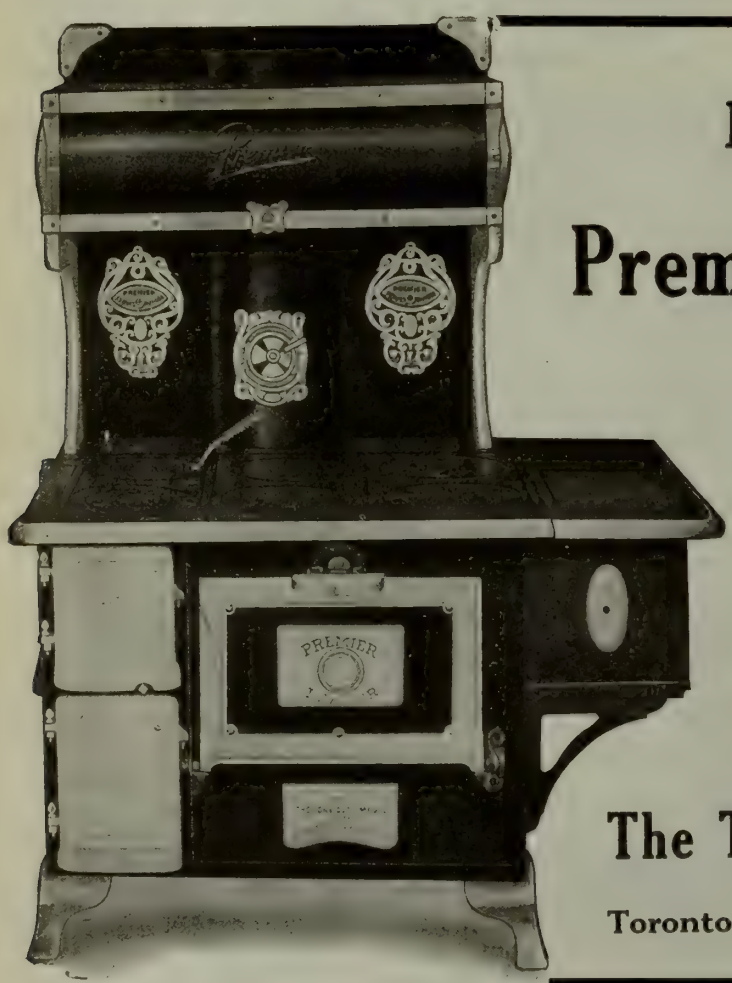
WROUGHT STEEL BRACKETS

These brackets are famous for their correct design, superb strength and attractive finish.

The use of the arched forms of steel in the wall and shelf plates give much greater strength than if flat metal was used.



The angle formed brace is well riveted and renders it secure against buckling or bending sideways under the severest strain.

Baked enamel finish, packed half dozen in a box. They sell quickly, easily and net a good profit to you.

Why You Should Be A Michelin Dealer

No. 34

Michelin Tubes Are More Easily Repaired

One of the minor advantages which Michelin Dealers enjoy is the ease with which Michelin Tubes are successfully repaired.

The ordinary tube is a piece of straight tubing cemented at the ends. When such a tube is inflated to the circular shape of the casing its outer circumference must obviously be stretched, or its inner circumference must be compressed, or both must happen.

It is evident that this stretching or compressing is likely to cause repairs to tear open.

Michelin Tubes on the other hand are made ring-shaped, and since they are neither stretched nor compressed by inflation, repairs, when properly made, are permanent.

This means repairs more easily made, and less likelihood of complaints.

LITTLE WORDS WITH BIG MEANING

Quality

According to "Webster," Quality is "an excellence of character; natural superiority."

Service

Webster's definition of "Service" is; "The performance of labor for the benefit of another."

We use these words advisedly—fully understanding their definitions—and realizing the obligation we place upon ourselves by their continued use in connection with our products of Iron and Steel, and our attitude to the people we serve.

Here's News

HUNDREDS of thousands of Canadians have read in their newspapers and magazines the story of Neōlin Soles. Thousands of these people have bought shoes soled with Neōlin—over 400 shoe manufacturers are using Neōlin for a tremendous part of their output. Now Neōlin is being offered in half-soles—you can give your business a new stimulus by handling them.

Be The First in Your Field

Already Neōlin Half-Soles are being warmly received by hardware men and general stores all over the Dominion.

Live dealers are realising the wonderful selling possibilities of Neōlin Half-Soles in these days of high prices and war-time economy.

To back up their efforts—to help you, too, to sell lots of Neōlin Half-Soles—we are running a big advertising campaign both in the newspapers and the farm papers.

You know there are scores of your customers who do the shoe-mending for the whole family. This campaign is going to send them to you, asking for Neōlin Half-Soles. It is going to "sell" other customers on the idea of re-soling their shoes at home.

Doesn't that mean bigger sales, too, for shoe repair outfits, tools, and many other profit-bearing items in your stock?

Be the first in your territory to sell Neōlin Half-Soles. Make a drive on this new profit-maker. Send an order to your wholesale hardware supplier to-day.

Neōlin Half-Soles come in cartons containing a dozen assorted sizes. Attractively designed for window and counter display.

Sterling Cleanable

Sterling Spark Plugs will give long-time service because, being separable, they are readily cleanable—by the simple and inexpensive process of wiping with a cloth or waste.

If your car was not equipped with Sterling Spark Plugs you will replace the plugs ultimately. Then use Sterling, and note the improved power—the sweeter running motor.

You will be delighted by the ease with which you can make your Sterlings new again when carbon accumulates.

Ruggedness is built into Sterling plugs, heavy electrodes that cannot warp, porcelains that heat won't break, copper-asbestos washers that allow cleaning often, without impairing the leak-proof adjustment.

Dealers who stock Sterling plugs render customers real service—and reap the benefits in profit and prestige.

For sale by progressive garages and supply dealers everywhere.

The John Wanamaker Store, Philadelphia

The John Wanamaker Store, Philadelphia. One of the largest, one of the busiest, one of the most perfectly conducted department stores in the world.

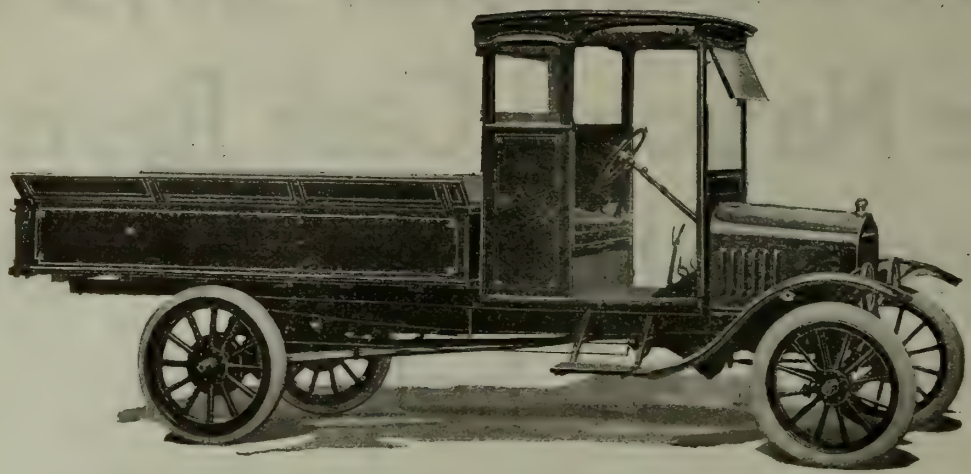
The Grand Court in the John Wanamaker Store, Philadelphia. Thousands of merchants visit this arcade every year to see how business is being handled.

John Wanamaker buys 100 more National Cash Registers to meet the present-day shortage of help.

Mr. Wanamaker says:

"A large number of people have been taken out of the big stores. The men have enlisted. The women have gone into Red Cross work and nursing.

"We are able to fill some of their places with improved cash registers. This frees many persons for war work."



Mr. Wanamaker's statement that cash registers save labor, is based upon critical investigation and upon experience with N.C.R. Equipment extending over many years.

His recognition of the labor-saving qualities of modern National Cash Registers is plainly shown by a contract he has just placed for nearly $100,000.00 worth of machines. This order calls for 100 of our latest model clerk-wrap registers. It is the largest single order ever placed with us for one store.

The high character of Mr. Wanamaker's stores, the careful tests made by his executives, and the size of his orders, combine to make his personal endorsement extremely important to other merchants, struggling with the present-day shortage of help.

The National Cash Register Company of Canada, Limited, Toronto, Ont.

MENDETS A PATENT PATCH

Mendets Will Solve the High Cost of Kitchen Utensils

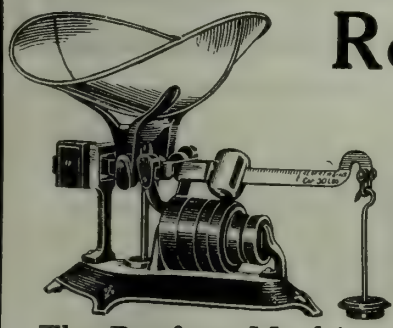
Dealers! Get busy! Take advantage of present high cost of iron, tin, granite and aluminum ware.

Mendets are popular with every housewife right now, because they quickly and permanently repair kitchen ware and utensils at small cost.

Put them on display. They sell themselves.

Collette Mfg. Company

Collingwood, Ont., Canada



MENDETS A PATENT PATCH

Show Her the Way

FOR goodness' sake, cries the average housewife, show us how to save money out of the deluge of sky-high prices for meats, sugar, flour—everything. And seldom a thought has she of what a tidy sum can be saved every little while by checking up the honest mistakes of grocer, butcher, etc. Show her.

Just a bit of enterprise, pushing the Renfrew Scale to the front—displaying it—and showing her how it soon pays for itself will stir up a tidy lot of sales worth while. Right now is the "psychological moment."

Clinch your sales by showing the Government Inspector's Certificate of correct weights accompanying every Renfrew. Scales supplied in black or all nickel-plated finish. The

Renfrew

HOUSEHOLD SCALE

Capacity ½ oz. to 30 lbs. Government inspector's certificate accompanies every scale.

SUPREME AMONG WASHERS

The "1900" Complete Line Pays You Best

For over twenty years we have been making washing machines **exclusively.** The best types of washers have been developed and patented by us in this time.
Recently we have perfected two new models representing the highest development the Washing Machine has ever attained.

"1900" Cataract Electric Washer

These most modern washers, as well as the other various "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising, and these inquiries are turned over to such "1900" Dealers as have proven their worth in their different territories.

"1900" Agitator Electric Washer

Is there a live "1900" Dealer in your district? Would you like to know more about the "1900" line?

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.

The "1900" Washer Company
357 Yonge Street
TORONTO

Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

Electric Steam Radiators

Each radiator independent, complete with glass leg rests, extension cord and plug, etc. The radiator generates steam heat, and is healthy and economical.

Our radiators give the heat and are indispensable for sick rooms, fall and spring use, as a complement to present heating system, garages, temporary heating, etc.

Rapid Radiators will satisfy your customers. Write us for full information and terms.

TELL ALL YOUR CLERKS THIS TALKING POINT

IN these days of epidemics, you cannot too strongly emphasize the sanitary qualities of O-Cedar Products.

Dust is a germ-breeder. It is dangerous, when it is so light as to float in the atmophere. When the dust is heavy, the germs are killed, and it is harmless.

Because it acts as a disinfectant and prevents the spread of disease, every household should use

O-Cedar Polish Mop

The O-Cedar Mop gathers the dust and does not scatter it. O-Cedar Polish has positive disinfectant properties. So, every family where O-Cedar is used has added protection against disease. Every household that does not use O-Cedar is taking unnecessary chances. Because O-Cedar Mops and Polish are sanitary, they are being used by large hospitals all over the North American Continent. When it is so easy for each one of your customers to take the same precautions as the most famous hospitals, why should you not sell each one of them O-Cedar Products?

Order from your Jobber.

Stove Prices Likely to Remain Firm

No Reductions in Wages or in Cost of Materials—Stocks Are Low and Manufacturers Say Prices Cannot Change Materially For a Long Time—Outlook For Business is Good

WITH a view of finding out how manufacturers view the future of the stove trade, HARDWARE AND METAL has obtained statements from a number of firms. Their replies to the questions asked indicate without exception that no reduction in prices is anticipated for some time, and that any reduction that may be made is likely to be gradual. The statements of the manufacturers are as follows:

Hardware and Metal,
Toronto.
Gentlemen:—

In reference to future of stove business, would say, from information we have received from different sources regarding metals, there are no prospects of any lower prices for some time to come. We believe the restrictions regarding standardization brought about by war conditions will be discontinued. Although there is more labor available at present than during the period of war, on account of a number of munitions factories having closed down, there is no more indication of cheaper labor at the present time than cheaper materials, but owing to labor becoming more plentiful on account of reasons outlined above, we expect now to be able to get some stock of goods made up, and be in a position to fill orders promptly.

We are placing orders now for material that will not be delivered to us for from six to twelve months hence; there possibly may be lower prices quoted for material before the last of this is delivered, but that cannot affect the prices at which goods must be sold based on cost of material obtainable, and lower prices cannot be put into effect until the delivery of material quoted at a lower price is received. As near as we can size up the situation there are going to be no lower prices on general lines of metal goods for some months to come.

Yours truly,
THE THOS. DAVIDSON MFG. CO., LIMITED,
Edward Goodwill

SAYS STOCKS ARE LOW THROUGHOUT COUNTRY

The Burrow, Stewart & Milne Co., Hamilton, Ont., write as follows:—

Dear Sir:—We are in receipt of yours with reference to future of the stove business, and while these are days of uncertainty regarding all lines of business, we do not believe the stove business particularly is going to suffer to any great extent during the re-construction period.

There has been a great shortage in Canada for the past two or three years, and we find this year that the merchants are very cautious in buying, with the result, generally speaking, stocks are low throughout the country, and as far as our particular factory is concerned we are out of all the popular lines, we mean by this the medium priced lines.

The writer had the privilege a few days ago of attending a meeting of the leading manufacturers of this manufacturing city, and in the general discussion that took place at the meeting, the leading manufacturers were all of the opinion that we would go down the slope in prices the same as we went up, that is gradually.

We noticed by the papers a great deal of discussion regarding munition workers being released for other lines of work, but up to the present time we have not noticed in this city, which was one of the leading cities manufacturing munitions, any great surplus of labor, and then the inquiries you have for help would not warrant the manufacturers reducing prices. Furthermore, there is still a great shortage of materials entering into the construction of stoves, and from all appearances we do not look for any decided drop in prices on raw materials for at least six or eight months, and, therefore, we do not believe that the prices will be reduced materially for that length of time on stoves.

Yours truly,
W. H. MONK,
Secretary-Treasurer.

EASTERN FIRM HAS NO SURPLUS STOCKS

An Eastern manufacturer writes as follows:—

Dear Sir—Up to the present, we have found business good. We have no surplus stocks, and with some exceptions, we find the retailers are sold out, having been cautious in their buying during the past few months.

The production of stoves during the past few years has been low and likely buyers have been making their old stoves hang on as long as they possibly could. We know this by the large number of repair orders we are receiving for very old stoves, and we understand in conversation with other stove manufacturers that they also experienced the same, so the future demand for stoves cannot help but be good, as these old stoves cannot last for ever.

Expects No Change

As to reduction in prices, we do not look for any noticeable reduction in prices for the following reasons:

We do not anticipate any reduction in the price of labor, on account of the cost of living being high and which will continue to be high for at least the next 20 months. The United States government has fixed the price for the wheat crop, of not only this year but also next year, which means that the price will continue to be high until about August 1st, 1920. This will not only mean high cost of living for the laboring class, but will also mean large purchasing power for the farmers, who

make by far the largest part of our population. This will stimulate business, and I believe before we know it, we will be busier than ever. While labor will not drop, we believe now we will be able to secure the labor we require, and while we will not benefit from any reduction in the price of labor, we will be able to secure more efficient labor.

Prices of Material

The prices of raw material we are using to-day are much higher than what the prices were at the time our present prices of stoves were fixed, and if the war had not terminated as soon as it did, there is no doubt but what prices would have advanced considerably during the next two to four months.

Taking this into consideration, you will see that it will take several months to get us back on a level where we were two or three months ago when our present prices were fixed. While we expect raw material will come down from the present prices, we do not look for any big drop, as the cost of the ore the furnaces are now using, and will continue to use for the next eight to ten months, was purchased at high prices, and as their labor for the blast furnaces will also remain high, there cannot be any large drop in the price of pig iron and sheet steel.

As intimated above, there will need to be a considerable drop in the prices of raw material, especially sheets, before we get down to our costs as at a few months ago. You will understand by this, the sheets we were using a few months ago were purchased many months before at a much less price than to-day's prices.

COST OF LABOR IS BIG FACTOR IN SITUATION

Another manufacturer says: "We are of the opinion that until the cost of living becomes less expensive, the cost of labor will maintain at least its present scale, and until the supply of raw materials meets the demand, the price of materials used in the manufacture of our line of goods will not be reduced. Consequently there is no immediate probability of a reduction in the price of manufactured goods and reduced prices are not likely to go into effect until the second half of the year and possibly not then, subject to the conditions existing, as indicated above.

"We can quite believe that the trade generally will be inclined to withhold buying until the last moment with a view of reducing their stock, but we find that the trade generally is in a healthy condition and the demand for goods is likely to be well sustained. We think the outlook is exceedingly hopeful and from a manufacturing point of view we look forward to the probability of being able to absorb our share of the efficient help that is offering during the coming months."

STEEL IS PURCHASED SIX MONTHS AHEAD

The Perfection Stove Company, Limited, Sarnia, Ont., says: "Referring to yours with regard to the future of the stove business, and, in particular, oil stoves and accessories, the general shortage of coal, and in particular localities of gas, indicates a continued strong demand for these goods. While we do not expect any further increase in prices, we also do not expect any reductions, during the next six months or more. The manufacturers must, of a necessity, purchase their steel about six months in advance, and these stocks are now either on hand or approaching delivery. There has, as yet, occurred no reduction in steel, tin or terne plate prices and all indications are that labor will resist any attempt to reduce wages. It follows that there must be a reduction in the costs of raw materials and labor, before there can be a reduction in the selling prices of the finished goods. We believe, therefore, that dealers will make no mistake in purchasing, for not only current requirements, but for the requirements of their trade during the winter and spring.

Yours truly,
W. E. BERESFORD.

SAYS MATERIAL MAY BE SCARCE FOR TWO YEARS

The D. Moore Company, Limited, Hamilton, writes:—Gentlemen, in answer to your favor of the 28th ult., we are pleased to enclose herewith copy of our travellers' letter issued under date of November 27. We do not know that we can answer your enquiry any better than by enclosing said letter. If it is your desire to quote this under our name we are perfectly satisfied for you to do so. We might also say that manufacturers of stoves have, of necessity, been obliged to purchase their pig iron—all that it has been possible for them to secure or book—and also contract for their steel sheets for the first half of 1919 requirements, otherwise they would not have their material, judging by what the manufacturers advise us of all iron products, that there will be a scarcity of same for possibly two or three years owing to the reconstruction work, not only abroad but likewise for domestic purposes. Take, for instance, rolling stock—cars, rail—the supply of same has not been kept up by any means and it is altogether possible that when the requirements come before the manufacturers that there will be as great a scarcity for a considerable time as there has been during the past two years. Therefore, our introspection for the two years to come is on a par with the two years past, and we cannot see it otherwise. As for labor, it is far from the intention of manufacturers of staple lines of considering reducing wages in any way.

Not in Proportion

Comparing the comparatively modest advance in stove selling prices, in relation to the enormously enhanced cost of the said raw materials, it would appear as though a great many other lines will require to be reduced very substantially before they are on a par with the moderate selling price of stoves and ranges. We question whether there are any lines of hardware, into which the same raw material enters, and the same class of mechanics are required, but what a change of price will come into line before they are on equality with the selling price of stoves. As long as our present costs continue we cannot see where there can be any reduction. In no cases have the stove manufacturers taken advantage of the rising markets and the abnormal conditions to enhance the selling price of their goods, excepting as commensurate with the actual increased cost.

We look for an enormous demand for stoves throughout the farming communities particularly. The price of grain is virtually assured to the farmer and he has and will have a buying capacity which is unparalleled.

Yours truly,
THE D. MOORE COMPANY, LIMITED,
Per R. D. Rohnson, Vice-President.
Nov. 27, 1918.

Travellers' Letter No. 19

(Re Taking Orders For Stoves and Ranges)

Please note that present prices are for immediate delivery only, and this applies for all territories both in our local market and Western Canada.

Under present conditions, regardless of the armistice, our costs seemingly will be just as high, and they might even go higher. In any event we do not anticipate or expect any change or alteration in prices—certainly not lowering of prices as far as we can introspect the present future.

THE D. MOORE COMPANY, LIMITED

FOOD PRICES AFFECT ALL WAGE SCHEDULES

Here are the views of another firm:—

"Gentlemen:—Answering your enquiry, would say that we do not anticipate any very speedy drop in prices in the metal line.

"The cost of living is fixed to some extent by the fact that the government has fixed prices on wheat in Canada,

(Continued on page 49)

Electrical Goods Splendid Xmas Sellers

Hardwaremen in Next Two Weeks Have the Best Opportunity They Have Had in Four Years—Buying Public Feels Free to Make Larger Purchases Now War is Over—Don't Forget Attractive Window Display

IN THE next two weeks hardwaremen will have the best opportunity they have had in four years to sell electrical goods. They are preparing to make the most of their chance and are pushing electrical appliances as appropriate gifts for Christmas presents with their usual energy. For four years there has been an inclination on the part of the public not to buy gifts that ran into money. Many felt that they could not afford to buy this line, and yet there is no class of goods that fits into the modern hardware stock on which there is a better margin of profit, and in which there is more pleasure in handling. Electrical goods are an addition to any hardware stock. They lend an atractiveness which can scarcely be obtained where they are lacking. Hardware men have made them one of their big sellers not only during the holiday season, but through the whole year.

Must Be Displayed

While it is essential to make the most of display with all lines which are found in the hardware store, it is very much more necessary that electrical goods be shown to the best possible advantage. This ought always to be the case, but at the Christmas season special attention should be directed to the electrical department. Perhaps the very best way is that of deciding to place the goods right where they will be seen as the prospective buyer enters the store—near the entrance. In carrying out this plan, some dealers procure at least one table. A table may be made, and its size decided by the extent of the lines you purchased for the trade of your community. The height of the table or tables will be best arranged at 30 to 32 inches, and with a width suited to the space you can allot this important showing. If there is plenty of width to the store, the display table may be three or in some cases four feet wide.

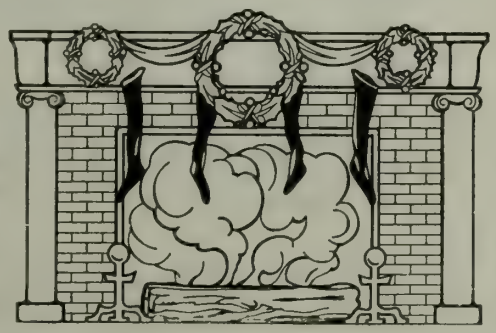
Interior Displays

In making the display within the store red cloth will answer well. If you choose a dark green will be suitable and the goods will contrast pleasingly when placed on this. See that the cloth has been drawn taut and tacked beneath the edge of the table top. This is readily done by cutting the cloth the correct size to allow for drawing over the edge and then turning the table upside down; the work is more speedily accomplished.

Having selected the nickelled goods you have in stock, these are easily arranged to meet the eye of the customer and with a little care exercised every morning, all dust may be kept away and the lines are sure to attract many customers who would not otherwise think of them, were they not so displayed.

At the holiday season it is important to use price tickets, and fully as important will be the announcement cards lettered in an attractive manner. A little touch of green will enable the store artist to make holly leaves as a border, lending timeliness to the display.

The Windows Too



If there is one season of the year when the windows should receive attention frequently, it is from five weeks preceding Christmas to the New Year. Many big hardware firms pay the greatest attention to this feature.

Trade-drawing displays of electrical goods are easily arranged for the hardware store, and in making these a suitable color scheme should be considered before the window is dressed. Windows are often effectively arranged with the use of blue or green cheesecloth. Some prefer red and purple. Use one color only. While it takes a certain amount of time and entails some expense in making this suitable setting for the display, it is well worth it. There is nothing gained when goods are merely "thrown" in a window.

When the back of the window and the floor thereof have been made ready, chafing dishes, electrical irons, electric toasters, hot plates, electric stoves, heaters, curling tongs, etc., may be arranged tastefully and in a way to compel attention. This latter result is all-important and the skill of the window dresser comes into play here.

Cards and Trimmings

The expenditure of a few dollars in suitable Christmas trimmings for the windows, as well as for the interior displays, will be worth the small cost necessary. Some holly and evergreens cost little and are very useful in making a seasonable showing and enhancing the showing of goods. Do not overdo in this respect. The trimmings will be even more effective where the placing of Christmas bells and greenery is not overdone.

The importance of cards, both those on which prices are given and the larger ones calling attention to the advantage of Electrical Goods as Christmas gifts, is very great. Prices are desired by the average customer; the goods sell themselves. They also lend life to the window and bring the customer nearer for a close inspection. A small neat border may be used on these cards, with holly leaves or sprays of wheat in green in one corner of the card. They are easily made.

Women and Men Customers

Catering to women's trade has been an important part of the policy of many hardware stores of late years. Women are good buyers, particularly of modern electrical appliances. They know the value of them and want to have all that they can afford, as they have learned by experience they mean a saving of labor. Therefore they ought to be appealed to through the special newspaper advertising arranged for when the Christmas selling campaign was launched. Then when the woman comes into the store, the clerk will find many an opportunity to explain the new lines and the advantages they possess. Very often sales will be made on the spot and where they are not the impression carried away will bring the customer back when the article wanted is decided upon.

Do not overlook the "man of the house." Once he has shown the least interest in an article, explain the labor that his wife will be spared if he buys her an electric iron, a water heater, a stove or a vacuum cleaner. He will generally be a free buyer if taken in hand and the proper suggestions made.

Selling electrical goods is proving especially profitable to large numbers of hardware firms. This year, it is stated, they have placed orders for various electrical appliances that are the largest in the history of the hardware trade. There has been a greater number of electrical vacuum cleaners, heaters and washing machines ordered than ever before and it is stated that the manufacturers are preparing for an even larger business next year.

A petition is in circulation and has been largely signed by the electors of Norwood, Manitoba, asking V. E. Hunt, hardware broker, to become a candidate for school trustee.

Putting "Pull" Into Your Advertising

Simple Direct Appeal With Prices of Goods Is Always Effective—Good Illustrations Have Real Value in Boosting Sales—Timeliness an Essential Factor in Retail Advertising

HARDWARE dealers have been doing some particularly good advertising in connection with Christmas trade and a close perusal of a large number of Canadian papers shows that no class of merchants are using more space or using it more intelligently. Two splendid examples, yet widely different, of attractively arranged pre-Christmas advertisements are here shown and are worthy of careful study, as they embody many points that may be emulated with profit.

The ad. of the Purdom Hardware Co. is splendidly arranged and splendidly balanced. It is just what people are looking for in that it contains a splendid list of really attractive gifts. The picture of St. Nicholas and the whole tone of the ad. is Christmasy and timely. Timeliness is always one of the great essentials in a successful ad.

Find It Pays Well

The Purdom Hardware Co. has always been a consistent user of newspaper space. It always makes it a point to use attractive illustrations, and it always backs its newspaper campaigns by window displays.

"We always find that we get direct and immediate results," said Thomas Purdom to HARDWARE AND METAL. "We are regular advertisers and find that it pays well. Business has been very good all through the year and we are expecting it to continue so.

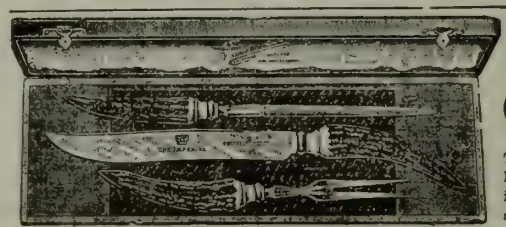
The Purdom Christmas ad. here reproduced is the kind of advertisement people like to read. It talks to them. It helps them to decide upon some really useful and timely gift. Christmas buying is in the minds of ninety-five people out of a hundred just now and an advertisement of this kind is read with keen interest. Note in connection with it many of the articles mentioned are not only illustrated, but well illustrated, and that what is equally important from the buyers' standpoint prices are given.

Neat, Clean Cut

Looked at from every standpoint the ad. is neat, clean cut and the kind that produces in the public the desire to buy. Without being told so directly they are influenced to believe that the Purdom hardware store is just the place where they will find a most attractive lot of goods suitable for Christmas presents. It is important to run an ad. like this at this time. It lets the people of London, Ont., know that the Purdom store has a big stock of attractive goods. The ad. indicates, without saying so, that the store is like the ad., neat and attractive, that the goods are quality goods and the service of the store up to date. People get a good impression right there

Take Santa's Advice

The Purdom Hardware Co.
124 DUNDAS STREET. PHONES 2800—2801.



JUST 21 SHOPPING DAYS LEFT

Bissell Carpet Sweepers, Bissell Hand Vacuum Cleaners, Northern Electric Vacuum Cleaners, Hoover Suction Sweepers, Sweeper-Vac Electric Cleaner, Regina Electric Vacuum, Etc., Electric Irons, Toasters, Percolators, Chafing Dishes, Curling Tongs, Heaters.

THESE ARE VERY USEFUL GIFTS.

Aluminum Percolators.

Cut Glass Spec al---Cut Glass Jug and Half a Dozen Glasses. Price, $5.00 Per Set

A Useful Gift Is a Constant Reminder of the Thoughtfulness of the Giver.

THE PURDOM HARDWARE CO.
124 DUNDAS STREET PHONES 2800, 2801

Note the splendid use made in the above advertisement of cuts to illustrate an attractive list of seansonable gifts. The ad is one of the many good ones used by hardware firms this week to boost Christmas business.

and this in itself is good business for the firm.

Follow It Up

This ad. is merely a starter. The Purdom Co. will follow it up with others just as attractive and just as full of timely Christmas suggestions. The results of a policy of this kind followed consistently year in and year out are shown by the proprietor's own statement, "Business has been very good all through the year."

It is a good general rule for any advertiser to follow, hardwaremen especially, to use cuts whenever possible. Proper illustrations lend a finish to an advertisement that cannot be obtained without them and they play a most important part in giving the prospective buyer a picture of the goods which stays in his mind. Many people have decidedly vague ideas about what they want to buy. Once, however, they get a picture in their mind of something they believe will suit it is a hard job to get it out and hundreds of buyers "sell themselves" in this way.

Not Too Small

While it may perhaps be better to have a small ad. rather than none at all, it is always better to have a fair sized display. It gives the store a prestige and people will look for the announcement. This makes for a steadily increasing business. It also gives the advertiser a chance to do justice to whatever lines he is advertising. In small space and without illustrations a great deal of the value may be lost and sales limited that might easily be made by a proper presentation of their merits to the public.

The cut of St. Nicholas at the top of the Purdom Company's ad. gives a seasonable touch to their announcement that is lacking in the advertisement of Wm. Gurd & Co. Notwithstanding the

Gurd ad. is well arranged and full of good suggestions that will appeal particularly to men. In this advertisement it will be noted also that prices are given in good, plain figures, and that the cuts are all well made and do justice to the goods that are listed. Many firms fail to recognize the importance of this and insert an attractively worded announcement and illustrate it with cuts that are not worthy of the rest of the ad. It is a noticeable fact that in their advertising hardwaremen are seldom guilty of this fault. More often they do not use sufficient cuts, but speaking generally they realize the importance of illustrations in helping produce sales and always use some.

Keep Up Good Work

Hardware men have been advertising splendidly, and according to many publishers, especially those in the smaller towns have set an example which other retailers might well emulate. A glance through the hardware announcements in papers from all over Canada shows that the hardware men are right on the job. This is as it should be, and the advertisements of the past week show that the hardware firms are right out after Christmas business and are letting the people of the various communities know that every hardware store has a good stock of good gifts that it will pay them to inspect. This aggressive spirit in going after the trade perhaps accounts for the fact that every hardwareman asked as to business said, "It has been very good."

The annual meeting of the Consumers Cordage Company, Ltd., was held on Wednesday of this week in Montreal, when the annual report were received and considered by the directors.

How To Plan Your Xmas Window

Plan Your Display Carefully and Win One of the Cash Prizes Offered by "Hardware and Metal"—Attractive Window Will Bring Many Buyers Into Your Store and Smash Your Sales Records

IN arranging your Christmas window display there are definite plans you may follow which will help you in making a winning display. Taking it for granted you have already a pretty thorough knowledge of the needs of your trade and have stocked accordingly, it might be well to take a stroll through your store and look over everything carefully, making note of the articles which strike you as being likely to carry a special appeal to the Christmas shopper. You will be surprised at the large number you will have on your list, and it is likely that you will have to eliminate a number of them by the process of making another list comprising goods which have the maximum display value in combination with maximum utility and timeliness.

Remember, the more articles you can put into your window that will bring people into your store to buy, the more valuable your window will be, and the more profits you will be able to count up when the holiday rush is over. There are many articles in the stock of every hardwareman which make exceptionally appropriate gifts, which will arouse the desire of people who see them in the window to buy, and which lend themselves splendidly to making the window attractive. Having selected a list, after going over your stock, study them with reference to their color, size and shape, and especially with reference to their possibilities of harmonizing with one another. Here is where your taste and ingenuity will count a great deal. There are so many combinations that are effective and attractive, so many ways of producing striking contrasts that will appeal to passers-by, among whom will be thousands of potential buyers, that you will be surprised to find how easy it is to arrange a Christmas display window.

Don't forget that HARDWARE AND METAL is offering splendid cash prizes for the best Christmas display windows of which photographs are sent in to this office not later than January 1, 1919. By a little extra effort and the exercise of your good taste and ingenuity you can make your Christmas sales not only smash all records this season, but win one of the prizes offered in the Xmas window competition.

ALL RESTRICTIONS ON GASOLINE REMOVED

AN order-in-council has been passed at Ottawa cancelling all the regulations sent out by the Fuel Controller in regard to gasoline several weeks ago. All dealers who sent money to Ottawa for licenses in accordance with the regulations are receiving it back again. The Fuel Controller's proposition, especially that part in which it was proposed to limit the profits of retailers to ten per cent., raised such a storm among merchants all over the country that an investigation was ordered and then it was announced that the regulations had been laid over indefinitely. All these developments were outlined in HARDWARE AND METAL and two weeks ago it was stated, on the authority of this magazine's Ottawa correspondent who is in close touch with the situation, that it was expected that the entire program as outlined by the Fuel Controller would be done away with. Dealers may now sell gasoline on the same basis as before and the cancellation of the regulations also removes all restrictions that had been imposed in regard to Sunday selling.

TRADE FIGURES ARE MOST SATISFACTORY

WHILE imports and exports, owing largely to difficulties in securing supplies and transportation, show a falling off for the year ending October 31, the figures are still far in advance of those of the days before the war. The imports totalled $894,556,688 as compared with $1,011,208,594 in the previous twelve months. Canadian exports for the year ending October 31 were valued at $1,338,210,274 as against exports in 1917 of $1,451,299,545. Now that supplies are available and shipping is becoming steadily more plentiful, Canadian firms are going after export business aggressively and hope to maintain a splendid volume of business.

STRONG OPPOSITION TO HIGHER EXPRESS RATES

RETAILERS are keenly interested in the opposition being made by various organizations against the schedule of increases in rates as announced by the three railway express companies. While it is freely admitted that the express companies may be entitled to advance their charges in order to meet increased wages and operating expenses, merchants and manufacturers claim that the sliding scale of advances outlined by the express companies is unreasonably high. This, they state, is especially so in view of the service rendered. Freight rates and express rates, they point out, should bear a certain relation to one another, with the higher charge in favor of the express companies. Under the proposed scale they claim this proportion is unfair. The largest increase in Dominion is to be made between Montreal and Toronto. The express companies claim that the tariff between these points has been far too low, and that in order to equalize it an advance of 100 per cent. is justifiable. The Toronto Board of Trade, the Canadian Manufacturers' Association, the Montreal Board of Trade and other organizations all over the country are meeting to discuss what action will be taken. It is likely that demands will be made at Ottawa for better service and for a more reasonable rate of increase than is proposed by the companies. The point will also be made, it is stated, that as some express companies are subsidiaries of the railways they have been benefiting by increased freight and passenger rates. The schedule of proposed increases as submitted by the express companies would raise their revenue by $2,000,000 a year.

ORDERS POURING IN FOR DAIRY SUPPLIES

FIRMS dealing in dairy supplies, pails, cans and similar lines report a record business. One manufacturer stated that his business was the greatest ever in the past few weeks. This represented, he said, not the cash value of the output which, owing to increased prices, might be expected to be higher but in the number of pieces actually shipped. He attributes this increase to the fact that the farmers are getting ready for greater production next year on an unprecedented scale to take care of the needs of the overseas Allies. Dairy production has been greatly stimulated since the war and there is every indication that Canadian food products will be in great demand for a long time. Another line for which large orders are being received is sap pails, indicating that more maple syrup is to be made next spring. Business in most lines in which the farmers' supplies are concerned, is reported to be brisk.

NO IMMEDIATE CHANGES IN WHITE LEAD PRICES

CANADIAN lead corroders state to HARDWARE AND METAL that there is no likelihood of white lead prices declining. Even in view of the decline of one cent per pound which has been made in the United States, they cite the fact that there are many orders in hand for overseas account that are only being shipped now. These were held, in some cases, since last spring, and if the export demand holds there is no likelihood of lower prices. The Canadian production has been small, and there is a firmer feeling in the British market, where the removal of the government control has resulted in advance of from $15 to $19 per ton.

THIS WOULD INDICATE BRUSHES WILL BE FIRM

A NEW problem presented itself to a brush manufacturer this week when he was approached by a firm with whom he had contracted for raw materials and asked to be relieved of the obligation. The manufacturer some time ago placed a large order for hardwood which he uses extensively for handles and was asked if he could relieve the man on whom he is depending for his supplies. It was explained that prices are now about thirty-five per cent. higher than they were when the contract was signed and that it is extremely difficult to get the

hardwood required. The manufacturer did not agree to any cancellation. This manufacturer stated to HARDWARE AND METAL that in addition to his Canadian business being good he is receiving a great many inquiries from overseas for the lines he makes, and he is expecting to greatly expand his export trade. He states that there is no possibility of prices coming down in the immediate future, as besides the trouble he may have in getting the wood required for handles, he has had difficulty in getting bristles.

NO MATERIAL CHANGES IN PRICES OF STEEL

ALTHOUGH prices of steel plates and sheets came down this week there is nothing to indicate that there is going to be any sharp decline in steel prices. In fact, everything seems against it. Dispatches from Pittsburgh, which is one of the real centers of steel information, state in analyzing the present situation, that the producers are certain that there cannot be any decline to pre-war prices. Opinion seems to be general that there will be little reduction in wages, and this is an important factor in maintaining prices. Many mills report that there is a tendency for foreigners who have been making high wages during the war and have been unable to get home to see relatives, to leave as quickly as possible. Thousands, it is stated, plan to be home for Christmas. This is causing some trouble from a labor standpoint, as it is not always possible to replace these men. As far as Canada is concerned, munitions business is nearing the end. With the exception of a few American Government contracts, which may be completed, nearly everything will be finished by the middle of the month, many of the contracts sooner. In spite of this many firms are very busy on other lines and are taking on men as quickly as they can find those adapted to the work.

MANUFACTURERS TO GET TINPLATE ON SAME BASIS

THE recent formation of a combination of American makers of tinplate has brought about a price of $10 per box for tinplate for overseas demand. The price now paid by the Canadian manufacturers is $7.75 per box and this is continued for the time being at least. The demand from overseas will determine the position of price that will likely obtain in the Canadian market.

PLATES TO BE READY FOR SPRING SHIPMENT

HARDWARE AND METAL learns from the importers that there is likely to be an early improvement in the supply of tinplate and sheets from England. This will manifest itself as the winter wears away and among the early shipments that are now expected to come, plates will be forwarded in fairly ample quantities. It applies, also, to the polished and ordinary grades of Canada plate which have been unobtainable for so long.

FOUR-CENT ADVANCE IN PRICE OF ENGINE OILS

SEVERAL lines of oils, especially vacuum oils, have increased in price during the week from two to four cents per gallon. This is due, the manufacturers state, to increases in the cost of barreling at the producing points. There has been no further change in the price of fuel oil, although it is not unlikely that a further reduction may be made before very long. It is reported that very large orders are being received from England for oils and gasoline, and that in spite of the fact that supplies are not now required for aeroplanes, a great deal is needed for army autos and for pleasure cars, now that the restrictions on the use of these is lifted. A report that was in circulation that a large oil company contemplated refusing to sell gasoline to retailers unless they would instal large underground tanks, so as to buy in quantity, are declared by officials of the firm to be absolutely without foundation.

WAR BOARD REMOVES RESTRICTIONS ON STEEL

THE Canadian War Trade Board has cancelled the resolution passed October 9, prohibiting the use of structural steel, steel shapes, plates, bars or any other form of steel, the value of which exceeds $2,000, in the erection of any building or structure of any kind, form or description. This is expected by many hardwaremen to have an important effect in helping to stimulate building activities.

ARE BICYCLE PRICES GOING UP OR DOWN?

TRAVELLERS for bicycles who have been calling on hardwaremen report that they are not buying as largely as previously, apparently in the belief that prices are likely to come down. A number of dealers, it was stated to HARDWARE AND METAL, had asked for cancellations on their contracts for 1919 on the ground that they could afford to wait until next spring if prices would be lower then. The travellers believe that there is not the slightest indication that prices will come down. This view is also held by manufacturers who discussed the situation with HARDWARE AND METAL.

"We cannot tell yet just where we are going to be in regard to getting materials," said one manufacturer, "and there is also the problem of getting labor. We may or may not be able to get the help we require. Some dealers who got caught before with short supplies owing to labor and shipping troubles placed larger orders than usual for this season's delivery. For next season they are not buying so largely, especially the hardwaremen. However business has been very fair. Many of the larger dealers have placed their orders for 1919 and the machines are being made. There will be no change made in the prices of these goods."

EDITORIAL COMMENT

EDITORIAL BRIEFS

THE advantage of making satisfied customers is that they not only come back, but they do not come back alone. They always tell somebody else and bring them to your store.

* * *

YOUR store window tells a story every day to the passing public. If that story brings them in to buy, well and good. If not, it is up to you to make your window an asset instead of a liability.

* * *

THE lucky salesman, you will generally find, is the chap who tries hardest and who spends the most time in studying the goods and the business; in other words, fitting himself for his work.

* * *

IF YOU do no advertising in the papers you are advertising yourself and your store to the public as unprogressive. This kind of advertising is not good for business.

A SENSIBLE POLICY

DURING the past few years there has been a tendency on the part of a few merchants to speculate in the amount of stock that they carry. They have known that prices were advancing, that if they placed big orders and kept the goods in stock that they would advance in price. This is sometimes a dangerous piece of business for a merchant, just as it is for any man who speculates on the stock exchange.

The business of a merchant is to turn over goods at a profit. We must never lose sight of this fact. It is particularly important to-day when there is a great deal of doubt as to whether prices will advance or decline.

Hardware merchants would be well advised to follow a conservative policy. This does not mean, however, that they should curtail buying to such an extent that they will not have in stock the goods that their customers require. It is the business of the merchant to give the very best possible service to his customers. He can only do this by carrying sufficient stock to meet their requirements.

Merchants can also do a great deal at the present time to maintain a feeling of confidence on the part of their customers. If the customers find that a merchant is not buying goods as he expects a decline in prices, they, on their part, will refuse to buy for the same reason. If all classes of business men, retailers, wholesalers, manufacturers and travelling salesmen maintain a sane, sensible attitude at this time there is no question that the period of readjustment will pass by without any great hardship to any class.

WHAT UPSET THE PLAN?

THE retail hardwaremen have had another example this week of how their interests are guarded (?) at Ottawa. As stated in HARDWARE AND METAL some weeks ago, the Fuel Controller planned to put into force a set of regulations in connection with the licensing of gasoline. So many question were asked as to why the retailers were singled out, why their profits were limited to ten per cent. and nothing said about the profits of the big fellows and similar queries that Ottawa saw that something had to be done. The retailers handling gasoline got busy and letters poured in from all over the country. More or less of a hornet's nest was stirred up and it was finally announced by the Fuel Controller that the proposed regulations were held over. This week comes the announcement that they have been cancelled. It would appear that somebody blundered and just how much of the people's good money has been spent in connection with the case, no one will probably ever know. Ottawa tries to sidestep by saying the regulations were adopted following a report by Dr. McFall. What the people are asking, especially the retailers, is if they were necessary, why are they not enforced? If they were not necessary, why was the trade put to a lot of bother without any reason and why was the country put to the expense of having the regulations framed, sent out and then cancelled? Is it another example of the marvellous business efficiency, the ability to grasp a situation and deal with it, that characterizes so many of the doings at Ottawa, especially where matters pertaining to retail trade are affected?

WILL HIT HUN HARD

THE year before the war German furnaces consumed 37,830,000 tons of iron ore. Of this amount, only 4,700,000 tons came from German mines, while 21,200,000 tons were extracted from mines situated in that part of Lorraine which Germany stole in 1871 from France. This is restored to France and while it will take probably two years to repair the damage and make the mines producers again, it will be done. Just what their loss of these iron resources means to German industry is already realized by her manufacturers. The Hun's loss, however, will be France's gain.

Bring the Junkers to Judgment!

What Canada Wants to See—

From MacLean's Magazine

UNDER the sod lie 56,-047 sons of Canada, martyrs to the cause of world liberty. Many thousands more are crippled or disabled for life, their futures marred, that other men and other generations may be free.

Over in Holland, under the benevolent protection of a friendly Queen, in a castle of such magnificence that newspapers have wasted columns in describing it, lives the Arch-Instigator of the four years of slaughter and misery from which the world has just emerged. He lives in luxury and with all the mock trappings of majesty, surrounded by neutral toadies and the sycophant Germans who absconded with him.

Canadians cannot reconcile these two conditions. That over ten million men and women of all nations should have died through a madman's gamble and that the end of the slaughter should find the madman still free is not in accord with our ideas of justice. The feeling in Canada on this point is stern and deep-rooted. William Hohenzollern must answer for his crimes. No peace will be satisfactory to Canada that leaves him at large.

There are several things in connection with peace terms that the Canadian mind is set upon. The first is that the instigators of the war, great and small, from the withered-armed maniac himself and his fellow junkers down to the brutal *Ober leutnant* who ordered his men to burn and slay, must be punished. After the ex-Kaiser, comes the Crown Prince; then comes von Tirpitz who sent out the submarines; von Mackensen who ordered 1,000 Roumanian children to be shot; Blegen, who massacred 600 persons at Dinant; von Dreicht who in a drunken stupor ordered his men to shoot 117 Belgian hostages and laughed next morning as at a good joke when he found they had actually done it; Klauss who smothered a prisoner in oil and burned him alive; and scores, nay hundreds, of others. If these butchers are not brought to book and the lesson driven home that the world brooks no license in the name of Kultur, then our Canadian soldiers have died in vain.

HERE in Canada we view with alarm the wide-spread tendency that is being shown to favor leniency toward the beaten foe. It is cropping up everywhere. We are especially alarmed at the half-veiled suggestion that the idea finds favor in certain circles in Britain. We know that the British have always been over-generous to their foes. How easily this tendency could be warped to dangerous ends in the present crisis! Do not forget that there has always been a Potsdam party in politics—that there was once a premier blind enough to give away Heligoland—that to-day we have a War Minister who saw fit to express disapproval of steps to overthrow the German Imperial Government. And it is being whispered that influence prevented for an almost fatal period the exercise of drastic measures in the case of the ungrateful skunk who sat on the throne of Greece and betrayed the nations who had been paying him his salary.

1—No Softening of Armistice Terms.

2—Canadian Representation at the Peace Conference.

3—The Punishment of the Criminals Who Started the War and Conducted it so Ruthlessly.

4—The Banishment of All Members of the Royal Family From Germany.

5—The Payment of an Indemnity to Canada.

This is no time for a display of clemency. Justice must be meted out in full measure, *so that the hand of retribution may rest heavy on the German shoulder and drive the love of war from the German soul.* Canada, we believe, is a unit in demanding this. The army, the pulpit, the press, the voice of the man on the street, are joined in a loud chorus of stern agreement. Let Sir Robert Borden take heed that Canada wants, that Canada demands:—

1. No softening of armistice terms.
2. Canadian representation at the Peace Conference.
3. The punishment of the criminals who started the war and conducted it so ruthlessly.
4. The banishment of all members of the royal family from Germany, that the seeds of autocracy may be uprooted.
5. The payment of an indemnity to Canada to cover our war bill.

THERE is a most subtle form of propaganda at work in all Allied countries to-day. It is argued that we must not hamper the effort of the German people to set up a democratic form of government; that to push our advantage too sternly would be to create chaos and thus to make it impossible for the Germans to get on their feet and pay their war debts. There can be no doubt that this idea was cunningly set afloat by German agents. It is enemy propaganda pure and undiluted.

It has been demonstrated in this magazine that the natural wealth of Germany is great enough to make the payment of ample indemnities a matter of no great difficulty. If Bolshevism gained the upper hand in Germany, the Allied Armies could go in and establish order and exact the full toll of indemnity by administering the natural resources of the country.

A study of opinion in Canada shows that the Canadian mind is sternly made up. There is no mawkish sympathy here, no tendency to grant dangerous favors to a foul-fighting opponent who has taken the count. There is a resolute belief that the Arch-criminals should be punished according to the measure of their crimes, and there will be deepest resentment here if, as a result of subtle influences and official weakening, William Hohenzollern is not haled out of Holland and with all his murder crew placed on trial for his life.

EVENTS IN THE TRADE

Business Changes

Dempsey Bros., Toronto, have sold their hardware business to F. C. Richards, of Toronto.

Windsor, Ont.—The Walkerville Hardware Co., Ltd., has sold its Windsor branch to John Moir.

Fire Losses

The plant of Rallender & Co., Toronto, manufacturers of burlap, was damaged by fire.

William J. Fitzner, hardware, New Waterford, Nova Scotia, sustained a severe loss in a fire which destroyed four stores.

Fire caused a small loss at the plant of the Standard Sanitary Mfg. Co., Toronto, manufacturers of plumbers' supplies.

Obituary

The death occurred in New York after a brief illness with influenza of Cawthra Mulock, aged 34, president of the National Iron Works, Toronto.

The death occurred at Beauport, Quebec, of Jules Belanger, hardware merchant.

The funeral of Robert Kilgour, vice-president of the American Sales Book Co., of Toronto, took place at Beauharnois, Quebec, on Thursday.

The death occurred at Ottawa of W. J. Henry, sporting goods.

Personals

Geo. M. Rice, hardware merchant, Whitby, Ont., was a Toronto visitor during the week on business.

W. Higgins, Brampton Hardware Co., Brampton, Ont., was in Toronto early in the week on a buying trip.

Miss Florence Theurer has severed her connection with the staff of the Bernhardt Hardware store at Preston, Ont.

Ald. W. E. Lord, of the W. E. Lord Company, Limited, Red Deer, Alberta, was elected mayor of the town by acclamation on Wednesday.

Geo. Padget, of Padget and Hay, hardware merchants, Agincourt, Ont., spent a day in Toronto this week doing some buying for the firm.

Silvester Bros., Stouffville, Ont., hardware merchants, were represented in Toronto this week by one of the members of the firm who came in to do some buying.

Wm. J. Chambers, for the past three years on the travelling staff of Brandram-Henderson Limited, latterly as industrial representative in Toronto and Montreal, has resigned and will discontinue his duties at the end of the month.

P. O. King has severed his connection with Rice, Lewis & Son, Ltd., Toronto, to accept the position of buyer with the Kennedy Hardware Co., Toronto. Mr. King returns to familiar surroundings, he having previously spent five years with the Kennedy Hardware Co.

Montreal News

C. Hubbard, representing E. C. Atkins and Co. of Hamilton, was in Montreal early this week.

James Hossack of The Lufkin Rule Co., Windsor, was in Montreal during the week.

H. B. Render, representing Lewis Bros., Ltd., is this week covering territory east of Montreal.

J. E. Pilon, for the past 7 years an employee of Lewis Bros., Ltd., in the sales department, died last week. Mr. Pilon was for 20 years with the Madore Hardware Co., Montreal.

A number of Montreal hardware jobbers and several of the manufacturers' representatives purpose attending the Atlantic City convention during the coming week.

W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Ltd., left Montreal on Wednesday night to be present at the convention of the Western Division Sales Staff next week.

Latest Happenings in the Trade

The stocks and patents of the Hero Manufacturing Co., Ltd., Winnipeg, have been purchased by the Twin City Separator Co.

The head office of the Canada Scale & Slicer Company, Limited, is to be located at Bowmanville, Ont., instead of Toronto, as formerly.

A winding-up order has been granted in connection with the Dominion Architectural Iron Works, Ltd., Montreal, and C. E. Arpin appointed provisional liquidator.

C. C. Cartwright, hardware broker, who has been located at 85 Water St., Winnipeg, for the past six years, has taken new offices at 1206 Union Trust Building.

The annual convention of the Sherwin-Williams Company of Canada, Ltd., Western Division, is being held in Winnipeg on Monday, Tuesday and Wednesday of next week.

A. B. Holmes, of the firm of Fuller, Allen & Holmes, has purchased the garage business and the Chevrolet agency from the Adamson Hardware Co., of Orangeville, Ont.

W. Kempton, manager of the hardware department of the Grenfell Milling Co., Grenfell, Sask., was painfully injured while unpacking axes. One of the axes slipped and cut a deep gash in his knee.

S. D. Ross, of Brighton, Ont., has sold his hardware business to F. C. McMaster, of Lindsay, Ont. Mr. Ross has been in the hardware business for 20 years. He has also been interested in vegetable canning and has an apple evaporator. He intends to devote all his time to these projects.

D. Courville, hardware dealer, of Alexandria, Ont., whose store was damaged by fire on November 15, reopened on December 2. He sustained a loss on the building of $2.437 and on stock of $3,987, all being fully covered by insurance.

George A. McMurtry, hardware, St. Thomas, Ont., has received word from his son, Wireless Operator Cyril A. W. McMurtry, R.N.C.V.R., stating that his boat has arrived safely at Lounsbury, Nova Scotia He was through the storm which caused such heavy damage all along the Atlantic coast and says at one time all on board thought their boat was doomed. Operator McMurtry was formerly in the hardware business with his father.

The Marshall Hardware, Ltd., 131 Eighth Avenue East, Calgary, and Bevers Bros. Hardware Co., 1218 First Street West, are amalgamating. After January 1 the businesses will be carried on by the present proprietors under one management and will be known as the Marshall-Bevers Hardware, Limited.

Dr. C. A. Patterson, M.H.O., of Forest, Ont., is giving up his practice and moving to Smith's Falls, where he will identify himself with the Smith's Falls Malleable Castings Company, which firm lost two of its active members when Mrs. Patterson's two brothers died recently from Spanish influenza.

The Deruchie Hardware & Heating Co., of Virden, Manitoba, this week occupied larger quarters and announces the opening of a tinsmithing and hardware business and also that it is prepared to accept all kinds of repair work including auto radiator repairs.

Incorporations

Quinns, Limited, capital $49,000, head office Toronto, has been granted a provincial charter. The firm plans to deal in automobiles, accessories and gasoline.

Another Toronto concern to obtain a Dominion charter is the National Oil Burner and Heating Company, which is capitalized at $300,000. The firm plans to import, manufacture and deal in all kinds of oil burners, furnaces, stoves and heating appliances.

The Canadian Tack and Nail Company, Limited, capitalized at $100,000, has obtained a Dominion charter. The head office will be in Hamilton.

The Murphy Victory Furnace Company, Limited, has been incorporated at Ottawa, with a capital of $50,000, to manufacture furnaces, stoves, ranges and plumbers' supplies.

A Dominion charter has been granted to the Asbestos Manufacturing Company, Limited, head office Quebec. It is capitalized at $1,000,000.

ACTION DISMISSED WITH JUDGMENT FOR DEFENDANT

Judgment in favor of the defendant, the Boeckh Co., Ltd., Toronto, was given on Wednesday, by Mr. Justice Masten, in the case of Rubberset Co. and Rubberset Co., Limited, v. Boeckh, an action by the plaintiffs for injunction restraining defendant from applying the word or mark "Rubberset" or any other word, words or mark containing the word "Rubberset," or other word, words or mark similar thereto, to any brushes or rubber or other goods manufactured by defendant, etc., for an account, and for $2,000 damages.

Judgment: No case of actual deception is established, or indeed put forward in the evidence. The claim is based solely on the ground that there is a reasonable probability of deception. As to whether the name "Rubberset" has come to be so appropriated by user as to mean the goods of plaintiffs, I made no express finding, and base my judgment on the failure to establish a reasonable probability of deception. Action dismissed with costs, without prejudice to the right of plaintiffs or any of them to maintain another action if a case of deception actually occurs hereafter.

SALESMANSHIP CLASSES

Arrangements are being completed by G. H. Wilkinson, representing the Border Cities Retail Merchants' Association, and Principal F. P. Gavin, of the Windsor Collegiate Institute, whereby classes in salesmanship will be included in the curriculum of the night industrial classes. A large number of merchants and their employees have already signified their intention of attending the course, for which a nominal tuition fee is charged, but is refunded at the end of the term, provided the student has attended a certain fixed percentage of the lectures, which will be given by qualified, experienced, practical salesmen.

Another Paint Manufacturer to Enter Canada

THAT the E. I. Dupont de Nemours and Company will be manufacturing ready mixed paints, as well as varnishes in Canada next year, is the information given to a HARDWARE AND METAL representative who visited the United States office of the company last week. Some months ago HARDWARE AND METAL announced that the Duponts had purchased the Flint Varnish Works of Toronto, Can., and Jackson, Mich. It was stated at that time that in all probability the company would manufacture paints as well as varnishes. Several United States paint and varnish plants were acquired by the Dupont interests, and it was only natural that the activities of the company would extend into Canada. It is understood that the ready-mixed paint lines will be marketed in Canada under the name of "Harrisons Town and Country Paint." There have been various rumors regarding the alleged sale of Canadian paint plants to the Dupont company, but the sale of the Flint varnish plant at Toronto is the only one so far officially admitted.

Another Plant for Canada

It is also reported on good authority that a large Massachusetts firm will open a Canadian plant next year for the manufacture of oil heating plants for office and factory buildings. This firm is one of the largest of its kind, and already has a good connection in Canada through the sale of a number of other products manufactured by the company.

CATALOGUES and BOOKLETS

Brass, Copper and Nickel Ware

The Wentworth Manufacturing Co., Ltd., Hamilton, Canada, have just issued an attractive 40-page catalogue, illustrating their complete range of brass, copper and nickel ware products. Each article in the catalogue is well illustrated, and complete descriptions of the various goods appear also, including sizes, how packed, and weights, along with list prices to which a uniform discount applies. The idea back of this idea is that the catalogue be used to sell from as well as to buy from. Only one side of each sheet is illustrated, and as the catalogue is loose leaf, changes in prices or descriptions can be easily affected without disturbing any other line or class of goods. An illustration of the plant, along with a statement of policy and instructions on ordering goods, complete a very well arranged catalogue, copies of which can be secured by writing the above firm.

Catalogue "A" just issued by R. R. Kinread, Winnipeg, wholesale jobber of harness specialties, lists halters, traces, and other accessory lines. It contains fourteen pages, and is attractively illustrated. Copies will be sent to all who are interested.

Find Special Sales Increase Business

The Kingsville (Essex County) Retail Merchants' Association has proven to the satisfaction of its members, the merit of the monthly sale plan, in which all retailers co-operate. On the first Saturday of each month, special sales are held. Advertisements are inserted in the local paper, and each store prints in the neighborhood of 2,000 circulars, which are distributed in Kingsville from house to house, and throughout the rural districts by mail. The result of this effort to increase business has been not only decidedly encouraging, but enlightening, and, according to the merchants of that place, has exerted a strong influence toward centralizing and localizing trade, and combatting the influence of the larger merchandising houses of nearby municipalities.

ALLEGE PROFITEERING IN SISAL

Hanson & Orth, fibre merchants, New York, have begun a propaganda among the rural newspapers of the United States on the subject of the price of sisal fibre and the cost of binder twine to the grain farmer during the last three years. They have sent in printed form to weekly newspapers an article, which they ask editors to print and comment on. This article charges that the "Mexican government profiteering monopoly" has cost the American grain farmers $86,000,000 during the last three years, and that this large sum represented by advances that have been made has gone chiefly into the hands of Yucatan governmental profiteers.

The American Car and Foundry Company has booked orders for 10,000 freight cars for Italy, and about 3,000 cars for other countries, involving about $30,000,000. The company's total of unfilled car orders on hand now amount to more than $100,000,000.

HARDWARE LETTER BOX

W. Walker & Sons, Toronto.—Can you advise us who manufactures auger bits in Canada?

Manufacturer in Canada is Garven Gilmore, Montreal.—Ed.

Boeckh Company, Limited, Finds That Profit-Sharing Plan Works Well

A FIRM which has adopted a profit-sharing plan which has worked out very simply, but with great success, is the Boeckh Company, Ltd., of Toronto, brush manufacturers. The Boeckh Company inaugurated its profit-sharing plan in April, 1917, and Mr. E. C. Boeckh, the president and general manager, stated to HARDWARE AND METAL that the results had been eminently satisfactory in every way. One of the rocks on which some profit-sharing plans have been wrecked is that they were so involved and incomprehensible to the employees as to prove unworkable. Other plans taxed the patience of employees too long before a distribution of profits took place and others required the employee to take stock in the firm and pay for it. The best plan seems to be that in which the employees can look forward to receiving a definite dividend on a definite date just as they would if they held a Victory Bond.

Profit sharing by employees is a phase of business which Canadian manufacturers and retailers are giving more and more attention. The results which have been obtained by many firms which adopted a profit-sharing policy have been most encouraging. The plan has proved especially beneficial to firms in the past few years by enabling them to retain employees who were badly needed and might have been lured to munitions or other plants by the inducement of temporary high wages. It has, it is stated, worked out well in a great many instances by stimulating production, maintaining the firm's standards for high quality goods and by establishing among employees that esprit de corps which is only possible when there is the closest co-operation between employer and employee.

In inaugurating their profit-sharing policy the Boeckh Company posted the following notice where each employee could see it, and has not changed any of the rules during the year and a half the plan has been in force:

"To each of such employees who have been in the employment of the Company for six months or longer, on the 30th September, 1917, a bonus of 6 per cent. on the wages earned by such employee during the six months immediately preceding such date shall be paid on or about the 15th October, 1917, and such bonus shall be paid to each of such employees up to the 31st day of March and the 30th day of September, in each year thereafter, on the wages earned by the employee for the six months immediately preceding the said 31st day of March and the said 30th day of September respectively, but no employee shall be entitled to such bonus unless he or she has been continuously in the employment of the Company for six months or more immediately preceding the date on which the same is expressed to be payable.

To each of such employees who have been in the employmnt of the Company for not less than three months, but not exceeding six months on the 30th September, 1917, a bonus of 3 per cent. on the wages earned by such employee during the period immediately preceding such date, shall be payable on or about the 15th day of October, 1917, and such bonus shall be paid to each of such employees up to the 31st day of March and the 30th day of September in each year thereafter, on the wages earned by such employee for the period in each year immediately preceding the said 31st day of March and the 30th day of September respectively, but no employee shall be entitled to such a bonus unless he or she has been continuously in the employment of the Company for three months or more immediately preceding the day on which the same is expressed to be payable.

An employee who has been continuously in the employment of the Company for not less than three months and finds it necessary for good and sufficient reasons to discontinue his or her employment, and does so **with the consent of the Company**, shall be entitled to receive payment of the bonus accrued to him or her up to the time of leaving, provided that his or her services have been satisfactory to the Company.

An employee discharged by the Company for ill-conduct or for unsatisfactory work done by him or her, or for any cause whatever, shall not be entitled to receive payment of any bonus at the time or after his or her discharge.

Time lost by reason of being laid off by the Company on account of slackness of business shall not be deducted in determining whether an employee has worked sufficient length of time to entitle him or her to payment of a bonus.

The Company reserves the right to

Annual Convention Canada Paint Company

THE convention of the Canada Paint Company Limited, held in Montreal November 18-21, is reported as the most successful in the history of the company, although it had been postponed from the previously selected date.

Under the direction of the manager, Mr. Royal Cluxton, the sessions were sessions, Sidney Ward, trade sales manager, and W. H. Newton, manufacturing opened and in the subsequent special sales manager, assisted.

The survey of the past season showed that it was the most successful year in the history of the company.

The presentation of prizes was made the more interesting in that a general get-together entertainment had been planned and this was carried out successfully on the closing day of the convention. The salesmen left later for their various territories enthused with the splendid outlook for business in 1919.

Salesmen of The Canada Paint Company at their annual convention held in Mont real.

discontinue the bonus system at any time.

The Company wishes to impress upon its employees that it is to their interest as well as the interests of the Company **to increase the output** of the factory and expects every employee in its service to work well and faithfully in the best interests of the Company and **to turn out only first class work.**

Big Demand For Glass is Expected in the Coming Year

FOLLOWING letter in connection with the outlook for window glass has been sent to the trade by the Johnston Brokerage Company of Pittsburgh:

"During September and October several conferences were held with members of the War Industries Board, which resulted in the making of an agreement for the curtailment of window glass production for 1918-19. As the present curtailment order doesn't expire until December 8 there seemed to be no need for having the new order issued until the expiration of the first order, although everything pertaining to the details had been decided. With the peace arrangements, evidently the departments in Washington will be discontinued and it is not likely that the War Industries Board will co-operate with the manufacturers in any line. That is to be decided definitely within a few days.

The War Service Committee of the Window Glass Manufacturers' Association felt that they should meet with the authorities in Washington and if possible close up the agreement that had been entered into; but if it doesn't go through the plan need not be greatly changed and the manufacturers are not showing any disappointment, as they well understand that during the reconstruction period the demand for their products will be greatly diminished. During the summer and fall they have been making their plans for the carrying out of the curtailment plan, and they could not readily change them if they were so disposed, which they are not. Quite a number of the factories stopped their repair work, planning to produce their allotments in the spring or summer, and others have arranged for the transfer of their allotments later on to other factories. The general plan has been well under way toward execution, and it is our opinion that the production will not in any sense exceed the requirements of the country. As to costs, the skilled workers will only operate a limited period and are asking an advance, which they will probably receive; the factories have stored a large part of the materials that they will need for next season's output; fuel will be scarce and high-priced; there will be no change in transportation, and skilled and semi-skilled labor will be slow in reaching lower levels. So there is every argument for continuing sales along current lines, and this applies to the distributors as well as to producers. A wage conference will be held in the first week of December, but it is not likely that a settlement will be reached at this first session, and granting that there will be no unusual delays, glass cannot very well be produced before the middle of January; it may be later. It is our opinion that at resumption only a small percentage of the factories will get under way early, so that the demand will equal and doubtless exceed the production during the winter.

Reports from architectural publications, contractors, and those dealing with building materials, indicate that hundreds of millions of dollars will be spent for the new construction during 1919, and with a limited production for the next few months, the window glass industry should be in a most healthy condition to reap the benefits of this prosperity.

We don't feel that there is any risk attached to carrying present stocks or for any sash house or dealer to carry normal stocks of window glass. Common sense will prevail with the manufacturers, and it should extend all along the line. It is foolish for anybody to sacrifice stocks for the reason that there is a temporary dullness. It is something that we all anticipated and, therefore, is no surprise; by taking advantage of what business is going and applying current prices, we will make a profit during this period of curtailment, and be in every way equipped to increase our activity when the demand justifies. To us the course seems clearly laid out and should be plain to everybody connected with the industry—that by the co-operation that has existed during the past three or four years we have nothing to fear. All we need is a little patience, as we are certainly going to experience several years of the greatest building activity that the nation has ever known. Some of our manufacturers have gone so far as to say that they would rather remain idle this year than to disturb the prospects of wonderful prosperity that is to come within the next ten or twelve months.

Stocks in the hands of the manufacturers are the lowest to-day that have been known for years. This is a fact that can be absolutely proven by a little investigation; and from our information, the jobbers' stocks are on the average below normal.

Give this situation serious thought and we believe you will share our opinions."

DEATH OF WM. CARPENTER

Wm. Carpenter, said to be the oldest lampblack maker in the country and the oldest employee of the L. Martin Company, died at his home in Philadelphia at the age of 82 years. He worked steadily for the L. Martin Company for sixty-two years excepting when he fought in the Civil War, where after two years' service he was seriously wounded at the battle of Bull Run and honorably discharged with a pension.

STOVE PRICES TO REMAIN FIRM

(Continued from page 38)

Here are the views of another firm:

"Gentlemen: Answering your enquiry, would say that we do not anticipate any very speedy drop in prices in the metal line.

"The cost of living is fixed to some extent by the fact that the Government has fixed prices on wheat in Canada, which govern till next August, and in the United States the same condition exists to an even later date. This helps to make impossible a reduction in wage costs on ordinary commercial business, although of course the munition makers have to take less money. Labor enters largely into our raw materials and is perhaps the biggest factor in the cost, hence we do not anticipate any very prompt reduction, especially as we expect that the Governments will regulate the base prices of raw material so as to make the transition from war conditions to those of peace with as little disturbance as possible.

Stocks are Low

"Another factor that would operate against price reduction is the fact that the country dealers are bare of stock in our lines, and that the manufacturers have very little stock now on hand, and until these gaps are filled conditions will remain steady.

"Another thing that militates against price reduction is the fact that agricultural implement makers, stove manufacturers, automobile manufacturers and others, have had their production cut to 25 and 50 per cent. of their former totals, while at the same time the country itself has been gradually run out of stock on almost every line. The steel mills are very short of stock as well, and many of them have taken no orders for commercial consumption for several years, all of which is now piled up and will have to be taken care of.

Will be Gradual

Any decline, in our opinion, will be very, very gradual, and the merchants and manufacturers of this country will be well advised if they see to it that no sudden slump in any quarter may occur to destroy the confidence of the commercial community.

Regarding standardization, it is the general feeling that it is a good thing, and it will be many years before we get back to the immense variety of lines which so many of us carry, and which were so wasteful in their effect upon production and warehousing.

Regarding the future, we feel that so many enterprises have been held up and stopped that this in itself will furnish great impetus to the future business. Building will be resumed, and an immense amount of held-up construction will necessarily be gone on with. Many new enterprises and developments in mining and other commercial lines will be proceeded with, and we feel that there is no country in the world that has such opportunities as Canada."

THE CLERKS DEPARTMENT

POVERTY AND CELIBACY OR POVERTY AND MATRIMONY?

All Three Appear to be Ingredients in the Making of Millionaires, But the Mixture Has Got to be Right For the Man

IT has been pointed out so often that a good start in the money sense is by no means necessary to the intending millionaire, that the facts in the first portion of the following article may seem like the proverbial flogging of the dead horse. Nevertheless they are worth noting. With machine gun rapidity half-a-dozen of the best examples of penny-saving starters in the race for millions are given right at the outset, and later appears an interesting reference to "dead horse" in another sense, the Wild Western sense, meaning debt, which will perhaps inspire many a millionaire in the making to swifter accomplishment. B. C. Forbes is the compiler of the facts, and writer of the crisp machine gun reports of achievement that lead this article. He is also the author of the more extended matter given, and published these sidelights on the millionaire fraternity first in "The Wall Street Journal." But here comes the machine gun fusillade:

A CHICAGO MERCHANT PRINCE

When H. P. Davidson first came to New York he lived five miles back from the bank, but he used a bicycle every day in order to save the ten cents' carfare.

Frank W Woolworth for years lived on a very small amount so as to enable him to open store after store with his earnings.

William L. Douglas used to carry his supplies of leather under his arm from the city to his modest factory to save expenses and lived on no more pretentious a scale than his workers.

We all know how Carnegie, in his early days, lived scrupulously up to the Scots' reputation for frugality.

John D. Shedd probably would not be to-day the chief owner of Marshall Field & Co. of Chicago had he not systematically saved money from the day he started as a junior clerk in the store at ten dollars a week. Mr. Shedd believes that a great many young men diminish their chances in life by allowing their living expenses to expand unduly before they have made any considerable advancement in business. Mr. Shedd was brought up on a farm in Vermont and there learned the value of money as well as the value of industry and other qualities which spell success.

One of the half-dozen richest men in America—and to my mind, one of the half-dozen ablest—is H. C. Frick. Like Duke, Frick as a boy was as poor as a church mouse. "I had to make one pair of shoes last two years or go without," Mr. Frick once remarked to me.

His early history corresponds exactly with that of Rockefeller and Duke and dozens of other men who have attained conspicuous business success; he saved every dollar he could lay his hands on and, when opportunity hove into sight, he then borrowed to the limit.

When Mr. Frick was earning two or three hundred thousand dollars a year he lived in one room in a Pittsburg hotel, and even after he was making more than a million dollars a year he and his wife first occupied only a couple of rooms and later moved into quite a modest home of their own. As with Rockefeller, Frick could always see attractive opportunities to do more business than he could find capital to swing, and consequently kept down his living expenses to the minimum so that he could devote every available penny to the building up of his enterprises.

A. C. Bedford an Office Boy

The turning-point in the career of A. C. Bedford, now chairman of Standard Oil, came when he was an office boy with the fine old firm of Charles Pratt & Co. Like Davison, young Bedford was not a college graduate. But, also like Davison, he early foresaw the importance of doing more than his job called for, of keeping his eyes wide open for opportunities to make himself especially useful, of learning and doing duties not strictly within his province.

Negotiations having been opened for the merger of the Pratt Company with Standard Oil, an exhaustive inventory and accountancy of the business was undertaken.

Office-boy Bedford was assigned to fetch and carry books and papers for the expert accountant. But whenever he had a moment he added up columns of figures for the accountant, worked out little problems in mathematics and in other ways showed boundless willingness and also unusual aptitude for rendering real assistance in the work. The grouchy old bookkeeper of the firm told him he was a fool, that he would receive no thanks for his extra pains and that rather than have one of his own sons become a clerk he would prefer that he commit suicide. These doleful warnings might have discouraged a youth less ambitious and less confident. But Bedford merely redoubled his efforts and cheerfully worked early and late.

The accountant, seeing the stamp of the young man, volunteered to teach him the fundamentals of bookkeeping, of accountancy and of finance. The result was that young Bedford quickly left his whining elder far behind becoming first, secretary to Mr. Pratt, then his assistant next his right hand man. All this time he was studying the fundamentals of business, the principles of production, of transportation, of marketing, etc.

H. H. Rogers, always quick to spot brains, saw that in A. C. Bedford there was presidential timber, and although Bedford was far younger than any other Standard Oil director, Rogers one day nominated him for membership on the famous 26 Broadway directorate. No one was more surprised than Bedford himself at receiving the honor. It did not take him many years, however, to graduate from position to position until he succeeded John H. Archbold as president, his work during the dissolution process having won him a reputation as a business statesman. Incidentally, like another of H. H. Rogers' proteges, John D. Ryan, Mr. Bedford was one of the first of our business leaders to place his services at the disposal of the Government when this country entered the war and, in an unspectacular way, has rendered the Administration invaluable aid.

Frick Started in a Millinery Store

H. C. Frick's first job, when a tiny lad of little schooling, was in a millinery store and he was only a bookkeeper at Broad Ford, Pa., when, with an acumen that has marked his whole career, he discerned the possibilities of the coke industry, then in its swaddling clothes. He invested in coke lands and coke ovens not only every cent he could save, but he borrowed to the limit his character and credit could command. His associates all became frightened when the panic of 1873 strewed the country with financial wrecks, but young Frick, instead of showing the white feather, daringly took over his partners' obligations, rode the storm and was earning a million dollars a year shortly after his thirtieth birthday! Simply another instance of initiative, courage and industry intelligently applied.

Charles F. Brooker, head of the American Brass Co., and often referred to as the Brass King, owed his first lift to an act of special politeness, plus, however, readiness and fitness to seize the big opportunity when it came along—that is, instead of confining his activities to his office job, he had missed no chance to go into the machine shops, don overalls and learn all about brass and its manufacture.

Climbing on "Dead Horse"

Save, then borrow.

That is how the majority of our most successful men of affairs got their start.

The richest man the world has ever known once remarked to me: "The most important thing for a young man starting life is to establish a credit—a reputation, character. He must inspire the complete confidence of others.

"The hardest problem all through my business career was to obtain enough capital to do all the business I wanted to do and could do given the necessary amount of money. You must establish a

credit (character) before you can hope to have people lend you money.

"The first large bank loan I received —it was $2,000, a big sum in those days —was granted me only because the head of the bank made himself familiar with my mode of life, my habits, my industry, and learned from my former employers that I was a young man who could be trusted."

On the theory that if I could find out specifically and in detail just how the greatest business figure America ever produced succeeded in laying his foundations, the information would be of both practical and historical value. I have delved into the early days and early struggles of John D. Rockefeller.

Mr. Rockefeller began to save money by the time he was seven. He chuckles to this day over a deal he made with his mother to raise a brood of turkeys. Little John's savings, at his suggestion, were invested in this enterprise, as he figured that the food for the birds would cost him nothing and that, when they attained maturity, the money realized would be nearly all profit. And so it worked out. Mr. Rockefeller's advice to young men who aspire to become captains of industry is to begin saving from the very start, since it is easier to borrow if you have some capital of your own than it is if you own nothing.

Marriage and Millions

Most of our business and financial giants are very domestic animals—there are a few notable, and one or two notorious exceptions.

Not ten per cent. of our foremost men of affairs are bachelors.

Charles M. Schwab, perhaps had this in mind when he recently advised young men to marry early—as soon, in fact, as they could support a wife. "I was married when twenty," he added.

On the other hand, the head of the largest dry goods business in America complained to me not long ago that the trouble with most young men was that they insisted upon taking on domestic obligations and responsibilities before they had made any considerable headway in life. "At the time they should be devoting themselves exclusively to their business in order to achieve some measure of success, too many young fellows," he said very earnestly, "divert their thoughts and their time and their ambitions to these other channels. If they would first concentrate upon their work and make some success in it, they would then be in a position to marry without having to worry, as so many of them do, over their domestic obligations—over making ends meet, I mean."

A Majority Married Early

In mentally calling the roll of our big men. I find that the majority, though by no means all, married early. In most instances blasted romances have been responsible for the late marriages and for the no-marriages.

Andrew Carnegie's case is well known. He was deeply in love with a young lass when he was in his early prime, but one of his associates, a statuesque Adonis, suddenly carried her off, and Andy, who was no statuesque Adonis, was "left lamenting." The tragedy embittered him against his successful rival, whom, it is said, he afterwards fought in business. One of the iron-master's chief regrets is that when he later married a most estimable woman, no son, only one daughter, was born of the union.

John W. Sterling, the legal confidant of scores of America's leading capitalists, and who, when he died a few months ago, left a fortune of over $20,000,000, also had an unfortunate affaire de coeur when a young man, and he remained wifeless to the end of his days. Notwithstanding his extreme intimacy with a great variety of large affairs, he led a lonely sort of life, his sole social companion being the late James Stillman. When the latter was in this country most of his evenings were spent in philosophic communion with bachelor Sterling.

America's Richest Bachelor

Perhaps the richest bachelor among all America's business titans is George Eastman. So far as I know, his celibacy is not due to any early mis-shooting of Cupid. It is due, I rather think, to a curious trait in the Kodak King's make-up. His mother unexpectedly found herself quite poor when George was a mere boy, and the sudden change in the family circumstances made such an impression upon his plastic mind that he contracted a mortal dread of poverty. To release his mother from the shackles of poverty became his dominating passion. Even after he had accomplished this, the fear of poverty continued to grip him, and by the time he had made enough millions to enable him to overcome his strange dread he had passed the gay-young-spark age. He is intensely fond of children and has donated large sums for juvenile philanthropic purposes.

What I started out to write about, however, was the pronounced domesticity of most captains of industry. The public often pictures millionaires and multi-millionaires as enjoying a continual round of feasting and (big-S) Society entertaining, of club life and card games, of automobile touring and foreign travel.

The sober truth is that the battle of Big Business is so strenuous, the responsibilities are so burdensome, the problems to be solved so numerous and complex, that the leaders cannot afford to dissipate either time or vitality in a vortex of distracting pleasure-seeking. Most of them go straight from business to their homes and can rarely be coaxed out to social affairs. It would astonish the public to know how many of them are in bed at an unbelievably early hour four or five nights of the week.

Did you know that the main reason why so many business Trojans live most of the year in the country is to get completely away from the turmoil of the city and city life?

"I can do no real thinking in my office. All my thinking has to be done at home." President Vanderlip of the National City Bank once remarked to me when I spoke of the endless procession of callers at his office. His case is typical. Mr. Vanderlip lives all the year round at his beautiful home at Scarborough-on-the-Hudson, where the quiet, rural environment is conducive to reflection and contemplation. Apart from imperative business engagements, such as public dinners, occasions when he has to make an address, and important conferences, he probably does not spend on an average of one evening a week in the city. He has a glorious family of young children —six of them—and he and Mrs. Vanderlip spend much time with them.

Morgan Considers Domestic Life Essential

J. P. Morgan regards a rational domestic life as of more importance than nerve-racking and body-wrecking slavery to business. He derives more satisfying enjoyment from taking time to be a really domesticated husband, father and grandfather than he could ever derive from a feverish, eternally-on-the-jump, business life. His attitude towards business is that of the successful Englishman rather than that of the modern American financial hustler. He attends to business with regularity and with great conscientiousness, his chief concern always being that nothing shall be done calculated to lower in the minutest degree the standard of the House of Morgan. But with him business is not the whole of life. It is not a fetish. He refuses to enslave himself to it. He will not allow financial affairs to usurp his home life.

The directors of a certain conspicuously successful organization not long since intimated to its chief executive that it would be helpful in a business way if he gave up living in the country and brought his family into the city. It so happened that he is essentially a domestic being. His phenomenal success in business, indeed, has been no more notable than his success as a husband and father and neighbor and citizen. What, think you, was his reply? This:

"Gentlemen, I'm already giving you all of me that is for sale."

The directors, I may add, confided later that they admired his stand. Indeed, it caused one or two of them to do a little serious thinking on the relative worthwhileness of things, and I rather suspect the result will be a reappraisement of life's values.

Claim New Fuel is Cheaper Than Gasoline

According to dispatches from Washington "Liberty fuel," vastly cheaper than gasoline and possessing many advantages over that product, has been invented by officers of the war department and is now being produced in large quantities.

The new fuel, it is stated, is the result of more than 500 experiments conducted by Major O. Zimmerman and Captain E. C. Weinberger, of the research and development divisions of the general engineering depot.

The base of the new oil is kerosene, Major Zimmerman said. The other ingredients are of low cost, and can readily be obtained. The process of manufacture is exceedingly simple.

The tests, which proved conclusively the value of "Liberty fuel," have been most exact and rigid. They were conducted under the supervision of the bureau of standards.

"That no leaf was left unturned to test its practical suitability is shown by the fact that the fuel was used extensively in automobiles, motorcycles, trucks, tractors, stationary engines and hydro-airplanes in cold and warm weather under violent variations of load, with poor and good operators," said Major Zimmerman.

Arrangements had been made for quantity production before the armistice, much of which would have gone to the forces abroad.

The new fuel is odorless, tasteless and non-corrosive. Tests for corrosion were made in a motorcycle that covered 23,000 miles of variable operation. It leaves less residue of carbon than gasoline, requires less air or oxygen for combustion and develops greater horsepower.

CHARGES OF BRIBERY DENIED

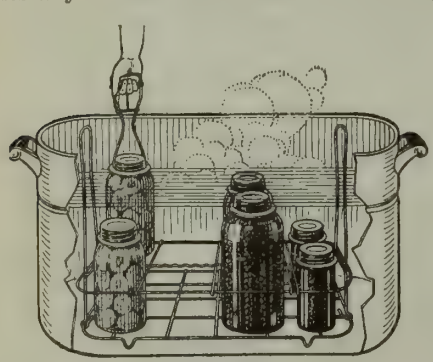
Charges of bribery and improper practices in its commercial relations preferred by the Interstate Commerce Commission against the Commonwealth Color & Chemical Co. of New York, are denied by the company in an answer just filed. The company is charged with having offered presents and rewards to employees of prospective customers and the customers of competitors in consideration of obtaining their business.

NEW HARDWARE GOODS

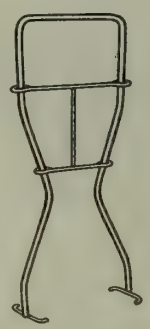
OFFERED TO CANADIAN HARDWAREMEN

BUTTER MERGER

The "Wonder" butter merger being put on the market by the National Kitchen Products Co., 620 West Lake St., Chicago, is, it is stated, a simple, sturdy little churn having a specially constructed plunger with a valve that impels air into the contents of milk and butter,



Butter Merger

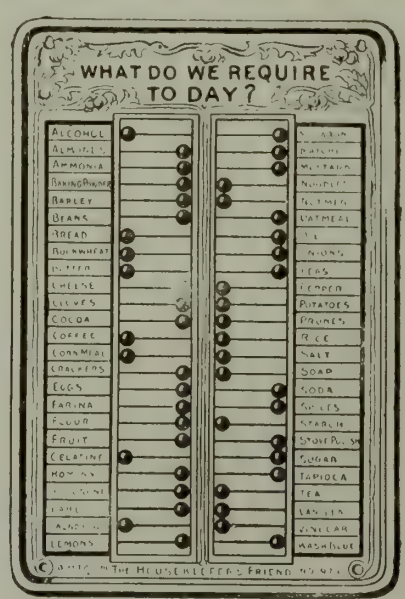


causing them to merge in such a manner that not a drop of milk remains. The merging it is claimed is purely scientific. The merger it is stated can also be used on an ice cream freezer and it is claimed will make and mould a quart roll of ice cream in two minutes.

CANNING RACK

The cold pack canning rack and "Locktite" jar lifter shown below are made by the Pearce Company of Grand Rapids, Michigan. The "Pearce,' 'it is claimed, fits any kettle or wash boiler which may

Canning Rack

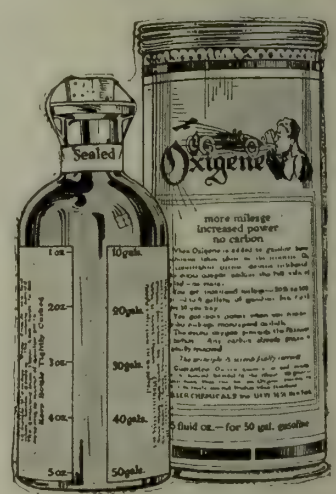


Jar Lifter

be tightly covered. It will it is stated hold any sized can and when not in use will fold so compactly it is less than one inch thick. Special feet on the bottom of the rack it is stated support the cans a full inch above the fire bottom, keeping them from cracking. The rack it is stated is heavily tinned, will not rust with the upper deck removed, can be used with good effect for lifting clothes from a boiler.

KITCHEN INDICATOR

A kitchen indicator made by the G. M. Thurnauer Co., Inc., 6 East 20th Street, New York, is said to be a simple contrivance of great help to housekeepers in



Kitchen Indicator

keeping track of their supplies. The indicator it is stated is made of white metal, is decorated in blue and glass beads are used on the cross wires to show what articles are on hand and what are required. The indicator it is stated is substantially made and should last for a long time.

MOTOR DECARBONIZER

"Oxigene" manufactured by Stewart & Co., 349 West 86th St., New York, prevents it is claimed the formation of carbon from gasoline. The combustion is so complete it is stated that no residue is deposited. The free oxygen liberated it is claimed also removes the carbon residue of oil, changing the hard gum into brittle flakes, which pass out through the exhaust. By keeping cylinder walls, valves and spark plugs clean and free from carbon Oxigene it is claimed prevents pre-ignition, knocking,

Motor Decarbonizer

and makes for more power, longer life and better service from the entire motor. The increased power given by Oxigene it is stated is particularly noticeable on the hills or in city traffic where quick pick-up is desirable. In use Oxigene is showing it is claimed increased mileage varying from 25 per cent. to 50 per cent. according to different makes of cars. The makers state that it is poured into the gasoline tank and mixes thoroughly without any stirring. A five-ounce bottle it is stated will treat fifty gallons of gasoline.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LOWER levels have been reached in some quarters on linseed oil this week. Declines range from 7c to 9c per gallon, and are a direct reflection of lower seed prices in evidence. The depression in the seed market is attributed to probable lack of demand. Navigation is practically completed, and the fact remains there would naturally be little buying interest following this condition. The movement of seed, as far as can be determined, has been very good.

Turpentine prices at primary points show a sharp decline this week. This was unexpected and is considered a result of a profit-taking move by some interests unable to hold stocks any longer. The real causes contributing to the recent advances have not been removed, and the feeling is general that in two months' time the movement will be again upward. The present is a period of quiet, there being little demand and little movement. Locally prices have remained unchanged.

The metal markets are fluctuating considerably. The removal of Government restrictions on trading in London, England, resulted in an upward swing on copper, spelter and lead, the latter advancing a full 2c per pound. Local markets show that tin is being sold down another 5c in some quarters, although supplies are not considered heavy, and no word on shipments en route is available. Lead has come down 1c per pound, and spelter is down 1c per pound.

The decline in tin prices, along with lower lead, has been a factor in bringing about lower prices on solder. Lead wool and lead sheets have come down following decline in the metal.

Higher prices have been named on many lines of tools this week. Pipe cutters, mitre boxes, boxwood rules, scratch awls, spoke shaves and carpenters' pencils have all reached higher levels. Other lines to follow the upward trend include rim locks, hand rail screws, paper files, ceiling hooks and cattle leaders.

A revision in galvanized clothes line wire has been made which provides for an advance in some gauges and a decline in others. Higher prices on spark plugs are reported, and a sharp advance, amounting to 25 per cent., has been made in one line of poultry netting.

Christmas activity is general now, and heavy sales of silver-plated flatware, razors, in fact all lines of cutlery, are being made. Stocks of pocket cutlery and carvers in cases are very limited, and there is some doubt expressed as to whether shipments due from England will reach here in time for the holiday trade. Skates, hockey sticks, sleighs, coaster wagons and toys are all active.

MONTREAL MARKETS

MONTREAL, Dec. 5.—Tin and lead and also lead products have shown declines this week. The sheet markets are also slightly easier, but without quotable change being made. Old metals are quiet but are not changed this week. There seems a likelihood of lower prices ruling in the immediate future for heavy metals. The advance made for wood rat and mouse traps a few weeks ago has now been withdrawn, the manufacturers being able to secure more material in making this line.

The movement of Christmas goods has been very excellent during the present week. Children's sleighs and skates have gone out freely, and nickelled goods and hockey sticks have moved actively.

In a very short while some of the travellers will be in from the road and preparations are anticipated by many for the annual taking of stock. The promise of better supplies, even though slow in coming, has had a satisfactory effect upon the trade.

Some Rope Selling; Basis is Held

Montreal.

ROPE, TWINES.—The sale of a certain amount of rope is reported and this is of a seasonable and light nature. Stocks of binder twine were carried over in some localities and movement for the coming season has not yet developed. The movement of this will be undertaken a little later. Price basis for rope is as follows: Pure Manila 39c per pound; British Manila 33c and sisal 27½c.

Wares Sold Freely; Stoves Also

Montreal.

STOVES AND WARES.—While there have been no price changes this week the outlook is for a maintenance of the present quotations for various wares, etc. There has been a splendid demand for these goods this fall and the manufacturers are well satisfied with the manner in which orders have come to hand.

Stove sales are naturally letting up somewhat and reports indicate that the season has been a good one, in spite of the difficulties that faced the manufacturers.

Big Coal Oil Sale; Gasoline Steady

Montreal.

OILS, GASOLINE.—The demand for coal oil is steady and quite satisfactory, although a great deal of the heavier demand is manifest in the country points. Prices are steady and hold at 19c for Royalite and 22c for Electrolite and Palacine.

The sale of gasoline is still moderate and will be so, now that the snow has

arrived. The price of motor grade holds at 34c.

Nail Prices Hold; Sales Are Fair

Montreal.

NAILS AND WIRE.—Sales of wire nails are made on the same basis of $5.50, while cut nails are unchanged at $5.85. The movement is just fair, the season being well developed for building and the trade from now on generally expected to be that of a routine nature. The price of smooth steel wire holds at $6.25 per 100 pounds.

Lead Products Down; Solder Lower

Montreal.

LEAD PRODUCTS.—The pig lead market having declined this week, prices on the manufactured lines have also gone lower and lead sheets, lead wool and also solder have reached lower levels. This is quite as expected, for as pointed out last week in HARDWARE AND METAL, the position attained by pig lead would very probably determine the immediate position of the manufactured lines. There is very little trading and the manufacturers are not anticipating any big movement before the first of the year.

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Old Material Quiet; No Changes Made

Montreal.

OLD MATERIAL.—The market is still an easy one but there have been no declines since the last report appeared. The small sellers have unloaded their supplies with the result that the larger buyers and some of the users have ample supplies for their requirements for some time to come. The tendencies will be those of a lowering nature and quiet is likely to prevail for a few weeks.

BRIEFS FROM THE WEEK'S MARKETS

Spark plugs registered an advance in price this week.

* * *

Hand, panel, and compass saws show an advance of 10 per cent. in latest prices issued.

* * *

Solder showed a decline of around 2c per pound in all grades. The lowering tin market is principal factor.

* * *

Gooseneck carpenters' bars, 24-inch, are up to $6 per dozen.

* * *

Lead wool and lead sheets have undergone revision downwards, following a decline in pig lead. Solder prices in Montreal are down 5c per pound, the lower basis for tin and lead combining to bring this about.

* * *

Linseed oil declined 7c per gallon in Montreal this week.

* * *

Free trading in England this week on some ingot metals was the signal for sharp advances. Copper, spelter and lead showed substantial increases in London, lead going up a good 2c per pound.

* * *

A sharp advance in one line of motor oil has been made this week, 18c per gallon being added to the list.

* * *

A sharp advance of 25 per cent. has been made in Banner poultry netting.

* * *

Mitre boxes, scratch awls, boxwood rules, and even pencils are carpenters' requisites to undergo revision upward this week.

* * *

A readjustment of values on galvanized clothes line wire this week shows some advances and some declines.

* * *

Tin is down to 80c per pound in Toronto, and prices on lead range from 9½ to 10c per pound, which shows a decline. Spelter is easier in some quarters also, 10c per pound being low level reached.

* * *

No buying and no selling in a dull and stagnant market—these are the conditions in old materials.

Movement Iron And Steel is Light

Montreal.

IRON AND STEEL.—There is not a great deal of activity now for this line and the market is unchanged. Business is confined quite generally to small sorting orders, and sizes are available in the usual dimensions.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Sheet Market Easy; Little Business

Montreal.

SHEETS.—The tendencies are pointing to an easing of the markets for black sheets, but the week has brought no definite quotable change. The outlook promises to be quiet for these and while a certain amount of enquiry and sale will develop for both black and galvanized sheets, this will not be large for a while yet.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$9 25	$11 50
12 gauge	9 15	11 00
14 gauge	8 50	8 20
16 gauge	8 65	8 25
18-20 gauge	8 75	8 30
22-24 gauge	9 10	8 35
26 gauge	9 25	8 40
28 gauge	9 40	8 50
GALVANIZED SHEETS—		
10¾ oz.	$12 00	$12 35
28 gauge	11 65	11 90
26 gauge		11 35
22 and 24 gauge		11 15
20 gauge		11 05
18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c per 100 lbs. is made for broken lots.

Lead Drops One Cent; Tin is Easier

Montreal.

INGOT METALS.—The features of the week are those of a lowering tin market and a decline in the lead market. Copper has also been ruling easier, as far as the casting variety is concerned. Little new business has been developing.

COPPER.—The same competition is manifest in the New York market as affecting casting copper. This is selling here at 28c per pound while the standard is unchanged at 30c to 31c per pound.

TIN.—London quotations have been lower this week to the extent of £15, and there is a tendency to decline somewhat further. The local market is easier with prices now around 82c per pound.

SPELTER.—This is quite unchanged, with few sales made and with the local price ruling at 10½c per pound.

LEAD.—The reduction of one cent per pound in the United States market came as somewhat of a surprise to the trade here. It was not looked for at this time. Local prices have declined in sympathy and the ruling price is now from 9½c to 10c per pound.

ANTIMONY.—No new feature has developed. Trade is of small proportions and the price remains at 12c per pound.

ALUMINUM.—A good export demand has been manifest of late for this metal and as a consequence of this the local position is steady and unchanged, 48 to 50c per pound obtaining for lots wanted.

TORONTO MARKETS

TORONTO, Dec. 5.—Higher levels have been reached in galvanized clothes line wire, household grinders, mitre boxes, and a couple of lines of snow shovels. New prices have also been issued on casement adjusters, scratch awls, boxwood rules and spoke shaves, the figures reached on each of these providing for an advance over former prices. Other items on which quotations have been revised to higher levels are paper files, cattle leaders, ceiling hooks, hand rail screws, rim locks, mouse and rat traps. A basis of $11 on 28-gauge galvanized sheets has been established in some quarters, which represents a decline over former figures. Some shading of prices on ingot metals is reported in some quarters, and solder is down about 2c per pound also.

Business as a whole is considered very good, and sorting orders coming to hand represent a very good total. The outlook for spring business is good, and it will be not very long before spring orders will be moving from the jobbers' warehouses.

Higher Levels on Pipe Cutters

Toronto.

PIPE CUTTERS. — Another line of pipe cutters to reach higher prices during the week has been the Holland Improved. The new prices established on this line are for the No. 1 wheel, $4.25 each; No. 2, $5.70; No. 3, $10.45; No. 4, $17.10; No. 5, $26.60. The No. 2 Roller are quoted at $5.70 each; No. 3, $10.45; No. 5 at $26.60.

Scratch Awls, Rules, Spoke Shaves Up

Toronto.

SCRATCH AWLS, RULES.—Revised prices have been issued in some quarters on Stanley Scratch Awls No. 7; the present price quoted on these which represents an advance is $2.60 per dozen. Some lines of Stanley box wood rules have also come in for revision upward. The present price of the No. 30½ is $13.05 per dozen; No. 32, $6.93; No. 68, $2.50.

Stanley spoke shaves have also gone to higher levels, No. 52 now being quoted at $4.70 per dozen and the No. 53 at $6.07.

Revised Prices on Clothes Line Wire

Toronto.

CLOTHES LINE WIRE. — A new basis of quotations on galvanized clothes line wire has been established, same gauges showing a slight revision downwards and others reporting advances. This is just a re-adjustment of values and the present range of figures is given as follows:

No. 17 by 50 ft., $7 per thousand feet; No. 17 by 100 ft, $6.85; No. 18 by 50 ft., $5.65 per 1,000 ft.; No. 18 by 100 ft., $5.60; No. 18 by 150 ft., $5.60; No. 18 by 1,000 ft., in coils, $5.60; No. 18 by 1,000 ft., on reels, $6.20.

Higher Levels on Mitre Boxes, Pencils, Hammers

Toronto.

MITRE BOXES, CARPENTERS' PENCILS.—New prices have been established in some quarters this week on the Stanley Mitre Boxes which provide for advances over former levels. Quotations which are now in effect on the No. 50½ are $7.90 each; No. 246, $17.30; No. 346, $18.70; No. 358, $19.80.

Other lines which have been revised upwards include carpenters' pencils, the Dixon seconds, No. 174, red and black wood, being quoted at $3.95, and No. 290, black wood, at $3.95 per gross.

Tack hammers, No. 260 at $2.20 per dozen and upholsterers' hammers, No. N 100 at $3 per dozen are also higher.

Mouse Traps Higher; Cattle Leaders

Toronto.

MOUSE TRAPS, CATTLE LEADERS.—Further revisions in the price of mouse and rat traps have occurred this week. The new prices issued provide for an advance, Victor mouse traps now being quoted at $3.25 per gross, the Hold Fast, $3.25 per gross, and the Round Wood, 4-hole, mouse trap, $1.30 per dozen. Victor rat traps are quoted at $1.15 per dozen, the Hold Fast at $1.15 and the Out-of-Sight, $1.50.

Cattle leaders have gone to higher levels, the No. 52 now being quoted at $1.65 per dozen.

New Price on Casement Adjusters, Rail Screws

Toronto.

CASEMENT ADJUSTERS, HAND RAIL SCREWS.—Quotations this week on casement adjusters show an advance has occurred in this line. The present basis of quotations for Nos. 112, 119, 133, and 151 is $4.95 per dozen.

Hand Rail Screws have also gone to higher levels, No. 51 by 4-inch now selling at $8.70 per gross and 4½-inch at $9.65 per gross; No. 52 by 4-inch now quoted at $9.90 per gross and the 4½-inch at $10.80 per gross.

Ceiling Hooks No. 125 have advanced to $3 per gross.

Snow Shovels Move Up; Grinders Too

Toronto.

SNOW SHOVELS, GRINDERS. — Higher figures are represented in the new basis of quotations which have been established on Arctic snow shovels; the japanned is now quoted at $5.10 per dozen and the galvanized at $7.20. Higher levels have been issued on the Luther Grinder — their grit grinders being quoted at $4.75, $6.50 and $9. The Luther household grinder is quoted at $2 each. Foot power attachments for grinders are quoted at $2.60 each. All of these prices on grinders are list and are subject to a discount of 15 per cent.

Rim Locks Higher; Paper Files, Too

Toronto.

RIM LOCKS, FILES. — New prices have been named on rim locks, the 3800 japanned is now quoted at $3.10 per dozen, the No. 4800 A.C. $3.70 and the No. 9800 D. B. at $3.70.

Paper files have been revised upwards, the No. 37 now selling at $2.50 per dozen and the No. 24 is quoted at $1.40.

Union Hardware Ice Skates are now being quoted again by some of the trade, the No. 5 selling at 75c per pair; No. 5½ at $1.20; No. 16 at 85c.

Stoves Unchanged; Wares Sell Well

Toronto.

STOVES, WARES.—The situation in stoves is without any material change. Business coming to hand is quite satisfactory for this time of the year, and manufacturers are taking care of the bulk of business quite well. Hopes are expressed that raw material will be available in better quantities next season, but this will hardly show in production much before next fall. However, there seems to be every reason to believe that trade will be good and that the most pressing requirements will be met.

Orders coming to hand for all kinds of wares would indicate that the trade is in a very healthy condition and the consuming demand is good. Retailers are not buying goods just to fill up their shelves, and the fact that they are sending along orders quite freely would indicate that the movement to the consuming public is very good. Prices have held very firmly and there is no indication whatever of any immediate recession in values. Booking business for spring has been very heavy, this show-

ing up particularly in dairy supplies, and maple syrup sundries, the volume on these two lines in actual number of pieces constituting a record business with some manufacturers.

Cordage Remains Steady, Unchanged

Toronto.

CORDAGE.—As far as rope is concerned there is absolutely nothing new to report. The demands are limited to reasonable requirements and these are being taken care of quite readily from ample stocks. The market rules without change, quotations on the pure manila holding at 39 cents per pound base, on British manila at 33 cents, and on sisal at 27½ cents.

It seems possible that new prices on binder twine, though not usually determined on before February or March, may be set in the very near future. There has been some indication that prices from one to two cents lower than those now in effect may prevail. Supplies of raw material have been reaching the manufacturers in much better quantities than had been expected and some of this has come forward at prices somewhat lower than the maximum set by the Food Administration last year. However, there are some fairly heavy stocks on hand which have been bought at the high levels, and whether these will be worked off before any recession in values can be looked for is still undecided. Some definite announcement may be expected at an early date.

Nails Hold Steady; Wire Firm

Toronto.

NAILS, WIRE.—There is very little trade passing at the present time. This is rather a quiet time in the building trade, although orders from city customers have been comparatively good. As a matter of fact some dealers express wonder at the amount of business which is really coming to hand. Prices have been firmly maintained during the week, the wire selling at $5.50 per 100 pounds base, and the cut nails selling at $5.85.

Wire is unchanged with trade very quiet. Smooth steel wire is quoted at a base of $6.25 per 100 pounds.

Sharp Advance in Motor Oil

Toronto.

MOTOR OILS.—A sharp advance in motor oils has occurred this week which is in line with tendencies outlined in HARDWARE AND METAL last week. The list price on Gargoyle Mobiloil has advanced 18c per gallon, making to-day's list $1.33, which is subject to a trade discount of 25 per cent. This is primarily due to the enormous increase in the cost of the packages, the product itself showing a comparatively small increase.

Coal Oil Steady; Gasoline Unchanged

Toronto.

OILS, GASOLINE.—Sales of practically all lines of oils, illuminating, fuel and lubricating, have fallen off to some extent due to the curtailment of munition work. Gasoline sales have been similarly affected, but the regular channels of trade are absorbing big quantities at prices which remain steady at 33c per gallon. Coal oil sales are good and a steady market is being maintained, quotations ranging from 18½ to 21½c per gallon, according to grade.

Waste is Steady, Oakum Unchanged

Toronto.

WASTE, OAKUM.—There have been no new developments to record in the market on cotton waste. Sales are maintained on a very steady basis and prices have held without change and seem likely to until the first of the new year. At that time there may be a slight revision, but little variation is looked for when time for naming new figures arrives.

Oakum continues to rule along unchanged lines. Sales are reasonably good with prices holding firm and without change.

Roofing Very Firmly Held

Toronto.

ROOFING.—The market rules with a very firm undertone and indications point to a very strong situation for some time to come. Manufacturers have experienced extreme difficulty in getting materials and there is no indication that the cessation of hostilities will effect an immediate improvement. Conditions are expected to improve, but some manufacturers are away behind with their orders. In another couple of months, too, they will face a period which seems to promise big business, so that an actual return to conditions where supplies are really easy seems some distance away. There have been no price changes recorded and a steady basis of quotations is looked for.

Bars Show No Variation

Toronto.

IRON AND STEEL.—Iron and steel bars are ruling at unchanged levels. Sales are within a comparatively narrow compass just at the present time, but the outlook for spring business is considered very good. Quotations in effect to-day follow.

TORONTO—	Per 100 lbs.
Common bar iron	$ 5 25
Common bar steel	5 50
Refined iron	5 65
Angle base	5 75
Horseshoe iron	5 50
Tire steel	5 70
Mild steel	5 50
Norway iron	11 00 13 00
Toe caulk steel	6 25
Sleigh shoe steel	5 50
Band steel, No. 10	5 75
Do., No. 12	6 00
Spring steel	9 50 11 50
Mining drill steel	19 00 30 00
Sheet cast steel	0 42 0 45
Tool steel	0 20 0 42

Sheets Hold Steady; Plates Light

Toronto.

SHEETS, PLATES.—There has been no material change in the situation on sheets. A basis of $11 for 28 gauge galvanized has been named by some sources which represents a decline from former figures. The mills are not in a position to do much actual commercial shipping before February from all accounts and whereas some shipments are coming, these do not represent a very heavy tonnage as yet.

BLACK SHEETS—	Per 100 lbs.
10 gauge	$8 50-$10 00
12 gauge	8 35- 9 60- 10 00
14 gauge	7 90- 8 40- 8 90
16 gauge	8 00- 8 55- 8 55
18-20 gauge	7 80- 8 05- 8 80
22-24 gauge	7 85- 8 10- 8 85
26 gauge	7 90- 8 15- 8 90
28 gauge	8 00- 8 25- 9 00
3/16-inch plate	- - 8 40
¼-inch boiler plate	8 00

Prices shown are for full cases. An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$11 00	$12 00
U.S. 28	10 70	11 70
U.S. 26	10 40	11 40
22 and 24	10 25	11 25
18 and 20	10 10	11 10
16	9 95	10 95
14 gauge	9 85	10 85

Prices shown are for full cases An extra charge of from 25c to $1 per 100 lbs. is made for less than case lots.

Corrugated Sheets Remain Steady

Toronto.

CORRUGATED SHEETS. — There is nothing new in the situation on corrugated sheets. Seasonable quiet rules over practically all lines of manufactured sheet metals, but the trade believes outlook for spring should be very good. Prices have held unchanged at nominal basis shown herewith:

TORONTO— Corrugated Sheets—	Per 100 Sq. Feet Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Wrought Pipe Holds; Tubes Unchanged

Toronto.

WROUGHT PIPE, BOILER TUBES. —A steady, quiet tone prevails in the market on pipe. The demands of the trade are not so very heavy and most urgent requirements being met. There are still some back orders to be cleaned up. The outlook seems to be that steel may gradually assume more nearly normal supply and a good healthy business is looked for during 1919.

Stocks of boiler tubes are practically nil and as yet no definite price changes have been put into effect. When further supplies are in sight this may hasten the day that lower prices will be named.

Boiler Tubes—	Per 100 feet	
Toronto—	Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00

3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Lower Solder Prices Named, Down 2c

Toronto.

LEAD AND ZINC PRODUCTS. — Lower prices on solder have been reached in some quarters amounting to 2c per pound. On the present basis, which shows a wider range, guaranteed is quoted at 48 to 55c per pound; strictly, 45 to 52c; commercial, 40 to 45c; wiping, 38½ to 50c; wire, 49¾ to 54c. The tin basis has been revised to lower levels and this is principal factor in decline, though lower lead prices are in effect in some quarters.

The decline in pig lead has exercised no downward influence on manufactured lead products as yet, quotations ranging at levels shown below.

Lead pipe, lb.	....	0 15
Lead waste pipe, lb.	....	0 16
Lead traps and bends	....	Net list
Lead wool, lb.	0 14	0 15

No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Metal Markets Fluctuating, Lead Lower

Toronto.

INGOT METALS.—The market locally shows considerable fluctuation, tin, lead and spelter being lower in some quarters. Free trading in London resulted in an advance in prices on copper, lead and spelter. If this is any criterion of what the removal of government control may mean, declines registered here this week are not likely to hold for any length of time. There is an evidence on the part of some holders to unload stocks.

COPPER.—Locally there is nothing new in the situation. Supplies are still scarce and price shows no change at 30-32c per pound. Free trading in London resulted in an advance in copper—will similar conditions result here after the first of the new year? That is the question.

TIN.—Lower prices have been reached in some quarters, quotations now ranging from 80c to 85c per pound. The trade seems to want to clean up on available stocks, though there are no further shipments reported moving to this market.

SPELTER.—Spelter at 10c per pound is now the figure reached by some interests, 11c is outside price. Free trading in London resulted in an upward move and prices in the States are quite firm. The present decline seems to be just a local flurry.

LEAD.—Similar conditions to those obtaining in spelter are reported, except that decline of slightly over 1c has occurred in United States markets. Locally prices range from 9½c to 10½c per pound.

ALUMINUM.—The situation is without change. Commercial supplies are not plentiful and the nominal quotation of 50c has not been altered.

ANTIMONY.—A price of 10c has been named in some quarters on antimony, although others are quoting from 13c to 15c per pound. The demand is comparatively small and interest limited.

LONDON MARKETS

LONDON, Ont., Dec. 5.—Many important price revisions are reported this week, advances being reported in spark plugs, hand saws, compass saws, brick trowels and pointing trowels. Chain hooks have also gone to higher levels, along with carpenters' wrecking bars, egg crates and window cleaners. A decline in the price of solder has been reported.

Christmas trade has already secured a brisk start and the outlook is for a good business. Pocket cutlery and carvers in cases are very scarce, but several shipments are reported en route from English firms. Whether these will arrive in time for the holiday trade is still uncertain.

Spark Plugs Revised Upward

London, Ont.

SPARK PLUGS.—Prices just issued on spark plugs show a higher level of values than that which has been ruling. Toledo Champion X spark plugs for Ford cars in lots of 100 are now quoted at 64c each, and in smaller quantities 66c; Toledo Champion spark plugs for all other cars are quoted at 67c each in lots of 100, and 69c in smaller quantities.

Prices Available On Sand Paper

London, Ont.

SAND PAPER, EMERY CLOTH.—Advice of an advance in the price of B. & A. sand paper and B. & A. emery cloth appeared in these columns last week, but at that time net prices were not available. These have now been determined on, prices on B. & A. sand paper being figured at list plus 45 per cent., and B. & A. emery cloth at list plus 37½ per cent. Quotations being made to the trade, figured net, are as follows:

B. & A. Sand Paper—	Reams	Quires
Nos. 3 0 to 0	$ 7.25	$ .39
No. ½	7.70	.42
No. 1	8.70	.47
No. 1½	10.15	.54
No. 2	11.75	.62
No. 2½	13.50	.72
No. 3	15.40	.81
B. & A. Emery Cloth—	**Reams**	**Quires**
Nos. 3/0 to 1/0	$41.25	$2.15
No. ½	42.90	2.25
No. 1	45.05	2.35
No. 1½	47.20	2.50
No. 2	50.20	2.65
No. 2½	54.20	2.85
No. 3	58.45	3.05

10 Per Cent. Advance in Hand, Compass Saws

London, Ont.

HAND, COMPASS SAWS. — New prices issued on Disston hand and compass saws show an advance of 10 per cent. over figures formerly ruling. On the present basis of quoting, hand saws are figured out at following levels: D 8 x 18-inch, $28 per dozen; 20-inch, $30.50 22-inch, $33.25; 24-inch, $36; 26-inch, $37.60. Compass saws are now quoted as follows: No. 2 x 12 inch, $7.35 per dozen; 14-inch, $7.60; No. 4 x 12-inch, $7.10; 14-inch, $7.35.

Brick, Pointing Trowels Move Up

London, Ont.

BRICK, POINTING TROWELS.—Higher levels have been reached on Disston brick trowels and pointing trowels during the week. This is the first change reported for some time and gives some indication of the strength of the markets in manufactured lines containing steel and wood. New prices on brick trowels are: No. 5, London pattern, 10½-inch, $16.20 per dozen; 11-inch, $16.95; 11½-inch, $17.75; No. 10, Philadelphia pattern, 10½-inch, $17.75; 11-inch, $18.50; 11½-inch, $19.25. Disston pointing trowels No. 15 x 5-inch are now quoted at $7.35 per dozen.

Solder Declines; Chain Hooks Up

London, Ont.

SOLDER, CHAIN HOOKS.—The lower prices which have been reached on

pig tin have largely influenced the decline on solder, which has been recorded this week. Half and half solder is now quoted at 53c per pound. Chain hooks, both slide and grab, have been revised upward, the new prices being as follows: Slide hooks, ¼-inch, 13½c each; 5-16-inch, 18½c; ⅜-inch, 24½c; 7-16-inch, 30c. Grab hooks, ¼-inch, 13½c each; 5-16-inch, 18½c; ⅜-inch, 24½c; 7-16-inch, 30c.

Silver Plated Ware; Razors, Cutlery Active

London, Ont.

SILVER - PLATED FLATWARE, RAZORS.—Activity is the keynote of the trade in silver-plated flatware, razors, and in fact all lines of cutlery. Prices are ruling firmly and without change. Rogers 1847 silver-plated flatware, all patterns, being quoted at 40 per cent. discount from list. Safety razors are selling well at maintained prices, the Gem Junior being quoted at $12.50 per dozen; Ever Ready at $10.80; Auto-Strop at $3.75 each; Gillette at $3.75 each. Stocks of pocket cutlery and carvers in cases are badly depleted. Several shipments from England are reported on th way here but there is no indication that these will arrive in time for the holiday trade.

Window Cleaners Higher; Egg Crates, Too

London, Ont.

WINDOW CLEANERS, EGG CRATES —Higher prices are reported on window cleaners or rubbers. Present quotations are: X L C R, metal frame, 10-inch, $2.50 per dozen; 12-inch, $3; 14-inch, $3.25; 16-inch, $3.50. Peerless, wood frame, 10-inch, $2.75; 12-inch, $3.25; 14-inch, $3.50. Egg crates have advanced, reaching very high levels. The Humpty Dumpty now selling at $6.50 per dozen.

Carpenters' Bars Up; Shovels, Scrapers Selling

London, Ont.

CARPENTERS' BARS, SHOVELS, SCRAPERS.—A new price has been named on goose-neck carpenters' bars, which provides for an advance over former levels. The ¾ x 24-inch is now being quoted at $6 per dozen. Good sales of snow shovels, furnace scoops, and sidewalk scrapers are reported. Prices remain firm and unchanged, with stocks in very fair shape to meet demands of the trade. Prices to-day are given as follows:

Snow Shovels—Arctic, japanned, $4.65 doz.; Prince or No. 20, $9.55 doz.; Queen or No. 30, $10.65 doz.; King or No. 40, $12.75 doz.; Moose or No. 50, $15.95 doz.; Wood, No. 116, $5.65 doz.; No. 118, $6.25 doz.; Galvanized, No. 127, $11.00 doz.; No. 128, $12.50 doz.

Furnace Scoops—D Handle and L Handle, $10.65 doz.

Sidewalk scrapers—Fox, $4.00 doz.; Bull Dog, $5.70 doz.

Freeze-proof For Autos Moving; Coasters

London, Ont.

FREEZE PROOF, COASTERS. — A good sale of freeze proof for automobiles is reported at present. Price is unchanged, Johnson's being quoted at $1.40 per package. Coaster wagons are enjoying a good Christmas sale just now and prices have been firmly maintained, the Auto Wheel Coasters being quoted at following levels: No. 00, $22.88 per dozen; No. 01, $45.04; No. 1, $54.34; No. 2, $60.06; No. 3, $66.50; No. 4, $75.79.

Linseed Oil Holds; Turpentine Firm

London, Ont.

LINSEED OIL, TURPENTINE. — Fluctuations in the seed market are still in evidence. Oil prices held without change during the week at figures shown below. Supplies are ample for immediate requirements, though by no means heavy. Turpentine markets in the South after a week, during which the "nothing doing" sign has been hanging out, are again active, and prices show a marked decline. The situation locally has not yet reflected this condition. Quotations are given below:

Linseed Oil—	Raw Gal.	Boiled Gal.
1 to 2 bbls.	$1.77	$1.80
3 to 5 bbls.	1.76	1.79
6 to 9 bbls.	1.74	1.77

Less bbls. add 10c gal.

Turpentine	Per Imp. Gal.
1 bbl. lots	$1.19
2 to 4 bbls.	1.18
5 gal.	1.29

WINNIPEG MARKETS

WINNIPEG, Dec. 5.—Advices for the past week show that markets in general are very firm. Galvanized sheets show a slight reduction, while advances have been named in hand saw handles and Banner poultry netting.

With the lifting of the "flu" ban, Winnipeg business is reported to be fairly brisk. However, many country points are still closed and trade from these points is naturally quiet. Christmas lines, such as cut glass, cutlery, toys, etc., are in good demand, and stocks are reported as well assorted.

Bolts Hold Firm in Steady Market

Winnipeg.

BOLTS.—Prices on all lines of bolts continue to hold firm, there having been no advance since July, 1917, although practically all other iron and steel products have increased. However, as none of the manufacturers are anxious for spring business on to-day's basis some revisions may be expected, unless increased stocks of raw material are available prior to that date. Prices still ruling are given herewith:

Carriage bolts, ⅜ and smaller	5% off list
Carriage bolts, 7 16 and larger	5% on list
Machine bolts, ⅜ and smaller	5% off list
Machine bolts, 7 16 and larger	5% on list
Plow bolts, all sizes	5% on list
Stove bolts, all sizes	50% off list
Shaft bolts, all sizes	5% on list
Tire bolts, all sizes	25% off list
Sleigh shoe bolts, all sizes	5% on list

Hand Saw Handles Revised Upward

Winnipeg.

HAND SAW HANDLES.—Hand saw handles show a slight revision upward during the week due to increased costs and the difficulty experienced in getting materials. Prices now effective are as follows:

Hand saw handles: D8 x 26 inch, $6.85; 24 inch, $5.50; 22 inch, $5.50 doz.

Panel saw handles: D8 x 20 inch, $5.10; 18 inch, $5.10 dozen.

Rip saw handles: D8 x 28 inch, $7.35 dozen.

Galvanized Sheets Show Decline

Winnipeg.

GALVANIZED SHEETS.—With prospects of getting galvanized sheets from the American side in the near future prices have undergone a slight revision, although stocks are still reported to be very low. Prices on black sheets continue firm and no immediate change is looked for. To-day's market prices on both black and galvanized sheets is given herewith:

Galvanized Sheets—10¾ oz., $12.00; 28 Ga., $11.50; 26 Ga., $11.20; 24 Ga., $11.05; 22 Ga., $11.05; 20 Ga., $10.90; 18 Ga., $10.90; 16 Ga., $10.75 100 lbs.

Black Sheets—28 Ga., $9.45; 26 Ga., $9.35; 24 Ga., $9.30; 22 Ga., $9.30; 20 Ga., $9.30; 18 Ga., $9.30; 16 Ga., $9.45; 14 Ga., $9.45; 12 Ga., $9.45; 10 Ga., $9.45 100 lbs.

Poultry Netting Moves Up 25 Per Cent.

Winnipeg.

POULTRY NETTING. — New advanced prices have just been announced covering Banner poultry netting, which moves up approximately 25 per cent. This is attributed to the extreme scarcity of wire, as all mills have been working to capacity on Government orders. To-day's ruling prices are given as follows:

Banner Poultry Netting. 24 inch, $5.30; 36 inch, $6.75; 48 inch, $8; 60 inch, $9.50; 72 inch, $10.80 per roll.

Outlook For Good Sales Game Traps

Winnipeg.

GAME TRAPS. — With the present high prices on furs large sales are expected on traps, and many of the jobbers report a steady movement at present. Prices continue firm at former quotations which are herewith confirmed.

Game Traps—Victor—No. 0, $1.95; No. 1, $2.30; No. 1½, $3.45; No. 2, $4.80; No. 3, $6.40 dozen. H. & N.—No. 1, $3.60; No. 1½, $5.40; No. 2, $7.50; No. 3, $10.00 dozen. Jump—No. 1, $8.10; No. 1½, $4.55; No. 2, $6.70 dozen.

Butts Hold Firm; Light Demand

Winnipeg.

BUTTS.—No change has been recorded in the prices of steel and plated butts for some time past. All lines are reported firm with only a limited demand. The following prices are still in effect:

Butts: No. 241, antique copper or drill brass: 2½ x 2½ inch, 37c; 3 x 3 inch, 39c; 3½ x 3½ inch, 40c; 4 x 4 inch, 52c; 4½ x 4½ inch, 75c; 5 x 5 inch, 94c.

Wrought Steel Butts. No. 840, net list; No. 800, 5 per cent. on list; No. 838, net list; No. 804, 5 per cent. off list.

Linseed Oil Holding Firm

Winnipeg.

LINSEED OIL.—Linseed oil prices remain firm at former quotations despite the fact that reports indicate considerable shortage of flax seed, as precedence is given to wheat shipments at the present time. Should this continue for long it may influence higher prices. To-day's markets are quoted as follows:

Raw Linseed Oil: $2.20 gal.; boiled linseed oil, $2.23 gal., in single barrel lots.

Turpentine Holds at Advances

Winnipeg.

TURPENTINE. — Turpentine prices continue to hold firm on the local markets at levels recently established. Stocks are reported as somewhat low with very little prospect of replenishing them in the immediate future. This is said to be due to the demand in the United States being practically as great as the output and no recession in prices is looked for. Prices now ruling are as given herewith: Barrels, $1.20 gal.; ½ barrels, $1.23 gal.; 5 gal. lots, $1.25 gal.; 1 gal. lots, $1.25 gal., plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Dec. 5.—Events as to "reconstruction" are moving rather rapidly. Reconstruction work itself is not formidable in character, for it is found to consist chiefly in ceasing to do the things that were being done as war measures, while industry is showing a strong disposition to reconstruct itself.

There is now good reason to suspect that recent talk of reconstruction was indulged in largely for its sentimental effect. For instance, at the outset it was on all hands considered imperative that the War Industries Board should continue to fix iron and steel prices, and there was much talk of the desirability of its fixing minimum prices instead of naming its prices as maximum, as formerly. The idea was that the iron and steel market was clearly booked for a great slump, and needed support for a while. The talk of fixing minimum prices was soon dropped, as it was seen clearly that nothing of the sort could possibly be done. Now there has been such further progress that it seems unlikely that the War Industries Board will set any prices at all. The present limits expire December 31, for they were as usual set to control deliveries to the end of the quarter. The board has intimated that it will fix prices only upon definite request of an industry involved, also that it will do so only in a case of emergency.

Control Relaxing

It looks now as if industry would be fairly well able to reconstruct itself, and that may be the reason why every day there is fresh news of the Government relaxing its control. It is not safe, however, to assume that it is positively settled such is the case. The relaxation of control may be due in part to the War Industries Board recognizing that the continuance of control would be difficult. Thus at the end of November the board ceased the making of allocations, announcing that thereafter the various "purchasing agencies" would make their purchases direct, the War and Navy departments, for instance, as well as the Fleet Corporation, the Railroad Administration and the purchasing commissions of the Allied Governments. Whether the initiative in this move came from the board or the buyers involved is not known. What is clear is that the authority of the board in the matter of prices is greatly reduced. Hitherto when it set maximum prices it made no particular effort to shade the prices, but placed the orders for the various requirements at the maximum limit. In future the condition would be that of the board fixing maximum limits and of the various agencies being free to seek to buy at lower prices than the limits. That they would seek to shade the limits is obvious.

Producers More Confident

Producers are showing more confidence in the price future. They do not expect the market to decline as much as they did a few weeks ago. Some blast furnace interests, though not all, venture to predict that if the pig iron market is left to itself it will advance. They claim that pig iron is stronger than steel, because in the past three years there has been more new construction of steel making capacity than of pig iron making capacity. It is true the steel works were fairly well supplied with pig iron during the war, but the foundries were not taking their usual proportion, and it would perhaps be difficult to find enough pig iron to operate all the steel works and foundries at capacity. Then it is claimed that Great Britain and France want large tonnages of pig iron, 750,000 tons being mentioned in the case of Great Britain.

The Matter of Wages

A question that has been much discussed, in connection with the future of iron and steel prices, is that of wages. It is understood that the Government does not desire to see any wage reductions and so the argument has been made that if the Government wants wage reductions to be avoided it should endeavor to sustain the market. Some criticism has been directed against the Government's policy of going slow in the matter of cancelling contracts for war steel, and what is back of the criticism is undoubtedly a desire to see conditions brought about in which wage reductions might be effected. In the last analysis, however, it is improbable that heavy wage reductions could be made. The steel mills are even now short of labor and the world's real work for the peace period has not begun. Furthermore, the iron and steel industry has in the past depended largely upon immigrant labor, and immigration has been shut off for more than four years, while prospects now are that instead of immigration there will be emigration of some of the foreign born. A great many men have signified their intention of going abroad as soon as they can secure passage. If half as many go as now think they want to go there will be a serious shortage of the class of labor upon which the coke works, blast furnace and steel mills depend. To attract American born labor in sufficient volume to make up the deficit might require further wage advances and the introduction of the eight-hour day. Steel mill labor works chiefly eight, ten and twelve hours, unskilled labor being almost entirely ten and twelve hour. Since the wage advance of last August the standard rate for common labor has been about 42 cents an hour. With the introduction October 1 of "the eight-hour basic day" the ten-hour men get paid for 11 hours and the 12-hour men are paid for 14 hours, receiving time and a half after the eight

(Continued on page 64)

BINDER TWINE PRICES NAMED

Basis for 1919 Determined Upon Shows A Decline of 1½c per Pound—Booking Business has Been Very Good

As HARDWARE AND METAL goes to press, an announcement has been made that binder twine prices for 1919 have been determined on. The new range of quotations provides for a decline of 1½c per pound over 1918 figures. Prices are not usually set until February or March, but as raw material market is down to a point probably as low as it will go to affect the next season's business, there was no reason to hold off naming figures. The new prices are as follows: 500 foot, 22c per pound; 550 foot, 23¾c; 600 foot, 25c; 650 foot, 26½c. Booking business has largely been completed and represents a very satisfactory total. The actual crop of course will determine actual business done, and that is something for the future.

WEEKLY PAINT DEPARTMENT

Put It Up to the Farmer Plainly

Hundreds of Thousands of Dollars' Worth of Costly Machinery Left Unpainted and Unprotected Out in Fields or Under Trees, Through Winter Storms —Big Talking Point For Hardwaremen to Sell Paint

"WHAT would a man say to his wife if she were to leave her $50 sewing machine out over night in a rainstorm? Well, he would do a plenty if she persisted in leaving it out in the weather. Yet the same lord of creation has left his farm machinery standing in the fence corner. Many of these costly tools will stand out unprotected all winter. What should your wife do to you, Mr. Farmer? She should get a rolling pin after you and make you house them now. You can save a ten-dollar bill any day this week by acting on this suggestion."

NEGLECT IS GENERAL

A country editor wrote as above after a short trip through the countryside recently. On every hand he found machinery that in many cases had cost hundreds of dollars, neglected and left for the elements to destroy. The same thing is true all over the Dominion, and the damage that results runs into huge sums.

There is a chance here for the hardwareman to boost his paint sales by impressing upon the farmers the fact that by painting their implements they can protect them from the ravages of the weather. A little paint applied regularly will mean many dollars directly in the pockets of the farmers. It will save machinery, waggons and other costly equipment, and lengthen their life by many years.

POINTS TO EMPHASIZE

Now that the farmer is over his rush of fall work and has time to spare, he can use it most profitably by painting up his implements and equipment. The cost will not be large and the saving will be many times the outlay. Point out to him that trees and fence corners are not good places in which to store machinery during the winter. He would not think of leaving his new automobile out in a snowbank all winter or under a tree. If he did he would find a sad-looking car in the spring. While farm implements are not, perhaps, as highly finished or as classy looking as an auto, they suffer just as severely from the effects of the weather, and their life is shortened by careless handling and neglect. There is no excuse for not painting, and just now, when prices of new equipment are high, a few dollars spent for paint will make the old implements last as well as new. If they are painted regularly every season, and given reasonable care the owner will not have to buy new ones for years.

It is estimated that every winter farm implements and machinery valued at several million dollars are left unpainted and out in fields or under trees. The loss that is sustained in this way runs into large figures and affords the hardwareman an argument for selling paint against which there is no real come-back.

USE THEIR WINDOWS

Some dealers in market towns, where large numbers of farmers come in two or three days a week, have found it pays to drive this fact home by placing a rusty, weather-beaten implement in their window and painting one-half of it. The object lesson is so striking that it needs no explanation. Every farmer who sees the window display can see the difference the paint makes at a glance. If he comes into the store the dealer can impress upon him the lasting qualities of the particular line of paint he handles and the importance of preserving not only his machinery, but his house and barns by painting them regularly.

Paint Is Paint! And So Is—
MOORE'S

All paint looks alike to some dealers, but not to the dealer who handles Moore's Paints.
Moore's Paints, Varnishes and House Colors not only **look good** but possess all the high-class ingredients that go to make up a superior product.
We are proud of our reputation as manufacturers of good paint.

Your customers will find Moore's Paints reliable, 100% efficient, and possessing lasting qualities, not met with elsewhere.

Dazey Churns

The Dazey makes more butter from a given quantity of cream than any other churn on the market. The butter is better worked and when the churning is completed all the globules are gathered together on the dasher which saves the trouble of gathering them from the buttermilk. The square corners of the dasher produce more agitation, resulting in the butter being churned more quickly The whole churn is easily removed and washed. We have them in glass in three or four quarts, and in steel in two, three, four, six and ten-gallon sizes. We can furnish the six-gallon with power attachment to run with a groove pulley.

CALGARY

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, Dec. 5.—Changes this week include a seven cent drop in linseed oil and a firming of the position on turpentine. The latter product is still on a held basis, however. Stocks held are light and many are not offering any nor are they even quoting for future delivery.

The outlook for the coming season is reported satisfactory from all sides and many good orders are in hand for attention at the usual time early in 1919. Already many bookings have been received for insecticides for the coming season and the development of trade for these lines will very probably continue.

Seven Cent Decline For Linseed Oil

Montreal.

LINSEED OIL.—A decline of price has been registered for linseed oil this week totalling seven cents. This makes the bottom price for raw $1.66 in one to four barrel lots, with the usual differentials for larger quantities.

While the future seed market has ruled easier, spot seed is steadier and there is not expected to be much recession from the present position. The outcome of the price basis will devolve a great deal upon the state of transportation. If the export of South American wheat to Europe develops, the relief that will then come to the Canadian transportation lines through an easing of delivery from the West of Canadian grain, may permit better and quicker shipment of seed to this market. With navigation about closed, this movement would have to develop over all rail routes.

LINSEED OIL

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 66	$1 73
5 to 9 bbls.	1 65	1 73
10 to 25 bbls.	1 64	1 73
Boiled, Imp. Gallon—		
1 to 4 bbls	1 68½	1 76
5 to 9 bbls.	1 67½	1 76
10 to 25 bbls.	1 66½	1 76

No Lower Prices For Turpentine

Montreal.

TURPENTINE.—There is still a steady and firm market for turpentine and the tendencies seen just a little hard to determine. Some are selling 5 gallon lots at $1.30 per gallon and there is a general scarcity in this market, with little promise of any improvement. Some of the paint makers who customarily sell have none to offer at the present time and are therefore not quoting.

Turpentine.	Per Imp. Ga.	
1 to 4 barrels	$1 15	$1 20
5 barrels and over	....	....
Small lots	1 21	1 30

(Packages extra)

Putty Moved Well; Quotations Hold

Montreal.

PUTTY.—The movement has been very heavy for some weeks but there is now a cessation of outdoor work to a great extent and the movement will be curtailed. The price basis is unchanged and steady.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Paint Sold Freely; Varnishes Are Firm

Montreal.

PAINTS, VARNISHES.—The mixed paint trade for 1918 has been a large one and the season is now well along to a close. In the matter of spring business, the bookings have been reported as good and the trade in a general way has been very satisfactory. Orders have naturally been somewhat fewer for the past few days and still the orders taken in the early fall total up well and no cancellations have been reported whatever.

Varnishes are still in a firm position and there is still talk of higher prices prevailing ere long.

White Lead in Oil Expected to Hold

Montreal.

WHITE LEAD IN OIL.—While the price of pig lead has declined one cent the market on white lead in oil is not expected to change at this time. This product has been bought well ahead and as showing the position with regard to delivery HARDWARE AND METAL was informed that some orders placed many months ago are only being delivered now. And in spite of the easing of markets in the States, the prices have advanced from $15 to $19 per ton in England.

Local prices are quite unchanged with five ton lots selling on the basis of $17 per 100 lbs.; ton lots at $17.50 and smaller quantities at $17.85.

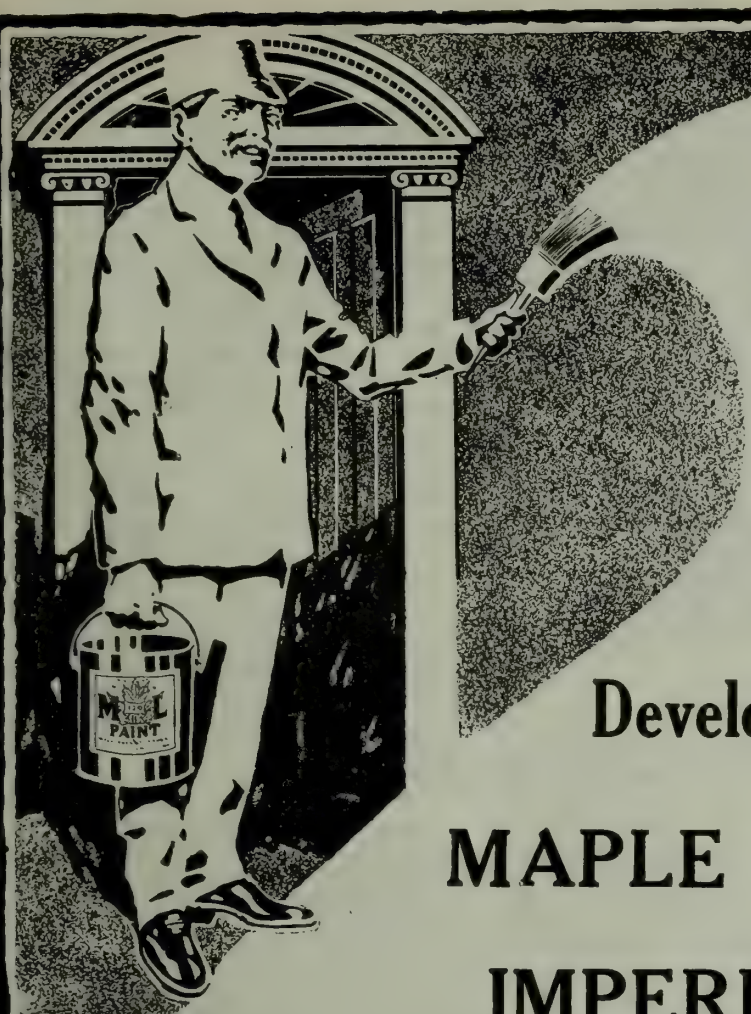
TORONTO

TORONTO, December 5.—Linseed oil has been revised again, lower levels being reached in some quarters. Turpentine has held without change on the local market, though declines at primary points are shown. Lower pig lead and lower linseed oil have not yet exerted any influence on white lead in oil, but raw materials are sure to determine values eventually on all commodities. Mixed paints for spring are selling freely, some manufacturers looking for a big business year in 1919.

Linseed Oil Again Lower

Toronto.

LINSEED OIL.—A further revision in linseed oil prices has occurred this week with downward tendencies noticeable. The seed market has come down around 11c per bushel, due, it is thought to a probable easing away of the demand now that prospects of shipping by boat are practically nil. Crushers report that movement of seed by boat, on which they now have fairly accurate figures has been very good. Dependence for further supplies in the next few months must be placed on the railroads, and it would seem that there may be delays owing to heavy troop movements which may soon be in progress, along with usual heavy traffic demands during a period of adverse working conditions experienced during the winter. The range of quotations on linseed oil follows:



Linseed Oil—	Raw Imp. gal.	
1 to 2 barrels, gal.	$1.68	-$1.77-$1.82
3 to 5 barrels, gal.	1.67	- 1.76- 1.81
	Boiled Imp. gal.	
1 to 2 barrels, gal.	$1.70½	-$1.80-$1.85
3 to 5 barrels, gal.	1.69½	- 1.79- 1.84

Add 10c gallon in smaller quantities.

Local Prices on Turpentine Hold

Toronto.

TURPENTINE.—Locally there is nothing new to report on turpentine. Supplies ample to meet present demands, and there is really very little movement in progress. Primary points show a marked decline this week after a decidedly dull period, some interests who have been holding stocks evidently unloading. The factors which resulted in the recent advances have not been removed or satisfied, and whereas it seems probable that little change may now be expected until after the first of the year, higher prices seem almost sure to come.

Develop Your Farm Trade

with

MAPLE LEAF PAINT

and

IMPERIAL BARN and ELEVATOR PAINT

Upwards of 63% of all farm property is suffering loss and being allowed to show inexcusable neglect on account of not being properly painted with sufficient frequency to keep it in first-class condition.

Not more than 10% of Canadian barns and stock buildings have ever been painted at all.

Paint Dealers of Canada! This condition exists all about you. What are you doing to stop it?

It is a condition that should open your eyes to an opportunity for a greater and more profitable Paint Department.

We Will Help You To Get This Farm Trade

Give us a list of the owners of neglected farm property in your locality and we will co-operate with you in bringing **MAPLE LEAF Paints** and **IMPERIAL BARN** and **ELEVATOR Paints** to their attention.

Figure this possibility in with your plans for Spring business. The farmer is the man who will have the money next Spring.

Get his business; it is to be had and it's worth while.

THE IMPERIAL VARNISH & COLOR CO. LIMITED
WINNIPEG TORONTO VANCOUVER
CANADA

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1 15-$1 19
2 to 4 barrels (barrels included)	1 14- 1 18
5 gallon lots	1 25- 1 29

Outlook For Mixed Paints Good

Toronto.

MIXED PAINTS.—The outlook is splendid for spring business according to all manufacturers. The amount of booking orders coming to hand is very encouraging, and preparations for a heavy 1919 trade are well under way. Prices have held firm and unchanged, the various grades being shown in current market quotations.

White Lead in Oil Holds Steady

Toronto.

WHITE LEAD IN OIL.—Steadiness is still the keynote as far as white lead in oil is concerned. A decline in pig lead and declines registered in linseed oil have not yet exerted any influence on the manufactured goods though the price of raw material must be a factor in determining future values. Pure white lead in oil is being quoted at $17.80 per 100 pounds in ton lots, and $18.15 in smaller quantities.

Glass Holds Firm; Putty is Quiet

Toronto.

GLASS, PUTTY.—The undertone to the market on window glass remains firm. Labor is making further demands for wages which will be met and which will have the tendency to at least maintain present levels, if not supersede them with higher prices. Discounts appear in current market quotations. The outlook in putty is unchanged. Oil is lower but no better supplies of whiting are yet in sight. Trade is quiet just now, the demand having fallen off considerably.

WEEKLY MARKET REPORTS

(Continued from page 59)

hours. At 42 cents the 14 hours is $5.88 per day, and an actual eight-hour day might be impossible at a 42-cent rate, which would make only $4.20. It must be accepted as positive, at any rate, that there is not going to be any great reduction in the wage cost of mining ore and making coke, pig iron and steel, except as some reduction occurs through men rendering better service than of late. Steel prices cannot possibly decline to the pre-war level.

The new demand for pig iron and steel is not heavy by any means. It is insistent, but is only for relatively small lots and for early deliveries. The market certainly has not struck its gait yet for there is none of the heavy buying for construction work, for "investment" purposes that is always essential to give the market full support and employ the industry at capacity. Even that part of the Government demand that is to be counted upon for the future is not much in evidence. The Railroad Administration shows no disposition to place orders for rails, cars or locomotives at this time. The Fleet Corporation has suspended some plate contracts, on the ground that the plans are being changed so that fewer small vessels and more large vessels will be built, and new specifications will be filed later against the revised program.

Predictions are of course very hazardous, but the balance of probability seems to be that something like the following will occur:

Present maximum limits for pig iron and steel products, set to cover deliveries through December 31 to continue to be observed, without the War Industries Board taking any action as to the later period; producers to endeavor to have buyers take out as much tonnage as possible of their present commitments, then to reduce prices to a level that will tempt buying as investors get ready to take hold, probably some time in the early spring, new buying being confined meanwhile to the filling of pressing requirements, against which buyers cannot afford to wait. The chief doubt is whether there will be a slump in the market, with a quick recovery, or a gradual settling to a regular trading basis on which the market will sustain itself. It goes without saying that eventually there will be heavy demand; if there is not, 90 or 95 per cent. of the trade is now laboring under a great error.

Too Late For Classification

YOUNG, EXPERIENCED HARDWARE MAN desires position as travelling salesman for manufacturer or wholesale house. Previous road experience and good Western Canada connection. Apply Box 130, Hardware and Metal.

SHOW CARD WRITER'S OUTFIT, CONSISTing of Paasche air brush E2, air tank, hose, seven bottles color, stencils and brushes, $25.00. Apply Box 643, Hardware and Metal.

Among the interesting features of the convention of the Canada Paint Company at Montreal, was the presentation to some 17 employees of twenty-five years standing, and over, of solid gold watches and long service diplomas. A photograph of the long-service employees appears herewith and two of these are now on the pension list of retired employees. Three of those serving the company for over 25 years were unable to be photographed with the others.

A Quality Standard

"Equal to Berry Brothers" is a statement often heard by varnish buyers. This is because the uniform dependability of all their products has caused them to become the standard of comparison.

There is no surer prelude to an artistic and lasting finish on woodwork, walls, floors and ceilings than Berry Brothers' varnishes, enamels and stains.

The wide knowledge of this fact among discriminating buyers makes all products bearing the Berry label easy to sell.

WHY EVERY HARDWARE CAN RECOMMEND THE ARISTOCRAT OF BABBITT METALS

Harris Heavy Pressure and its Advantages

1. **A complete immunity from hot bearings is secured, HARRIS HEAVY PRESSURE** having a lower co-efficient of friction than any other known metal.
2. **A scored journal is impossible,** and if through any failure of lubrication a bearing should run hot, **HARRIS HEAVY PRESSURE,** owing to its special properties, will act as a lubricant, saving the journal from injury and preventing any delay to traffic.
3. It will stand the **heaviest pressures,** always running cool, even under the most trying conditions.
4. It will **wear** from 50 to 100 per cent. **longer** on general machinery bearings than any other Babbitt metal.
5. It effects **a saving in lubrication.**
6. It **preserves the journals,** and materially **increases their life.** A journal after running a short time with **HARRIS HEAVY PRESSURE** attains a perfectly smooth and highly polished surface.
7. It is easily applied and, if properly applied, no abrasive force will remove it.
8. **Its cheapness.** The first cost is moderate. It gives a longer life to the bearings, resulting in a great economy, as the number of renewals is thereby considerably reduced; its specific gravity is low in comparison with other metals; does not deteriorate with re-melting; and these advantages, together with its unequalled anti-friction properties, render it the **cheapest** as well as the **best metal** for all general machinery bearings.

Terms 2% 30 days, approved credit.

Freight equalized on Chatham, Guelph, Hamilton, London, Montreal, Toronto, Welland.

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

KWIK-LOK

Ignition Lock for Four-Ninety Chevrolet Cars

is one of the simplest and most effective ignition locks on the market for the Four-Ninety. It is permanently and easily attached to the car and offers no possibility of loss or misplacement. One simple operation is required to lock. The lock is attached to the dash in such a position that the bow of the lock encloses the ignition button. When unlocked with bow up the button is free to be pulled out for starting. To lock, it is necessary only to press down the bow, not using the key, which is required only in unlocking.

A Blended White that pays good profits

Many Dealers are making a good profit on White despite the high cost of White Lead. They have discovered a good thing and are passing it on to their customers—a Blended White that does everything White Lead will do, but costs a great deal less.

Pure Superba White

is an excellent paste white made from pure carbonate of lead, barium sulphate and zinc oxide, ground to an extreme degree of fineness in pure refined linseed oil.

If you wish information on any of these products, mark with an X.

- **Pure Superba White**
- **Crown Diamond Liquid Paints**
- **Munns' Wall Size**
- **Crown Diamond Pure White Lead**
- **Lucas Imperial French Greens**
- **Lucas Dry Colors**

Pure Superba White is *very* white, and *stays* white. It will not blacken, turn yellow, crack, peel or blister. It is used and recommended by the best master painters.

This is a picture of the bristles shed by a

There aren't any!

It isn't only that Rubberset Brushes *don't* shed their bristles. They *can't!*

The bristles are embedded in soft rubber which is then vulcanized so that bristles and rubber are one inseparable unit—the grip is *everlasting.*

Bristles will wear out, of course, in time. But Rubberset bristles never come out—never shed—never work loose.

That is why we can guarantee absolutely that "Rubberset Brushes will make good—or *we will!*"

Are these not the kind of goods you want to sell in your store?

Isn't it a good thing for your business to sell brushes that in every case give satisfactory service?

And the wide range of Rubbersets brings the buyer of one style brush back for other members of the same sturdy family.

You cannot handle any line of goods which will sell with less effort—give greater satisfaction to your customers than Rubberset Brushes.

A Vacuum Cleaner You Will Be Proud To Sell

No invention of recent years is meeting with such popularity as the electric vacuum cleaner. It is being introduced fast into modern homes everywhere because it is not only a wonderful labor-saver—doing away with the old insanitary broom with its hard toil—but a health-producer as well, for with dust and dirt it carries off germs from carpets, rugs, furniture, curtains and floors. This immense market is just beginning. It promises to be a rich field for any merchant to exploit. *Now* is the time to get into it. You cannot afford to delay a single day.

But in selecting the vacuum cleaner you will sell it is important to choose one the efficiency of which has been *absolutely proven*, one which not only sells readily but *stays sold* and brings more customers on the recommendation of delighted users.

The "APEX" meets these conditions absolutely. It is in constant use in over 50,000 homes in the United States and Canada and possesses the very highest reputation. One of its many strong features is its remarkable sloping nozzle, slender and powerful, which pokes under radiators, low furniture and tables and gets close up to wainscotting and into all out-of-the-way places. Its suction is powerful enough to remove all dust and lint from the *surface* of the carpet and from *underneath* the carpet. It is easy to sell because its efficiency is at once apparent.

The Apex ELECTRIC SUCTION CLEANER

We cannot tell you all the story here, but if you are interested, write us at once and we will be glad to give you full particulars. You may rest assured that if you sell the "APEX" you will dominate the vacuum cleaner market in your town. It is the best machine for cleaning, best for selling, best for profits.

Secure the agency at once—you are still in time to get a share of the Christmas trade.

McDONALD & WILLSON, Limited

Makers of the "TROJAN" Electric Washer, Lighting Fixtures, Etc.

THERE ARE PROBABLY FIFTY
DIFFERENT MANUFACTURERS

— OF —

SET IN RUBBER BRUSHES

BUT THERE IS ONLY ONE

TRADE SIMMS SET IN RUBBER MARK

DON'T BE FOOLED BY THE TERM "SET IN RUBBER"

IF A BUNDLE OF STRAW WERE SET IN RUBBER YOU WOULD HARDLY CARE TO LATHER YOUR FACE WITH IT

The making of good Brushes is a complicated art, of which the setting in rubber, however difficult to do well, is but a minor part.

First comes the development of the skilled labor, used for the many different operations, in which years and years of careful training is required; then the accumulated experience of years in the selection of the proper materials; then the blending of these materials in a way to suit the many special needs of the brush-user and the treating and preparing of these materials, and finally the product,

"BETTER BRUSHES"

They are necessarily "Set in Rubber," but so also are the poorer kinds. Protect yourself and your customer by buying

TRADE SIMMS SET IN RUBBER MARK

More-Profit Pumps ---Real Profit

No use to sell a pump that makes trouble for a dealer with his customer.

The trouble is remembered. The cost of repairs is dead loss of time and temper. The dealer suffers.

"Aremacdee" hand and motor metal pumps for force or lift use, every kind, are shown in the big catalogue.

Dealers, ask for prices and terms. Get real profits on your metal pump sales.

GALT, CANADA

CONSERVE LABOR

Everyone possesses some degree of energy. That energy expressed is labor. Without labor the world would suddenly stand still. Production of any kind would be absolutely impossible. Humanity would perish.

Labor is, and will continue to be scarce. Labor is costly. Expenditure of labor through inefficient methods is a waste not only of labor, but of time and money, all of which should be expended more profitably.

A Figure 109 Installation
(From an actual photograph)

BOWSER
ESTABLISHED 1885
SYSTEMS

for the storing and handling of oil will conserve

70%

of the labor necessarily expended by less efficient methods.

They also conserve—

TIME
CAPITAL
SPACE
MACHINERY
LIVES
PROPERTY
MATERIAL

Bowser Systems are

LEAK-PROOF
LOSS-PROOF
FIRE-PROOF
DIRT-PROOF
EVAPORATION-PROOF
DETERIORATION-PROOF

An inquiry carries no obligation whatever. Let us help you conserve labor.

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

NATIONAL PROBLEMS OF CANADA DISCUSSED AT ANNUAL MEETING OF THE BANK OF MONTREAL

Sir Vincent Meredith, President, Dealt With the Difficult Problems of Increased Taxation—Bank Will Open Branch in Paris, France—Sir Frederick Williams-Taylor, General Manager, Pointed Out That There Never Was a Time When Country Was in More Need of a Sane Financial Policy.

Montreal, December 6, 1918 (Special) —The annual meeting of the Bank of Montreal held at the head office, took on many of the features of a national gathering.

The Bank, by its position, had played a principal part in directing the country throughout the trying conditions of the war period and at the meeting Sir Vincent Meredith, the president, and Sir Frederick Williams-Taylor, the general manager, took up the problems that Canada must necessarily fave during the post-bellum period. The addresses at the Bank of Montreal annual always have a special bearing on the events of the day, but this year perhaps more than ever before they contained references of the utmost interest and benefit to every business man in Canada.

Everywhere there prevailed a strong belief that Canada was in an excellent position to grapple with the difficulties of the period of readjustment.

Problems of Canada

Sir Vincent Meredith, the president, dealt particularly with the problems immediately ahead of the country. The most important, Sir Vincent pointed out, was how the country was to meet the interest on the vast debt of possibly $1,800,000,000, which would exist after the war. Increased production would relieve the country of a portion of its burden and this, with strict economy and growing population, would in time adjust the difficulties of the country.

Taxation cannot easily be lessened and may be increased, added Sir Vincent. A levy on capital, advocated in some quarters, must only result in the stifling of individual incentive and enterprise and the penalizing of industry, self-denial and thrift. Taxing capital to the point of unemployment in industrial enterprise would involve unemployment of labor and produce serious consequences. If placed principally on consumption, the burden of taxation is distributed.

The New Conditions

With the cessation of hostilities, the cancellation of munitions contracts has begun and the adaptation of war industries to peace conditions will doubtless bring about a check with possible dislocation of business but these adverse factors should prove transitory.

If Canada is to share in the business opportunities during the period of reconstruction, the banks must stand ready to arrange liberal and probably long term lines of credit providing the necessary funds from their own resources or availing themselves of rediscount with the Dominion Government.

As the war ends, all signs point to a great demand for capital for reconstruction, refunding and replacement purposes and interest rates in consequence will in all probability rule high for some time to come.

With particular reference to the affairs of the Banks, Sir Vincent announced that the distribution to the shareholders would now take the form of a straight dividend of 12 p.c. per annum, instead of a dividend of 10 per cent. and a bonus of 2 p.c. With a view of enabling Canada to be closely in touch with the affairs in France during the period of reconstruction the Bank was also making arrangements for the opening of a branch in Paris.

Sane Financial Policy

Sir Frederick Williams-Taylor, the General Manager, dealt more especially with the growth and development of the business of the Bank and financial conditions in the principal centres of the world. Sir Frederick pointed out that there never was a time when Canada was more in need of sound economic thinking and a sane financial policy as at present.

With the acquisition of the Bank of British North America the resources of the Bank now totalled $558,413,546, of which $34,468,283, belonged to the shareholders and $523,945,262, was entrusted to the care of the Bank by the public. It was worthy of note that the Bank's total assets are now as great as were the combined total assets of all the Canadian Chartered Banks seventeen years ago.

The Bank ever kept before it its duty to its depositors and shareholders. At the same time the Bank had a further duty, national in nature, in financing established business and in fostering the young industries of the Dominion. For these various purposes the power of the Bank was greater than ever before while its position had never been stronger or more elastic. It was of interest to point out that while the cost of everything else had risen the public had paid no higher rate of interest for banking accommodation than before the war.

As regards the outlook in the country, Sir Frederick said:—

"It will bear repeating that Canada possesses all the attributes of a great nation, excepting population. The crying necessity of the hour is for increased production. This cannot be fully achieved without immigration. We have room and opportunity for many millions of farmers and for a good class of labor to develop our mineral wealth and our fisheries and to convert our great forests into lumber and into pulp and paper. One sure way of attracting such immigration is to make living in Canada cheap. To attain this object there must be an end to the public and private extravagance of the past."

Business is Good

Sir Vincent Meredith said in part:—

"The business of the Bank has been well maintained during the year. In view of possible Government financing and the somewhat uncertain outlook at home and abroad, we have consistently set our faces against over-expansion which is to be deprecated under existing conditions. While giving our customers all reasonable accommodation required and taking up many new desirable accounts, we have maintained a strong liquid position, continuing a well considered policy of the Bank; a policy which in the past as now, had added materially to the Bank at home and abroad and of Canadian finance generally.

"Turning to the British finance, two outstanding features during the year were: First, the success of the system of continuous borrowing by means of the 5 p.c. Nation's War Bonds, which were made available to investors at all times on application. This plan yielded the huge sum of £1,200,000,000 from daily subscriptions and avoided the unsettling of the money market which invariably attended the placing of great war loans. Notwithstanding this remarkable response of the investing public, deposits held by the banks in England are actually larger than a year ago.

"The second feature is the amalgamation of some of the more important banks in Great Britain, resulting in a closer co-operation between the Imperial Treasury and the banks in meeting and solving the financial problems with which the country was faced.

Change Policy Slightly

"The question of opening branches in foreign countries to participate in the business that may arise in connection with reconstruction requirements abroad is one that has received considerable attention from your directors. Following the policy of many English banks, we have deemed it prudent to refrain from establishing branches at points far afield where Canadian capital would be required in local and possible competitive industries, preferring rather to strengthen and extend our relations with foreign banking houses and to retain their good-will, thereby conserving our resources for the assistance and encouragement of home trade. In this connection it may be well to mention that we propose presently to establish an agency of the bank in Paris, not for the purpose of loaning Canadian funds but to supply necessary banking facilities to Canadians travelling abroad and to further the interests of Canada generally in France.

"Sooner or later we in this country will without doubt have to meet foreign trade competition of cheap and skilled labor together with advantageous transportation facilities, to a more pronounced extent than Canada has yet experienced. If this competition is to be effectively coped with, the increased efficiency, co-operation and co-ordination to which I have referred are essential. Our best energies must be

directed to greatly increased production of our basic, agricultural and other great natural resources. In this way, and by strict economy in government municipal and personal expenditures, a solution can be found of our difficulties of exchanges, the maintenance of our favorable trade balance and the payment of our war debt. Otherwise we must look for a shrinkage in business, to be followed by a readjustment of the scale of wages for labor and of the prices of all commodities.

"We shall undoubtedly for some years have to pay in relatively high taxation the price of our devotion and patriotism, but I am confident this will be done uncomplainingly, in the belief that all present and prospective difficulties can and will be overcome."

Stood Strain Well

Sir Frederick Williams-Taylor said in part:

"The ease with which financial Canada has met the stress of war condition has been favorably commented upon abroad. At home one hears no expression of surprise at the stable financial conditions in the Dominion.

"The real basis of that stability is a banking system that has proved most efficient in peace times and with the facilities accorded by the Minister of Finance, has withstood the severe test of war times. The system as it stands is without doubt adequate to meet any possible demands arising during the reconstruction period and for many years thereafter.

"The anticipated disturbance in bank deposits resulting from domestic Government war loans has subsided, and was to be expected. Seeing that the proceeds of such loans remain in the country, the money, of necessity, finds its ultimate way back to the banks through one channel or another; and therefore the loanable capital of the banks is, in the long run, undiminished. On the other hand, the strength of the banker's position lies largely in his command of numerous small deposits. The volume of deposits has increased by many millions, but the number has not grown proportionately. Our own deposits are now $569,727,811.96, as compared with $330,795,390.72 a year ago. This sum includes $48,950,000 Bank of British North America money. As usual, we have certain large deposits of special character. The increase in our savings deposits is reasonably satisfactory.

Rates Not Increased

"As regards profits, an impression exists that these war years have been unusually fruitful for the banks. The reply is that when adequate provision has been made for unknown future rates for taxation in Canada and elsewhere, for the increased cost of administration, for heavy depreciation in even the most gilt-edged securities, it may be stated without reservation that the net results are none too ample for safety. I would emphasize another point, viz., that while the cost of everything else has risen, the public have paid no higher rate of interest for banking accommodation than before the war.

"After passing thro•gh the inevitable period of economic confusion which all countries must endure, that country of boundless wealth and virility, the United States, the only great power, by the way, to emerge from the war better off financially, may probably enter upon an era of unprecedented expansion and development. Canada must share in such prosperity independently of the part we hope to take in supplying Europe's reconstruction and regular demands. Meanwhile, there never was a time when our country was more in need of sound economic thinking and sane financial policy.

"Our New York and London Offices have been invaluable channels for international transactions during the war.

"In London, the important banking events of the year have been a series of bank amalgamations regarded by those competent to judge as wise preparation for foreign trade competition after the war.

"The Dominion has been penalized during the past year by a heavy premium on New York funds. This new condition is a matter of wide-spread interest.

"In theory, there are four ways in which this onerous penalty can be removed: by increased exports; by reduced imports; by paying in gold; or, by borrowing in outside markets. None of these remedies is at hand, but with the return of peace, Canada should at least be able to float public loans in New York. Then also we can hope for better things so far as imports and exports are concerned. Also there is on balance a large amount owing our Government by the Imperial Government and $200,000,000 is owing the Banks of Canada by the Imperial Government, representing wheat and munition purposes. In due course, these combined amounts will aid the exchange situation. The premium in question should, therefore, diminish sooner or later to a point that will be immaterial. Meantime it discourages the importation of non-essentials from the United States, and the investment of Canadian funds in American and foreign securities."

Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

Stanley Tools

Stanley Adjustable Spoke Shaves Nos. 151 and 152

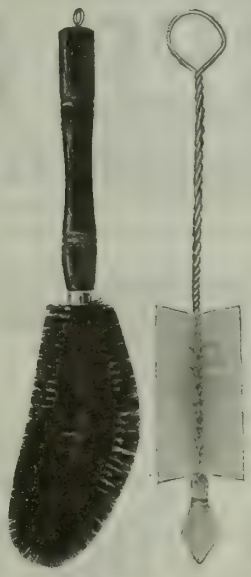
These new and improved Spoke Shaves have a Lever Cap fastening the cutter in such a manner as to bring an even pressure on the cutting edge.

The important feature is that the cutter can be quickly adjusted both endwise and sidewise by means of the adjusting screws which engage the slots near the end.

The Cutters are made from a high grade of steel, well tempered and sharpened ready for use.

The handles are japanned and through each a hole is made to enable the owner to hang the tool up out of the way.

Made in two styles—one with raised and the other with straight handles.



10 in. long, 2⅛ in. Cutters.

GOODELL-PRATT

1500 GOOD TOOLS

Automatic Screw-Driver

No. 111

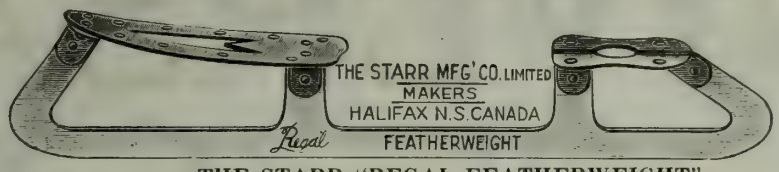
With Ratchet and Locking Device

THIS tool will operate either right or left hand, automatically or by using the ratchet mechanism. It can also be used as a stationary Screw-Driver by setting the shifter knob at the star marked on the ferrule.

The spiral has just the right angle for giving plenty of power with sufficient speed for all purposes.

The spiral and spiral nuts are made of hardened steel. This form of construction makes the operation easy by insuring smooth-bearing surfaces at all times. It also prolongs the life of the tool by permitting the threads of the spiral and spiral nuts to withstand the strains to which they are subjected in a tool of this power.

Each Screw-Driver is furnished with three interchangeable tool-steel blades.



The length extended, with blade in place, is 18 inches. Length closed, without blade, 10 inches. Price **$2.80.**

"WW" BRAND

WE HAVE A BETTER PROPOSITION THAN ANY CANADIAN MANUFACTURER OR JOBBER. WRITE FOR IT.

"WW" BRAND

A New Poultry Fence

THIS is not a line that is called for largely at this season of the year, but the great majority of good merchants make their purchases now. We have a thousand customers or more who buy Wickwire's Poultry Fence, and will not take any other, for the following reasons:

There's more than one reason for the popularity and selling strength of "WW" Brand Poultry Fencing, but all of them can be traced back to the idea of giving the best value and highest quality possible. The manufacturers of "WW" Poultry Fencing mine their own ores, operate their own blast furnaces, open hearth mills, rod and wire mills, etc., in short, they control every step in the manufacture and therefore can regulate the quality from the beginning to the end. Nothing but the best is allowed to pass.

Made in one and two-inch mesh horizontal wires one gauge heavier than all other makes.

When you stretch the "WW" Fence the strain comes on the Horizontal Wires only.

We also stock Wickwire's Hexagon Netting—all standard widths, 12″ to 72″; galvanized after weaving; the price of which is no higher than galvanized before weaving, but worth a lot more.

"WW" BRAND

We are headquarters for Wickwire's Screen Cloth.
The price is no higher than other makes. We can supply green painted cloth, if required.
Write for our propostion.

Put This Stand On Your Counter

This attractive stand displays a Millers Falls Bit Brace No. 732, the only brace that is nationally advertised. It shows the features of the brace and is an effective silent salesman. Sent free with a small brace order.

Once you put it on your counter you will find that there is a market for these braces which you did not realize existed.

Our advertising in the "Saturday Evening Post" features No. 732 Brace as the third tool for every household, and it is creating a buying interest that you should cash in on.

This brace is already the carpenter's favorite, so that it appeals equally to amateur and professional tool user and will help speed your whole tool line.

No. 732 Brace has the famous Millers Falls tool quality throughout. Ball-bearing head, ratchet and all-purpose chuck that takes twist drills as well as auger bits.

Send for our sales handbook, "How to Sell Tools." It is full of selling ideas that are worth money to you. Free on request.

AUTOMATIC SELLERS

NO effort required to move RELIABLE Colored Enameled Metal Tubular Searchlights. Just display them in your window. That's enough to make every passerby want one.

Now look the searchlight situation straight in the face. All fibre searchlight lines are pretty much alike, as are the nickeled lines.

Here's a line of **Colored** searchlights — of METAL. Nothing else in the world like them. They're in a class by themselves as a line—absolutely alone and above everything else as sellers. They're a novelty—now—but it won't be long before they're staple. Here's why: In factories each man can have a special color for his searchlight; every member of the family has his own searchlight and knows it by color.

We want you to see these searchlights. So write for a line of samples. Then put them alongside the searchlights you now carry. Decide for yourself their selling qualities. Don't forget to write TO-DAY for samples and prices.

Get our prices on RELIABLE Searchlight Batteries and RELIABLE Dry Cells.

Here's Another Westwo Line that You Should Handle

The same high quality—gives the same complete satisfaction—a ready seller like

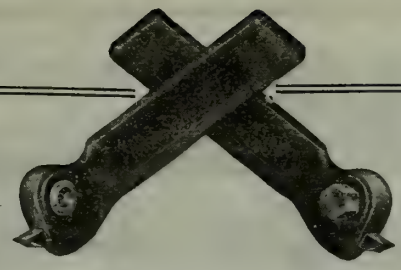
ALL Westwo LINES

Westwo

FIVE-HORSE HITCH

Easily attached to right or left-hand plows. Works five horses abreast, one in furrow and four on the land. Evener works freely and equally on all horses. Has no side draft, and gives each horse plenty of room. Can be used on any plow having a cross clevis hitch or on a disc plow with a flat draft bar.

Westwo



EVENERS AND HITCHES

are made from choice selected wood, and careful, competent workmen, using the most modern machinery. For this reason they work better and last longer than others where quality is not a first consideration. Westwo products carry our iron-clad guarantee for satisfaction.

We are creating an extra demand for these lines. Be ready to supply your customers when they call. If your jobber cannot supply you, write us.

WEST-WOODS LIMITED

WINNIPEG

The Reputation of Williams' "Agrippa" Tool Holders Is Thoroughly Established

THEY are specified by many of the leading shops in the metal-working industries as well as by the U.S. and Allied Governments.

They embody the improvements suggested by the use of earlier models and are a particularly attractive line to the dealer because of the strong consumer demand.

BISHOPRIC STUCCO BOARD

The economy in first cost and upkeep—the saving in material and labor—have made **BISHOPRIC STUCCO BOARD** and other Bishopric Products very popular with Dealers everywhere. Write us for prices and further particulars.

BISHOPRIC WALL BOARD CO., LIMITED
529 B BANK STREET, OTTAWA

It's an ideal proposition for hardware dealers, and in fact, for every merchant who handles building material.

In these days of labor shortage and high prices, **BISHOPRIC STUCCO BOARD** is a "star feature" for the dealer who wants more business.

BISHOPRIC STUCCO BOARD takes the place of boarding, sheathing paper, furring strips and laths. It saves the cost of these extra materials—and fully 50% of the time.

For temporary buildings, it can be used for walls inside and out. For permanent buildings, especially residences, it is used as a foundation for stucco walls and interior plaster.

For the working men of your town

in fact for every man because practically every man needs a good roomy serviceable pair of working gloves.

TAPATCO
REGISTERED TRADE MARK BRAND

You can get this profitable extra trade by stocking the Tapatco lines—There's a style and a weight to suit every requirement. Your jobber can supply Tapatco Gloves.

THE WAR WITHIN OUR MIDST!

Are you supplying the proper tools to fight the ever-present enemy?

As long as there are Bugs, Insects and Lice to plague the life of Plant and Beast—Sprayers will be a necessity.

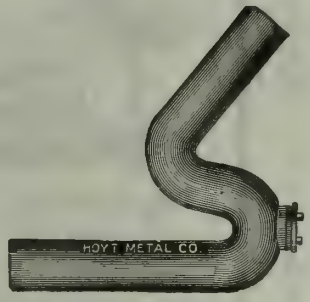
The EUREKA SPRAYERS here illustrated are but two of the many lines we manufacture. We make sprayers for all purposes.

Eureka Glass Tank Sprayer

Reliable, durable, economical—a neat appearing, efficient sprayer for potatoes, small shrubs, livestock or for disinfecting poultry houses.

When you consider the margin of profit to be realized and the High Quality of goods,—it's GOOD BUSINESS to sell the EUREKA LINE.

Fountain Compressed Air Sprayer



No complex or intricate parts, positive and automatic in action, easily operated, easily controlled —a time-saver, labor-saving and solution-saver.

May we send you further information and prices? Write to-day.

Undoubtedly The Sifter For Sales!

Samuels' Ash Sifter

The SAMUELS' Ash Sifter is something different and new and will instantly appeal to your customers as it is now appealing to consumers everywhere throughout Canada.
Fine screen has been adopted in making the sifter which saves much more of the fine cinders, and is stronger. As the illustration indicates, the smaller ash can or pail may be placed inside the waste can and so catch all the screenings which can then be removed more easily than when the larger can had to be carried out. The new feature also makes for longer life for the SAMUELS' Sifter, since the waste can is not subject to the ashman's abuse.
The SAMUELS' leaves all other sifters hopelessly behind.

EVEREADY DAYLO

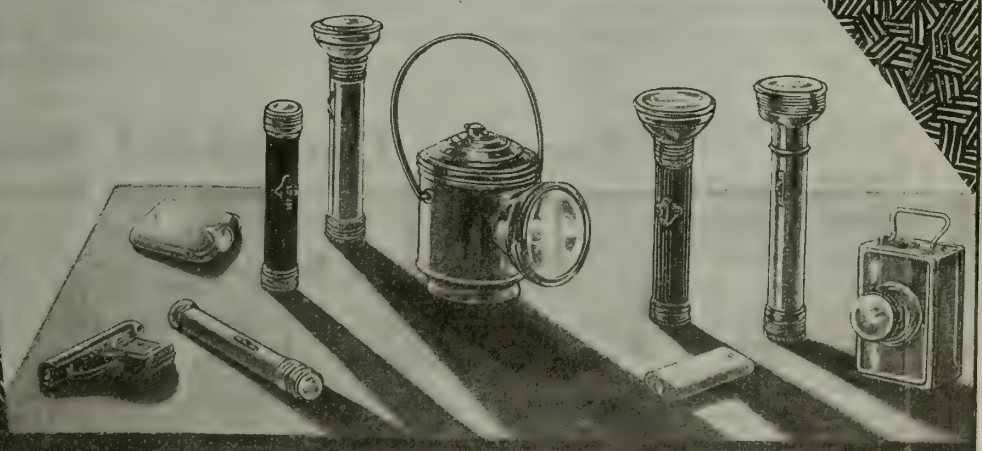
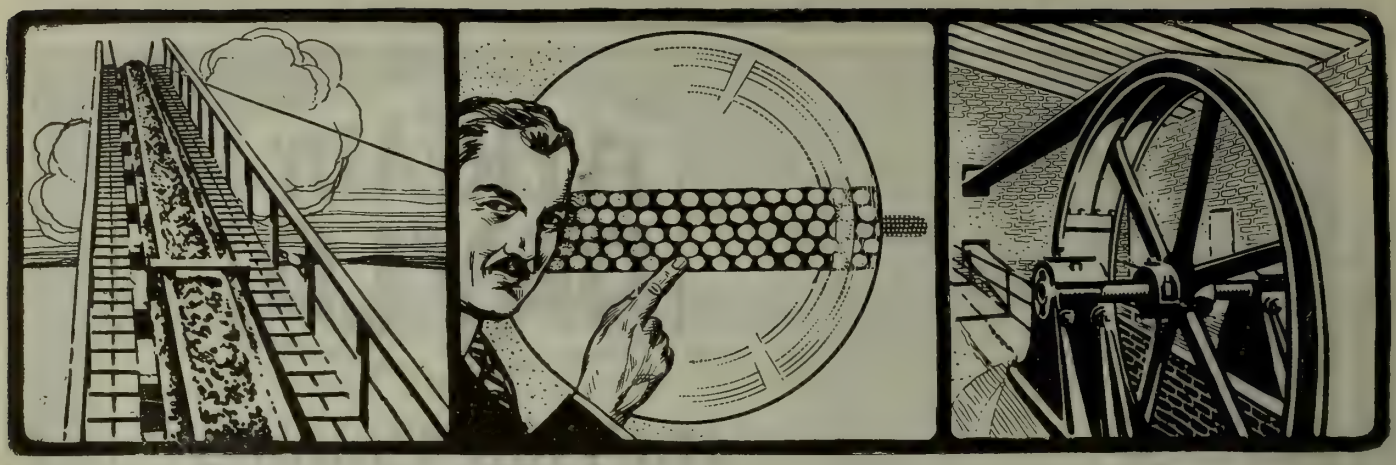
On Your Counter

—plus your window display and the right kind of sales effort in co-operation with ours—that's the winning combination for producing sales and multiplying profits.



Our consumer advertising, showing the many uses for DAYLO, impresses on the prospective customer's mind the need of DAYLO in every household. But the real buying incentive—the thing that makes him dig down into his pocket for the purchase price—is the goods on display.

A DAYLO window display says, "Here's the place to buy me," and ushers in many a sale. But DAYLO counter displays have created enormous sales amongst the class of trade that rushes in for something else and is caught and held by the display while making other purchases or waiting for change.



And don't forget that DAYLO sales bring repeats. No one expects a battery to last forever. You can build up a permanent and growing business in Eveready Tungsten Batteries and Eveready Mazda Bulbs. The big stores are doing it by keeping the Eveready line constantly on display.

Put in a complete Eveready line, push it and get *your* share of this business.

The light that says "There it is!"

Dominion Rubber System Belting Insures Maximum Service

Dominion Rubber System Belts are built to a scientific quality standard which insures the proper width, thickness and type of construction to efficiently serve a given purpose.

Dominion Rubber Systems Belts are *one-piece belts*—with absolute uniformity, dependability, economy and satisfaction built into each foot.

The layers of strong endless fabric are saturated and embedded in special rubber which gives a toughness that is practically indestructible.

Its rubber surfacing has a tested pulley grip greater than that of any other belt made, hence it allows minimum power leakage.

Where water, acids, oils, dust, grit, belt-shifters, etc., soon ruin ordinary belting, there is a type of Dominion Rubber System Belting that will withstand the severest punishment and eliminate many replacements and delays.

The largest users of belting in Canada have proved the value and efficiency of our belting in actual service and through the special free service of our belting experts, have cut costs and speeded up production.

This free technical service is yours to command whether you are a customer or not and it opens the door to the entire facilities of the largest rubber organization in Canada with a fifty year record for producing dependable products.

If your belting problems need emergency service, phone or wire our nearest branch.

why buy Stanley products?

THE reason you buy Stanley products is because they are leaders in their field, they are known everywhere, they are in constant demand, they move quickly from your shelves, and they mean every year to you a substantial, certain profit—a profit which grows annually because your Stanley sales always show an increase.

The public is not concerned with your mercantile problems, profit percentages, etc.; it *is* guided in its purchases by utility and service.

The public knows that for many years Stanley has meant wrought steel hardware of exceptional merit. It knows that the Stanley line is complete, that the required equipment is invariably available, that it is well designed, well made, and can be relied on to operate perfectly under the most difficult conditions.

In other words, the public by experience know that Stanley Hardware means *Satisfaction.*

The most valued asset of any manufacturer is the *confidence* with which the public looks upon his products. *The confidence which buyers place in Stanley products is never misplaced!*

Vol. 30 TORONTO, DECEMBER 14, 1918 No. 50

Big Demand Expected For Accessories

Limited Output of New Cars and Necessary Fixing Up of Old Ones Should Keep Trade Brisk—Manufacturers Look For Little Change in Prices and Are Optimistic Regarding Business Outlook

INQUIRIES made by HARDWARE AND METAL in regard to the outlook of auto accessories indicate that a steadily increasing business is expected. The auto accessory business depends upon two main factors, a continued output of new cars and the fixing up of old cars. Both of these conditions are likely to prevail for some time according to those in closest touch with the situation. The output of new cars while large will not, it is stated, be anything like the normal output for some time.

The Toronto manager of one of the largest automobile companies in the world stated to HARDWARE AND METAL that his firm's Canadian factory will not likely make more than 25,000 automobiles for the 1919 trade. This is just one-half of the company's output for 1918. The manager stated that his firm already has the supplies necessary for the 25,000 cars and that it will be at least six months before they can get the materials required for other cars. This means that there is little chance of them being made in time for next year's markets. It also means that there is not going to be any great reduction in the present prices as the materials have been purchased at the prevailing rates for steel and the other commodities required.

Will Not Change Much

"I do not look for prices to change much for some time," said the manager to HARDWARE AND METAL. "There is too big a demand for steel and other materials. Sales have been a little inclined to be slow this fall because the public had the impression that prices were likely to go down with the coming of peace. They have not gone down and my judgment is that they will not go down for some time. Any reduction that is made will be made first in the higher priced cars and even there it will be comparatively small. In time there may be a gradual reduction in prices of all cars, but in my judgment it will not be made in time for next year's business. As far as my firm is concerned there will be no changes in the prices that have been in force. We expect that our entire output will be taken care of long before the usual time and we are looking for more orders than we will be able to fill."

Will Boost Accessories

A situation of this kind means that there will be a large and continued demand for auto accessories of all kinds. When people cannot get new cars they will have to make the old ones do and this means that all kinds of equipment will be required. This view is generally shared in the trade.

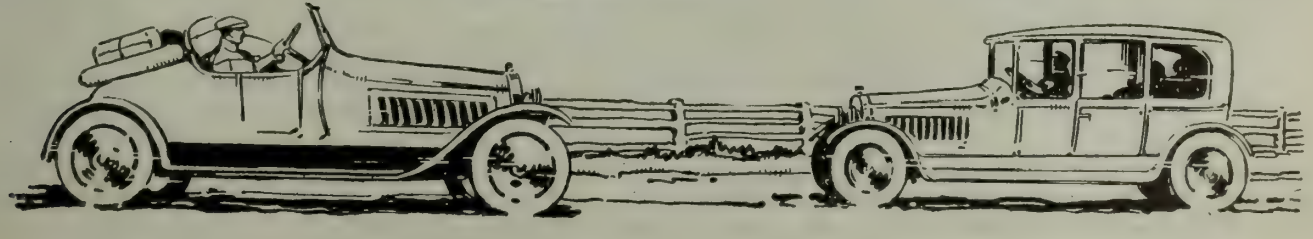
'I have been in pretty close touch with representative people in the auto accessory trade," said Arthur Kinzinger, president of Kinzinger, Bruce & Co., Ltd., of Niagara Falls, to HARDWARE AND METAL, "and have yet to hear of one who is not optimistic regarding the present outlook.

Removal of Restrictions

"The removal of Governmental restrictions on raw material for new cars is in itself a most important factor, because the sale of many accessories depends to a large degree on new car business. Undoubtedly the restrictions imposed in the late summer, and the general uncertainty regarding future action on the part of the authorities had a depressing effect on accessory dealers; and now that this particular cloud has passed, the far sighted men in the trade are looking forward to good business, and are covering prospective requirements for several months in advance.

Industry has been starved in regard to steel supplies, and it seems reasonable to expect delays in mill deliveries for some months to come, until the situation has cleared. This also would have the effect of holding prices up to the present level. Price restrictions in the United States have prevented undue inflation and this, too, should make for a stability that might not have been expected if steel prices had been allowed to advance in proportion to recent demands.

Cost of Labor



Another factor in the price situation is the cost of labor. As far as I can see, there is no immediate prospect of any reductions here. So long as the cost of living as represented by foodstuffs and clothing remains at its present level there can be no expectation of reduced wages, and the only changes in the food markets at present seem to be upwards. Even on a somewhat reduced living cost, it is not to be expected that skilled labor will ever return to the old levels.

Taking all of these factors into consideration, therefore, I look for good business at sustained prices, and I believe that dealers in automobile accessories will be well advised to place early orders for reasonable quantities of standard goods. Otherwise their very caution may be the actual cause of reduced turnover through inability to get sufficient goods to meet the demand at the proper time."

Did Splendid Business

This year has seen some splendid growth made in the acessory departments of many hardware firms. One firm growth made in the accessory department every year is the Hobbs Hardware Co. of London.

"We started only a few years ago with

just a few lines of wrenches," said C. A. Whitwam, of the Hobbs Hardware Co. "We started in a small way because while we judged that there was a field for accessory trade we wanted to go carefully and feel our way. We were soon satisfied that it was a splendid department, and it has grown steadily and is still growing. For instance, just in auto tires alone last year we handled goods valued at $20,000."

Many hardware firms, especially in the districts where tractors are coming into use in large numbers, are finding that it pays well to handle both auto and tractor accessories. The tractor field is regarded by many as having just as big a future as the auto business, and some firms are planning to get in early on the accessory end of the business and cash in on the opportunities as the business expands.

Lower Prices Named on Binder Twine

Quotations For 1919 Business Show Decline of 1½c Per Pound —Reduction in Sisal Fibre Prices and Declines in Manila Fibre Factors—Fairly Heavy Carry-over From Past Season—Limited Export

LOWER prices have been named on binder twine for the season of 1919. As HARDWARE AND METAL went to press last week an announcement was made that binder twine prices for 1919 had been determined on. The new range of quotations provides for a decline of 1½c per pound over 1918 figures. The new prices are as follows: 500 foot, 22c per pound; 550 foot, 23¾c; 600 foot, 25c; 650 foot, 26½c.

Sisal Fibre Lower; Manila Fibre Too

The Food Administration in the United States which has exercised control over twine and fibre last season, have succeeded in reducing the price of sisal fibre and the price of manila fibre has fallen also. Supplies of both have shown improvement and there was a heavy carry-over from last season which was not relieved as is usually the case by export business.

The decline in manila fibre prices is due in part to a reduction in freight rates on the Pacific Ocean, the Shipping Board having provided a surplus of tonnage, the rates declining in October from $18 to $11 per bale of 275 lbs., with rumors of even lower rates being offered. It seemed possible that this surplus of Philippine tonnage might be followed by a deficiency at a later date, in which case rates might recover somewhat and manila fibre become so much scarcer that fibre prices would advance. However, this condition is not yet in evidence and whereas sisal fibre values are unchanged manila fibre prices have shown further declines.

Heavy Carry-Over; Little Export

Information given out by manufacturers shows that a considerable quantity of binder twine was carried over last season; and an effort to have the Food Administration relax its minimum price control for export business was made, but all to no avail. With sisal fibre prices lower and manila fibre down there was certainly no incentive to hold stocks of twine and some manufacturers would have been willing to sell at lower figures to avoid carrying charges. Figures show that exports for the first seven months of 1918 were little more than half what they were in 1916. Whether the discrepancy in figures will be overcome is hard to say, but no relaxation of the restrictions on trading have been announced as yet.

Booking business has been very largely completed and represents a very satisfactory total. The actual consumption of twine is, of course, uncertain and it will not be known until the crop is really harvested how successful the season has been. The outlook as far as can be judged is good.

Western Ontario Retailers Plan Closer Co-operation to Solve Problems

Border merchants are following up the movement to have the Windsor City Council pass a by-law making it obligatory for citizens changing their places of residence to notify the city clerk. The object is twofold: to prevent delinquents leaving the city hurriedly and thus escaping payment of debts, and to maintain an accurate directory of the municipality. Representations made to the council by the association are now being considered, and action is expected shortly.

Closer Co-operation

Although recently affiliated with the Provincial and Dominion organizations, the Border Cities Retail Merchants' Association is now working on a scheme from which it is hoped an Associated Retail Merchants' Association of Western Ontario will be evolved. The proposal was made at the regular meeting by Harry J. Neal, of the Neal Baking Company. The suggested organization would be similar in construction to the Associated Boards of Trade, and would embrace the entire Western Ontario peninsula. An effort will first be made to secure the co-operation of Kent and Essex before the scope of the movement is enlarged to include the other counties.

Western Ontario has been unfavorably discriminated against in many phases of business, in the opinion of a number of prominent merchants here, and hence the proposal to offset this influence.

Retail merchants of the Border Cities have practically bound themselves by an "unwritten law" to cease all competition in employing sales help from the store of a fellow merchant. The suggestion made by C. H. Lanspeary, the proprietor of a string of retail drug stores, was well received, and while it was thought that no formal resolution was necessary to cement the fact, in future members of the association will be morally bound to desist from all efforts to cripple the staff of other retailers in the Border Cities. This does not mean that an employee will be denied the privilege of bettering his position, but will operate only insofar as it affects that type of merchant who might, because of a stronger financial position or some other advantage, attempt to take away employees from a competitor.

SAYS ROOFING PRICES LIKELY TO STAY FIRM

There is very little indication of any kind that roofings and building papers will be lower than they are at the present time in the opinion of D. P. Hatch, sales manager of The Barrett Co., Ltd., Montreal. Mr. Hatch pointed out to HARDWARE AND METAL that there was no surplus of materials, and that as far as his company was concerned they were still working on the current year's orders, it being necessary to operate overtime to take care of the present business. In view of this fact there has been no possibility of laying up surplus stocks, and the goods are well absorbed as soon as available.

The demand for raw materials from a clamoring list of manufacturers in all parts of this continent has served to keep the market cleaned up on these pretty close and there is consequently little or no surplus of the basic elements required. At the present time, Mr. Hatch pointed out, there is very little raw material in sight, and he did not expect an early improvement in this respect.

"Labor will remain high so long as food costs are high, for on the present basis the worker sometimes has no more than enough to meet living requirements," said Mr. Hatch. "So long as labor and food costs hold as they are today there will be no lower prices on these lines!"

J. H. McComb, another Montreal authority on the roofing and paper situation, stated that there were no stocks in hand of any account. Production has been well absorbed and market tendencies are strong. There really is every reason to anticipate a firm market, both labor and material costs contributing to this, as well as abnormally high prices for any of the odd materials that are used. Even old rag clippings, used in the manufacture of felts and other lines, are abnormally high, Mr. McComb pointed out.

How to Make Record Sales at Xmas.

"Our Christmas Display Window Brough Magnificent Results" says the dealer who arranged the above display. Your Window will do the same and if you send in a photo of it you may win one of the cash prizes offered by Hardware and Metal.

"OUR Christmas display window brought us in magnificent results," was the way in which the winner of HARDWARE AND METAL'S *Cash Contest last year described the business the firm did. Any good window will produce results and it is particularly important that at the Christmas season, when everybody is looking for suitable gifts, that the hardware windows should be at their very best. Every hardwareman should plan to take advantage of this period which is one of the very best in the whole year. Just in proportion to his efforts will be his reward. A window filled with appropriate goods, attractively arranged, is one of the very best sales boosters that has yet been discovered, especially during the next ten days when the buying public is out with its purse strings loosened intent upon getting something that will be "a real gift."*

A SPLENDID CHANCE

No stores have more "real gifts" than hardware stores. The very nature of the business is based on service and utility and from his stock the hardwareman can choose any number of lines that carry a big appeal to the public. This in itself is often a problem to the window dresser of the hardware stores. There are so many things that are attractive and that would make a splendid showing in the window that he has to do a good deal of planning to select just the best sales producers. Here is where he has to study the buying taste of his community and this is generally not difficult to do.

Remember in making your arrangement that it is sales you want to make, not only in the interests of your store, but as a factor in winning one of the cash prizes offered by HARDWARE AND METAL *for the best Christmas windows. One of the best things about a contest of this kind is that the man with a little store or a small window has just as good a chance as the owner of a huge store with appropriations for window display purposes. The man with the little window can by the exercise of his own good taste and good judgment make perhaps a better display from a sales producing standpoint than the man with elaborate equipment. It is not a question of expensive paraphernalia in this case, but of selection of goods and attractive arrangement.*

THE ONLY CONDITION

The only condition in the contest arranged by HARDWARE AND METAL *is that the goods must be for Christmas display. This leaves every dealer a wide field. Get busy on your window, boost your Christmas sales to new records and win one of the cash prizes. Remember all photos must reach* HARDWARE AND METAL *by January* 1, 1919.

Charges Credit Seekers 5 Per Cent.

Galt Hardware Firm Aims to Eliminate All "Dead" Accounts — Member of Company Says Daily Cash Receipts Increase and That the Plan is Giving Much Satisfaction—Alberta Firm is Changing Its Methods Also

CARDS bearing the announcement shown below in big letters greeted HARDWARE AND METAL on a visit to the store of the Fraser Hardware Co., Dickson street, Galt, and J. A. Fraser, of the firm, when asked how this new system of giving credit was working out, made the following comment:

"After a couple of weeks' trial we have found the new credit system, which you will agree is clearly enough outlined on these cards, to be a decided success. While we are not establishing a strictly cash system, this 5 per cent. extra charge eliminates new accounts on the books and also gives us a line on people who seek credit. If they are willing to pay 5 per cent. extra for our limit of credit, namely, 30 days, we do not want this class of trade as it is more than likely they would be "dead" accounts. We find this an easy way of getting rid of the doubtful class.

Makes It Easy

"Not only does this system work out well in getting rid of the class of trade which is not desirable, but it is an easy way of refusing credit and increases the daily cash receipts. For an instance, a man came in the other day and purchased a pulley and some belting and after his parcel was ready asked to have it charged. I told him that he would have to pay 5% extra to have the account go on our books, because we had adopted a system of a 15-day limit in meeting our accounts and, therefore, could not stand to give customers credit for three or four months. This man quickly realized that he would save a dollar on his purchase by a cash payment and immediately produced the money.

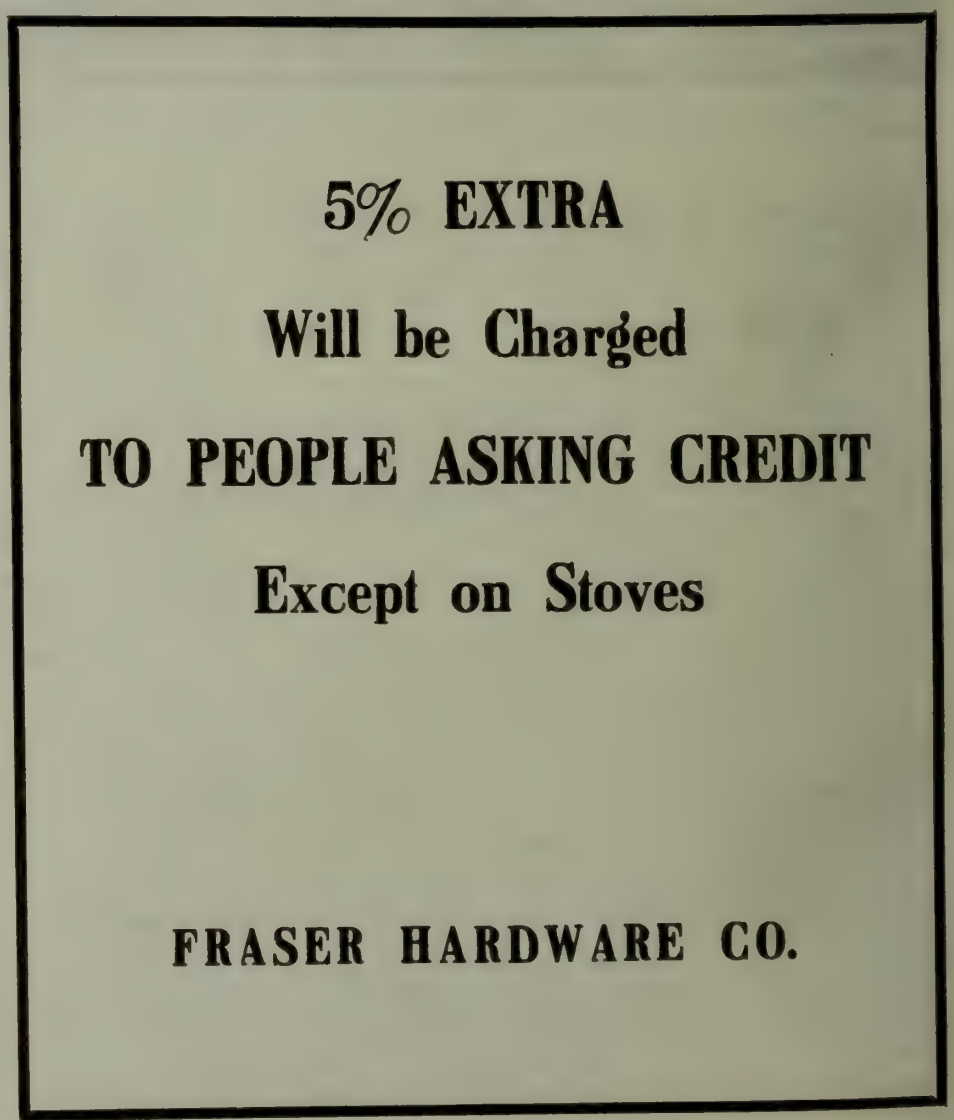
"This system also simplifies bookkeeping as now practically the only accounts we carry are those of manufacturers. Another thing, it does not offend anyone and in these times when ready cash is so essential, it increases the day's receipts.

Secure A Lien

"The reason we give credit on stoves is because in this line we have established a big business because of the principle of sale. We give time for payment on stoves but secure a lien against the stove to insure payment. With every sale of a stove we issue a payment card, and the purchaser can make weekly or monthly payment as the purchaser desires.

"I unhesitatingly recommend this system of eliminating credit to the trade and feel satisfied that it will obtain the same results for others that it has for use."

This is merely another example of the policy many retailers all over the country are adopting.



Keeping an eye on the finances is one of the most important things in connection with successful merchandising. Bankers state that one of the best things in connection with retailing during the past four years is that merchants have realized as never before the really big place that collections play in either keeping a business forging ahead or dragging it back. All over the Dominion firms have been brought to realize that their profits are needed in their business and that having the ready money with which to buy and keep up stocks is a most valuable asset in the commercial race.

Hardware men are generally recognized as among the keenest of retailers. They are usually among the very first to adopt measures that are progressive and that make for better business. For some time past HARDWARE AND METAL has drawn attention to the changes that hardware firms are making in their methods, especially in connection with the cutting out of "credit accounts."

Steadily Spreading

One hardware firm after another is getting away from the work and worry of "carry" accounts, and the close of this year will see more hardware merchants on a "cash basis" or "nearer to cash basis" than ever before.

A number of firms who have not yet made the change are giving it their most careful consideration and getting information from other hardwaremen as to how it works out. Indications are that many of these will adopt methods from time to time which are aimed to reduce their losses from "dead" accounts to a minimum. If all the money that is owing to merchants could be collected in a lump sum it would make a very hand-

some sum. Probably ninety-five per cent. of the money was rendered "dead" by ill advised credits, and of these ill advised credits, a large percentage were granted through good nature, easy going slip-shod methods, or fear.

How It Works

It is obvious that you cannot buy new stock with money that you have not collected. Most firms need all the money that is coming to them in order that they may "carry on." It is with this end in view that they are working to get away from giving unnecessary credit and also to save themselves a lot of unnecessary worry and annoyance in chasing up "poor pays."

The announcement on this page was made recently by the B. F. Morris Hardware Co., Limited, of Leduc, Alberta. The advertisement pretty well explains itself. As far as the public is concerned there is no chance of any misunderstanding. On the contrary customers are assured of "lower prices" and that their "dollar will go farther" by the new plan.

Losses Are Large

Just how general credit troubles are may be gathered by the experiences of retail merchants at Windsor, Ont. They have many thousands of dollars owing them. They are not only cutting out credit to a large extent but are getting in a lot of money they had given up as lost. As stated in HARDWARE AND METAL recently unqualified success has followed the establishment of a department for the collection of "deadhead" accounts of members of the Border Cities Retail Merchants' Association at Windsor, Ont. This department is conducted by Secretary T. C. Ray. At the last meeting $525 was distributed. Border merchants are coming to a full appreciation of this feature of their association, and at a previous meeting one grocer handed over $1,400 worth of belated bills to Mr. Ray. This is not the only phase of the work of the department, for without the necessity of establishing a "blacklist" of poorly paying transients and customers, merchants are warned quietly whom to avoid in extending credit.

St. Thomas Merchants Boycotting Londoners

Alleging that the City of London, Ont., is doing everything in its power to prevent the proposed government highway from Hamilton to Windsor going through St. Thomas, the St. Thomas merchants are boycotting London firms with whom they have done a large business. Travellers from London houses, it is stated, are getting the cold shoulder when they call on St. Thomas firms and many contracts have been cancelled, it is said. At a big meeting of the St. Thomas Board of Trade the following resolution was passed:

"That whereas the Chamber of Commerce of London, representatives of the business interests of that city, have organized and are carrying on a determined campaign from Hamilton to Windsor in a selfish attempt to prevent St. Thomas and the towns of Elgin county to the west of the city enjoying the benefits of the new provincial highway, and whereas the business men of this city have, in a large measure, been making their purchases from the manufacturers and wholesale houses in London, be it resolved, as a protest against the selfish, unneighborly attitude of the business interests of London, we, the merchants of the City of St. Thomas, pledge ourselves, so far as it lies within our power, to seek new sources of supply and to discontinue trading with business firms of a city that has shown such uncalled-for antagonism towards a near neighbor, believing that the failure of the London business men to protest vigorously against St. Thomas being kept off the provincial highway shows an utter lack of appreciation of the business we are giving them.

"And be it further resolved that we will do all in our power to encourage, in this city and district, the circulation of newspapers that we can count upon giving us a square deal in matters pertaining to our local interests."

National Motor Show At Montreal in April

The National Motor Show of Eastern Canada for 1919 will be held in the Victoria Rink, Stanley and Drummond Streets, Montreal, from Saturday, April 5, to 12 inclusive, and the exhibits will include passenger and commercial cars, motor cycles, motor boats, aeroplanes, accessories, tractors and farm-lighting outfits. The decorations will be in the form of a huge Japanese garden.

The show will be run in aid of the Montreal Soldiers Wives' League, and a very elaborate and well-organized ticket selling campaign is being arranged by the various ladies' committees.

A special section of the show will be placed at the disposal of exhibitors showing motor boats, and application has already been received to exhibit a 27-foot motor boat.

SHIPPERS WANT CASH FROM THE RAILWAYS

THE retailers and manufacturers plan to meet the move of the Canadian railways which are putting all their shipping on cash basis commencing January 1, by a demand that the railways make a cash settlement promptly for all claims the shippers may have against them. The matter is now being taken up with the Canadian Railway War Board and it is pointed out that there are instances innumerable all over Canada where firms have been waiting for many months, in some instances more than a year, for settlement of claims. It is only reasonable, the shippers point out, that if the railways are to demand cash in future that the shippers should be paid promptly. It is interesting to note the general attitude of the business men of Canada toward the cash basis idea as being adopted by the railways. With very few exceptions, they favor the move as being in line with the sort of policy necessitated by present-day conditions.

WILL URGE RETAILERS TO STOP FIRE WASTE

WITH a view of bringing home to retail merchants all over Canada the importance of stopping the enormous fire losses in the Dominion, which are now the highest per capita in the world, a number of business organizations plan to enclose with each letter sent out a printed slip drawing attention to the importance of fire prevention. Figures just prepared show that at the present rate the total losses for 1918 will exceed $34,000,000. Last year the losses were $25,000,000. A careful examination of the statistics has revealed the interesting facts that seventy-five per cent. of the loss this year so far has occurred in five per cent. of the fires, showing that the big fires were nearly all in manufacturing plants. The figures also show that twenty-five per cent. of the fires originated from careless handling of matches, and another twenty-five per cent. from smoking, especially from cigar stubs carelessly thrown away. Another prolific cause of fires is in defective heating equipment. Canada's per capita fire loss this year will likely total $6, against 60 cents in England and 30 cents in France and some other European countries. Those who are working to check this enormous loss each year are also planning to have more drastic legislation framed and better building laws which will ban the erection of inflammable structures.

TO DEVELOP TRADE WITH NEWFOUNDLAND

THE importance attached to the possible trade development between Montreal and Newfoundland is taking a hold on the business interests of Montreal. The Board of Trade will urge the Federal Department of Trade and Commerce to provide a suitable service between Montreal and the ports of Newfoundland, and steps have already been taken to secure the Government's assistance in making definite plans. The time is considered ripe for a consideration of this big possibility and from the expressions of the jobbers in Montreal made to HARDWARE AND METAL, there will be a ready interest on all sides. Every assistance will be given the proposal and with adequate transportation provided, there is little question of the development of trade relations that will bring to Canada a portion of splendid trade that has heretofore gone elsewhere.

REVIVAL OF BUILDING WILL BOOST BUSINESS

BUILDING development, which is anticipated on a large scale, is expected to cause a boom in the sales of gas stoves and electric stoves, and the biggest business ever done by manufacturers and wholesalers is looked for by some firms. Steam and hot water furnace and radiator manufacturers report that prospects for a good business in the near future look exceedingly bright. Manufacture of these goods has been to some extent limited the last two years by conditions. Plans are being laid by steam and hot water furnace and radiator manufacturers to secure a large output.

METRIC SYSTEM MAY BE ADOPTED BY CANADIANS

THE adoption of a uniform standard of weights and measures for Canada, the United Kingdom and the United States, with a view of facilitating trade in all departments, is under consideration The movement has made considerable headway in England and the United States and is now being taken up by the Montreal Board of Trade which is urging the general adoption in Canada, the United Kingdom and the United States of the metric system. This is the standard used by France for a great many years. It runs in tens and is extremely simple. Other boards of trade throughout the country, it is stated, are considering the question and may join in the move and the matter will also be discussed by various business organizations, both retail and manufacturers.

BRITISH CUTLERS ARE WORKING FOR THE GOVT.

SINCE the beginning of the war a great deal of the capacity of British cutlery makers has gone to the Government for the use of the army. It is understood, as pointed out this week to HARDWARE AND METAL, that there will be no change in the programme of the Government for some months to come and that there will be little likelihood of heavy supplies reaching this side of the water before next fall. The present arrangements, whereby the needs of the army are supplied, will hold until September next, it is now expected. With the cessation of hostilities it was hoped that the pre-war basis of export selling would be possible of resumption soon after peace was declared.

MAXIMUM PRICES ON IRON PIPE ARE FIXED

THE price-fixing committee of the United States War Industries Board, acting upon the request of various Government agencies that it make official the differentials recommended by the American Iron and Steel Institute upon cast-iron pipe, has fixed

the following maximum base prices per net ton of 2,000 pounds upon cast-iron pipe, 6 inches and larger, Class B, American Water Works weight or heavier, effective until December 31, 1918:

$60 f.o.b. Birmingham, $67.70 f.o.b. New York, and $66.80 f.o.b. Chicago.

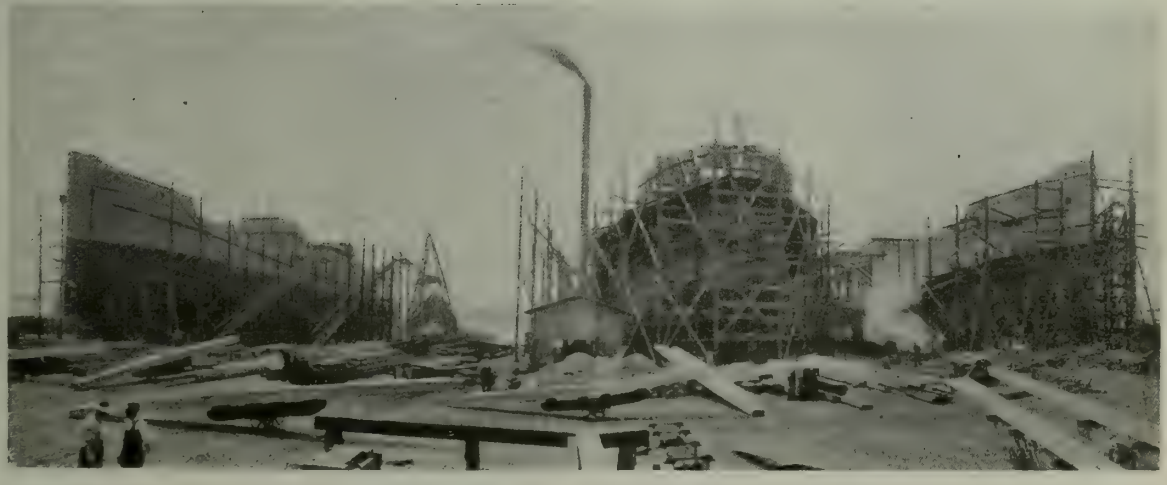
TRADE COMMISSION TO BOOST EXPORT BUSINESS

A CANADIAN Trade Commission, consisting of three members, Sir Charles Gordon, of Montreal, chairman; Charles B. McNaught, of Toronto, and H. B. Thomson, of Victoria, has been appointed by the Dominion Government. The board will have its headquarters at Ottawa, and will co-operate closely with the Canadian Mission in London with a view to securing export trade for Canadian firms and also a share of the business arising out of the reconstruction work in France and Belgium and other war-devastated parts of Europe.

Authority is given to the commission to select and appoint advisory or associate members with a view to associating with itself any industry or class of industry considered advisable.

WAR BOARD WILL NOT PERMIT OVERCHARGING

THE Canadian War Trade Board has made the following announcement in modifying all restrictions on steel:



"In view of recent developments which have made the steel situation somewhat easier, and especially in view of the fact that certain United States restrictions have been lifted and others modified, permitting shipments of plates, boiler tubes, etc., being made to Canada more easily than in the past, it will be unnecessary in future to apply to the War Trade Board for releases from stock on forms which were provided for this purpose, neither will it be necessary to supply monthly reports as in the past.

"Dealers and others are now at liberty to dispose of their stocks wherever they can, but the War Trade Board reserves the right to fix the price of same in the event of receiving complaints to the effect that prices which are being charged are excessive."

LINSEED OIL PRICES DIFFICULT TO DEFINE

THE law of supply and demand has been, to some extent, responsible this week for a lowering of the market on linseed oil. Orders are lacking. Supplies are not generally stated as heavy or excessive. Seed was lower last week than this and still, with the seed market tending higher, selling prices on oil in some quarters have softened. Just whether they will continue to decline further is a question that cannot be forecast definitely, some intimating that there may be lower prices but that this condition will very likely be overcome later. It seems to be a matter of sales with many jobbers, and with a quiet selling season confronting them the recent lowering of markets has been brought about, it is thought, to stimulate sales.

Current Events in Photograph

SHIPBUILDING ON THE PACIFIC COAST

THE building of ships of all kinds has, since the war, received a stimulus which in several sections of Canada is making it one of the leading industries. Many thousands of men are engaged at various points in turning out ships which as soon as possible will be put on the European trade routes to take the place of those sunk by the Hun submarines. On the Pacific coast, owing to the great supplies of timber available, many large wooden ships are being constructed. The photo shows a scene in a Western shipyard. On the Eastern coast the ships under construction are both wood and steel.

Windows that are Boosting Xmas Sales

Three Big Windows Full of Toys Shown by St. Thomas Firm—Galt Firm Adopts Display Idea From American Drug Stores—Hardware Firms Report Splendid Christmas Business

Ingram & Davey, St. Thomas, Ont., this week are featuring Canadian-made toys in their three large windows. Special attention has been given to lighting effects and arrangement.

George A. McMurtry's windows contain an excellent display of labor saving devices for housewives, washing machines, vacuum cleaners and electric specialties. Included in the display also are articles of silverware and cutlery.

Cutlery is featured also by A. E. Campbell, but Mr. Campbell found that his store front was not large enough to make the Christmas display he wished, so he rented the window of the store next door, and with this additional space has a fine showing of cutlery, stoves, vacuum cleaners, carpet sweepers and aluminum ware.

R. H. Blackmore, Ltd., the west-end hardware store of St. Thomas, has a striking display of electrical appliances and cutlery in their Christmas windows.

The Fraser Hardware Co., Galt, Ont., has a novel window display along the lines of some of the big drug stores in American cities. The displays are made as close as possible to the window, on frames perpendicular and covered with black velvet. The articles are exhibited on individual stands, which can be adjusted to the size of the article and the effect obtained is that of a mirror, with every article prominently facing the onlooker. One side-window is devoted to aluminum goods and the other to nickel-plated goods and carvers. The centre window contains cutlery and safety razors. All the window displays suggest timely Christmas gifts. The majority of the articles are price marked, appropriate Christmas cards being used.

The Fenn Hardware Co., took advantage of the cold spell to feature "comfort" windows, one containing stoves and the other gloves. None of the articles are price-marked. In front of the store, sleighs, snow-shovels and toboggans are shown. In the interior the firm displays on tables suitable gifts for Christmas.

Buchanan and Tait in one window display a variety of leather gloves all price marked and in the other washing machines, boilers, and wringers, unmarked.

The McMurtry Hardware Co. have one window decorated to give a fire-place effect, with casseroles, electric heaters and toasters, roasting pans and granite table sets for children displayed. Some of the articles are price marked. The second window is devoted entirely to gloves, every pair bearing a price ticket.

Allen and McKenzie in one window display gloves. In the other, a variety of fire-place fenders are exhibited, each with the price marked on it in chalk.

The Baxter Hardware Company, Windsor, Ont., is devoting the entire space of its four large windows to toys. Tricycles, wagons, rocking horses, Teddy bears, dolls, sets of dishes, crokinole boards and similar lines are attractively arranged.

One of the large windows of the Ripley-Peck Hardware Company, is devoted solely to toys. They are neatly arrayed and a background has been made of beaver board. The firm's other window is used for a showing of oil heaters and gas ranges.

Taking advantage of the game season, the W. J. Douglas & Company, presents a window advertising products of a cartridge company. The background consists of advertising cuts of hunting scenes, while in the centre are stuffed quail, wild ducks, squirrels and other small game. Grouped in the foreground are samples of the different brands of cartridges that may be obtained within.

Cutlery for the holiday trade and carpet sweepers are featured by the Nelson Hardware Company. In one of their windows cutlery sets are shown off against rich plush velvet, while the other window is given over to various types of carpet sweepers, effectively displayed with the assistance of life-sized cardboard figures of children assisting their mothers in the operation of sweeping.

Nelson Richardson, Ingersoll, Ont., features cut glass, cutlery and household articles in his main window. In the other, oil heaters, stove boards and heating equipment generally is shown. Both windows are well arranged.

One of the large windows of T. N. Dunn's store is devoted to a big showing of horse blankets, halters, chains, lanterns, combs and brushes, and other articles in demand in the rural districts. It is a striking window for this class of trade especially. The second window displays coal oil heaters.

In the window of Jas. McKay & Co. are shown axes, cross-cut saws and oil heaters.

The James Walker Hardware Co., Ltd., Montreal, are showing a nice line of suitable gift articles. In one window they are featuring carpenters' benches and also tool sets. In the other window they are showing skates. These are neatly displayed on a plush-covered background in the centre. Skates and hockey boots are shown, with nickelled flashlights a prominent feature and with electric toasters and safety razors prominently shown. A large card draws special attention to the razors in particular. In an adjoining part of the window are shown toboggans, snow shoes, etc.

The Bernier Hardware Co., St. Lawrence Boulevard, Montreal, is using an effective window that has excellent selling value this week. This was dressed by Mr. Bernier himself and the built-up background has drawn attention from pedestrians even across the street. Cutlery and plated table ware are used as the back of window on specially-made boards, in the form of diamonds, etc. These make a seasonable backing for the bright goods, and with green a dominating color the best values of the goods themselves are brought out. Trays, aluminum ware and electrical goods are placed immediately in front of the background proper. Plate glass shelving has been brought into use here and on these the plated goods are tastefully arranged. Prominent display is made of cutlery, razors and carving sets in the foreground, some on the floor of the window and others on raised glass shelving. Green cloth is used on the bottom of window. There is also a fair showing of brass goods, among these being a nice array of ash trays. Electrical chandeliers are tastefully arranged from hangings a short distance up from the base of the window, and the effect is excellent. A unique use is made of a sub-window beneath the main window of the store. This has a showing of electric fixtures and some mechanical toys.

Electrical goods and cutlery are featured in the windows of the M. Philbin Hardware Co., Montreal. These are very tastefully displayed. Use is made of long panelled boards at the back, covered with yellow cloth and the bright goods attached so that they make a pleasing background for the other goods. Cutlery is placed well toward the front of the display, the pocket knives being stuck into the slanting front of the window bottom, just where it rises from the plate glass. This, being about six inches wide, permits of the knives being shown to good advantage. In the remaining window of the store, tools are prominent.

Mackenzie, Milne & Co., Limited, Sarnia, Ont., are showing percolators, brass goods, casseroles, electric irons, fire sets, carpet and vacuum sweepers, and hockey sticks and skates in both windows this week. The goods are displayed on steps with the skates and hockey sticks at the bottom. Business, the firm reports, has been very good.

Brightening Up the Xmas Show Card

Selling Value of the Attractive Cards Makes it Indispensable to the Large Store and So Should Be Used By Smaller Ones as Well—Some Christmas Cards and How to Make Them

By R. D. Edwards

CHRISTMAS show cards are at present an absorbing topic of interest to those in charge of producing show cards for the large or small store.

The large departmental stores through Canada and the United States are busy putting Christmas cards on their counters and in their windows. One of the large Toronto stores has already put into use many thousands and before the Christmas season has advanced much farther, the quantity will be increased to double.

For Small as Well as Large Stores

Early Christmas shopping is the watchword. Therefore, the Christmas feeling must be supplied to encourage early shopping. Prettily designed Christmas cards are what remind and keep reminding the customer over and over again that the gift season is again at hand.

The small store, too, should follow the big store's examples and get their Christmas cards on their merchandise and in the window displays.

The principle used by most large stores is to adopt one special design and carry it out through the interior of the store. This design is used also in the show windows at intervals with other special Christmas show cards designed by the cardwriter.

In the majority of cases the Christmas cards for the interior are either of a printed or lithographed design and from two to four color work.

SUGGESTIONS FOR CARDS

Do it Electrically.

Your Wife Would Appreciate One of These.

You Will Be Sure To Please If You Give Something of Service.

Here Are Gifts That Men Will Appreciate.

If You Like Our Windows Come Inside. You Are Welcome To Inspect Our Large Stock.

For the smaller store, very attractive designs can be worked up with the air brush by using stencil or lithograph, or printed cards can be bought from supply houses.

But the window card for dainty Christmas displays, both for large and small stores, must be made by hand.

Change Cards Frequently

First of all these cards must be original. They should be changed every few days, just as the window trimmer changes and decorates his windows. They should be made in series and the change from one style to another should be made all at one time.

Stick to daintiness in show cards. Don't plaster the card all up with design and lettering. We are offering two suggestions of what we think are quite good enough, even for the best Canadian stores.

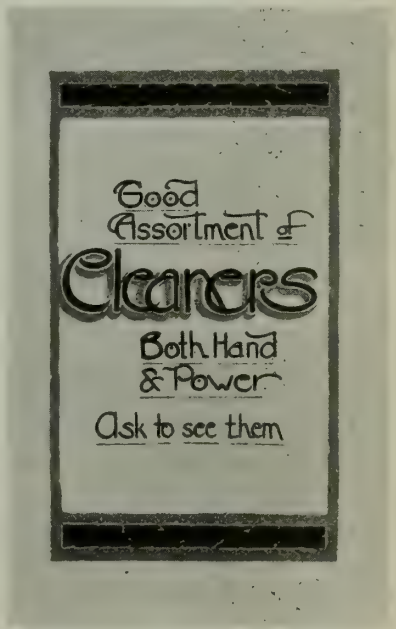
They are exceedingly neat and good looking and they would add much to a Christmas display.

They are made with a mat bound background with a deckled edge cover paper, panel in the centre. The edge is deckled by hand with a small pair of scissors and is nothing more or less than an uneven or rough edge.

The dark background card is made of dark green mat board with a buff centre panel of heavy cover paper. Cover paper can be procured from wholesale paper houses in any color or finish desired. The top two corners only are stuck and the rest of the paper hangs loosely against the cardboard.

The card with the dark panel is after the same order as the other with exception that the background is a buff mat board and the centre panel is of medium grey.

Many other color combinations can be worked up with good effect. Dark green background with pale green or white centre, white ground with pale green centre, buff ground with white or pale green centre are only a few of the many attractive color combinations.



Made With Pen and Waterproof Ink

The drawings and lettering on these cards are made with pen and black waterproof ink. The drawings are colored with transparent water colors in greens and reds. The lettering is made with a No. 2 round writing pen nib.

Some Tips

There seems to be an idea prevalent among those who have newly broken into show-card writing that to become a proficient card-writer they must possess an air brush; and that through its use is the only way to make what they term a really attractive and high class show-card. Now I want to explode that theory, although it must be understood that the air-brush is an excellent tool for show-card work. Also, it has been the means of making thousands of very poor show-cards, show-cards which are an eyesore to any display on which they are used.

In Toronto you can see air-brushed

cards in some Yonge street stores which you can hardly read owing to the large amount of highly colored inks sprayed on them with the air-brush. There is poor judgment both on the part of the maker and on the part of the merchant for showing them there. Cards like these tend to repel rather than attract customers. The whole trouble lies in the inexperience in the proper handling of the air-brush. All amateurs should learn how to letter properly, how to make show-card designs and the proper combination of colors before attempting to make air-brush show-cards.

EDITORIAL COMMENT

DON'T forget to enter your Christmas window in HARDWARE AND METAL'S big contest.

* * *

IF YOU want your clerks to impart enthusiasm to your customers, set the example by imparting it to your clerks.

* * *

IT IS not the size of your stock that makes it possible for you to clean up good profits, it is the rapidity of the turnover.

* * *

DON'T let your business run itself. Behind every growing business you will find a human dynamo that keeps things humming.

OUTLOOK IS BRIGHT

IN the stock market it is an axiom that success depends upon being able to read the tape right. By that those who trade in securities mean that a mere knowledge of market values is worthless unless accompanied by a clear insight into the cause back of every market movement. So it is with the reading of quotations in the hardware markets today. A mere knowledge of figures, unless backed up by a thorough understanding of what they stand for and how they came about, is useless.

With the coming of peace, a readjustment period was looked for. There are evidences that this period may be much shorter than many expected. Many firms are taking on extra hands as quickly as they can get the men qualified to do the work they need. These firms are getting ready for a big business. Every mail brings inquiries from all parts of the world for Canadian products. This means export business for the home firms. A glance at the Trade Inquiries in this issue of HARDWARE AND METAL will show a longer list than it has been possible to print in months.

The normal home demands will have to be looked after and when it is remembered that many of these have been held up for three or four years, especially in building lines, it is apparent that it cannot be supplied in a minute. The automobile firms are preparing for a bigger business than ever and some of the large firms making agricultural implements will work to capacity all winter in order to be ready for next year's demands. Never in the history of Canada has there been such a demand for foodstuffs and every ounce that every farmer in the Dominion produces he can sell. For four years the farmer has been making money and this has been reflected in increased buying. Next year this should be greater than ever, because many things will be available that could not be bought before.

CHANCE FOR HARDWAREMEN

THE announcement from Ottawa that the Dominion government has created a fund of $25,000,000, which will be available as loans to the Provinces to help them in carrying out their plans for housing, is the first really definite step in the working out of what is a serious problem all over Canada. Since the war very little building has been done, especially of residences, with the result that in many communities houses are not obtainable and rents are outrageous. This has resulted in a doubling up process on the part of citizens, and in many cities a number of families may be found under one roof. This does not make for ideal living conditions, especially in the poorer sections. Retailers are just as vitally interested in solving this great problem as the manufacturers. Whatever makes a community better or worse directly affects the merchants. To hardware men the housing question is of special interest. They can, if given the chance make many suggestions that will result in a much better type of home being erected than has been built in the past. Now that many of the provinces are awake to the importance of Canada's fire losses and are planning to check this enormous waste by prohibiting the erection of inflammable types of buildings, the hardwaremen by co-operating fully in this direction and also with those working out housing plans give valuable assistance. Aside from these considerations entirely the move to solve the housing problems means a greatly increased business for the hardware firms as enormous quantities of materials will be required. According to the latest information from Ottawa, it is hoped that some of the building work may be gotten under way during the winter and that it will be in full swing by spring. General reports from building sources indicate that a huge volume of building is in prospect during the coming year.

CO-OPERATION COUNTS

IN this issue of HARDWARE AND METAL is an account of how the Border Cities Retail Merchants' Association is planning to extend its work

not only through its own county, Essex, but also into the adjoining County of Kent and later to all Western Ontario. Why not throughout the Dominion? The Border Cities' Association, although a young organization, has found that there are problems outside of its own territory that have a direct bearing on all business. They hope by Co-operation to solve these problems. There are problems in the retail business which are not to be solved by county or even by provincial co-operation, but by every retailer in the Dominion putting his shoulder to the wheel. The retailers, that is the majority of them, do not appreciate their own importance. It is estimated now that there are 200,000 retailers in the Dominion, that their annual turnover is $20,000,000,000, that their property is valued at $5,000,000,000 and that they pay out in salaries each year $1,040,000,000. These are huge figures and they are constantly growing. Every year as Canada grows, her business will increase. It is doubtful if the authorities at Ottawa, except in a very general way, ever give very serious consideration to the retailer and his problems. If every centre had a live merchants' association and co-operated with one another all the way across Canada, many problems could be adjusted that would make infinitely better conditions in merchandising. Until some such united effort as this is made, retailers will continue to be the victims of all sorts of unnecessary troubles.

AN UNENVIABLE RECORD

CANADA this year has won a new distinction, another world's record. This one is not in keeping with the laurels the Dominion earned by its war efforts. It shows in the words of the official report that "we stand indicted before the world as a nation of careless spendthrifts," because our fire losses according to our population are the highest in the world. If the fire loss of approximately $35,000,000 this year is added to the indirect losses due to insurance and expenditure on fire protection, fires will cost the people of Canada $65,000,000 or about one-tenth of the amount subscribed in the recent Victory Loan. There seems to be a disposition on the part of many people to believe that as far as they are concerned any loss that occurs does not affect them because it is met by the insurance companies. If they stop to figure it out every fire loss directly affects every individual in Canada. Every merchant, every manufacturer, every individual has to contribute to the payment. The merchant increases the cost of his goods to take care of his insurance, the manufacturer does the same and the general increase is paid by the consumer. Canada's fire losses have been increasing at such a startling rate that it is realized that something must be done to check them and steps are being taken in this direction by various business organizations and also by provincial authorities. It is not unlikely that some rather drastic legislation will be enacted before very long which will bring home to the public at large their responsibility for starting fires which run into millions of dollars annually.

A NICE NEST EGG

NO less than $15,000,000 is in the hands of the Receiver General at Ottawa as deferred pay of the soldiers who are yet to come home. This represents money saved by them since the commencement of the war. In other words, it is pay earned but not drawn, with accumulated interest.

Now that demobilization has begun there is no doubt that great benefits will accrue from these savings, which have been effected under a policy inaugurated by the Government in 1915, under which soldiers serving in France have been required to leave on deposit with the Government a portion of their pay which could not be profitably spent overseas, but would be a useful provision for a rainy day. In the result the majority of the men will have a sum of money which they themselves have saved immediately available on discharge.

Under the regulations adopted there will be paid to every man a further sum by way of free grant, commonly called Post Discharge Pay. This will amount to a sum equivalent to three months' pay and allowances, payable in three monthly instalments, including Separation Allowance to the soldier's dependent entitled to receive it.

On discharge every soldier who has donned uniform will also receive $35, which is intended to provide for the purchase of civilian clothing.

CONFIDENCE NEEDED

ONE of the big problems in connection with reconstruction in England as in Canada will be the amicable adjustment of all difficulties that may arise between capital and labor. The words of Mr. Lloyd George recently in discussing the British Government's programme for increasing the nation's industrial output seem particularly applicable to the situation in Canada. "One step is needed for success and that is confidence," he said. "All classes must give confidence to those who have brains. Those who have capital to those with hearts and hands to work. I say to labor: You shall have justice. You shall have fair treatment and a fair share of the amenities of life. Your children shall have equal opportunities with the children of the rich. To capital I say: You shall not be plundered and penalized. Do your duty by those who work for you and your future is free for all the enterprise of audacity you can give us. But there must be equal justice and labor must have happiness in its heart. We will tolerate no sweating and labor must have its just reward."

EVENTS IN THE TRADE

Business Changes

Clairmont, Alberta. — Mains-Hooper Hardware Co., partnership registered, Caril E. Mains and Wm. Allen Hooper.

Zurich, Ont.—Stade and Weido have purchased the hardware stock of J. Preeter and will continue business in the same store.

Obituary

The death occurred recently of Lewis R. Wright, manager of the Architectural Department of Berry Bros., Inc., manufacturers of varnishes.

Joseph C. Bell, aged 35, formerly of Hamilton, died very suddenly in Detroit from peritonitis. He was Detroit salesman for the Standard Oil Company. Mr. Bell was a native of Ottawa.

Frederick Cook, aged 27, of the firm of Cook Bros., hardware, with stores at Bredenbury and Langenberg, Saskatchewan, died from complications which followed an attack of influenza. The business will be continued.

After an illness of only a few days with influenza which developed into pneumonia the death occurred in Hamilton. Ont., on Monday of Francis E. Newton, aged 39 of the Mills Hardware Co. He had been with the firm for two years and was formerly employed with the hardware firm of J. W. Husband & Son, Wallaceburg, Ont. His wife was prior to her marriage Miss Adelaide Husband. B. G. Newton, of the MacLean Publishing Co., Toronto, is a brother. Interment took place at Hamilton on Wednesday.

New File Works May Locate at Ingersoll

By-laws are to be submitted to the ratepayers at Ingersoll, Ont., shortly which if carried will result in the location there of the Port Hope File Company. The file company proposes to take over the plant of the Ingersoll Nut Company and to add to it by 100 feet of similar construction.

Their total investment, it is stated, would be $125,000. They ask from the town a loan of $10,000 for ten years free of interest and exemption from taxation.

The Ingersoll Rolling Mill Company proposes to take over the plant of the Noxon Company, invest $200,000 and employ 125 men. They ask a loan of $50,000, free of interest, this loan repayable, beginning the sixth year at the rate of $10,000 per year. They also ask exemption from taxation.

PYRENE COMPANY TO BUILD IN CANADA

The announcement is made to HARDWARE AND METAL that the Pyrene Company will shortly erect a Canadian factory in Montreal. J. A. Miller, president of the Pyrene Company of Canada, Ltd., is out of the city and could therefore not be seen, but the announcement is approved by the Canadian head office. Particulars as to the extensions to be made will be forthcoming at an early date. It will be the company's intention to take care of all Canadian business from the Montreal plant, when erected, and work will be started on the new factory, it is understood, immediately after the first of the year.

Fire Losses

The stove warehouse of Thomas Potts, Niagara St., Brantford, was completely destroyed by fire. The loss will run into several thousand dollars. The blaze started from an overheated stove.

Personals

N. S. Vanzant, Western Ontario traveller for the Canada Foundries and Forgings, Limited, Brockville, Ont., will go to Winnipeg shortly, and on January 1 will become western manager for the firm.

J. A. Rollefson, hardware dealer, Swift Current, Sask., is a candidate for the mayoralty.

F. Leslie Sara, on his discharge from the army, will join his father in business as manufacturers' agent in Calgary.

W. A. Laidlaw, of the Laidlaw Bale Tie Co., Hamilton, who has been ill for some time with influenza, is steadily improving.

A. B. Jenkinson, manager of the National Machinery and Supply Co., Hamilton, who has been indisposed, is now recovering.

J. L. Walker, for several years with E. H. Insull, hardware merchant at Craik, Sask., is starting in the hardware business for himself at Sceptre, Sask.

W. R. Herbert, Calgary manager for the British Columbia Paint Co., Limited, Victoria, B.C., has just returned from a trip to headquarters.

James Ward, traveller for the Sherwin Williams Co., formerly of Brampton, Ont., now of Escanobia, Michigan, is spending a month at Brampton recuperating. He has not been well for some time.

S. E. Elkin, general manager of the Maritime Nail Company, Limited, and member for the City of St. John, N.B., in the Dominion House, has been elected to the directorate of the Union Bank of Canada.

Miss Warren, of the office staff of the Mackenzie Milne Co., Limited, Sarnia, Ont., has resigned to accept a position with the Imperial Oil Company. Her place is being taken by Miss Wade.

The Great War Veterans of Winnipeg are voting by mail this week on a proposal that they form themselves into a co-operative trading company, with a centrally located retail store. It is proposed to start handling groceries and drugs.

Trade Notes

The head office of the Hercules Rubber Co., Ltd., is being moved from Toronto to Brampton, Ontario.

H. E. Armstrong, of Regina, has resumed his duties after an attack of influenza.

The Quebec Broom Co., manufacturers of brooms, have commenced operations at Quebec.

The Fox Chain Co. of Canada, Ltd., has purchased the business of the Reeder Weeks Mfg. Co., Ltd.

Regina hardware firms report a record business in skates and hockey supplies this season. Dealers state they have sold more skates than for three years.

The Frost Steel & Wire Co., of Hamilton, Ont., are this week opening the recently constructed addition to their plant. It is of steel and concrete construction and will give them 4,000 square feet of floor space.

Canadian Hart Wheels Limited, of Hamilton, manufacturers of abrasive wheels, have taken over the plant formerly occupied by the Baines Carriage Co., situated in the district known as Irondale.

Messrs. D. Milne & Malcolm Mackenzie, formerly of the hardware firm of Mackenzie, Milne & Co., Limited, Sarnia, Ont., have purchased the Sarnia Fence Company and operations, it is stated, will be resumed about the first of the year.

Four persons were killed and ten persons injured in an explosion which wrecked one of the buildings of the Canadian Electrical Products Company at Shawinigan Falls, Quebec, on Saturday night. A loss by fire, totalling about $100,000, was also sustained.

G. T. Davidson, who has been with the Canadian General Electric Company, Toronto, for eighteen years, has been appointed advertising manager of the firm, following the resignation of G. S.

DO YOU GIVE CLERKS A BONUS?

HARDWARE AND METAL is gathering information regarding bonus or profit-sharing plans for clerks. We would like to hear from firms who pay clerks or salesmen on this basis. Names will be treated in strict confidence, and the assembled information will prove of real practical value to the trade. Early compliance with our request will be greatly appreciated. Address Editor, HARDWARE AND METAL, 153 University Ave., Toronto.

McLean, who joins the "Globe" editorial staff.

The Massey-Harris Company, Toronto, has, it is stated, bought the Structural Steel Company's plant at Weston, and will remove its gasoline engine manufacturing department to the new factory.

The council of Outremont will assist in the necessary improvement required by McArthur-Irwin Limited, in the matter of water and sewer connections for their newly-acquired chemical and dry color plant in this part of Montreal. The city will construct a pipe line, and this will enable the McArthur-Irwin Company to operate at an early date.

Montreal News

Montreal is well represented at the National Hardware Convention meeting this week at Atlantic City. Among those attending are Jos. W. Dowling, president of the Canadian Wholesale Hardware Association; Col. Robert Starke, Herbert B. Seybold, George C. Davis, Archie MacFarlane, Arthur Telfer, and Leslie Drake. There are many interesting sides to the situation this year and there are probably others from in and about Montreal who have gone down to hear the various speakers on important topics of the hour.

F. Braithwaite, of Braithwaite Bros., Huntingdon, Que., was in Montreal this week.

Albert Hancock, formerly on the office staff of Starke-Seybold, Ltd., and who joined the forces of Uncle Sam last spring, has returned to Montreal.

T. Houghton, sales-promotion manager of the Martin-Senour Co., Ltd., has gone to the woods to hunt. Mr. Houghton has not been in the best of health for some time.

D. J. Munn, president of Alex. McArthur and Co., Ltd., paper manufacturers, was out of the city on Wednesday of this week.

J. B. Smith, assistant treasurer and fitting sales manager of the International Malleable Iron Co., Ltd., Guelph, was in Montreal this week.

A. Gamache has accepted a position with Starke-Seybold Ltd. It is understood that Mr. Gamache will cover the City of Montreal for this firm.

J. A. Miller, president of the Pyrene Company of Canada, Ltd., is this week in New York City.

Incorporations

Brass and Metal Products, Limited, of Toronto, Ont., capital $300,000, plans to carry on business as iron, brass and steel makers and also deal in tin plate.

The New Brassware Company of Canada, Limited, head office Montreal, capital $10,000, plans to deal in babbitt, brass and steel manufactures.

The Canadian Container Company, Limited, head office Bowmanville, Ont., capital $200,000, has been granted a provincial charter to manufacture and deal in cans and containers of all kinds.

The Ford-Smith Machine Company, Limited, capital $500,000, head office Hamilton, Ont., plans to carry on business as iron and brass founders and also manufacture and deal in steel and tin plate.

The Flexible Metallic Packing Company, Limited, of Windsor, Ont., with $25,000 capital, has been granted a charter and plans to manufacture all forms of metal, fibre and rubber packing and gaskets.

Canadian Laboratory Supplies, Limited, capitalized at $40,000, head office, Toronto, Ont., has been granted a provincial charter. The firm plans to manufacture and deal in porcelain, crockery, glassware, copper, brass and iron goods and in hardware.

Dominion Rubber System. Limited, head office Montreal, capital $500,000, has a Dominion charter to manufacture tires and rubber and felt boots and shoes. Dominion Rubber System, Limited, Ontario, Maritime, Manitoba, Alberta, Pacific, Quebec and Saskatchewan also have Dominion charters.

The MacPherson Manufacturing Company, Limited, of Hamilton, Ont., capitalized at $50,000, has been granted a Dominion charter and plans to acquire and take over as a going concern the business now carried on by J. A. McPherson and the business of Hibbert & Phillips. The new firm will manufacture and deal in wire products and iron, brass and tin wares, and galvanized, japanned and enamelled goods.

CHATHAM RETAILERS ORGANIZE

Retail merchants of Chatham have organized an Association in that city with the following officers:—

President, W. Foreman; First Vice-President, E. Wanless; Second Vice-President, G. W. Cowan; Secretary, F. W. Brigden; Treasurer, James Gray. Representatives from each line of business in the city constitute the executive committee.

RAISE TRADERS' FEE

W. C. Miller, Secretary of the Retail Merchants' Association, Toronto, appeared with a large deputation of Yonge street merchants before the Board of Control Wednesday and asked that the license fee for transient traders be increased from $50 to $250. The board recommended that the City Solicitor submit a new by-law at the next meeting of Council and an effort will be made to collect from this class, which at present avoids paying into the city treasury while competing with merchants who do.

CATALOGUES and BOOKLETS

The American Zinc, Lead and Smelting Company, Pierce Building, St. Louis, Mo., has issued "A Book of Useful Information for Paint and Varnish Manufacturers." It contains thirty-five pages, in convenient form for ready reference, of facts and figures useful to the average man in the paint and varnish trade, in solving problems that arise from day to day. Copies of the booklet will be sent to readers of HARDWARE AND METAL upon request.

The Greenfield Tap and Die Corporation, Greenfield, Mass., Canadian factory Wells Bros. Co. of Canada, Ltd., Galt, Ontario, has issued catalogue 40 of small tools. It contains 288 pages of listings of taps and dies, screw plates and reamers and is splendidly illustrated. One section is devoted to useful information and valuable tables. Copies of the catalogue will be sent to readers of HARDWARE AND METAL upon request.

Butterfield & Co., Inc., of Derby Line, Vermont and Rock Island, Quebec, in catalogue No. 17, which has just been sent out, list a large number of taps, dies, screw plates, blacksmith and pipe stocks and dies, and tap wrenches and reamers. The catalogue is most attractively illustrated and contains 188 pages. Readers of HARDWARE AND METAL may obtain copies upon request.

The Vokes Hardware Co., Limited, 40 Queen St. E., Toronto, have issued a price list of small parts supplementing Automobile Supplies Catalogue No. 27, containing 64 pages and listing automobile supplies and parts for small cars. It is well illustrated throughout. Copies will be supplied to interested readers of HARDWARE AND METAL.

An attempt to establish a whitelead works in Launceston, Tasmania, by a British syndicate represented locally by Mr. J. Gitsham, is reported. The Launceston Municipal Council will furnish 400 h.p. of electric energy, and the government will supply 1,000 h.p. from the state hydro-electric works.

Early Closing of Hardware Stores Favored By Montreal Merchant

THE proprietor of the Bernier Hardware Co., St. Lawrence Boulevard, Montreal, feels that the time is opportune for earlier closing of the hardware stores of Canada. Asked what effect the early closing hours during the recent "flu" epidemic had had upon the retail business of the store, Mr. Bernier stated to HARDWARE AND METAL that while there was a temporary falling off, the normal sales soon developed again, becoming quite up to standard in a short time.

How would you like to get down to business in the morning at 5.30? That was the experience of Mr. Bernier in the early days—over 30 years ago, and this condition continued for many years. Half an hour was allowed for breakfast and an hour each for dinner and supper. The stores then closed at 9 p.m., leaving eight hours for recreation and sleep.

Mr. Bernier, after the foregoing experiences, is ready for the shorter day, and believes that if it is still necessary to open early in the morning, that the retail store ought to close at 6 or 6.30, and that this would cause no hardship on anyone. The present system is a menace in many ways, he says, and even now it is not the easiest thing in the world to secure good help. In a large city it will require at least half an hour to reach home, and even longer in many cases.

"It is time for a change in many places that still adhere to the old order of things," said Mr. Bernier. "Why cannot the rut be left and a unanimous decision be reached regarding an early closing. The public can be educated to buy early?"

Confidence Will Carry Canada Through the Reconstruction Period

"IF Canada meets the problems of the reconstruction period with the same spirit displayed during the past four years, they will all be solved easily. I venture to predict that if we 'carry on' for the next six months things will be in such good shape that we will wonder why we were apprehensive."

Sir John Willison, chairman of the Canadian Industrial Reconstruction Association, spoke as above at a largely attended meeting of the Canadian Credit Men's Association held in the Board of Trade rooms in Toronto on Friday evening.

"Organization, co-operation and production during the past four years have enabled Canada to build up a record trade. In the period that is coming the nation which uses its resources wisely will be the winner. Canada has immense resources and it is my opinion that with proper control of our raw materials and the manufacturing of them in Canada to their final processes Canada will have unprecedented prosperity for the next twenty years."

Urges Organization

He told of the huge demands of devastated Europe for materials and declared that Canadian firms must organize in order to secure their share of this business. Action and decision on the part of the authorities at Ottawa is essential also, he pointed out, and at the present time there is an opportunity such as is seldom presented.

"The government and the bankers I understand are co-operating to supply adequate credits to take care of all business if the proper organization is effected," he said. "The Imperial Munitions Board looked after the placing of business during the war and it is likely that the Canadian War Board may be enlarged and reorganized to look after the distribution of orders from overseas."

Canadian factories must organize in order to receive these big orders, he pointed out, and declared that standardization would go a long way in cutting costs and in increasing production. That was one of the lessons of the war, he pointed out, and England as well as the other countries had learned it.

Waste in Canada

There was much waste in Canada, he said, and related an incident that occurred at Fort William where some French government representatives had looked over the plant of a shipbuilder. He was anxious to know what they thought of the works and was surprised when they told him that if he were in France it was not likely that he would be allowed to continue in operation as there was such a terrible waste.

Sir John discussed at some length the question of adjusting differences between capital and labor.

"I am satisfied," he said, "that if each side meets the other in a spirit of mutual sympathy and understanding that all differences can be easily and satisfactorily arranged. What is needed is for each to have an appreciation of the other's difficulties and then they can get together on a common ground and adjust matters."

Housing Problems

The housing problem, he pointed out, is an important one in connection with reconstruction all over Canada. Now that the government has set aside $25,000,000 the work should be started soon. In Ontario alone it was estimated that $10,000,000 would be needed.

"There should be no misunderstanding regarding this work," he said. "Just because this money is available cheaply municipalities should not go ahead and build beyond their needs. They should build just what they require and no more. The same policy should be followed out by the government and municipalities in regard to public works. There are a great many things that are really needed, but no work should be started as a charity. That is the wrong viewpoint. Only necessary works should be gone on with."

Looks For Prosperity

If Canada's efforts are intelligently directed toward maintaining production and organization is effected by which the Dominion can not only obtain but handle orders from the Allies and from other countries he looked forward to a period of splendid prosperity. Realizing the importance of carefully using all natural resources England, he said, would likely see to it that she had whatever priority rights were necessary regarding supplies in Canada. There would be big demands from England, from France, from Italy and later from Russia, not to mention the needs of the smaller countries devastated by the Huns and which must be rebuilt.

FRANCE MAY BUY TOYS MADE IN CANADA

While existing import restrictions preclude the securing of any trade in toys at the present time, it is likely that Canadian toys may find a profitable market in France after the war is over, provided prices are suitable. Prior to the war German manufacturers were selling large quantities of toys. Conditions will be more favorable than they have ever been for the introduction of Canadian toys. It is advisable to get in touch as soon as practicable with French firms likely to be interested in these products.

This trade might be handled best through a general agency established in Paris, which is the great center of the French toy industry. Such an agency should be supplied with a full line of samples. Catalogues and other advertising literature should be printed in French, and correspondence should be conducted in that language.

Before the war France imported yearly about $3,000,000 worth of toys.

HARDWARE LETTER BOX

Wants Tractors

S. E. Eakins, Millbrook, Ont.—Kindly let us know who handles the Case Tractor in Canada.

Case Tractors are distributed in Canada by the Canadian Fairbanks-Morse Co., Montreal, Toronto.—Ed.

Work on Huge Steel Plant May be Commenced in Spring

PLANS for extensive operations at the plant of the Canadian Steel Corporation at Ojibway are now being formulated, according to official announcement made by W. B. Perley, general manager and vice-president, who has returned from a business trip to New York and Pennsylvania, in the interests of the corporation.

Just how many men will be employed or what amount of money will be expended has not been definitely decided, but it is stated that millions of dollars and thousands of men will be utilized in the construction work of the building.

Between 200 and 300 men are now engaged in completing work on the million dollar canals and docks which are located on the property of the company, and connected with the Detroit River. These canals will be large enough to accommodate the largest freighters on the Great Lakes System and the finished products of the plant, when completed and under operation, will be loaded for water transportation at their monster plant. Work on the canals will not be completed until the summer of next year.

General Manager Perley has definitely stated that no actual work on the plant proper will be commenced until spring.

Says Canadians Can Get Business in Siberia

The possibilities of developing a permanent trade with Russia, and especially with Siberia, were discussed by J. Findlay, a member of the Canadian Commercial Commission to Siberia, who returned recently from Vladivostok.

Mr. Findlay is impressed with the possibilities for Canadian goods in Siberia, and it is interesting to note that the C.P.R. ocean services have signified their intention of offering a certain amount of space to shippers. This will be dependent upon the release of steamers from their present work.

At the present time it is only possible, Mr. Findlay pointed out, to venture an opinion on the trade that may be secured at this time. The sending of one boat per month would perhaps serve the needs of this time and shipments might be forwarded via Japan or direct. This matter would be worked out in time. It was even possible that shipments might be forwarded via the Atlantic, going through the Dardanelles and the Black Sea.

The possibilities in this great country, he said, suggest the sale there of hardware and paints, among other commodities. In fact metal goods and agricultural machinery were likely to be among the items that would meet with early favor.

One of the most encouraging remarks that was made by Mr. Findlay is that concerning the banking facilities there, and which he reports are excellent. The Japanese will be active competitors of Canadians.

EATON'S TO BUILD BIG WAREHOUSE IN MONCTON

The T. Eaton Co. of Toronto will, on February 1, commence in Moncton, N.B., the construction of a reinforced concrete building 240 feet wide and 260 feet long. It will be six stories in height. It is expected to be completed by the middle of the summer. The building will be used as a distributing warehouse for the Maritime Provinces ,and will employ between five and six hundred persons.

BRITISH FIRMS AFTER SCRAP

British iron and steel merchants are showing keen interest in the intentions of the Government with regard to the distribution of the huge dumps of steel scrap, consisting of broken shells and the metal parts of transport and railway wagons, which have been gathered on the battlefields of France and Belgium. Some of this material is now being used by the French steel works, but their consumption only represents a small proportion of the whole, and the bulk of the material may have to be disposed of in England.

Co-operation Stopped Waste in Selling

At the Reconstruction Conference in Atlantic City this week Murray L. Sargent, chief of the Hardware and Tool Section of the War Industries Board, pointed out the wonderful way in which the public had taken up the matter of war activities and believed that this was a clear indication that they could be depended upon to carry out the necessary work of adjustment in the same sane manner. He showed the great results which had been obtained by an intelligent interchange of information between maufacturers, this information reaching the questions of methods and costs of manufacturing.

The value of this in securing the needed output in many lines could hardly be over-estimated and he believed that this kind of co-operation should be continued to as great an extent as possible. This study of costs and of selling methods has helped greatly in eliminating wasteful practices, in the cutting out of unnecessary styles and sizes and had been generally helpful in conserving both the materials and the energies of the country. Mr. Sargent advocated the holding of regular meetings at frequent intervals, both for the purpose of getting acquainted with competitors and for the purpose of talking over such matters as are of general interest to the industry.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

820. **Agricultural machinery.**—A well-known Milan firm wishes to hear from Canadian manufacturers of all kinds of agricultural machinery for after-the-war trade. This company has already handled Canadian machinery.

821. **Material for constructing motor-ploughs.**—A first-class Milan firm manufacturing motor-ploughs and other machinery would be glad to receive from Canada any material entering into the construction of motor-ploughs.

822. **Agricultural machinery.**—A large firm importing agricultural machinery in Milan would welcome correspondence and catalogues with reference to obtaining supplies from Canada.

826. **Enamelled ware.**—A London firm asks to be placed in correspondence with Canadian manufacturers of enamelled ware, and more particularly those who have studied the requirements of the United Kingdom market and can supply the patterns in demand there. (Prohibited at present.)

827. **Table glassware.**—A London company asks to be placed in touch with Canadian manufacturers of table glassware, of which they are open to purchase large quantities. (Prohibited at present.)

828. **Collapsible metal tubes.**—A London firm desires the addresses of Canadian manufacturers of small collapsible metal tubes as used in connection with paint, tooth paste, etc. (Prohibited at present.)

835. **Hammers, axes and household tools.**—A Natal firm, wholesale distributors, request catalogues and price lists of the above lines.

836. **Box shooks.**—A South African firm of manufacturers ask for quotations on box shooks of heavy kind. Particulars with the Department in Ottawa. This inquiry is with a view of delivery after the war or better ocean freight conditions.

837. **Household hardware.**—A Durban firm of merchants and agents request catalogues and price lists from Canadian manufacturers in any line of household hardware.

838. **Household utensils.**—A Durban firm of merchants and agents are prepared to receive on consignment, purchase or act as agents on any suitable line of household utensils. Catalogues, price lists and correspondence is requested.

840. **Kaffir hoes.**—A South African firm of wholesale distributors ask quotations on first lot of 12,500 dozen Kaffir hoes. Samples of kind wanted and other particulars are on file with the Department in Ottawa.

846. **Furniture finishes.**—A Mexican firm requires varnishes for furniture, powdered bronze for furniture and gilding, hardware fittings for furniture, nails, screws, bevelled-edge mirrors, etc.

847. **Felts, wire or wool cloth.**—A Mexican firm requires felts, wire or wool cloth for paper manufacturing machines.

849. **Tank plates, ship plates and tinplate.**—A Japanese importing firm, with a branch in New York, wishes to obtain large quantities of tinplate, tank plates and ship plates, should supplies become available.

856. Party in Turin requires quotations c.i.f. Genoa for 100 tons hoop iron m/m 25/60 wide and 1.4 m/m thick.

860. Party at Ravenna would buy machinery for leather belting manufacture.

865. Turin firm inquire for machinery for the manufacture of horseshoe nails.

866. Genoa firm would handle umbrella and sunshade ribs, ironmongery and hardware, lace and haberdashery.

867. Turin engineers have openings for spiral springs.

THE CLERKS DEPARTMENT

JOHN A. TOPPING PUTS SAVINGS WHERE HE CAN WATCH THEM

Unfortunate Investments, He Says, Usually Result From Poor Information or Lack of Information—Advises Young Men to Put Money in Their Own Enterprises or in Firm Employing Them

MR. John A. Topping, Chairman of the Republic Iron & Steel Company, believes in investing his savings where he can keep watch of them. He is an investor in business ventures—that is, in stocks—and he wants to have full knowledge of the enterprise in which he places his money. He wants to know the "character" of the company. This is not only good insurance, he says, against the making of a poor investment at the start, but also against being scared by rumors or influenced by fluctuations in stock values to sacrifice his holdings because of fright.

Should Be Careful

"Experience has taught me," he said, "that unfortunate investments are usually the result of poor information or lack of information. If investors would use the same searching methods of inquiry concerning the character of the corporations whose securities they buy, that they do when contemplating the creation of a partnership for conducting some individual enterprise, failures would be few and investment returns more satisfactory.

Home Enterprises

"Investing in home enterprises or corporations with which I have been connected has been my life-long practice. A very simple opportunity which presented itself to me when quite a mere boy influenced me that way. This incident put me into the 'bee culture' business. I discovered a swarm of wild bees, which I successfully hived; and from this start, I developed a substantial group of hives. This individual enterprise experience was not only a lesson in thrift, but a stimulus to further effort. As soon as I got into business permanently and had saved a sufficient sum of money for investment purposes, I made an investment in the capital stock of an iron company and from time to time added to my holdings, both as a result of savings and from purchases made on loans.

Begin At Home

"I am a strong believer in encouraging investments by young men in their own enterprises or in the enterprise which employs them. Mr. Andrew Carnegie is credited with the statement that he believed 'putting one's eggs in one basket was the safest rule to follow, provided that the owner of the eggs had charge of the basket.' This explains the thought in my mind in another way. To work for yourself means that you must zealously guard the basket, for eternal vigilance and industry are always the price of success. Your investment in an enterprise means you will work harder for it, and your work will make your investment more valuable.

Keep It At Home

"As a rule, I think small investors should confine their purchases of stocks to local enterprises because they have not usually the means available for making the necessary investigation concerning foreign enterprises. In regard to local concerns they can make inquiries through their banks and by other means at hand which gives them abundant information for determining values. As a general proposition, to insure safety of investment, those contemplating such investment should pay more attention to the character and reputation of the management of the company whose stocks they buy, for a competent organization is one of the best assets of a company, and, of course, the reverse of this is true, that a poor organization means failure.

Analyze Carefully

"A matter of great importance in considering the financial position of any company is to analyze carefully the character of its physical assets to see that patents and good will are not overvalued, or that the company does not carry too large a percentage of its capital in non-productive assets.

"When one has invested with full knowledge of the conditions surrounding his investment he should not be disturbed by rumors or fluctuations of earnings. In my case, with full knowledge of the fact that the iron enterprise in which I early invested was sound and well maintained, although my stock values fluctuated as a logical result of the ups and downs of business, my confidence in this enterprise was never influenced by fluctuations in stock values. Unfortunately, investors are too frequently scared by rumors, and unless they have full knowledge of the conditions affecting their enterprise or investments, too frequently sacrifice their holdings out of fright, whereas with full knowledge of the situation, their confidence would remain unshaken and useless sacrifice would be avoided."

Fixing Steel Prices Saved Three Billions

At a meeting of the American Society of Mechanical Engineers, New York, Albert C. Ritchie, counsel for the War Industries Board, predicted an unprecedented demand from Europe for steel for reconstruction uses.

Mr. Ritchie said it was estimated that the price-fixing policy adopted by the War Industries Board on steel had saved the government $3,000,000,000. He declared that the Board would retain control over a given industry hereafter only when all interests asked for such supervision.

Captain P. E. Dulieux, of the French High Commission, said that immediate French requirements in the steel line called for 8,000,000 tons. He predicted that, with Alsace-Lorraine back in possession of France, his country might "at a not very distant date be your competitor."

Steel Needs Must Be Met by Home Firms

Before the war Norway imported 350,000 tons of iron and steel yearly, but owing to the growth of her manufactures she will require 500,000 tons a year in the future, and the problem is where to find such a quantity. Since Germany, whence Norway drew her principal supplies before the war, has lost Lorraine she will hardly be able to cover her own needs of iron, let alone supply other countries. France will not be in a position to supply the deficiency, Britain, it is argued, will need her iron to rebuild her merchant fleet, and in any case would not supply iron for less than 600 kroner per ton, the basis price for new tonnage. The only alternative therefore is for Norway to develop her own iron industry.

How the Germans if Victorious Planned to Cripple Allies

HERR Wilhelm Muehlon was a director of Krupp's when the war broke out, but resigned his position towards the end of 1914 because he thoroughly disapproved of the war, recognized that Germany was in the wrong and was disgusted with the savagery and the thirst for plunder of the whole German people, and in particular of the business men with whom he came in contact. He kept a diary which he published after his retirement to Switzerland, but its circulation was forbidden in Germany. The following is Dr. Muehlon's account of a meeting (presumably of the Stahl Verband) which he attended in his business capacity in the month of September, 1914, when all Germany believed that victory was assured and that the only question was how much should be wrung out of the defeated enemies:

The Pirates Plans

Yet another discussion about the division of the spoils after the war—this time at a most confidential gathering of the tiptop manufacturing brigands! I am still quivering with shame; these modern German manufacturers are repulsive enough to make one vomit. If the English have at any time pursued a shopkeeper's policy, they must be outdone by Germany, so these industrial gentlemen think, with a policy of undisguised robbery; even foreign private property must not be spared, especially in the case of districts rich in coal and metals, big factories and enterprises. One gentleman hotly maintained that Germany must annex Belgium at once, as Italy had annexed Tripoli, so that in the later peace negotiations Belgium might be eliminated from the discussion altogether. At the same time, he insisted, there must unquestionably be drastic expropriation of all the more important industrial and other private businesses.

Would Punish France

In the peace terms France is to be obliged to bear the cost of indemnifying the victims. Moreover, we must not repeat the mistake we made in Alsace Lorraine in 1870, when the leading men were allowed to remain in the country: for they are now the chief source of Alsace-Lorraine's attachment to France. This time all the influential elements in the annexed country must be compelled at once to depart, unless they unreservedly accept the new order of things. The speaker laid strong emphasis on the fact that his fellow-manufacturers, Thyssen, Stinnes, Kirdorf, were using all their influence to carry through the vigorous policy he described. These gentlemen, he said, had already applied to the Chancellor to add to the German administrative body in Belgium an industrial expert, who should go round and inspect all the industrial works and properties in Belgium and mark everything that would be of use to Germany.

Proposed Trickery

His friends' zeal caused the shark whom I quote to make the following proposal: The Chancellor should at once be approached and induced to appoint a gentleman belonging to this shark's own concern to "support" the German Government in Belgium as industrial expert, and this gentleman should take a special interest in the firm of Cockerill at Seraing. To prevent competition from Cockerill, it was decided to try at the outset to acquire secretly the majority of the shares. As a veil for their interested purpose, which was chiefly concerned with Cockerill's manufacture of arms, these gentlemen chose a man unconnected with armaments to see how the land lay.

To Fool the Public

This dainty specimen of true patriotism was put before us with many embellishments. They said: "In order that the great sacrifices of our nation may not be made in vain, we must take just as much in land and private property as we can hope to be able to digest. Moreover, it is urgently necessary to keep the imagination of our people busy after the war by pointing to the enormous enlargement of our territory and our enrichment in other ways, and also to the chances which exploitation offers. Only thus can the nation be diverted from the demand for so-called inner reforms. If this is not done, the state of things in Germany after the war will be worse than it was before."

To Control Iron

There were, however, dissentient voices. Experience, said one, has taught us that we are not able to assimilate foreign peoples. We ought to content ourselves with such territorial increase in the East and West as strategic and economic interests show to be desirable. On the other hand, we ought to make France, Belgium and Holland dependent on us by drastic treaties, to secure exclusive advantages for ourselves by tariff arrangements, and to demand the French mineral districts, which all lie near the frontier, as a part of the war indemnity. In the annexed territories, certainly, we ought to take energetic measures for expropriation and expulsion. The war indemnity, at a rough estimate, ought to amount to 50 milliards of marks (£2.500.000.000) and must be paid not, as in 1870, in bills, but chiefly in goods, property and minerals, as being much more to our advantage. In this way we should achieve the important result that it would be just as impossible in France as in Belgium ever again to develop a strong iron industry.

Must Be Disciplined

Another speaker cautiously expressed a doubt whether the State could set an example of robbery without injuring the morality of the nation, and, therefore, recommend a solution which, whilst leaving private property unmolested, should incorporate the districts in which it is situated with Prussia — not, however, with the German Empire, lest the state of things in Alsace- Lorraine should be repeated. The population of the annexed districts would, he said, certainly be a hard nut to crack, for it was undisciplined and unused to strong government; but it must be taught discipline and obedience by whatever means might be necessary. Everyone agreed with him in this, and also with his fervent appeal that after the war the German people should be brought to regard it as their most sacred duty to bring into the world as many children as possible—who will have the pleasing prospect of entering into the inheritance of those inferior and subjected peoples.

Both in words and sense the speeches were all about power, material prosperity, spheres of activity, discipline, method. There was no doubt of justifying their domination on any other ground, no idea of any benefit or consideration which they owed to the vanquished—in short, no magnanimity. They mean to lay themselves in the other people's bed, and are quite willing to be called barbarians in return. They have not the least ambition to win the others by moral means.

BORDER FIRMS BUSY

Manufacturers of steel products in the Border Cities of Ford, Walkerville, Windsor, Sandwich and Ojibway report most favorably regarding trade conditions. The Hiram Walker Metal Products Company, the Dominion Forge and Stamping Company, and the Trussed Concrete Steel Company, are all working at capacity, and the cancellation of war orders, of which few were placed in this locality, was but little felt, and the production of normal domestic products has not slackened nor is any slump anticipated. The Standard Foundry and Supply Company, Walker Road, Walkerville, which recently took over the plant of the Potter Machine and Tool Company, has just received a large order for test projectors from the United States Government which will maintain the plant at full capacity until June 1, 1919. Three carloads of machinery have been imported to speed up production. Although a phase of war work, it is understood this contract will not be withdrawn.

NEW AUTO TIRE

G. E. Phillips, of the Mackenzie Electric Co., Sarnia, Ont., is securing a patent on a new automobile tire. The aim of Mr. Phillips is to stop punctures and blow-outs, do away with slow leaks and produce a casing that will give more than double the mileage that can be obtained now.

Although delays have occurred in the shipments of plant from Britain, the works of Metal Manufactures Ltd., at Port Kembla, New South Wales, have begun the manufacture of copper wire. The output will be increased as further sections of plant arrive.

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

PORTABLE VISE STAND

A portable vise stand and pipe bender which, it is claimed, can be used without being fastened in place, has been put on the market by H. P. Martin & Sons, of Owensboro, Ky. It is stated that it is

Vise Stand Open

adapted for use wherever a stand is required on which pipes or conduits may be bent, threaded or cut.

The device weighs 45 lbs., and, it is stated, can be readily assembled and dissembled. One of its chief uses is for the cutting and threading of pipe. The work, which is fastened in the vise, rests in the bending attachment. This always keeps the pipe rigid and in line, it is claimed.

The front legs of the stand are placed, it is stated, so as to brace it thoroughly against the twisting motion necessary in cutting or threading, and they are so placed that short nipples can be threaded with ease. The rear legs of the stand are placed at an obtuse angle so that great pressure may be exerted downward on the pipe that is being bent without, it is claimed, tilting or upsetting the stand. The legs are arranged so that they are not in the way when short nipples are being threaded.

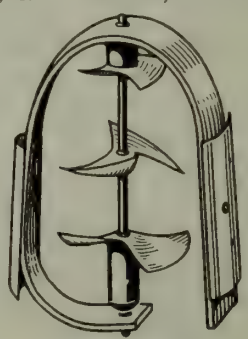
This portable vise stand and pipe bender does not, it is stated, have to be fastened in any manner to the floor, wall or ceiling, and no bolts, screws or braces are necessary. In assembling, all that is

Vise Stand Closed

necessary, it is stated, is to insert the legs in the sockets and it may be stationed any place where there is a space of 6 x 8 feet. The stand is made throughout, it is claimed, of No. 16 gauge sheet iron, thoroughly riveted and reinforced with special malleable iron castings and the legs of ¾ in. pipe and slip into the sockets easily. The side braces provide a convenient place for tools. Either hinged or chain vises can be supplied.

BARN EQUIPMENT

Rightway barn equipment manufactured by the Hudson Manufacturing Company of Minneapolis are it is claimed simply but strongly made and will help in simplifying work. The equipment it is stated is easily installed and many



Barn Equipment

of the lines will result in a great saving of time.

VOLATILIZER

A volatilizer made by Flintham and Gilstrap, 906 East 4th St., Topeka, Kansas, will, it is claimed, lessen gasoline

Volatilizer

bills and also give more power on less gasoline. It is stated it will keep the engine from choking. The volatilizer, it is stated, is run by the suction of the engine at high speed and it is claimed it agitates the ingredients of the gasoline to such an extent that it turns it into dry gas before it enter the cylinders of the engine. It is stated that the volatilizer can be put on any car without altering any part of the auto.

VICTOR TRACTOR LAMP

The new Victor Tractor Lamp for night farming has been developed, it is stated, after many tests and experiments under actual night working conditions on the farm. They enable the tractor user, it is claimed, to plow, harrow, thresh and carry on any farm work at night, just as well as by day.

Unlike motor car lamps, Victor Tractor Lamps do not, it is stated, throw a long distance, concentrated light. The large lamp has a special shallow reflector that spreads an even, widely diffused light in front of the tractor on the field ahead. The auxiliary lamp for rear lighting illuminates the implements so the progress of the work can be watched and adjustments made.

A unique feature of this lamp, it is stated, is the auxiliary lamp. This lamp is detachable, and there is a special com-

Traction Lamp

partment in the body of the main lamp for a ten-foot cord. This cord allows the auxiliary lamp to be used, it is stated, as a portable lamp for use around the tractor and implements, making adjustments and inspection easy.

The large lamp can be adjusted, it is stated, in any direction or at any angle. This is quite an advantage when doing pulley work, as the light can be directed on the machinery being operated, no matter where it is placed.

The Corcoran-Victor Company, of Cincinnati, are the manufacturers.

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

READJUSTMENTS in jobbers' prices to lower levels on both black and galvanized sheets have occurred this week. These are quite in line with developments expected when exceptional conditions existing under active war efforts were modified. Prices at the mills show no change, and the basis of selling now arrived at here is considered more in line with mill values. Galvanized sheets are down about 1½c, and black sheets about ¾c per pound all around. Supplies are expected to improve, some tonnage being promised shipment this month, and by February it is hoped a fair rate of delivery will be maintained by the mills.

Late advices received last week as HARDWARE AND METAL went to press recorded a decline of 1½c per pound in binder twine. The new prices in the United States were determined by the Food Administration there in conjunction with the manufacturers. The Food Administration states that in arriving at a decision as to a proper price basis, it took into consideration these facts: That a substantial amount of twine was carried over by the manufacturers which was made from sisal fibre bought at a high figure; that further sisal fibre has been bought at approximately 3c per pound lower than last year's cost, and that averaging up these figures, a lower cost is arrived at. This results in a lower manufacturer's selling price, amounting to 1½c per pound in Canada, and twine should reach the consumer at a lower figure.

Some lower prices on iron and steel bars are recorded, steel bars showing a slight decline of 50c, and iron bars 35c per 100 lbs. in some quarters. Lead pipe has declined 1c per pound following an easing away in the price of pig lead.

The price of antimony is down in some quarters, and the range of quotations is considerably narrowed thereby. Spelter is weak but unchanged, while lead shows a decline. Tin has held at low levels reached last week. The lower market on lead and tin has resulted in further recessions in prices on solder.

Dealers state that the demand for steel goods is quite brisk. Business that has been neglected for a long time is coming to life. Apparently the demands come from industries affected principally by the trade of the mines, agriculture and shipbuilding. The outlook is considered good for 1919 business.

MONTREAL MARKETS

MONTREAL, Dec. 12.—Advances have been made this week for certain lines of roofings. Oilcloth binding and some lines of auto accessories are also up. Declines have been effected in black and galvanized sheets and on tin, antimony and lead pipe. The ingot markets are easy, and the tendency is toward a further revision on tin, aluminum and spelter. Shelf goods are steady and without change.

Old iron, both wrought and cast, is lower, and the tendencies are to lower level still. One jobber states that his sales of heavy goods improved this week considerably.

Christmas goods have been held at steady prices, and most of these are active sellers. In fact, some of the jobbers report a decided scarcity of sleighs and bells, and skates are not very plentiful in certain quarters.

Advance on Running Board Moulding

Montreal.

AUTO EQUIPMENT.—A stiff advance is announced for running board moulding of aluminum material. This comes in 12-foot lengths, and the former trade price of 13½c per foot is superseded by one of 22½c. In lots of 24 the price per foot is up from 12½c to 21c, and in lots of 96 from 11½c to 19½c.

Plate Glass Lights; Heel Plates Selling

Montreal.

ALUMINUM HEEL PLATES. — A line of aluminum heel plates for automobile use are offered. These are 6 x 10½ inches in size and are selling at 75c to the trade, singly, and at 70c and 65c respectively in lots of 6 and 24. Plate glass round curtain lights, N. P., are selling at $2.10 in a trade way, and in quantity the price on 24 is $1.96, or in 8-dozen lots $1.82 each. Oval shape for the corresponding quantities are quoted at $2.62, $2.45, and $2.27 each.

Auto Heater Prices; Extractor Sets

Montreal.

AUTO HEATERS.—Prices are quoted here on the Victor line of auto heaters for Ford cars. These, in single lots are quoted at $5.62; for three heaters $5.25 each, and for one dozen $4.88 each. Ezy-Cut screw extractor sets are priced here at $2.95 per set to the trade for No. 15, and at $2.25 for No. 17, with a discount of 25 per cent. applying.

Various Fan Belt Prices Announced

Montreal.

FAN BELTS.—Quotations are named for Gates Vulco fan belts, suited to the various makes of cars. For the Paige, Studebaker, Velie, Dodge and Buick the trade price is given by one jobber at 57c each. Where lots of 12 are taken the price is 52½c each, and for lots of 4 dozen, 49c each. The respective discounts to the trade on the above lots

are 25 per cent. to 30 per cent. The various model cars are supplied on a uniform price basis, that is for the models of different years, excepting Buick 1915 and 1916, these being higher at 68c each.

Trade price on Maxwell model is $1.01 each, and on Maxwell model, 25-1918 $1.12 each; Allen 1915-16 are priced at 68c each; Ford models from 1911-16 are sold at 41c, and 1917-18 at 49c each; 68c applies for Overland models Nos. 75 and 90, and 75c for models 80, 81, 83, and 85. This price applies as well to Hudson, Moon, National, Saxon, and Willys-Knight. Briscoe, Dort, Grant and Hollier are all priced at 52c, with the usual 25 per cent. discount applying on the small lots and 30 and 35 per cent. on the larger quantities.

Prices Out on Pumps, Throttles, Fillometers

Montreal.

PUMPS, THROTTLES, FILLOMETERS.—The following prices are applying here for Yankee running-board pumps, with gauge, the price quoted is $5.62 each, or in half dozen lots $5.25 each. Without gauge the price is $5.07 and $4.73 respectively. Apex carburetor throttles are priced at $3.75 singly and at $3.50 in half dozens, while the Fillometer for Fords is quoted at $2.62½ each, or at $2.45 each in quantities of six. The usual discounts respectively of 25 per cent. and 30 per cent. apply.

Replacement Parts On Net Price Basis

Montreal.

AUTOMOBILE PARTS.—An extensive and complete price list covering several pages has been issued for the various parts of Ford cars. The various numbers of the manufacturer are each priced in the usual manner of giving the retail price, and from these the dealer is allowed his 25 per cent.

Roofing Prices Show an Increase

Montreal.

ROOFING.—Revised prices are made for a line of roofing in accordance with the firm prices obtaining on raw material. The advances are quite in accord with tendencies of recent date and prices as revised on Good Luck Brand are: 1-ply, $1.80 per roll; 2-ply $2.10, and 3-ply $2.40; McComb's Special for 1-ply is quoted at $1.75; 2-ply $2, and 3-ply $2.25. Black Cat in 1-ply is quoted $2.05; 2-ply $2.35, and 3-ply $2.65 per roll. The markets are holding firm.

Oil Cloth Binding Advanced About 10%

Montreal.

LINOLEUM BINDING. — Advances have been made in one quarter totaling about ten per cent. for oilcloth binding. The brass is selling at $2.75 for 4 x 4, and the price for 6 x 4 is $4.25, and for 8 x 4 $5.50. The corresponding prices for zinc on these sizes is $1.20, $1.80 and $2.40.

Little Rope Interest; Prices Holding

Montreal.

ROPE, TWINES.—While there is little interest in the rope market it is expected that bookings will be coming along within a few weeks for the needs of next spring. Pure manila basis is held at 39c per pound; British manila at 33c ,and sisal at 27½c.

Lithographed Ware Sales Very Heavy

Montreal.

WARES, STOVES.—The sale of lithographed and decorated ware—child's decorated sets in particular—has been exceedingly heavy, and the manufacturers have been pretty well sold up on their output. A big retail Christmas business is doubtless anticipated by the retail trade. Stove sales have been seasonably good, and while these are now slower there has been plenty of encouragement all through the fall season, and prices have held firmly. Wares, too, have been steady and active.

Gasoline Holds Steady; All Oils Firm

Montreal.

GASOLINE, OILS.—While the sale of gasoline has gradually declined there is no decline or change of price. City business still is steady and seasonable, there having been little snow as yet to impede car traffic. Motor gasoline is selling at 34c per gallon. Coal oil sales are steady and the basis is unchanged. Royalite price is 19c and Electroline and Palacine are selling at 22c per gallon. Lubricating oils are steady and unchanged in any way.

Small Lots Nails Sold to the Trade

Montreal.

NAILS AND WIRE.—While small lots of nails, for the most part are the only quantities figuring in the jobbers' turnover these days, orders are steady and quite regular. The shipment of large lots will be deferred for some weeks and quiet is naturally looked for. Wire nail basis is held at $5.50 per 100 pounds, cut nails at $5.85. Smooth steel wire base is still $6.25 per 100 pounds.

Black Sheets Down; Galvanized Easier

Montreal.

SHEETS.—A change in black sheets has been made and lower prices obtain with several jobbers. The changes are as much as $1.35 for light gauges, while the heavier have shown less, but still a considerable reduction. There is some business at the new prices. but this is rather limited. Some revision has also been made on two or three gauges of galvanized sheets, $11.35 and $10.90 respectively being quoted for 10¾ oz. and 28-gauge. These prices apply for full cases, 35 cents more being asked for smaller quantities.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$8 50	$11 50
12 gauge	7 75	11 00
14 gauge	7 85	8 20
16 gauge	7 75	8 00
18-20 gauge	7 75	8 00
22-24 gauge	7 90	8 35
26 gauge	7 95	8 40
28 gauge	8 05	8 50
GALVANIZED SHEETS—		
10¾ oz.	$11 35	$12 35
28 gauge	10 90	11 90
26 gauge		11 35
22 and 24 gauge		11 15
20 gauge		11 05
18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Iron Sales Light; Prices Hold

Montreal.

STEEL AND IRON.—Little interest in sales is manifest here and the basis is quite unchanged. Orders that have come along are those of a limited nature although one jobber reports a better condition the past few days than for several weeks previous.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Lead Pipe Down 1c; Solder Unchanged

Montreal.

LEAD PRODUCTS.—A decline of 1c per pound has been made during the week for lead pipe. This is in accordance with the reduction effected for pig lead last week. There is very little business to be had, and the whole list is uninteresting. No further changes have been made for solders and the position is without feature.

Lead pipe, lb.	$0 14	$0 15
Lead pipe (cut lengths)		0 15
Lead waste pipe, lb.	0 15	0 16
Lead traps and bends	**Net list.**	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 12¾
Lead sheets, 4 to 8 lbs., s. ft.		0 11½
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c. lb. extra.		
Solder, guaranteed, lb.		0 47
Solder, strictly, lb.		0 43
Solder, commercial, lb.		0 40
Solder, wiping, lb.		0 40
Solder wire (8 gauge)—		
40-60		0 49¾
45-55		0 54
50-50		0 58
Zinc sheets, casks		
Do., broken lots		

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Wrought Iron Down; Stove Plate, Too

Montreal.

OLD MATERIAL. — Declines in

wrought iron have occurred and the basis now is $22 to $23. Stove plate is also lower and $23 to $24 is being quoted by the dealers. There is little doing, and even lower prices have not served to stimulate interest. It is expected that there will be but little movement for some time. Rubbers are holding firm, this line being the only one in the list that is steady and held. Business all around is light.

Dealers' Buying Prices:

Tea lead		0 05½
Heavy lead pipe		0 07¼
Yellow brass		0 13
Red brass		0 21½
Light brass		0 08
Scrap zinc		0 06¼

Old rubbers, boots and shoes	0 08	0 08½
Overshoes, lumbermen's rubber boots		0 06
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Antimony Eases Some; Spot Tin at 80c

Montreal.

INGOT METALS.—Tin has declined a little this week and antimony is easing somewhat. Copper is tending to soften, and markets are generally quiet.

COPPER.—Trade is lagging and the position, while unchanged, is a bit weaker. There is still a basis here of 30-31c for best grades, while casting declined in the States ½c.

TIN.—Tin is quoted here at 80-85c lb. according to grade. There has been an absence of selling activity and cables from London are very slow still.

SPELTER.—The market is unchanged, trading is limited, and price still unchanged at 10½c per pound. A decline, however, will not come as a surprise altogether in the near future.

LEAD.—Some are willing to make concessions on lead, although prices are still quoted on the changed basis of last week, local price being 9½ to 10c per pound.

ANTIMONY.—This will be shaded in some quarters, it seems, for any round lots that may be wanted. Prices rule at 11-12c per pound.

ALUMINUM.—The market for small quantities is limited and quiet and in the usual way limited quantities are selling still at 48-50c per pound.

TORONTO MARKETS

TORONTO, Dec. 12—A readjustment of values on sheets is in progress and lower levels have been reached by some jobbers this week. This is not a result of any change in prices at the mills. A decline of 1c per pound has also been recorded in lead pipe and sheets and solder is down again in some quarters. Business as a whole is considered seasonably good and the outlook for 1919 seems very bright.

Sales of Christmas goods have been splendid and holiday trade is expected to reach excellent totals. Cutlery of all kinds, skates, hockey sticks, sleighs and snowshoes are all in active demand.

Adjustments Made in Builders' Hardware

Toronto.

BUILDERS' HARDWARE.—A readjustment of values on Canadian manufactured builders' hardware has been made, some of the prices named being slightly higher and some slightly lower than former levels. The lines affected include sash fasteners, window spring bolts, cupboard catches, sash lifts and kindred lines.

Revised Prices on Spark Plugs

Toronto.

SPARK PLUGS. — There has been a change made in spark plugs this week which provides for higher levels of values. This is brought about by continued advances in raw material and high production costs. The Sterling is the line affected and prices now ruling are given as follows:

Sterling Spark Plugs—

Size.	Black Sterling Less than 20	20 to 100	100 to 500	500 and over
½-inch	45c	43c	41c	40c
⅞-18	47c	45c	43c	41c
⅞-18 Special	49c	47c	45c	44c
Porcelains	38c (Any quantity).			

	Red	Sterling.		
½-inch	55c	53c	51c	50c
⅞-18	58c	56c	54c	53c
½-inch long	60c	58c	56c	55c
⅞-18 Long	60c	58c	56c	55c
⅞-18 Special	60c	58c	56c	55c
Porcelains	40c (Any quantity).			

Stoves Hold Steady, Wares Active

Toronto.

STOVES, WARES.—There is a steady tone in the market on stoves. Trade just now is somewhat quiet, a seasonable condition, and manufacturers intimate that repeat business on heaters has not been quite as heavy as usual, due it is felt, to the continued mild weather generally effective up to date. Whether a sudden turn to colder weather will stimulate sales or not is a question. The colder weather must come and stay before this fact can be established. The outlook for next season is considered quite satisfactory and price changes few and gradual.

An active demand for practically all lines of wares for next spring is in progress. Dairy supplies are selling freely along with sap pails and other syrup accessories. Prices rule with a steady tone and without change for the week.

Cordage Unchanged; Binder Twine Down

Toronto.

CORDAGE, TWINE. — There have been no new developments in regard to cordage during the week. There is a fair movement of rope to the trade and prices rule without any change. What the future of prices may be is uncertain, but the trade is confident that good business should be the lot of 1919 efforts. Quotations on pure manila rope hold at 39c per pound; on British manila 33c; on sisal, 27½c.

Late advices received last week as HARDWARE AND METAL went to press recorded a decline of 1½c per pound in binder twine. The new prices which are being quoted are: 500 foot, 22c per pound; 550 foot, 23¾c; 600 foot, 25c; 650 foot 26½c. Booking business now in represents a very good total.

Nails Rule at Unchanged Levels

Toronto.

NAILS, WIRE.—The market rules at unchanged levels and there have been no new developments this week of any particular interest. Trade is comparatively quiet and there seems to be little prospect of material improvement in this respect until after the new year. Wire nails are being quoted at $5.50 per 100 pounds base and cut nails at $5.85 per 100 pounds base.

Smooth steel wire at a base price of $6.25 per 100 pounds shows no change. The demand is within very narrow limits.

Oils Steady, Gasoline Holds

Toronto.

OILS, GASOLINE.—The tone of the market generally is steady. Business is along fairly satisfactory lines, but the Christmas rush is overlooking oils with exception of those necessary to carry on with. Prices on coal oil are firm at 18½c to 21½c per gallon.

There have been no new developments in gasoline. Sales are fairly well maintained and the price rules at the unchanged figure of 33c per gallon.

Cement Quiet; Plaster of Paris Too

Toronto.

CEMENT, PLASTER OF PARIS.—The market on cement is steady and there is a fairly seasonable demand in evidence. The trade are making preparations for a good, healthy trade in 1919 and volume of business hoped for will far exceed the past year's figures. No change in price has occurred and no great revision is anticipated for some months to come.

Plaster of Paris is in about the same position as cement. The demand just now is rather quiet, but good business is looked for next year. It is expected, too, that supplies will come through in better volume than has been possible the past few months.

Some Readjustments Made in Bars

Toronto.

IRON AND STEEL.—A readjustment of prices on bars has been made in some quarters, steel bars being quoted down a little, $5 against $5.50, and iron bars $4.90 against $5.25 per 100 pounds base. Small shapes, and this heading includes a large variety of material, is quoted 25c per 100 pounds down at $5.50 against the $5.75 that has held for some months.

Dealers state that the demand for steel goods is quite brisk. Business that has been neglected for a long time is coming to life. Apparently the demands come from industries affected principally by the trade of the mines, agriculture and ship building.

TORONTO—	Per 100 lbs.	
Common bar iron	$4 90	$5 25
Common bar steel	5 00	5 50
Refined iron	....	5 65
Angle base	....	5 75
Horseshoe iron	....	5 50
Tire steel	....	5 70
Mild steel	....	5 50
Norway iron	11 00	13 00
Toe caulk steel	....	6 25

Spring steel	9 50	11 50
Mining drill steel	19 00	30 00
Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Prices Hold on Corrugated Sheets

Toronto.

CORRUGATED SHEETS.—The market rules firm and without change during the week and the present basis is expected to hold for some little time to come. Prices now in effect have not changed for some months and are quite in line with mill figures, so until these latter are revised there seems little likelihood of a revision in local figures.

Eavetrough and conductor pipe have held steadily this week at prices shown in current market quotations.

TORONTO—	Per 100 Sq. Feet	
Corrugated Sheets—	Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Further Revisions in Sheets, Plates

Toronto.

SHEETS, PLATES. — Further revisions have occurred in the jobbers' prices on sheets and plates. These provide for a lower scale of quotations than have been ruling and is in line with information given out in these columns during the past few weeks. This is not a result of declines at the mills, but is the result of an effort on the part of jobbers to get down to a basis more in line with the actual market. Little revision from figures now reached is looked for, but the question of supplies seems somewhat brighter. A fair tonnage may move from the mills this month and about February or March it is expected that deliveries will reach fairly substantial figures so that jobbers will not have to scrape along on such narrow margins as has been general the past few months.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$7 50	$8 50
12 gauge	$6 85	7 35	8 35
14 gauge	6 90	7 20	7 90
16 gauge	7 00	7 25	8 00
18-20 gauge	7 30	7 80
22-24 gauge	7 35	7 85
26 gauge	7 40	7 90
28 gauge	7 50	8 00
3/16-inch plate	7 40
¼-inch boiler plate	7 00

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

GALVANIZED SHEETS—		
10¾ oz.	$9 30	$9 50
U.S. 28	9 00	9 20
U.S. 26	8 70	8 90
22 and 24	8 55	8 75
18 and 20	8 40	8 60
16	8 25	8 35
14 gauge	8 15	8 25

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

Tubes Grow Plentiful; Wrought Pipe

Toronto.

WROUGHT PIPE, BOILER TUBES. —Tubes are coming forward to Canadian dealers in large lots. In fact they can get all the tubes they want now, and almost any kind, or size. Some of those interested in the trade are rather skeptical about the remarkable recovery that is being made in the ability of the mills to furnish the supplies of tubes to Canadian dealers. The tube situation was bad for a good many months. In fact it was impossible to secure a two-inch tube and they were badly needed for repair work. Canadian dealers were told, when they approached the mills on the other side, that it was impossible to give them the stocks they required. Their mills were entirely on war work, and furthermore it was impossible to secure

Better Outlook in Sheets; Price Readjustments Effected

THERE has been a further readjustment in the prices of both black and galvanized sheets this week, and the market locally would now seem to be on a basis more in line with prices at the mills. The decline this week in galvanized sheets amounts to about 1½c per pound, and that in black sheets to around ¾c per pound. There may be some further slight changes, but the prices now arrived at seem quite likely to be fairly well maintained for some time to come.

Readjustment Was Expected

The changes made are quite in line with the position outlined on sheets in HARDWARE AND METAL at different times during the past few weeks, and particularly in the issue of November 30, when the situation was covered in part as below as the result of an interview with one of the best-informed authorities in sheets on his return from the United States sheet mill districts The following is an extract from the report:

"Regarding prices, this authority expects that prices will hold around present levels for some time to come. Government fixed prices will prevail until January 1, after which, it is said, there is a possibility of a renewal of Government relations. Even though no further action is taken by the Government, it is thought that prices at the mills will maintain strength for some months to come. It is felt, however, that some distributors of sheets will have to forego in the future some of the premium which they have enjoyed during the past few months and that price re-adjustments will be necessary in a few instances. Present mill prices, it is said, do not justify some of the high prices which have been asked by some jobbers. In justice to other jobbers, however, it should be stated that in most cases profits have been very moderate. Back of all is pig iron, and this authority states that in his belief, and from his observations, pig iron prices will continue at present levels, or even higher, for some months in the future."

Better Supplies to Come

At the same time the question of supplies was taken up, and HARDWARE AND METAL advised the trade as follows: "In all probability there will be a good supply of black and galvanized sheets available in the near future. Mills have a considerable amount of business on their books and are not allowing cancellations. They have adopted a firm attitude in this respect." Enquiries made this week amongst Toronto jobbers reveal the fact that a fair tonnage has been promised for shipment from the mills this month, and the trade as a whole feel that by February or March supplies will be quite a good deal easier. The outlook for 1919 seems much better as regards what will be available, and as far as business is concerned the tone is most optimistic. Big trading is expected and preparations are being made to meet this.

Primed With Competitive Spirit

It is to be expected that in another two or three months competition will be keen for business. When goods were scarce there was rather an independent attitude adopted by some in regard to orders, but this is already disappearing. When the salesmen go forth in the new year, 1919, they will be primed full of the competitive spirit again, and they should keep the orders rolling into headquarters at a lively gait.

skelp to send to the rollers as the metal was passing through the open hearths to other purposes. Now, almost the day or week that the armistice is signed, the Canadian dealers are informed that their orders, accumulations of weeks or months, are on the road. Certain it is that the tube rollers could not have recovered so rapidly, and it looks as though they had been keeping a strategic reserve against a bad day, and that the Canadian dealers were now being avalanched from this. These tubes are coming in at a fairly high price, and, of course, there will be more or less of a scramble to place them before the era of high values has become a memory.

There is no indication that supplies of wrought pipe are much more plentiful as yet. There is a fair amount of business passing and prices have held unchanged at figures shown in current market quotations. Prices on boiler tubes still hold at following figures:

Per 100 feet

Boiler Tubes— Toronto—	Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00

3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Lead Pipe Down; Solder Again Lower

Toronto.

LEAD AND ZINC PRODUCTS. — The decline in pig lead has brought about a revision in prices of lead pipe and lead sheets to lower levels. New figures provide for a decline of about 1c per pound, lead pipe now being quoted at 14c per pound; waste pipe at 15c; lead wool, 14c; lead sheets, in rolls, 12½c.

Lower levels are again reported in prices of solder, the decline in pig lead and pig tin bringing about this revision in solder prices. Guaranteed is being quoted as low as 44c per pound; strictly, 41c; commercial, 36½c; wiping, 35½c; wire, 49½c.

Zinc sheets, lb.	....	0 26

Old Materials Dull, Inactive

Toronto.

OLD MATERIALS. — Scrap metal business is poor. It was poor last week and it looks as though it would be poor for some time to come. Dealers are not offering on any available material, and users are not in the market for any considerable tonnage. The feeling seems to grow that there will have to be a readjustment of the iron and steel situation before there is much of an improvement in the scrap metal trade. Prices shown are nominal only.

Lead Again Lower; Other Metals Steady

Toronto.

INGOT METALS. — With the exception of lead there has been little fluctuation in ingot metals this week. Antimony is down to 11-12c in some quarters, which is lower than offerings last week, though not as low as some figures. Tin holds steady and spelter is unchanged.

COPPER.—The trade is moving along in a routine manner. Production figures for November show a decline over October figures. At a meeting to be held December 15 between copper interests and government officials some announcements as to future course to be followed may be expected. Locally prices hold at 30-32c per pound, which means no change.

TIN.—There has been no change in the situation locally this week. Prices have held and there appears to be only a limited amount of interest in this metal. Prices to-day range from 80c to 85c per pound.

SPELTER. — Primary points show a somewhat weaker tone in spelter. There is little moving and this condition extends to local activities. Prices hold without change this week at 10-11c per pound.

LEAD. — Lower levels have been named on lead again this week. Prices now range as low as 8¾-9c and up to 9½c per pound. The market is dull and trading confined to limited lots.

ALUMINUM.—The established price on this metal still holds and there is as yet little marked interest commercially. Prices range locally at 50c per pound, a nominal figure.

ANTIMONY.—Figures named in some quarters show a decline from last week's quotations and a distinct narrowing of the range of prices which are now from 10c to 12c per pound. Little of interest has transpired lately in this market.

LONDON MARKETS

LONDON, Ont., Dec. 12—Winter lines are active, skates, sleighs, hockey sticks and snowshoes moving forward freely and at unchanged figures. Bird cages are higher in price, but the markets generally rule quite steadily and without change. This condition seems likely to continue until after the first of the year.

Christmas business is in full swing and promises to be exceptionally good. Cut glass, silver plated ware, cutlery of all kinds and sporting goods are prominent in trading now.

Active Demand For Sleigh Bells

London, Ont.

SLEIGH BELLS. — The break to colder weather with some snow arriving has stimulated sales of sleigh bells. Considerable activity is reported in these and a good movement until the end of the year is expected. Prices show no change, the following being quotations on many styles and grades:

Collar Bells on Strap—No. 2, $1.35 doz.; No. 3, $1.50 doz.

Steel Team Bells—No. 7, $1.35 doz.

Bell Metal Team Bells, Rough—No. 2, $3.50 doz.; No. 3, $4.00 doz.; No. 4, $5.75 doz.; No. 5, $6.75 doz.

Swiss Team Bells—No. 2, $4.75 doz.; No. 3, $6.00 doz.; No. 4, $7.75 doz.; No. 5, $11.00 doz.

String Bells, Dexter Pattern Steel, N.P.—No. 047, $1.50 per string; No. 048, $1.85; No. 040, $2.15; No. 050, $2.40.

Dexter Pattern, Brass, N.P.—No. 47, $2.10 per string; No. 48, $2.50; No. 49, $2.85; No. 50, $3.50.

Swedish Chimes—No. 1400, $2.35 set; No. 1500, $2.65 set; No. 1700, $3.50 set.

Shaft Gongs—Steel, N.P.—3 bell, No. 7, 45c pr.; 4 bell, No. 13, 75c pr.; Brass—3 bell, No. 90, $1.35 pr.; 4 bell, No. 91, $1.75 pr.

Skates Moving Forward Freely

London, Ont.

SKATES.—There is no question as to the movement of skates. The demand is splendid and sales to the Christmas shopper are by no means hard to make. There has been no change made in prices, lists given below on the Starr lines still being subject to a discount of 30 per cent. Net prices on skate straps are given also, these are unchanged:

Spring Skatess, Acme, list per pair, $1.30.

Hockey Skates, list per pair, No. 153, $1.45; No. 150, $1.65; No. 154, Bull Dog, $1.85; No. 156, Acadia, $1.75; No. 157, Beaver, plain, $2.75; No. 162, Beaver, flanged, $3.00; No. 173, Climax, $2.75; No. 194, Regis, $3.25; No. 176, Scotia, $3.75; No. 129, Mic Mac, $5.00; No. 189, Regal, $6.00; No. 181, Velox, $6.50; No. 193, Dreadnought, $4.00; No. 190, Tube, $6.00. All less 30 per cent.

Skate Straps—Web, 21-inch, $1.60 doz. prs.; 27-inch, $1.75; 30-inch, $2.00; 33-inch, $2.25.

Solid Black Leather—21-inch, $1.85 doz. prs.; 27-inch, $2.25.

Oval Head or Round Head Skate Screws, ⅜-inch x 6, 78c per gross list; ⅝-inch x 6, 82c per gross list, subject to a discount of 67½ per cent.

Bird Cages Go To Higher Levels

London, Ont.

BIRD CAGES. — New prices have been named on Japanned bird cages, which provide for an advance over previous figures. The new range of quotations follows: Wright's No. 612, $17.00 doz.; No. 613, $20.40; No. 614, $22 20. In assortments, No. 44x3 cages, $7.85 each; No. 88x6 cages, $15.45 each.

Nails Steady; Rope Unchanged

London, Ont.

NAILS, ROPE.—A steady tone has been maintained in nails. The demand is light at the present time from outside points and prices rule without change, wire nails being quoted at $5.50 per 100 pounds base and cut nails at $5.85.

Light sales of rope are reported and no special feature of interest attaches to this market just now. There has been no change in quotations, pure manila being quoted at 39c per pound base; British manila, 33c; New Zealand hemp, 33c; sisal, 27½c.

Sleighs; Snow Shoes Selling

London, Ont.

SLEIGHS, SNOW SHOES.—Splendid sales of children's sleighs and snow shoes are reported. Christmas business has been good so far, and there seems to be every indication this will continue. The market rules with a firm undertone, and there has been no recession in values, prices being maintained at following figures:

Sleighs, Canadian Buffalo Sled Co. line—List prices, per dozen—Flat iron runners, No. 27 x 27-inch, $5.20; No. 32 x 32-inch, $6.10. Rd. spring steel runners, No. 26 x 26-inch, $6.40; No. 30 x 30-inch, $7.30; No. 33 x 33-inch, $8.90; No. 36 x 36-inch, $10.70. Kiddo coaster sleighs, No. 85 x 33-inch, $24.70; No. 86 x 36-inch, $25.90; No. 87 x 40-inch, $34.90. Children's rail sleighs—No. 17, with sgle. wood rail, $28.80; No. 18, with dble. wood rail, $32.60. All above lists less 35 per cent.

Snow Shoes—Boys', 10 x 33-inch, $2.35 per pair, net; Ladies', 11 x 36-inch, $3.00; Men's, 12 x 42-inch, $3.50; Men's, 14 x 42-inch, $4.00; Men's, 16 x 42-inch, $4.35.

White Lead in Oil; Putty, Glass Steady

London, Ont.

WHITE LEAD IN OIL, GLASS, PUTTY.—Steadiness seems to be the keynote in the markets on white lead in oil, putty and window glass. In all three the demand is along comparatively narrow lines, while prices rule at unchanged figures as follows:

White lead in oil, pure, in ton lots, $17.80 per 100 pounds; in less than ton lots, $18.15; pure Elephant white lead is quoted at $18.30 per 100 pounds in ton lots, and $18.65 in smaller quantities.

Putty, standard, in 100 lb. drums $6.75 per 100 pounds; in 25 lb. drums, $7.00; pure, in 100 lb. drums, $8.75; in 25 lb. drums, $9.00.

Window glass, single diamond, 25 per cent.; double diamond, 25 per cent.; cut lights, 10 per cent.

Small Sale Linseed Oil; Turpentine

London, Ont.

LINSEED OIL, TURPENTINE. — Sales of linseed oil are small just now and little activity is expected prior to the turn of the new year. Prices are 2c down this week at levels shown below.

Turpentine is also quiet at the present time. Primary markets show little fluctuation, but the tone is weak. Prices below show a 4c decline.

Linseed Oil—	Raw	Boiled
	Gal.	Gal.
1 to 2 bbls.	$1.75	$1.78
3 to 5 bbls.	1.74	1.77
6 to 9 bbls.	1.72	1.75

Less bbls. at 10c gallon.

Turpentine—	Per Imp. Gal.
1 bbl.	$1.15
2 to 4 bbls.	1.14
5 gal.	1.25

WINNIPEG MARKETS

WINNIPEG, Dec. 12—Price changes for the past week show advances in shoe thread, binder whips, sand paper, emery cloth, hitching rings and gasoline faucets. Markets as a whole are reported firm, although there are fewer changes. These conditions are expected to prevail till after the first of the New Year as practically all manufacturers are marking time pending the outlook for next year's raw materials. Very few manufacturers will accept business for next year at to-day's prices.

Christmas trade is reported to be brisk in cutlery and sporting goods lines, while a fair demand is reported in the staple hardware.

Bamboo Binder Whips Higher

Winnipeg.

BINDER WHIPS.—The price for No. 946 bamboo binder whips has just been named for next season. This again shows an increase over former quotations. Even at to-day's price supplies are very hard to get. The bamboo poles are imported from the Orient and the demand for ships to transport war material on the Atlantic has forced freight rates on the Pacific to such high figure that the rate on poles figures in some cases about three times the original value of the poles. The price named for next season of $5.25 dozen is considered very reasonable in view of conditions faced in securing stocks.

Shoe Thread Climbs Higher

Winnipeg.

SHOE THREAD.—Jobbers all report a serious shortage of shoe thread. Supplies have been imported from Europe and shipments at all times since the commencement of the war being dependent, as they have been to a great extent, upon the demand in England, have been very erratic. The result has been a forcing of prices to very high levels. Further increases are registered during the week, although there is practically no stock to offer even at to-day's prices, which are given herewith: Barbours, No. 8, $3.15 per pound; No. 10, $3.25; Harp, No. 8, $3.05; No. 10, $3.15.

Wrapping Twine Holding Firm

Winnipeg.

WRAPPING TWINE. — Prices on wrapping twine continue firm and no immediate change is expected as all cotton lines are in good demand. Prices now ruling are confirmed as follows: Wrapping twine, cotton, 3-ply, in balls, 76c a pound; 3-ply, in cones, 72c; 4-ply, in balls, 79c; 4-ply, in cones, 75c.

Higher Prices on Hitching Rings

Winnipeg.

HITCHING RINGS.—Prices on hitching rings show a further revision during the week based on new lists issued by the manufacturers and are now selling as follows: Hitching Rings, 2½ inch, medium, $1.50 dozen; 2½ inch, heavy, $1.65 dozen.

Lock Faucets Move Upward

Winnipeg.

LOCK FAUCETS.—Gasoline lock faucets have undergone a further revision due to high prices ruling on brass and increase in production costs. These moved up to $15.50 dozen during the week.

Sand Paper, Emery Cloth Moves Up

Winnipeg.

SANDPAPER, EMERY CLOTH.—As predicted in a recent issue of HARDWARE AND METAL new prices were to be expected covering sandpaper and emery cloth. Quotations issued provide for an advance which is due to the increasing costs of numerous materials required in the manufacture. The new prices just announced show a substantial advance over former quotations ranging from 10 to 25 per cent. To-day's market prices are given herewith:

Sand Paper—

	Star.		B. & A.	
	Quire.	Ream.	Quire.	Ream.
Nos. 00 and 0..	38c	$6.75	42c	$7.50

No. ½	40c	7.20	44c	7.95
No. 1	45c	8.10	50c	9.00
No. 1½	50c	9.15	58c	10.50
No. 2	57c	10.35	66c	12.15
No. 2½	64c	11.70	77c	13.95
No. 3	72c	13.20	88c	15.90

Emery Cloth—	Quire.
No. 00	$2.25
No. 0	2.25
No. ½	2.35
No. 1	2.45
No. 1½	2.55
No. 2	2.75
No. 2½	2.95
No. 3	3.20

Linseed Oil Holds Unchanged

Winnipeg.

LINSEED OIL.—The market on flax seed for the past week has been very erratic with the result that reports from some of the Eastern points show a reduction in linseed oil while other points report firm markets. Prices on the local market show no change during the week and the following prices are still in effect: Raw linseed oil, $2.20 gallon; boiled linseed oil $2.23 gallon, in single barrel lots.

Fair Movement Glass, Firm Prices

Winnipeg.

WINDOW GLASS. — Local firms report a fairly good sale in window glass despite the high prices, while stocks are fairly well assorted and adequate to meet the present demand. Prices are reported firm on all markets and no immediate change is looked for. Prices now ruling on the local market are given herewith:

Window Glass—	Single.	Double.
Up to 25-inch	$15.50	$19.50 case
26 to 40-inch	16.50	22.00 case
41 to 50-inch	19.50	25.00 case
51 to 60-inch	20.50	25.50 case
61 to 70-inch	21.50	27.00 case

Turpentine Shows No Price Change

Winnipeg.

TURPENTINE. — Turpentine prices continue firm on the local market at former prices, while stocks are reported about normal. Reports from Southern markets point to an easing in prices, but as soon as space is available for export higher prices are looked for in some quarters. Prices locally in the meantime remain unchanged as follows: Barrels, $1.25 gallon; half-barrels, $1.28 gallon; 5-gal. lots, $1.30 gallon; 1-gal. lots, $1.30 gallon, plus the usual extras for containers.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Dec. 12, — The opinon expressed in last report that there will be no further price fixing is now confirmed and only the final formal announcement is needed to wind up the obituary of Government price control. The War Industries Board and the iron and steel industry independently reached the same conclusion, that price fixing should be discontinued. There appeared to be some weight to the idea of some measure of control of prices during the transitionary period, so as to avoid a slump in prices, but the War Industries Board found itself powerless to enforce minimum prices, to prevent sellers from shading, while the producers felt that in the long run they would be better off if the market were allowed from the very outset to take its own course. One cogent reason for the producers' attitude was that if the War Industries Board should set prices for the first quarter of the new year it would probably insist upon reductions as it would not be readjusting the market if it did not make at least a start, whereas the producers might be able to hold the old prices for a time.

Immediate Decline Improbable

While the situation created by the sudden disappearance of Government control—although, of course, the present agreement runs through December 31, which is not far off—appears to be an entirely new one it is not new after all. It is in substance the same situation that has always developed after there has been a rise in the market and the corresponding decline is in prospect. The market moves through cycles, which are very much the same in character, although differing in length and in the intensity of the movement. Starting with a period of low prices, demand develops, prices begin to ascend and buyers become confident. They buy more and more freely and thus encourage prices to rise further. When prices stop advancing the buyers find themselves well covered and cease buying. Then the producers hold prices as long as possible, shipping on old orders and booking such little additional business for early delivery as develops. No large sales can be effected on a declining market, hence the incentive to the producer is to hold prices, for there is more profit for him in the contracts he has on books than there would be in the little business he could pick up by cutting prices. When order books are pretty well cleaned out the sellers begin cutting prices and the decline occurs. Beginning with the boom of 1899 this cycle has been run through five times, the peaks of demand and prices falling in 1899, 1902, 1907, 1909 and 1912. Afterwards in each case, there was a period of sustained prices with little buying, but heavy shipments. After 1899 and 1902 the old pools and associations helped to sustain the market, and in 1908 the "Gary dinner" movement was a great help, but the underlying incentive to the individual producer, not to cut prices, was always present. The artificial assistance given, as by the Gary dinners, merely helped.

In its general form, the situation today is precisely similar to those experienced in the past. The furnaces and mills have a large volume of contract business on books, and there is a fair, though decidedly moderate, running demand in the aggregate for early deliveries, from buyers to whom price is no particular object because they expect to turn the material over at once. If the market is going to decline eventually, they do not wait, because then they can buy more material and turn it over also. In this class are the jobbers and automobile builders, for instance.

As to the contract business on books, some of the contracts are absolutely firm contracts when, for instance, they are for specific buildings or bridges, or specific lots of railroad cars. About this business there is practically no question; it must be carried out. Other contract business is not so firm, and the buyers under the contracts may be altogether unwilling to promise that they will take out the entire contract tonnage, which might involve a period of many months, but they are in many cases calling for immediate deliveries. They may be urgently desiring such and such tonnage deliveries for January, and perhaps also for February, and that affords business for producers even though there is no assurance as to whether these same buyers will want material in March at the contract price.

Little Construction Work

There is little construction work in prospect for the near future. There is practically nothing by way of entirely new projects, and as to old projects, set aside by the war, the buyers in many cases are at the mercy of the labor market and the market for other commodities, needed in conjunction with the steel. There is specific information as to several such projects, where large tonnages of steel have been under contract for months, and the buyers now tell the mills they will want the steel as soon as they can secure labor to utilize it. Just when that will be they do not know, but they are anxious to go ahead.

As to new projects, little can be expected for a time. Regular investment buyers, who would build factories, bridges, hotel and office buildings, cannot take hold now for they require assurance as to costs. They cannot make their investments at high costs if costs are shortly to be lower. It is not merely a question of the cost of steel, for the cost of utilizing the steel, by buying other construction materials and employing labor, is a large item in most cases, and if steel came down to an entirely satisfactory level at once these investors would still have to wait for their other costs to come down, or for assurance that costs were not going to come down. Accordingly, the iron and steel producers do not see that it would help matters in any way, while it would hurt the situation in several respects, for there to be an immediate and material decline in prices.

Market Prospects

It is barely possible, of course, that there will be declines immediately after January 1, but it is much more probable that existing prices will be held for a time, perhaps a few weeks, perhaps several months. Meanwhile the buyers who can afford to take the risk of buying

WEEKLY PAINT DEPARTMENT

Going After Business During Winter

Keep Stock in Good Shape, Clean and Well Assorted—Now is the Time to Make Any Rearrangement Necessary and Get Everything in Good Shape—How One Dealer is Planning to Boost His Sales

KEEPING your paint stock neat, clean and well ordered is an important matter. It saves time and trouble for the dealer when making sales and when a customer wants to be shown a can of paint or varnish it is far better to be able to hand out a can that is presentable than one that is dusty or on which the labels are torn or in bad shape. Put yourself in the customer's place and imagine the impression you would get if you went to his store and he handed you out goods that were badly in need of dusting or on which the labels were half missing. Clean, well kept stocks always create a favorable impression regarding your store and your service and this goes a long way with buyers.

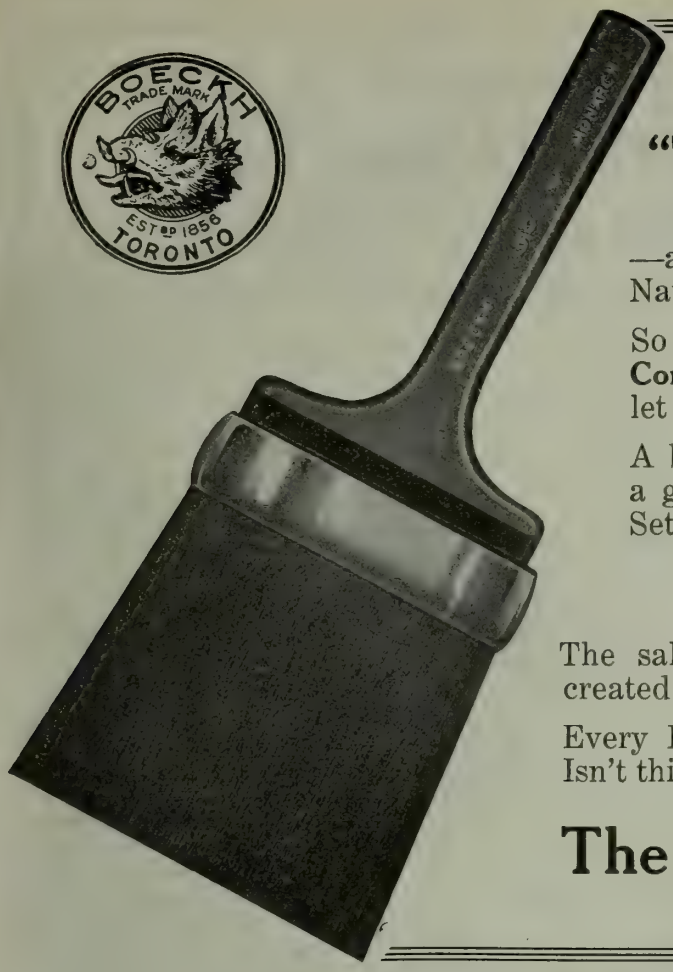
GET STOCK ARRANGED

If your stock is not in first class shape and not as well arranged as it might be it would be a good plan to start now and decide what changes you will make just as soon as the holiday rush is over.

"I am going to rearrange all my shelving," said one dealer to HARDWARE AND METAL. "These shelves are too deep. A lot of cans of paint and varnish get stuck away at the back and get dusty and dirty and do not move. We have had a fairly good year as far as sales go, but I am going to do better next year and as a starter, everything is going to be kept so that it can be got at quickly and can be kept clean and attractive. I am certain that that will be one way of keeping the stock moving."

WILL PULL IT OUT

The paint stock he referred to was located under a stairway near the front of the store. He is going to have the paint department moved out from under the stairs altogether, as the shelves are too wide and the arrangement is not a convenient one either for selling or for keeping the goods in shape.



This dealer states that he has found that by putting other goods at intervals around the store on display tables he has made a lot of sales he would not have made otherwise and he is going to try this plan out with paints during the winter months. He will have paints and varnishes especially suitable for household work, brushes, color cards and so on, where everyone who comes into the store must see them. He will change these around frequently and vary the colors and the advertising material.

SENDING OUT CIRCULARS

This dealer makes a point of sending out circulars at least once a month. He features special lines of hardware goods and has found that the plan works well in spite of the fact that he has lots of competition in his district. On every circular he always reserves a space approximately about one-fifth of the whole, for a paint talk. He has found that by this method his paint sales are continually increasing and that where before business was more or less spasmodic, sales being at a maximum in the spring, and fair through the summer and fall and quiet in winter, he now has a more steady business all through the year. His sales of paint through the winter are for household work and he features these lines from December until February. He makes a special point of appealing to the women in the matter he sends out and urges that they make the most of the opportunities they have during the cold weather to touch up furniture and do other indoor work. The plan has worked well and his records show that a steady increase in sales of these goods is being made each winter.

SELLS FLOOR FINISHES

This winter in addition to boosting paints and varnishes for fixing up furniture, he is going to try and make new records in the sales of floor finishes. His experience through several years leads him to believe that if this line is pushed as he plans to push it from now on, he can add quite a nice profit to his winter paint business. He has been getting a lot of pointers along sales lines from the manufacturers and will launch his new campaign after the stock taking and stock re-arranging he plans has been finished.

All The World Said,---
"THEY CAN'T COME OUT"

—and the German ships didn't, because the British Navy wouldn't let them.

So with every Boeckh Brush the Bristles **"Can't Come Out"**—that Steel Grip—Rubber Set will not let them.

A brush always dropping bristles is a menace to a good paint job. A Boeckh Steel Grip-Rubber Set Brush makes the perfect job a certainty.

A stock of these brushes will be a credit to your store.

The sales to be made and customers' satisfaction created will surprise you.

Every Boeckh sale adds another satisfied customer. Isn't this worth while?

The Boeckh Company, Ltd.
Toronto, Ont.

Is This Your Experience?

When both **Customer and Retailer** are so thoroughly satisfied, what other recommendation do we need to offer?

We would welcome an opportunity to tell you **why Moore's Paints and Varnishes** are becoming so popular with the Canadian Trade.

A postal card will put us in touch with you.

More Prestige for MOORE'S PAINTS

A prominent **Hardware Dealer** was asked the other day why he sold **Moore's Paints and Varnishes** exclusively. He replied: "I could hardly do otherwise. My dealings with **The Benjamin Moore Company** have always been of a most pleasant nature, and there is an excellent **demand** for their products. In fact, it has become a problem with us how to keep our stock complete when the cans move off our shelves so rapidly."

Benjamin Moore & Company Limited
West Toronto

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, December 12.—A ten cents decline is noted in this market for linseed oil this week, and is the big paint market feature of the week. The reason for this is generally assigned to the desire of some sellers to dispose of their holdings. Some assert that this is a good time to buy, and deliveries it is understood will be made in December, January and February on this basis. Turpentine still is scarce in some hand and holds quite firm. Spot markets of the South show an easier tendency, and sales there are reported to be limited.

There is a general quietness in the matter of present trading in paints, but orders for mixed paints have been freely passing in to the paint makers.

Linseed Oil Goes Lower; Raw is $1.56

Montreal.

LINSEED OIL.—The law of supply and demand has operated this week to produce a further decline in linseed oil totaling ten cents, and bringing the lowest price in this market down to $1.56 on one to four barrel lots. This is effected in the face of a firmer seed market for the present week than that obtaining last week. Lack of orders are directly responsible for the further drop, jobbers and crushers declare, and those who have oil for sale are, in some instances, anxious to get their money back. Whether this will bring in more business remains to be seen. One large paint maker thought there might be a decline still of a few cents, but did not expect this to be great. Spot stocks of seed are reported as fair but not at all excessive.

LINSEED OIL

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 56	$1 73
5 to 9 bbls.	1 55	1 73
10 to 25 bbls.	1 54	1 73
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 58½	1 76
5 to 9 bbls.	1 57½	1 76
10 to 25 bbls.	1 56½	1 76

Less Turpentine Here; Price is Firm

Montreal.

TURPENTINE.—Scarcer still does turpentine become, according to some sources, so much so that some are not making any offers and will name no prices. The quotations of a week ago are still holding, and lots available are confined to barrel quantities and less. There is naturally only a limited amount of trading in this commodity at present

Turpentine.	Per Imp. Gal.	
1 to 4 barrels	$1 15	$1 20
5 barrels and over	....	....
Small lots	1 21	1 30

(Packages extra)

Price to Hold on White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—The basis for white lead in oil is held without change and the general position is steady. The feeling of those handling this commodity in a jobbing way is that prices will hold steady, supplies of pig lead being none too plentiful. Five-ton lots are quoted at $17 per 100 pounds; ton lots at $17.50, and smaller quantities at $17.85.

Putty is Quieter; Basis Unchanged

Montreal

PUTTY.—The market is steady and without change. In view of the fact that the season is well along, sales have decreased a great deal, and while a good deal of glazing may still be done here and there, the bulk of the present year's activity is about concluded.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Little Sorting Now On Mixed Paints

Montreal.

MIXED PAINTS.—The season for active sales is now about over and all attention of the paint men is directed towards the making of next season's supplies. The bookings are very satisfactory as reported from various sources and a good season in the coming year is anticipated. All the tendencies are firm.

TORONTO

TORONTO, December 12.—Lower seed oil again in some quarters levels have been reached in lin- this week, even in the face of an advancing seed market. What may happen in the future is a little hard to determine, but the feeling is general that about the lowest point has been reached and the seed now swinging the upward way may stiffen oil values. Turpentine has come down in some quarters, too, in sympathy with markets in the south. Mixed paints are holding firm and without change.

Lower Levels For Linseed Oil

Toronto.

LINSEED OIL.—Lower levels have been named in some quarters on linseed oil this week and this in the face of a seed market which shows greater strength. The future seed prices have shown steady advances for the past ten days, and this may have a bearing on the trend of prices after the first of the new year. The demand is along very narrow lines just now and little activity is expected for another month, as far as retail demands are concerned. The range of quotations follows:

Linseed Oil—	Raw Imp. gal.
1 to 2 barrels, gal.	$1.58 -$1.75
3 to 5 barrels, gal.	1.57 - 1.74
	Boiled Imp. gal.
1 to 2 barrels, gal	$1.60½-$1.78
3 to 5 barrels, gal.	1.59½- 1.77

Add 10c gallon in smaller quantities.

Turpentine Records Decline This Week

Toronto.

TURPENTINE.—There has been a readjustment of values on turpentine this week, prices showing declines of from four to eight cents per gallon. There has been little interest in this co commodity for some few days, but better tone seems to be developing. The market in the South seems to have reached a firmer basis and all indications are that once a buying demand is again in evidence, prices will start on the upward trend again. Quotations to-day range as follows:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1.07-$1.15

Firm Prices In Mixed Paint

Toronto.

MIXED PAINTS.—The market remains very firm and there is no tendency towards any revision in values to lower levels. Letters received from United States paint concerns, which may be taken as a criterion of conditions

MARTIN-SENOUR
PAINTS AND VARNISHES

MADE IN CANADA—SOLD ON MERIT

PIONEERS
of
PURE PAINT
and
STILL FIRST
in the estimation of
PAINT USERS.

The Paints and Varnishes that fortify you against complaints and make a Big Advance in your turnover.

The exclusive Agency for this line is a most valuable asset to any merchant's business. Martin-Senour Paints and Varnishes are now so well known for their unsurpassed quality and from the fact that they are so extensively advertised, that more and more people are attracted to the store where they are handled, and consequently they are the easiest and most profitable to sell.

The high quality of each and every Martin-Senour Product is such as to retain and increase the demand of those who have once tried them.

Martin-Senour sales help and co-operation is the strongest, consisting of the most effective features of Interior and Exterior Displays, Mailing Campaigns, Follow-Up Systems, and direct help of Salesman.

This policy will not be curtailed.

It will be **continued** and **strengthened.**

Would you not like to be counted as one of our **satisfied** and **successful** Dealer Agents who is profiting by this policy?

Drop a line for our Proposition, but do it to-day.

here, indicate that manufacturers face an acute shortage of raw materials and that supplies of tinplate are limited to such an extent that the container situation may prove serious. Prices for the early part of 1919 are considered attractive in the face of existing conditions. There is a feeling that prices will remain firm for the next four to six months at least, and buying now of supplies to carry through until June of next year would seem quite alright. By that time stocks should be reduced to a point where only absolute requirements are carried, and if this policy is followed, the future, whether higher or lower, should find the dealers in a position to meet the situation fairly.

Steady Market in White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—There have been no new developments this week in the situation on white lead in oil. Prices have held firm, with the demand restricted to seasonable requirements. Pure white lead in oil is quoted at the unchanged figures of $17.80 per 100 pounds in ton lots and $18.15 in smaller quantities.

Glass Holds; Putty Unchanged

Toronto.

GLASS, PUTTY.—The market on window glass holds firm and unchanged at discounts shown in current market quotations. The demands are comparatively small just at the present time.

Putty remains in about the same position as last week. The demand is only fair and prices hold unchanged.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Muresco Prices Revised Upward

Toronto.

MURESCO. — Revised prices have issued on Muresco which provide for a stiff advance. The new quotations represent an increase over former quotations of $1.20 per 100 pounds. On the new basis, prices to the trade are as follows: Tints, 5 lb. packages, per 100 pounds, $9.60; white, 5 lb. packages, per 100 pounds, $9.00, f.o.b., Toronto.

WEEKLY MARKET REPORTS

Continued from page 61

at present prices, because they can turn over the material promptly, will be over their rush and much of the contract business will be worked off. Production will doubtless decline, perhaps very materially. Finally, when prospects appear ripe that heavy buying for forward delivery can be induced, producers will be ready to meet buyers' ideas, by dropping the market, and there is likely to be a dip to such an extent that it will be followed promptly by a recovery, and then the period of prosperity, probably of several years' duration, will be upon the trade.

GIVE THE CLERK A CHANCE

The best way to interest the clerk is to let him do something to encourage business. If you have a clerk who has done good work for you in dressing windows do him the justice of letting a wider circle see his display than just the people who pass the store. Enter his display in the Christmas contest. If it earns a prize he will be that much the more enthusiastic in the work, and in any event he will appreciate the appearance of his display in the pages of HARDWARE AND METAL.

PORT ELGIN'S FINE RECORD IN THE VICTORY LOAN

Port Elgin outstripped most other communities in the Victory Loan campaign. Its objective was $34,000, but when the final results were tabulated it was found that the town had subscribed $175,500, or 516 per cent. of its objective. There were no very large subscriptions to swell this total, but one person in every four of the population bought bonds, and the total reached the record figures recorded. As an example of the way the result was obtained, the Stevens-Hepner Company were the first factory to secure an honor flag, 76 per cent. of the employees of the company bought bonds for a total of 22 per cent. of the pay roll. It was this spirit that made it possible for a comparatively small place to make such a record showing.

MAKING ELECTRIC PIG IRON FROM STEEL SCRAP

At the last meeting of the American Electrochemical Society in Atlantic City, Robert Turnbull, of Welland, Ont., read an interesting paper on the manufacture of low phosphorous pig iron from steel scrap in the electric furnace. After telling how the production in Canada had been stimulated by the war from 900 tons a month in 1917 to from 2,500 to 4,000 tons at present, Mr. Turnbull discussed the probable use of electric furnaces in peace time.

There has been some delay in the establishment by John Lysaght Ltd., of galvanized iron works at Newcastle, New South Wales, owing to the government asking too much for the dredging of a channel up to the site of the works. An understanding has been arrived at, however, with respect to the making of a channel deep enough to give lighters access to the wharf in front of the works. that the factory will be completed by the is expected shortly, and it is anticipated cent. of proof spirits permitted which

HAS BOTTOM BEEN REACHED ON LINSEED OIL?

LOWER prices have been recorded again this week in some quarters on linseed oil. This follows other declines during the past few weeks, and is primarily a reflection of lower flax seed prices, which have been noticeable during that period.

What the trend of the future market may be is somewhat uncertain. However, best-informed authorities are of the opinion that there will be little, if any, further recessions in values. During the past few days May flax seed has shown steady advances, and this may have a bearing on what to expect in the future.

It must be true, too, that the majority of the crushers are now operating on seed purchased at a considerably higher figure than the present market, bought prior to the close of navigation, so that the water routing of freight could be secured. This being the case it seems probable that there will be no desire to stampede prices to lower levels. There is no single condition in sight to warrant such action.

Reports indicate that the movement of flax seed this fall has been very good, perhaps somewhat better than last year. If this is the case, crushers will be in a better position to meet the demands of paint manufacturers and jobbers for supplies. This is not a condition to influence the markets particularly, and it is not fair to assume from any angle one can look at it that crushers will want to depress the market.

Indications are that business placed with the crushers by the paint manufacturers for their spring requirements is quite heavy. This would show that a good trade is looked for, and reports from manufacturers indicate that there has been a good booking business for mixed paints.

Altogether the outlook for 1919 is very good. It seems that the bottom has been reached or very nearly so in oil, and that some slight changes to higher levels may be recorded is quite within the realm of possibility.

Varnish Insurance

Berry Brothers' label bears the same relation to varnishes and their allied products as the sterling mark to silver. It is trusted by all classes of varnish buyers and users, because it is a sure protection against inferior varnishes, stains and enamels. It is also a safe guide to quality and efficiency in every varnish-using industry. The long record of all Berry Brothers' Finishes for complete dependability is a sales-making asset for the dealer.

WHY EVERY HARDWARE CAN RECOMMEND THE ARISTOCRAT OF BABBITT METALS

Harris Heavy Pressure and its Advantages

1. **A complete immunity from hot bearings is secured, HARRIS HEAVY PRESSURE** having a lower co-efficient of friction than any other known metal.
2. **A scored journal is impossible,** and if through any failure of lubrication a bearing should run hot, **HARRIS HEAVY PRESSURE,** owing to its special properties, will act as a lubricant, saving the journal from injury and preventing any delay to traffic.
3. It will stand the **heaviest pressures,** always running cool, even under the most trying conditions.
4. It will **wear** from 50 to 100 per cent. **longer** on general machinery bearings than any other Babbitt metal.
5. It effects **a saving in lubrication.**
6. It **preserves the journals,** and materially **increases their life.** A journal after running a short time with **HARRIS HEAVY PRESSURE** attains a perfectly smooth and highly polished surface.
7. It is easily applied and, if properly applied, no abrasive force will remove it.
8. **Its cheapness.** The first cost is moderate. It gives a longer life to the bearings, resulting in a great economy, as the number of renewals is thereby considerably reduced; its specific gravity is low in comparison with other metals; does not deteriorate with re-melting; and these advantages, together with its unequalled anti-friction properties, render it the **cheapest** as well as the **best metal** for all general machinery bearings.

The Ideal Christmas Present

Automobile Skates

The Only Skates With Aluminum Tops

SEASONABLE and attractive—appreciated by nearly every boy and girl and by most "grown-ups" as well.

It will pay to push them hard between now and Christmas.

A nice "Christmassy" skate window will draw lots of business which would otherwise go to jewelers and other stores.

Hangers, display cards, electros, etc., free on request. Write for them.

How's your stock?

Canada Cycle & Motor Co., Limited

Montreal Toronto WESTON Winnipeg Vancouver

WHAT DO YOU KNOW ABOUT VARNISH?

You'll probably be willing to admit that you don't know much beyond the fact that it is made by boiling various gums and that some varnish is good and some poor.

Your customers know less—most people look upon varnish as a transparent kind of paint and leave the selection to the dealer.

This puts a great responsibility on your shoulders. Don't let your customer, in his ignorance, purchase a cheap varnish that is not worth the low price it costs. Sell him

DOUGALL VARNISH

and you can rest easy that he has a product which will give him good service and entire satisfaction—full value for his money.

QUALITY DOUGALL VARNISHES FIRST

The Dougall Varnish Co., Ltd., Montreal

(Continued on second page)

Don't Underestimate The Importance of The Name Behind the Product!

THE name "Silkstone," when used in connection with wall coloring acts like magic in making a sale.

Silkstone is one of the few really good wall colorings that will stand washing.

Silkstone lasts longer, looks better, **is much cheaper than wall paper, and is more sanitary.**

Be sure and see that your customers are supplied with no other.

There's a reputation behind it, which will make it prove more profitable in the long run.

Write for our agency proposition to you.

Lowe Brothers Paints

Are you prepared for this winter's demand for Lowe Brothers' paints?

THIS will be the first winter for four years during which the Canadian people can breathe easily and look forward to a cheerful, peaceful spring, and this feeling of buoyancy and hope is already beginning to be reflected in the demand for Lowe Brothers' Paints, particularly those for interior use.

The "spring offensive" next year will not be in France, but in Canada. There will be a general painting-up and building movement throughout the country. But between now and next spring people will devote a great deal of time to interior painting and decoration so that the returning soldier of the family will not find the home he has been away fighting for dull, dingy, unpainted.

Are you prepared to take advantage of the general paint-up movement? Are you ready to handle the trade who ask for Lowe Brothers' Paints?

"The Little Blue Flag Sign
Outside your door,
Will guide the new Customers
Into your store."

Have you these winter selling paints on your shelves?

High Standard Interior Paint
Mellotone
L-B Wagon Paint
Oil Stains
Graining Color Sets
Gold Paint
Oil, Japan and Distemper Colors
Dry Colors
L-B Drying Floor Paint
Seal-cote
Auto-Carriage Gloss
Vernicol Stains
Aluminum Paint
Enamels for Furniture and Interior Purposes
Paint and Varnish Remover

Many Uses—Many Sales

MUNNS Wall Size is one of the most convenient and useful products that a Painter could have. He can use it as a primer or first-coater under oil paint of any description, under Kalsomine, as a stain killer, as a wood stain or filler, or for sizing walls before handing wall paper.

Send for lowest prices on "Dealers' Boxes," which contain twelve one-pound packages, with advertising leaflets and show cards.

How much Paris Green will you require?

You will be well-advised to let us have your order for Munro's Pure Paris Green right away. During the past two seasons, owing to exceptionally large sales, we have been unable to fill all orders.

The large demand for Munro's Paris Green is due to the fact of its great strength, it being well over the Government standard.

All orders booked now will be delivered promptly on date specified. A delay now may mean the loss of sales next season. Get your order in to-day.

½ and 1-lb. papers, ½ and 1-lb. tins, 25 and 50-lb. drums, 250-lb. kegs, and 600-lb. barrels.

Every Woman Needs Its Help—Now

—but when the fall buying season comes, will you be ready?

Why Not Order a Good Supply of

Northern Electric

Portable Sewing Machines NOW?

Remember the greatest need for sewing by electricity is now, when the women of Canada are so extensively engaged in doing their own as well as a large amount of patriotic sewing work at home.

The Northern Electric Sewing Machine eliminates the tiresome, back-aching treadle work of the old method, and enables the operator to do twice as much sewing without effort.

The Northern Electric Sewing Machines are of the highest grade in design and workmanship, and carry a guarantee of complete satisfaction in every way.

Several different types are obtainable in both portable and stand style machines. You can secure either vibrating shuttle or bobbin type.

Satisfy customers and build up better business

TO the dealer who has the stock, the growing demand for "rubber-type" roofings means big money. And roofings that sell readily on their merit, and stay sold on their service, are the roofings that land the cream of the business.

These are conditions that the Johns-Manville line completely fulfills. The dealer who ties up with Johns-Manville can figure on every job that comes up, for the line includes types of roofing for every requirement of service and price. And to the selling value of the roofing itself is added the backing of an institution continent-wide in scope, which vouches for the service of its every product. This, too, is a genuine sales argument.

We make three grades of "rubber-type" roofings:

Regal Brand—made of high-grade selected wool felts and a combination of natural asphalts, processed in our own plants. Contains more water-proofing material per square than any other rubber roofing.

Service Brand—an excellent roofing for somewhat lighter service and at a lower cost.

Pilot Brand—made of cheaper materials, but designed to give a maximum of service for the money invested.

These three fabrics are made, from beginning to end, in our own mills. Carried in your stock, they mean bigger business on a better basis. Let us give you further facts about our sales plan.

CARTER'S

The Best Quality of Genuine Dry Red Lead and Genuine Dry Powdered Litharge

Paper manufacturers want a Red Lead to protect their steam and water pipes, and a Litharge to reline their digesters. Rubber and Color Makers need them. Shipbuilding firms must have them. Railways and Ironworks use them. Are you ready to supply the requirements of such firms in your district. Also

YOUR PAINTER

must have Genuine Red Lead and Litharge to meet his requirements. Do not delay in putting in a stock or you will lose good business which is rightly yours.

The Carter White Lead Co. of Canada, Limited, 91 Delorimier Avenue, Montreal

JUST A REMINDER

Christmas Trade

THE BRAINERD MFG. CO.
East Rochester, N.Y., U.S.A.

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

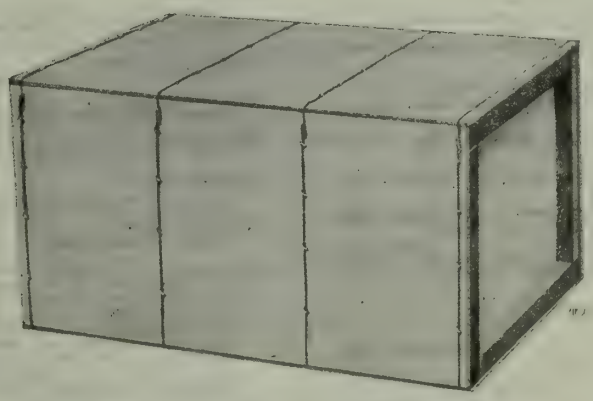
Let us quote on your requirements in Packing Cases

WE ARE MANUFACTURERS OF THE

4-One Wirebound Boxes

Famous for Economy



VIEW SHOWING BOX IN KNOCK-DOWN

They are **Light**—means a saving in freight.

They are **Strong**—means goods arriving in good condition, thereby eliminating claims.

They are **Secure**—means contents cannot be pilfered in transit.

VIEW SHOWING BOX READY FOR SHIPMENT

When requesting samples and prices give the following information consecutively: Size of box (inside measurements) length, width, depth, weight of contents.

The Financial Post on Capital and Labor To-Day

"THE mission of representatives of organized labor and the manufacturing interests to the Government with a joint bill of recommendations is one of the most encouraging events which Canadian industry has seen. The idea of co-operation indicated is of greater importance than anything which the Government may be able to do in response to the petitions presented. More than ever during the period of readjustment, the interests of capital and labor will lie in the same direction.

"Largely because labor numerically has been more widely represented in the war than capital, the workers will demand more than in the past. In this demand there may be more of justice than economic common sense, but it must be given the consideration it deserves. It is only to be hoped that labor will be represented in any controversies which may arise with industry by men who will appreciate that the workers share in the manufacturers' success and that in making demands too great they may easily kill the fabled goose."

Besides the important article from which the above is quoted,

THE POST

THIS WEEK CONTAINS:

Ontario Government Would Shift Responsibility to Trust and Loan Companies.

Beck Didn't Make the Hydro; The Hydro Made Beck.

Outlook for Bond Business in West Satisfactory.

Regina Revenue Running Short of Estimate.

Efficiency in Organizing the Branch Staff.

DU PONT POWDERS

The Choice of Experienced Sportsmen

Sportsmen are an exacting class of men. They know the value of reliable ammunition. Experienced sportsmen shoot DuPont loaded shells, and have done so year after year for generations.

Leading cartridge-makers load with DuPont Black and Smokeless Powders. You can secure all the popular makes and sizes, loaded with DuPont powder by simply specifying on your order.

For high velocity, low recoil, accuracy and dependable work under all conditions, DuPont Powders have the highest reputation —built and sustained for more than a century.

Carry DuPont loaded shells in stock. Your sporting customers cannot ask for better shells.

Becoming a Bigger Man

WHAT is the difference between some men you know and others known to you? Why are some men earning $3,000 a year and some $30,000? You can't put it down to heredity or better early opportunities, or even better education. What, then, is the explanation of the stagnation of some men and the elevation and progress of others?

We are reminded of a story. A railroad man, born in Canada, was revisiting his home town on the St. Lawrence River. He wandered up to a group of old-timers who sat in the sun basking in blissful idleness. "Charlie," said one of the old men, "they tell me you are getting $20,000 a year," "Something like that," said Charlie. "Well, all I've got to say, Charlie, is that you're not worth it."

A salary of $20,000 a year to these do-nothing men was incredible. Not one of the group had ever made as much as $2,000 a year, and each man in the company felt that he was a mighty good man.

Charlie had left the old home town when he was a lad. He had got into the mill of bigger things. He developed to be a good man, a better man, the best man for certain work. His specialized education, joined to his own energy and labor sent him up, up, up. To put it in another way: Charlie had always more to sell, and the world wanted his merchandise—brain, skill and ability. Having more to sell all the time, he got more pay all the time.

Charlie could have stayed in the old home town; could have stagnated like others; could have been content with common wages. In short, Charlie could have stayed with the common crowd at the foot of the ladder. But Charlie improved himself and pushed himself, and this type of man the Goddess of Fortune likes to take by the hand and lead onward and upward. Almost any man can climb higher if he really wants to try. None but himself will hold him back. As a matter of fact, the world applauds and helps those who try to climb the ladder that reaches towards the stars.

The bank manager in an obscure branch in a village can get out of that bank surely and swiftly, if he makes it clear to his superiors that he is ready for larger service and a larger sphere. The humble retailer can burst the walls of his small store, just as Timothy Eaton did, if he gets the right idea and follows it. It is not a matter of brain or education so much as of purpose joined to energy and labor. The salesman or manager or bookkeeper or secretary can lift himself to a higher plane of service and rewards if he prepares himself diligently for larger work and pay. The small manufacturer, the company director, the broker—all can become enlarged in the nature of their enterprise and in the amount of their income—by resolutely setting themselves about the task of growing to be bigger-minded men.

Specialized information is the great idea. This is what the world pays handsomely for. And to acquire specialized information is really a simple matter, calling for the purposeful and faithful use of time. This chiefly.

One does not have to stop his ordinary work, or go to a university, or to any school. One can acquire the specialized information in the margin of time which is his own—in the after-hours of business. Which means: If a man will read the right kind of books or publications, and make himself a serious student at home, in his hours—the evening hours or the early morning hours—he can climb to heights of position and pay that will dazzle the inert comrades of his youth or day's work.

IF business—BUSINESS—is your chosen field of work, we counsel you to read each week THE FINANCIAL POST. It will stimulate you mentally. It will challenge you to further studious effort. It will give you glimpses into the world of endeavor occupied by the captains of industry and finance. With the guidance of the POST, and with its wealth of specialized information, you, a purposeful man, aiming to go higher in life and pay, will find yourself becoming enlarged in knowledge and ambition, and will be acquiring the bases and facts of knowledge which become the rungs of the ladder you climb by.

It is the first step which costs. But this cost is trivial—a single dollar. We offer you the POST for four months for a dollar. Surely it is worth a dollar to discover how right we are in our argument. If yoou have the will to go higher in position and pay, sign the coupon below.

THE MACLEAN PUBLISHING COMPANY, LIMITED,

The Business Papers Got The Volunteers

EDWARD N. HURLEY, the clear-headed, resourceful Chairman of the United States Shipping Board —the man who induced Chas. Schwab to take the general management — puts a big rating on the national importance of the business paper. In the recent campaign for shipyard volunteers the business papers aided greatly in getting the required number of men.

Mr. Hurley, writing the Secretary of the Associated Business Papers, which includes a large number of the most progressive in North America, says:

"I WANT to tell you and those connected with the division of advertising that the services rendered the United States Shipping Board and the Emergency Fleet Corporation by the Business Papers in our recent campaign for shipyard volunteers, deserves our highest commendation.

"The editorials which these papers published and the advertisements bearing coupons and postcards to be filled in by those desiring to enrol in the shipyard volunteers, materially helped us in securing our full quota of volunteers.

"I recognize the great force of the Technical and Trade Press of the country, and particularly in these critical times, both with relation to business as well as to the war.

"Please accept this as a testimonial of my appreciation of your very valuable services and the assistance given us by the Associated Business Papers."

It is only since the beginning of the war that many have come to recognize the value and power of the Business Paper. Manufacturers who have subscribed for and used the Business Press in their own campaigns have long known its power in developing not only the business of its readers but the resources of the country. The Business Paper to-day stands high in the estimation of those executive heads connected with war endeavors, because they realize it is a mighty force in stabilizing business and in giving technical knowledge which cannot be secured in any other way.

"Delta" Files

—we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

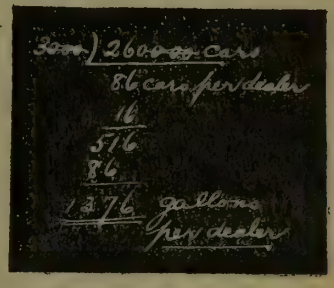
CUTLERS' COMPANY

SHEFFIELD ADVISORY COMMITTEE

A few years ago, the Sheffield Cutlers' Company, being aware of the great damage done to the City and Trade of Sheffield by the improper use by unscrupulous Manufacturers and Merchants in all parts of the World of the name *"Sheffield"* upon goods not manufactured there, established a Fund, with the assistance of the City generally, amounting to about £10,000, to enable action to be taken to suppress such frauds.

The Sheffield Advisory Committee, which administers this Fund, has already taken action through the Courts, and in other ways in various parts of the World, against Manufacturers and Merchants who have unscrupulously taken advantage of the reputation of Sheffield by using the name of Sheffield upon their goods.



The Cutlers' Company desire to bring the existence of this Fund before the notice of Manufacturers and Merchants all over the World, and to say that they will commence proceedings, without hesitation, against anyone who illegally uses the name of Sheffield upon goods which are not manufactured in that City, upon proof being furnished to them of the perpetration of such fraud.

The Cutlers' Company will be grateful if anyone in doubt as to the honest origin of goods supposed to be of Sheffield manufacture, will at once communicate any information in their possession to the Law Clerk at the Cutlers' Hall, Sheffield, England, so that the matter can be fully investigated.

(By Order)
R. T. WILSON, Law Clerk

GET YOUR FULL SHARE OF BUSINESS

DID you ever figure out your share of the sales of lubricating oils and greases? Study these facts; they are from reliable sources.

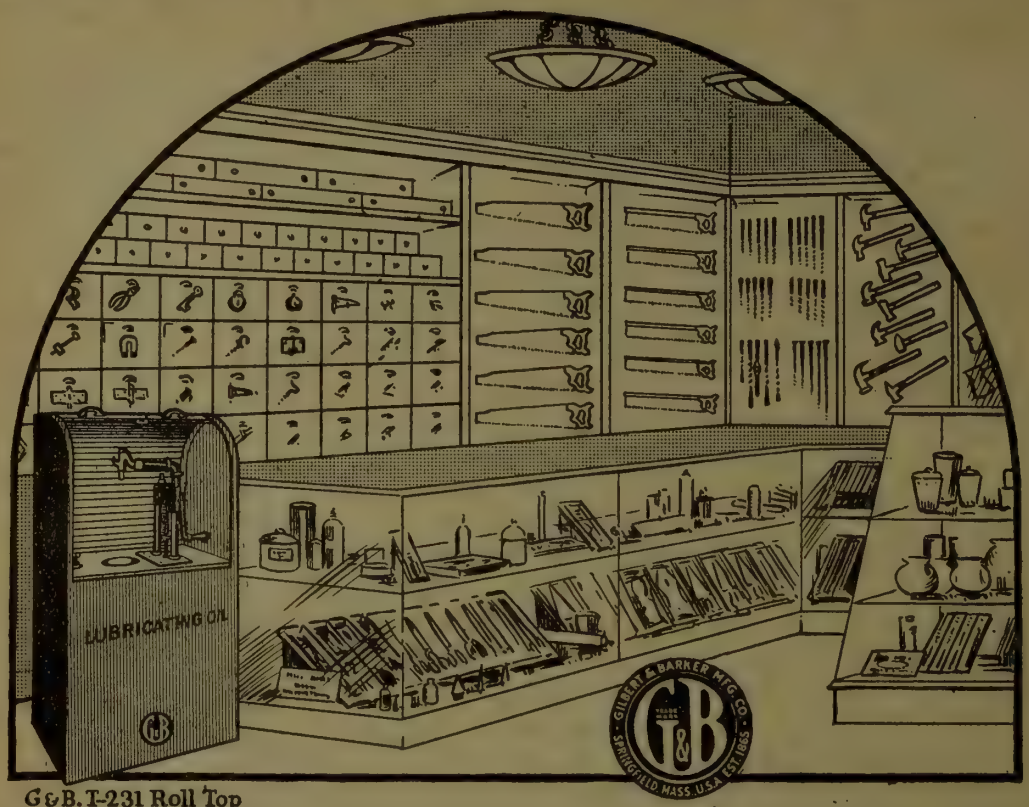
There are more than 260,000 automobiles and motor trucks in Canada to-day, and they need upwards of 4,160,000 gallons of lubricants per year. This big market is open to you. There are approximately 3,000 hardware dealers. You should supply 86 cars and trucks, consuming over 1,375 gallons per year at least. Are you getting your share?

Then what about the tractor trade? There are more than 15,000 tractors being used in Canada. Every tractor needs annually at least 1½ barrels (63 gallons) of lubricating oils and greases. How much of this highly-profitable trade do you get?

Polarine
FRICTION REDUCING MOTOR OIL

Most car, truck and tractor owners use Polarine. Many insist on it because of its high, uniform quality. It gives every satisfaction in winter and summer alike. The markedly rapid increase in its sales is a sure sign of popularity.

Handle Polarine right and you are certain of big profits and quick returns. Seize the present opportunity to prepare for next year's business. The minimum profit is 33 1/3%; quantity orders being extra discounts. Stock the full line. Give every customer the right grade and he will return for more and for other goods, too.



Polarine is widely advertised. Regular advertising campaigns are run in all the most popular newspapers and magazines of Canada. Watch this advertising and plan your own publicity in line with it.

Polarine comes in two grades, Polarine and Polarine Heavy. There are also Polarine Oils and Greases for effective transmission lubrication. Put up in attractive, lithographed, sealed cans — half-gallon, gallon and four-gallon. Larger quantities in 12½-gallon steel kegs, half-barrels and barrels.

Write for Polarine Booklet on Automobile Lubrication. Address us at 56 Church Street, Toronto, and get our dealer proposition.

Why You Should Be A Michelin Dealer

No. 35

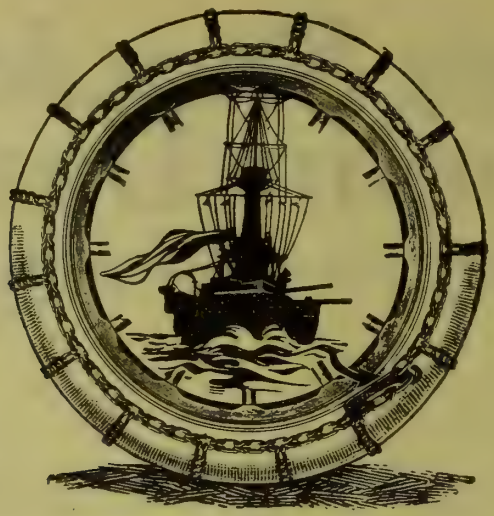
You Can Build A Business Which You Can Leave When Necessary

Many a tire dealer is so tied down to his work that he never has a chance to leave his business and enjoy the vacations his friends manage to make life yield them ; nor can he honestly look forward to some day transferring the burdens of his business to other shoulders and taking things easy.

Things of this sort are not ordinarily discussed in considering the merits of a dealer-proposition, but they are oftentimes as vital as matters of dollars and cents.

Now, in order to leave a business to itself without loss, you must have it running smoothly—and unless the tire he handles is right, the tire dealer can never have a smooth running business.

Here is another advantage, Mr. Dealer, in taking up Michelin's Proposition.



The quality of Michelin Tires, the liberal treatment and the prompt personal attention accorded every dealer by Michelin Headquarters, make for a business that runs smoothly and profitably—without the necessity of forever pacifying customers or straightening out some tangle.

For an all-around better proposition write today to

Michelin Tire Co.

DUNLOP TIRES

SEAL OF QUALITY

AUTOMOBILE

"Traction"—The Tire Beautiful—

WE hear so much about the "lines" of an automobile that we are apt to forget the "lines of a tire."

* * *

Surely if beauty is an essential in automobile construction it is likewise an essential in tire construction.

* * *

Examine "Traction" for beauty—no unnecessary lines, no distorted "treadlets," no ugly, unsymmetrical gouges—just one powerful, resilient, beautiful balance. And all this is extra — extra over and above the greatest road mastery ever obtained in a rubber tire.

* * *

We also make Dunlop "Special" and Dunlop "Plain" — two tires that are in great favor with motorist in general.

* * *

DUNLOP SEAMLESS TUBES and DUNLOP ACCESSORIES likewise make lasting friends wherever used.

The choice of 51 leading engineers

When you recommend Thermoid Brake Lining to your customers your recommendation is baked by the endorsement of 51 of the leading automobile engineers of the country. They have selected Thermoid for their cars only after the most exacting tests.

Where Thermoid is used

Notice the varied types of cars in which Thermoid is used. High-priced heavy cars where service—not cost—is the prime consideration. Lower-priced popular cars whose makers are willing to pay a little extra for brake lining that gives the maximum safety. It is also used on the leading axles. The engineers designing these axles are particularly well qualified to weigh the merits of brake lining.

Why Thermoid was selected

There are three reasons why Thermoid has been selected by this critical body of competent judges:

1.—Over 40% more material and 60% more labor are used in Thermoid than in any woven brake lining. This gives longer wear.

2.—Thermoid Brake Lining is Grapnalized, an exclusive process which resists moisture, oil and gasoline.

3.—Thermoid is hydraulic compressed. It wears down slowly and can be used until it is cardboard thin.

Thermoid is recommended by these engineers for use on new cars because it gives dependable service and helps to build good will for their products. It should be recommended by you for relining jobs because it will help to build good will for you. Write to-day for information.

Every foot of Thermoid is protected by ***Our Guarantee: Thermoid will make good—or WE WILL.***

"That's It, I Want the OutlooK"

Outlook Regular—Attaches to windshield frame.

Outlook Special—Attaches through the glass.

TWO TYPES

$2.15

"We're going to have bad weather, and I'm not taking any chances on running into somebody. I want a clear windshield whether it rains, snows or is just misty. I want this *OutlooK* because it's got the goods in it."

That's the way automobile owners believe in the *OutlooK* Windshield Cleaner. And why shouldn't they, with its incomparable length of life, ease of operation and convenience? The *OutlooK* actually sells itself—it's that good. Severe weather is at hand, so right now is the time to stock up to meet *OutlooK* demand.

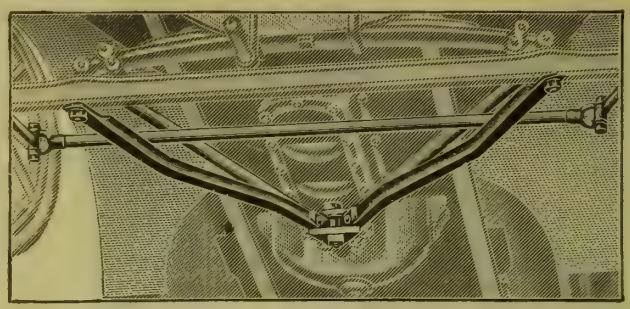
The *OutlooK* Fits Every Make of Car

There's an *OutlooK* Windshield Cleaner for every make of car. One style—*OutlooK* Regular—attaches to the windshield frame in two minutes. The other style—*OutlooK* Special—attaches through the glass. It's made expressly for closed cars and fits open cars as well.

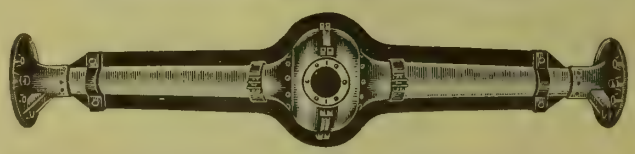
Here's Why the *OutlooK* Sells Itself

The *OutlooK* Windshield Cleaner is absolutely guaranteed. It has (1st) a spring steel tension bar assuring uniform rigidity; (2nd) an adjustable exclusive rubber roller which insures ease of operation; (3rd) an adjustable wiper made of high-grade rubber so firmly held that a clean sweep of the glass is always made; (4th) a close-fitting bracket which won't rattle, and (5th) *OutlooK* Regular can be attached to the windshield in two minutes. *OutlooK* Special requires a slightly longer time.

Stock Up NOW to Meet This Demand



OutlooK Windshield Cleaners are big winter sellers. The demand exists NOW. The *OutlooK* is well known and well advertised. Absolutely guaranteed to give satisfaction to every user. Let your customers try the *OutlooK* for 10 days, and then if they feel they want to get along without it, refund their money. But there won't be any returns—the *OutlooK* always makes good.



If your jobber cannot supply you, write us direct for full details.

OWEN SOUND, ONT.

Salesmen Wanted

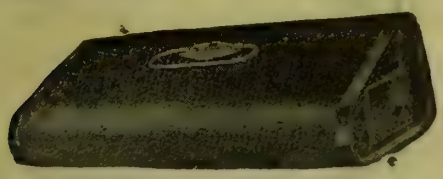
Men who have worked up a connection with the trade are far more valuable to you than inexperienced men. The way to locate them is through your trade paper because wide-awake salesmen read it. When in need of salesmen use the Want Ad Page; the rates are 2 cents per word first insertion and one cent per word for each subsequent insertion, a charge of 5 cents extra is made for Box Number to cover cost of forwarding replies.

Cold Weather Made Profitable

At this season of the year the dealer should have in stock such articles as make suitable Christmas gifts. There is nothing a car owner appreciates more than something useful for the automobile. A few suggestions are:—

Engine Hood Covers

With Fan Front



This is without question the best appearing and most serviceable two-piece outfit on the market. The circular front design is very attractive, and at the same time provides a simple method of ventilation.

Made of waterproof material, extra heavy felt lines, padded and quilted. This cover will retain the heat of the motor while standing, and furnish ample ventilation when in motion. Does not interfere with raising the hood.

No.	Price
9006—Ford, 1917-18-19	$12.50
9007—Chevrolet "490," "490A"-"490B"	12.50
9008 Gray Dort	12.50
9009—Dodge	12.50
9010—For other 4 cylinder cars	15.00
9011—For 6, 8 and 12 cylinder cars	18.00

Always specify make, year and model of car when ordering.

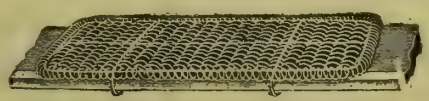
High Grade Foot Warmers

For automobiles, wagons, carriages, sleighs, etc. Gives cold weather comfort for less than one cent per hour. It provides a warm foot rest, and when placed underneath lap robe radiates heat which warms the entire body.

No. 9014 Price $3.50

Fleming Windshield Cleaner

The most practical cleaner ever offered the motoring public. Insures safe driving in rain, fog and snowstorms.



Will not injure the frame or scratch the glass.

Operates on rubber rollers. Fits any windshield.

No. 9031 Price $2.25

The Sanitary Wire Running Board Mat

Adds Class and Distinction to Any Car

Showing Mat Attached to Running Board

No. 9025 ..... $1.75

Price, $5.50 pair.

Utility Junior Heater For Fords

For use in open or closed cars.

No noise, no odor, no escaping gas, no back pressure on motor or loss of power. No operating cost. No cold draughts from outside. Installed in half an hour. Impossible to burn clothes or shoes. Cannot get out of order.

No. 9013—Price $12.50

Champion "Priming" Spark Plugs

Will start any motor on first quarter turn.

Brings gasoline right to the sparking point.

A great winter seller. The ½-inch thread size is especially recommended for Fords.

No. 9200—Price, ½-inch thread $1.50
No. 9201—Price, 7 8-18-in. thread 1.50
No. 9202 Price, Extra Porcelain 0.65

BIG

RESULTS

from small investments. Read Hardware & Metal's Want Ad. Page.

Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

BRING the JUNKERS to JUDGMENT!

"IF William Hohenzollern and the German butchers who engineered the war are not brought to trial and the lesson driven home that the world brooks no license in the name of Kultur, then our Canadian soldiers have died in vain. No peace," declares MACLEAN'S MAGAZINE, "will be satisfactory to Canada that leaves them at large."

Read this powerful article in the December issue of MACLEAN'S, in which it is declared that Canada is a unit in demanding stern measures. "There is no mawkish sympathy here, no tendency to grant dangerous favors to a foul-fighting opponent who has taken the count."

It is asserted that Canadians as a whole want:

1. **No softening of armistice terms.**
2. **Canadian representation at the Peace Conference.**
3. **Banishment of all Hohenzollerns from Germany that the seeds of autocracy may be uprooted.**
4. **The punishment of the criminals who started the war and conducted it so ruthlessly.**
5. **The payment of an indemnity to Canada to cover our war bill.**

It is an unsparing, outspoken expression of Canadian opinion—an article that deals hammer-blows at the tendency abroad to shield Germany.

Write for latest price list

St. Marys Wood Specialty Co. Ltd.
ST. MARYS, ONT.

2 cents

per word for the first insertion is the rate charged for an advertisement on this page. Each figure is counted as a word, and a charge of 5c extra is made when a box number is required.

When more than one insertion is ordered the cost is one cent per word for each subsequent insertion, providing the copy is not changed.

Write your message legibly and state the number of times you wish it to appear.

HARDWARE AND METAL "Wanted" ads get results.

Say You Saw It In Hardware and Metal

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

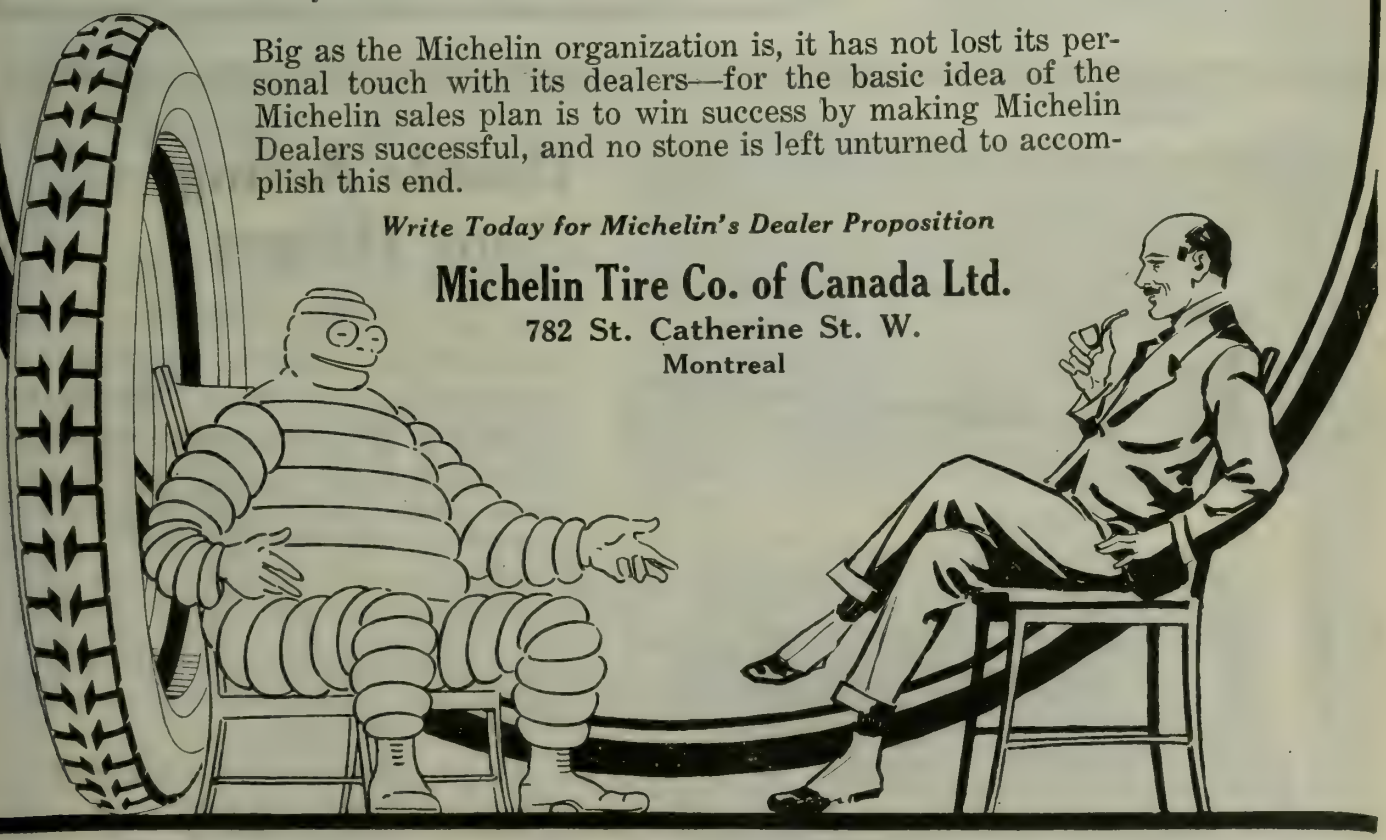
Why You Should Be A Michelin Dealer

No. 36

Co-operation in Solving Your Individual Problems

One important factor in the success of many Michelin Dealers has been the co-operation they have received from Michelin in solving their individual problems.



Chances are, Mr. Dealer, that you, too, have problems of your own—problems that are peculiar to your local conditions, and hence cannot be solved by machine-made, standardized advice.

Problems of this sort require individual study and personal attention. You get these from tire-selling experts if you are a Michelin Dealer.

Big as the Michelin organization is, it has not lost its personal touch with its dealers—for the basic idea of the Michelin sales plan is to win success by making Michelin Dealers successful, and no stone is left unturned to accomplish this end.

Write Today for Michelin's Dealer Proposition

Michelin Tire Co. of Canada Ltd.

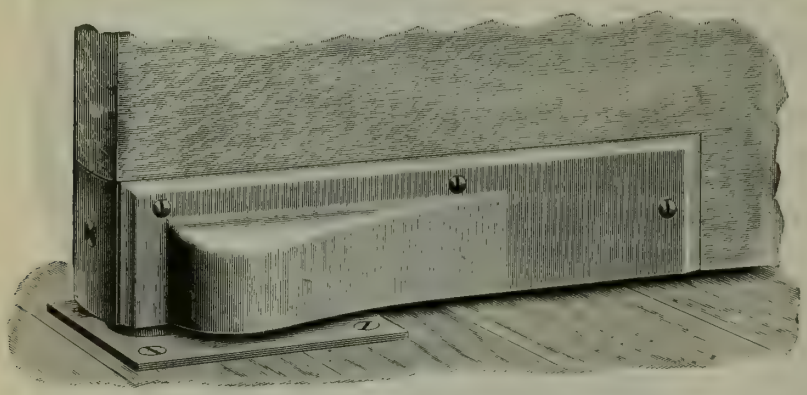
Montreal

MICHELIN

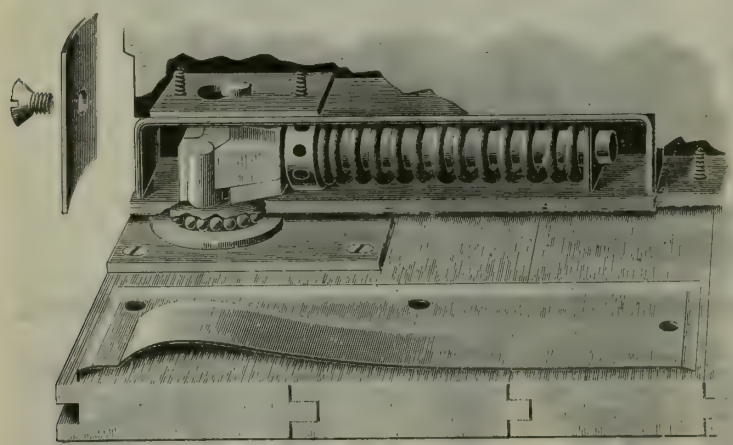
Time to Order
FREEZERS

All of the three, LIGHTNING, GEM or BLIZZARD, have served the housewives of America for thirty years, and, like the cream they create, are in demand in all seasons.

They are built of the very best material and workmanship possible —their ingenious construction makes them easy to operate, quick freezing, and economical to both dealer and user.



The Blizzard, being simpler in construction and cheaper in price, makes it a good running-mate with either the Lightning or Gem. They sell themselves and stay sold! No come-backs or complaints.



This means easy net profits for you.

Your Jobber Can Supply

Carborundum Has Done—and is Doing Its Bit

PRACTICALLY the entire output of Carborundum has been pledged to Uncle Sam and his allies for war work. Therefore, there will be no Carborundum Scythe Stones for some months to come.

Fortunately, we have a worthy substitute in the Scythe Stone that last year met with wonderful success, and so we again offer to our trade for immediate delivery for Spring Trade

Carboxite Scythe Stones

Clean, fast cutting stones that will not glaze. That give the scythe just the edge it should have.

They are made by the same process as are Carborundum Scythe Stones, which insures a free-cutting stone that shows long life and such remarkable durability as to reduce breakage to a minimum.

Hundreds of thousands of them gave wonderful service to farmers and gardeners everywhere last year.

They are ready now for immediate delivery.
You will do well to order now—Today

More Heat Units To The Dollar!

Every pound of coal will give off only a certain number of **Heat Units. Coal costs money** to-day, and the **Hot Water Heating System** which captures the biggest percentage of these **Heat Units** and converts them into useful heat of radiation, is in big demand.

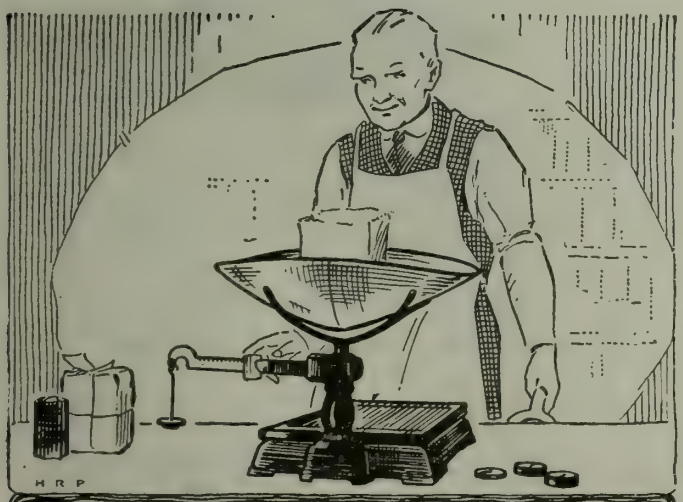
That's exactly the purpose of the

KNICKERBOCKER AUTOMATIC HEAT GENERATOR

It Increases Radiation 25% to 50%.

In a great many cases a **Knickerbocker Automatic Hot Water Heating System** costs no more to install than a regular system.

On the old installation the first cost is soon offset by the saving in fuel, and there is the added comfort incident to a properly working system.



The only Automatic Hot Water Heat Generator which operates on either an open or closed system.

BRING the JUNKERS to JUDGMENT!

"IF William Hohenzollern and the German butchers who engineered the war are not brought to trial and the lesson driven home that the world brooks no license in the name of Kultur, then our Canadian soldiers have died in vain. No peace," declares MACLEAN'S MAGAZINE, "will be satisfactory to Canada that leaves them at large."

Read this powerful article in the December issue of MACLEAN'S, in which it is declared that Canada is a unit in demanding stern measures. "There is no mawkish sympathy here, no tendency to grant dangerous favors to a foul-fighting opponent who has taken the count."

It is asserted that Canadians as a whole want:

1. **No softening of armistice terms.**
2. **Canadian representation at the Peace Conference.**
3. **Banishment of all Hohenzollerns from Germany that the seeds of autocracy may be uprooted.**
4. **The punishment of the criminals who started the war and conducted it so ruthlessly.**
5. **The payment of an indemnity to Canada to cover our war bill.**

It is an unsparing, outspoken expression of Canadian opinion—an article that deals hammer-blows at the tendency abroad to shield Germany.

An All-Star Line Up This Month

There is a steadily increasing demand for ELECTRIC WASHERS!

A multitude of Household duties that were formerly a drudgery have become a pleasure to perform, through the introduction of Electricity into the Home.

Everywhere you hear the slogan—
"Do it Electrically."

Now is the opportune time to start into the Electric Washer business.

Do you realize what an **interesting** and **attention creating** display an **Electric Washer** would make in your window?

Put the tub bench in the window with a couple of tubs, water and clothes. Set it going and watch the crowds gather.

There is nothing attracts a crowd quicker than machinery in operation.

The Housewife sees clothes cleaned as if by magic. It creates a desire with her to be rid of the old-time drudgery. A desire created means sales for you.

Write us for agency and free advertising matter. We have a special plan to start sales in every town with free consumer advertising copy and electros for your local newspaper.

Beatty Bros., Ltd., Fergus, Ont.

ST. JOHN, N.B., MONTREAL, LONDON, WINNIPEG, EDMONTON

Utility is the great selling factor in ELECTRIC WASHERS!

If you are not now selling a line of **Electric Washers** you little realize how easy it is to sell them and the **splendid profits** to be made.

Their usefulness creates a desire with the housewife to own one, and you do the rest.

She appreciates the hours of **drudgery to be saved** with an **Electric Washer.** It enables her to get through a big wash-day and keep up with her other work at the same time. It wrings the clothes without any tiring effort on her part so that wash-day is over before she knows it, and she is not all tired out, either.

An Electric Washer soon pays for itself—**in saving time and work— in saving laundry bills or washer woman's wages and in saving clothes,** which are ruined in laundries by careless handling.

Right now is the time for the dealer to make a start in the **Electric Washer business.** Their upkeep is so little and their usefulness so apparent that they are rapidly becoming as popular as the sewing machine.

May we send you information about our fine agency proposition?

We have plans, advertising copy, electros, etc., all ready for your local advertising, which will bring you sales right away.

Let us hear from you.

Beatty Bros., Ltd., Fergus, Ont.

J. J. TURNER & SONS, LIMITED, Peterborough, Ont., Can.

P✕H

TRADE MARK

ONE of the largest buyers of tools in the Dominion said to us the other day, "After the war we shall sever many business connections we have been obliged to make in order to keep our stock in shape for our customers. The manufacturer who has in these past four years kept up the quality of his product in spite of the temptation to sacrifice quality for quantity output is the only man with whom we shall maintain business relations."

Which is sound "Hoss Sense"

Confidence is the basis of all trade, and a buyer can only place reliance on the product which has stood up under the war strain.

P.H. and Imperial Files have been and will be marketed solely on the basis of service.

The Financial Post on Reconstruction and Government

THAT the Government should lift controlling restrictions and allow industry and business to readjust themselves to whatever conditions arise—exercising intelligent supervision through competent persons, but avoiding paternalism and class legislation, as well as public ownership—was the keynote of the great Reconstruction Conference at Atlantic City, attended by four thousand delegates representing the United States Chamber of Commerce War Service Committees. The views on the problems of the day and of the immediate future of such industrial captains as Charles W. Schwab, of Bethlehem Steel; John D. Rockefeller, Jr.; James A. Farrell, of United States Steel; Alba B. Johnson, of Baldwin Locomotive, were heard, together with many lesser notables in the American field of manufacturing, while in the group meetings there were many opportunities provided for discussion of the practical details of the questions which directly apply to the various industries.

Throughout the congress and the big convention of hardware manufacturers held later there was a note of confidence in the ability of industry to pass successfully through the period of reconstruction with intelligent regulation and co-operation by the Government, reasonable taxation and aid rather than hindrance in consolidation of interests for the reduction of overhead in the production of increased output. These various questions represent to-day the problems of Canadian manufacturers as well as those of the United States. Business and economic conditions in the two countries are very similar.

These are the opening sentences of an important article by a POST staff representative who attended the conference. Besides this leading article

TO THE TRADE -

Dear Sirs -

In the Christmas Holiday Season now approaching, we have great cause for extreme thankfulness, and owe to those who have risked their lives and to those who have made the Supreme Sacrifice, an undying pledge of gratitude.

We, who live in Canada, can have great pride in our young men in the wonderful effort they have made to free the World of the greatest menace of all time. With this in mind we, of all people, should find this Holiday Season one of great joy.

With our past efforts so satisfactorily concluded we can view the future with great hopefulness.

Wishing you a very Happy Christmas and a Prosperous New Year, we remain,

Yours truly,

G. F. Allen.

A New Christmas and a New World

AS THE LIGHT of another Christmas morning is about to stream through our windows; as the Christmas impulse of joy and generosity courses through our veins; as new hope springs in the heart of all mankind—and as we stand on the threshold of a new and better world, we, here at the Victor Plant, send you our traditional Canadian Greeting.

It is our hope that this Christmas may bring you a large measure of happiness, heaped up, pressed down, running over; and that the coming year may bring you not only material prosperity, but much else that is good and desirable.

We appreciate the confidence you have shown in us; for the many courtesies you ahve extended, we thank you; and with every resource at our command, we shall strive to merit a continuance of your co-operation.

As a nation, we are just emerging from the most cruel and destructive war the world has known; with its hideous and satanic clutch, it has collected toll from every corner of the universe; from our own firesides here in Canada—and possibly from yours.

When the hour of fate was upon us, we gathered up our jewels of manhood and went into the conflict, resolved on measureless ruin or complete success. Terrible as this war has been, yet it has displayed the spiritual grandeur of our nation—and the nobility of our race.

The principles we have fought for in this war shall go down honored and cherished to our children. Generations unborn shall enjoy the result of the great price we have paid; and even if we leave them poor in everything else, we will transmit to them the boundless wealth of its blessings.

Yes, we who dwell under the Union Jack have paid a price for the world-liberty we helped to win; and for the great question we helped to settle.

Old monarchies which for centuries have been governed by the primitive conception of "God-Kingship"—and the belief that the "rule of the many" is not a good thing, have disappeared from the face of the earth; and others are tottering to their fall.

The Czar has paid the price of his own errors and the errors of his predecessors. The peoples of Russia are blindly striving to recover from the darkness, the ignorance, the social and political helplessness in which autocracy left them.

Victor Saw Works, Ltd., Hamilton, Canada

Christmas 1918

If interested tear out this page and place with letters to be answered.

A New Christmas and a New World

The King of Austria-Hungary is gone. Austria-Hungary is gone. Wilhelm II., of Germany, is condemned. The Hohenzollern has followed the Romanoff.

In this age of steam, electricity and popular education, quick communication and the transmission of ideas have made the world a better place to live in. It is this enlightenment, this increased understanding that has reversed the old-world established order of things. The many have conquered the one. Autocracy has been crushed by Democracy.

Now that the smoke of battle disappears from our horizon, each of us is greeted by the dawn of a new day, a new future, new opportunities to render a more genuine service to mankind. We feel a bit more keenly than in the past, our obligation to the age and generation in which we live; and are eager to pay our obligations, each according to his talent, in the coin of unselfish service and unstinted justice.

Success in personal affairs is a thing much to be desired; wealth also is good; honor is better, but justice exceeds them all; for where justice reigns, every man and every nation is safe.

Justice is the ligament which holds men and nations together. Wherever its temple stands and so long as it is duly honored, either among nations—or in personal affairs, there is a foundation for general security, general happiness, and the improvement and progress of all men.

To delay justice, is injustice. The offender shall be punished—and the oppressed relieved.

Justice commands us to have mercy upon all men, to consult the interests of the whole human race; to give to every man his due—to injure no sacred, public or foreign rights, and to forbear touching what does not belong to us.

We have been taught that truth is the forerunner of justice, freedom its child; peace its companion. Safety walks in its steps; victory follows in its train; it is the attribute of God.

With this war won, new problems confront us; and the success of our personal future and the future of the world, depends on the wisdom and understanding we display.

There is a margin of safety in realizing that there will always be battles, but that the most serious are not those that are fought with guns and swords. There is something essentially fine in the man who can meet the daily conflict and emerge victoriously, with undaunted spirit. He can be compared with gold, having gone through the refiner's fire, where the dross is cast off—and the good comes out so bright and clear that it reflects the image of the refiner.

So, as we stand on the threshold of this new Christmas and this new world, we should not be unmindful of the great truth that the ultimate security of the universe lies in the direction of enlarged and comprehensive wisdom, which includes knowledge and spiritual development—and every influence and institution which supports them.

Victor Saw Works, Ltd., Hamilton, Canada

The MacLean Business and Class Publications in Canada

TO SELL or buy from Canada such lines as machinery, hardware, food products, dry goods, books and stationery, paper, printing machinery and supplies and general merchandise of almost every description, raw or manufactured, use or consult the MacLean Business and Class Publications, as per list below. For special information, write the publishers. Concerning the quality of the MacLean publications, let this copy of HARDWARE AND METAL which you hold in your hands speak for all. The MacLean list of 14 publications is as follows:—

THE CANADIAN GROCER (Est. 1886)
HARDWARE AND METAL (Est. 1889)
DRY GOODS REVIEW (Est. 1889)
MEN'S WEAR REVIEW (Est. 1898)
CANADIAN MACHINERY (Est. 1905)
THE POWER HOUSE (Est. 1907)
BOOKSELLER AND STATIONER (Est. 1884)
THE SANITARY ENGINEER (Est. 1907)
MARINE ENGINEERING OF CANADA (Est. 1910)
CANADIAN FOUNDRYMAN (Est. 1909)
PRINTER AND PUBLISHER (Est. 1892)
THE FINANCIAL POST (Est. 1907)
MACLEAN'S MAGAZINE (Est. 1896)
THE FARMER'S MAGAZINE (Est. 1910)

This fact may interest you: namely, the MacLean organization is the largest concern of its kind in the British Empire. The output of its mechanical department every working day is the equivalent of a 112-page publication of the size and type of this copy of HARDWARE AND METAL.

Our London Office, 88 Fleet Street, E.C.

Also at: NEW YORK, BOSTON, CHICAGO, MONTREAL, WINNIPEG

For over 20 years the MacLean Publishing Company has maintained a fully staffed London office, and has rendered British and Continental manufacturers, shippers, and traders an invaluable service in many directions.

Specimen copies of the MacLean publications will be cheerfully forwarded to all asking for them. Address us at London or Toronto.

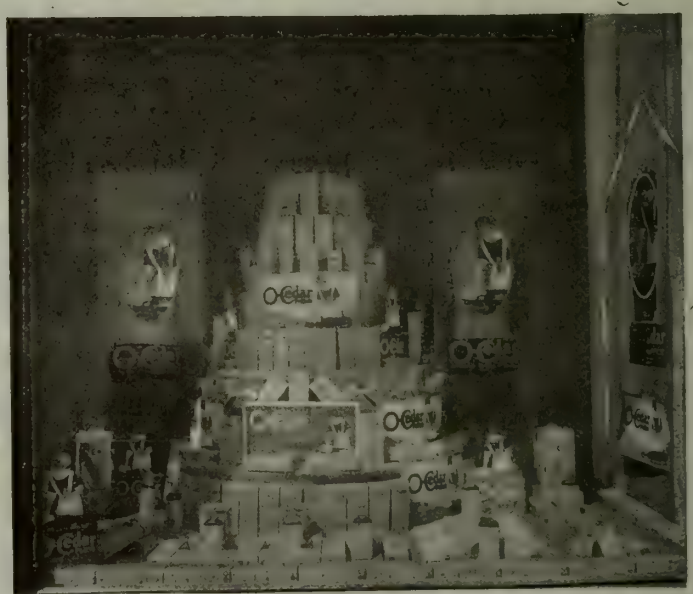
O-CEDAR Is Seasonable



ALL THE TIME

There is never a month in the year when O-Cedar does not deserve a conspicuous location in your store. If you have ever thought about it as a "seasonable" line—only to be pushed in the Spring and Fall—get over that notion right away, and see what a splendid Christmas seller you can make of

O-Cedar Polish Mop

And, if you have been in the habit of considering seasonable specialties as especially profitable, don't forget that few of these so-called "seasonable" lines afford you more profit—or even as much—as O-Cedar. This well-advertised polish and its companion mop, sell steadily the year 'round and give you a handsome net profit **at pre-war prices.**

Order from your Jobber.

Try a Display Like This in Your Store and Watch O-Cedar Move!

HARDWARE AND METAL

Published Every Saturday Since 1888

Vol. 30 TORONTO, DECEMBER, 21, 1918 No. 51

Christmas Greetings

DECEMBER 25 *this year marks the greatest Christmas in more than nineteen hundred years, the second greatest Christmas in the history of the world. The first Christmas was the beginning of a new era in the history of mankind. Christmas,* 1918, *marks the beginning of a new period in the history of the world. Millions of people are rejoicing that the world has been kept free for liberty-loving races, and because right has triumphed over might.*

To the people of the British Empire who have been leaders in the fight to keep the world free, Christmas, 1918, *causes special rejoicing. Because the grim shadows of war have been removed and replaced by the sunshine of glorious victory, the people of the Empire, in spite of the heavy sacrifices they have made bravely and unflinchingly for five years, are looking out on a future that seems particularly bright.*

To no nation in the world is the future brighter than to Canada. Her soldier sons for nearly five years have fought side by side with the best fighters in the world and have won a place of honor with them. While thousands of the boys will not be home in time for Christmas, the knowledge that their work has been completed, and completed as all hoped it would be, is most satisfying.

Christmas this year will be Christmas in a very real sense. People everywhere are happier than for many years and with the war clouds past are looking forward as never before to greater and brighter years.

To all readers, the editors of HARDWARE AND METAL *extend the heartiest wishes for a very Happy Christmas.*

No "Dead" Accounts to Worry Over

Manager of the Fenn Hardware Company Tells How Advertising Cash Basis and Good Service Have Made His Business Steadily Expanding—Daily Press Is Awakening Also to the Situation.

HOW would you like to end the year with the largest volume of business you had ever handled to show for your efforts during the twelve months and only $200 in outstanding accounts? This is the happy position in which E. Fenn, manager of the Fenn Hardware Company of Galt, Ont., finds himself.

Mr. Fenn says there are three main factors which brought about these results. He has tried to make his store stand for service throughout, he is a firm believer in advertising and ever since he came to Galt five years ago he has been doing business on a basis as close to strictly cash as possible. There are a few cases in which he decided it would be all right under the circumstances to grant credit. That accounts for the $200 he has outstanding at present.

Makes It Worth While

Mr. Fenn has found that he always gets results from his advertising. As will be seen from the accompanying illustration he works along definite lines. He makes his ads. timely as the cut of St. Nicholas and the long list of gifts appropriate to the season show. He always believes in stating the prices plainly, and he takes special pains to let the buying public know that it is worth their while to pay cash. As a special inducement during the holiday season he announced a five per cent. discount on all cash sales.

As a result of his policy of consistent advertising and selling for cash Mr. Fenn states that every year since he has been in business his trade has shown an expansion. Because he gets cash he has the money he requires to put right back into his business at the time he needs it.

"The cash plan has worked out well," he stated. "When people know the policy of the store it discourages requests for credit. Other firms are willing to carry long standing accounts if they want to, but I have had very little of that trouble and no serious losses."

Keenly Interested

As pointed out from time to time in HARDWARE AND METAL the question of eliminating unnecessary "credits" is receiving the careful consideration of retailers all over the Dominion. The grocers of Canada are perhaps leading in the move to get on a cash basis, but many hardware firms are in line with the move also.

Here is another announcement which appeared in the December 12 issue of the "Economist' o'f Shelburne, Ont.:—

"As we closed our books on the first of November, and will do a strictly cash business in future, all book accounts are to be paid on or before the first day of January, 1919. After that date they will be given over to the collector and his fee will be added thereto. J. J. Metcalfe."

In the Press, Too

The cash basis question is beginning also to attract the attention of the daily press. The "Canadian Observer" of De-

THE CHRISTMAS WINDOW CONTEST

ENTER your Christmas display window and go after one of the cash prizes offered by HARDWARE AND METAL. *The field is wide open and every hardware man has an absolutely equal chance. Get the photos of your window taken NOW and mail them to* HARDWARE AND METAL. *Remember, there are no restrictions of any kind, the only condition being that the goods shown must be for the Christmas trade.*

ENTER YOUR CHRISTMAS WINDOW NOW

Two contests will be conducted—one for stores in places under 5,000 population; the other for places of 5,000 and over.

Eight Prizes Will Be Offered As Follows:

Places Under 5,000		Places of 5,000 and Over	
First Prize	$10.00	First Prize	$10.00
Second Prize	5.00	Second Prize	5.00
Third Prize	3.00	Third Prize	3.00
Fourth Prize	2.00	Fourth Prize	2.00

Contestants will note that an equal number of prizes are offered to the small town trimmer as to those in the larger towns and cities.

The contest closes Wednesday, January 1. No photos received after that date will be entered unless there is proof that they have been delayed in transit.

All matter should be addressed to "The Editor, HARDWARE AND METAL, *143-153 University Avenue, Toronto," and marked "For Christmas Window Contest."*

This window of cutlery and silverware was arranged particularly with a view of providing prospective customers with suggestions for useful and attractive gifts. Note the seasonable decorative effects, the free use of price tickets, and the moving toboggan slide on the right. This was a striking feature which caused thousands of shoppers to stop.

Four Windows That Sold the Goods

Price Cards Regarded as Essential to Successful Display by Manager of Aikenhead Hardware, Limited—Says "Drives" in Special Lines of Hardware Invariably Produce Results.

"WE aim to make every window answer the universal question, 'How much?' We change them once a week and we find that by making them striking and by making 'drives' in special lines that we always get direct and immediate results."

This in brief sums up the definite policy pursued by the Aikenhead Hardware Limited, of Toronto, in regard to its window displays. The firm's four Christmas windows, arranged specially for the holiday trade, are reproduced in connection with this article, and hardwaremen may find in them many ideas worth following out in their own windows.

Price is Important

"Everybody wants to know the price," said W. J. A. Lytle, manager of the Aikenhead firm to HARDWARE AND METAL. "We find that is one of the most important factors in connection with our window displays and we make a special point of seeing that every article bears a price card. We have had many people come in three weeks or a month after a window display and say that they wanted such and such an article that was in our window at such a time and at such a price. This shows how both the window display and the price are fixed and associated in the minds of the buying public. Again, there are scores of people, prospective customers, who are interested in the prices of articles shown but who do not like to walk into a store and ask for fear that it may be higher than they expected and that they may be forced into taking it. The price card answers their question immediately. It works another way also. Even if the price is high the buyer gets the price fixed in his mind and accepts that price as a standard. This is a big help often to the merchant."

Business Is Good

"Business with us has been splendid and we look for it to continue so. For the past three years we have done a record trade with the munitions factories. Now that business, of course, is at an end, but we expect to replace it with other trade. For instance, we are doing a big business in auto accessories and we plan to develop it even more. Provision has been made for a larger auto accessory department. Again, in the spring there is every indication that there will be a big revival in the building trade and that will mean a big opportunity there. We are prepared to handle the business and are most optimistic regarding the outlook. Our out of town trade is steadily growing and we now have ten travellers on the road and all are doing well."

Definite Policy

The Aikenhead Company's windows shown in this article were arranged by Messrs. P. White, formerly with the Cochrane Hardware Co. at Sudbury, and by J. F. Bingham. In accordance with the definite window display policy which

This window of razors shows a wide selection of attractive gifts for men. The revolving stand in the centre was not only a feature that caused many to stop, but it enabled the firm to show many goods that without the stand they would not have had space for in the window.

"A good window display of tools always increases our sales in that line," says the manager of the Aikenhead Hardware, Limited. This selection was made with the object of helping shoppers who wanted to make really practical gifts make a choice. The returns from it were eminently satisfactory it is stated.

is adopted by the firm the windows are each a "drive" in one special line. In fact in this case there is a drive within a drive, because while the windows display cutlery, razors, auto accessories and tools, the selection of the articles in each was made with a special eye to its appropriateness for a useful and serviceable Christmas gift. Nothing but goods of the finest quality is shown, and while there is a range of prices each window unmistakably conveys to the Christmas shopper the impression that every article in it will give splendid service from a utility standpoint and would make a really useful and attractive gift.

Immediate Results

That the windows produce immediate results was apparent to the representative of HARDWARE AND METAL. While he was there a man walked into the store and asked to see a case of silver that was in the window. It was a handsome and serviceable gift, and although it was price-marked at $125 the man paid for it right there and gave directions as to its delivery. Another man wanted information regarding an electric heater and was "sold" in a few minutes. People were continually coming into the store and asking about other articles in the window.

"We have sold a great number of electric heaters through the fall season and also for Christmas gifts," said Mr. Lytle. "In addition to putting them in the window we connect them and turn on the power and place the heaters in prominent places on the counters and about the store. Customers can feel for themselves the heat they give and they are convinced as to their value. In this way the heaters largely sell themselves."

Distinctive Features

A study of the illustrations will show distinctive features aimed at by the window dressers. For instance, in the display of cutlery and silverware there was arranged in the left hand corner a miniature toboggan slide. All through the day and until late at night passers-by might see small Santa Clauses on tiny toboggans coasting gleefully down. On each side of the slide little colored lights representing roses, fruits and flowers were arranged accentuating and drawing attention to the toboggan. The effect was not only striking, but very beautiful, and that it was effective was shown by the thousands of people who stopped to admire and comment on it. Among these people the great majority of whom were Christmas shoppers, were many purchasers who once having their attention attracted to the window displays stayed to look over the goods and in many cases became purchasers.

"Without exception," said Mr. Lytle to HARDWARE AND METAL, "we find our sales show an immediate increase in whatever lines we feature in our windows. In a hardware stock there are enough lines to make a new and attractive display every week the year round, and we do this. Occasionally if we have what we believe is an exceptionally good window we may leave it in for two weeks. The results are just as satisfactory. Whatever we are featuring in

It is not easy to make a display of auto accessories that are particularly appropriate for Christmas gifts. Note that all the accessories shown above are not only acceptable and useful to the car owner but lend themselves well for window dressing purposes. Price tickets were attached to each article.

Clean and Bright

Every piece of cutlery, every razor, every accessory and every piece in the window of tools was clean, bright and attractive. This goes a long way also in helping their sale. This general policy is carried out throughout the Aikenhead store. The goods are not only well displayed, but they are kept looking their best. The arrangement of the display cases, the arrangement of the goods, the whole atmosphere of the store suggests quality and service. Advantage was taken this week to place all goods suitable for gifts for Christmas at strategic points in the store where customers coming in and going out could not fail to see them. Christmas gifts were featured in every window, and Christmas gifts were given the most conspicuous places in the front of the store. The general arrangement and display were such that one could easily understand why Mr. Lytle said that "business was splendid."

Display of Razors

The window display of razors was one that was particularly attractive. Any prospective buyer who was interested in giving a razor as a present or buying one for himself could in a few minutes look over a number of different varieties. On a revolving stand in the centre of the display were shown the different makes handled by the Aikenhead Company. There were different styles and different sizes and conspicuous everywhere was the price card. The results from this window display of razors as from the other windows were most satisfactory from a sales standpoint.

Accessory Gifts

It is not the easiest thing in the world to select from a big stock of auto accessories a whole window full of gifts that are suitable for Christmas gifts. The selection depends to a large extent upon the utility value and the price. Just how carefully the Aikenhead firm made its selection and combined it so as to make a striking and "sales pulling" Christmas display may be judged from the illustration.

In the auto accessory display window and in the window of tools no attempt was made to draw the attention of the passers-by by such mechanical devices as the toboggan with its moving figures and the razors on the revolving stand. The appeal was made to a different class of buyer altogether and the displays were arranged from this standpoint. Value and utility were emphasized in these windows and the spirit of Christmas was appropriately and conspicuously in evidence by the window decorations.

Montreal Store Captures Toy Trade

Getting the Toys Forward Early Very Important—Selling Substantial Toys Best—Use All Windows For Impressing Showing—Sales of Toys This Year About $1,500—Hardware Store Suited to Sale of This Line

HOW would you like to sell $1,500 worth of toys within a few weeks of Christmas? They are a profitable class of goods and many hardware stores are featuring them more or less extensively. Handling toys is a question that will necessarily have to be decided by each man for himself. But since there are many towns in which the toy assortments in other stores are decidedly poor the hardware man may well consider the possibilities of this line as a money maker.

A. R. A'Bear conducts a hardware store on Fairmont Avenue, Montreal. Ten years ago he started in his present location. At that time, he stated to HARDWARE AND METAL, there was a very meagre settlement in his vicinity. As an interesting coincidence he stated that he had, after starting his business, eaten his noon lunch in an open field just in front of his store for many a day, and from here watched the front door, while he breathed in the open, during this short spell from customer-serving.

Early Display Important

Mr. A'Bear gets his toys out early. This year he brought them well to the front in November. He has a much larger store than that in which he started, although it is the same building in which the growth has taken place. As the demands of his trade required, more space was secured and the additions made. Several lots have been required to permit of the extensions being made and a two-storey block of impressive dimensions is now owned by Mr. A'Bear.

"I find that if I leave the display of toys until near Christmas I do not sell so many. When my customers see them early they know that these may be had without going down town to the big stores and this year I expect to sell about $1,500 worth by the time the selling season is over. When I did not show them so early I did not sell so many."

Big Displays Made

The importance of this line is impressed upon all who pass. A large residential section of the city is served by the store and many hundreds of people pass the big plate glass windows. These are filled with a great array of toys just now and in fact all the windows —some four or five—are given over exclusively to showing them. When HARDWARE AND METAL called the clerks were busy selling and wrapping up toys. Many people buy early to get a better selection and the goods can then be wrapped up and laid aside for delivery nearer Christmas. The merchant's business is that of selling early and getting his profits and cleaning up on a very profitable line.

Are Shown Freely

Within the store the toys are also freely shown. Practically all the stock is shown, and the sellers consist of sleighs, toy doll carriages, dolls' beds, mechanical toys, chair and table sets, dolls and so forth. One of the important considerations with Mr. A'Bear is that he does not believe in selling trashy goods and stated that he had nothing to retail at less than 25 cents. Many of his customers had told him that they appreciated this, for they knew that they might depend upon the toys which he sold them. He makes a good profit on them, but not an exorbitant one.

An All Year Seller?

While toys are an excellent line for Christmas selling many have made them a more or less regular line. Children are destructive and even the better grades of toys bought for them are worn out ere long. They must be amused, or better still they have to be receiving instruction as they develop. This would be a logical line of argument to use in the advertising. Mr. A'Bear uses the community paper to tell his customers what he has and in this way the message reaches just the people who are likely to be interested. The two mediums are necessary and pull together—the windows and the newspaper announcements. Will you handle this line another year? Plans ought to be made early. There is a big trade to be had in most communities by someone.

STANDARD PRICES FOR GASOLINE ARE SOUGHT

A STANDARD price for gasoline all over Canada is aimed at by the Retail Automobile, Garage and Accessory Dealers' Association. Acting through the Retail Merchants' Association, they are taking the matter up with the producing companies. At a meeting held in Toronto on Tuesday evening of this week, it was reported that the firms that had been interviewed so far by the committee had reported favorably upon the proposal. The Ontario dealers are behind the move and it is stated that the Western dealers are lending active co-operation and that dealers in all the Provinces want the standard price adopted. If the standard price becomes effective it would, it is stated, apply to all those handling gasoline. Of the gasoline sales in Canada, ninety per cent., it is stated, are made through retailers and the remaining ten per cent. through the companies' service stations. "It is a pretty big proposition to consider, as there are many angles to it," said the representative of one of the large oil companies to HARDWARE AND METAL. "I am not prepared to give an answer offhand as to whether it would be advisable or not. The automobile manufacturers want the cost of gasoline kept down as low as possible. The retailers want to make as much as they can out of it. There is the question of long hauls to the far western points and there are other matters."

Current Events in Photograph

PREMIER TROOPSHIP ARRIVES AT HALIFAX

THE photo shows the giant White Star liner Olympic on her arrival at Halifax last Saturday with nearly 6,000 Canadian soldiers on board. The trip marked the completion of her 19th voyage from British ports to Halifax, and she brought the largest number of returning soldiers that has yet been carried to any Atlantic port. The Olympic, which is the queen of the White Star fleet, was given a rousing welcome. For nearly three years this grey leviathan has come and gone without ever a line about her movements being printed. Week after week, under the skilful command of Captain Hayes, R.N.R., D.S.O., she ran the gauntlet of the German "U" boats with her precious cargoes of fighting men. Of the 70,000 Canadian soldiers she carried from Canada to the Motherland, not one was lost at sea. Note the manner in which the big liner is camouflaged.

EDITORIAL COMMENT

THE sting of a wasp is only one-thirty-second of an inch long. The rest of the mile and a half is imagination.

* * *

SOMEHOW a man's neighbors never realize what a good man he was until they hear the minister tell about it at the funeral.

* * *

IT IS just as important to keep your store windows well dressed as to keep yourself well dressed. Don't forget the Christmas Window Contest. Send your photos so they will reach HARDWARE AND METAL by January 1.

NEW RESPONSIBILITIES

THE establishment by Canada of a Trade Commission to secure for the Dominion a share of European business in connection with reconstruction will bring with it many splendid opportunities, but also new responsibilities.

Who is going to pay the bills? We have a debt over which we would have sighed four or five years ago, and now, in spite of it, we are going to lend them more, for we must. Shall we let Belgium suffer for lack of funds with which to reconstruct Liege? Shall Lille go idle and the looms of Roubaix cease? There are certain things a gentleman can not do and there are certain things a nation can not do. We must see that these people are furnished the credits to pay. They cannot finance themselves unless we do a large part of it for them. Great Britain, with the marvelous resources of her Empire, can probably finance herself and her sister nations that form the Empire, but France and Belgium, Italy, Serbia, and Poland can not, and in some measure we must do our share to help furnish them the means.

So we have got to help feed many and in large measure furnish them materials and machinery and equipment to start life anew. We must in no small degree also furnish them the credits whereby they will be enabled to pay us. May not, then, our own future prosperity depend in no small measure upon our doing our part to restore the earning power of those who will owe us large sums and who have lost heavily in fighting for our cause? Is it not good business sense to help a generous friendly creditor to find his strength again?

ELECTRICITY IN THE HOMES

AN unusual impetus to the sale of electrical labor saving apparatus for women is promised by Miss Christobel Pankhurst, the noted suffragette, in her election platform. She promised the voters that when the women's *regime* prevails in Parliament every house, no matter how small, will be lighted, heated and served by electricity.

The British Parliament, she asserted, will be responsible for the electricity that turns the mangles, cooks the meals and warms the houses. Why, she asked, should women drag coal scuttles about and stand over steaming washtubs, spend hours over old fashioned ranges, which not only eat up coal, but cook the cooks, when by legislation and electricity the burden of the world can be lifted.

This is merely the forerunner of a development that promises immense business for hardwaremen, not only in England but all over the world. In Canada it is predicted by many that the uses of electricity in the homes will double and treble in the next ten years. Already hardwaremen are selling a big share of the electrical devices and they are doing a steadily increasing business. Both the electrical manufacturers and the hardwaremen are going after this business aggressively and as the goods largely sell themselves because their usefulness needs little or no demonstration the business is growing by leaps and bounds.

LIGHTED WINDOWS HELP ALL

WHAT a community owes to its merchants has been brought out in one more way since the window lighting restrictions were put into effect. In the big Ontario cities the appearance of the streets—under the new order of things—has been dismal enough; but in the smaller places things have been even worse. In the large centres, more than in those of lesser size, has it been possible to take the backs out of windows and let the cheerful light of the store interior shine through.

Fortunately the window lighting restriction has been lifted. Ontario merchants will heave sighs of relief as a result. Ontario's citizens generally will now have greater delight in their cities and towns. Perhaps more will realize that the merchant in lighting his windows is not only benefiting himself, but is benefiting all.

Need for Association

ONE of the outstanding lessons of the great war in so far as manufacturers and wholesalers are concerned, is that there are great advantages in organization. For many years past a combination or organization on the part of manufacturers or wholesalers has been looked upon in most cases with suspicion. This has been due largely to the fact that a few individuals have brought the name into disrepute, through the fixing of prices in star chamber sessions and through throttling the trade in various ways. Just at this time there are one or two combinations in Canada, allied to a certain extent with the hardware trade, whose operations might be investigated with resultant good to themselves and to other associations in Canada.

These combinations, and they are few in number, have greatly hampered the operations of other associations which have been really trying to improve conditions and make better business all round for manufacturers, wholesalers and retailers.

At the big Hardware Convention held recently at Atlantic City it was clearly pointed out that the organization for war purposes has taught manufacturers especially, the advantages of organization. These manufacturers now realize that when manufacturers get together the most important or desirable thing, is not to fix prices but to eliminate wasteful methods, to compare systems, to pool orders for raw materials, compare number of unfilled orders, etc. An appeal is to be made to the United States Government to amend or suspend the Sherman Anti-Trust Act to permit the manufacturers to do business along these lines. They can now do it, under the Webb-Pomerene Bill, for export business but not for domestic business. The Government has encouraged pooling of interests for war purposes and it is thought they will now repeal legislation which makes it unlawful for manufacturers to do what the Government has recommended and done.

It is felt by a number of leading manufacturers in Canada that somewhat similar conditions prevail here, and it would prove to the advantage of Canadian industries to work along somewhat similar lines. The great antagonism to organization in Canada has been due largely to the greedy methods of a few associations and there certainly have been some grounds for antagonism in this respect.

There is a great amount of work yet to be done if Canada wishes to hold her place industrially with the other nations, and there are a great many important reforms needed which can only be carried on through association and co-operation. Much of the antagonism and suspicion would be wiped out if associations as a rule gave more publicity to the objects of the association and the good which they are able to accomplish. Secret diplomacy is out-of-date in international politics and for the same reason it will not go with the trade.

One of the big questions before hardware manufacturers to-day is that of the permanent discontinuance or the reinstatement of the various styles, sizes and finishes, etc., which have been eliminated by the War Trade Boards. The hardware manufacturers in convention at Atlantic City went on record that every effort should be made to keep various sizes and finishes, etc., down as close to war basis as possible. Many manufacturers stated that they were sure they would never go back to pre-war basis.

The same plan has been followed out by paint manufacturers who have narrowed down the number of shades with the result that the merchant can carry a good stock of the best selling colors with no greater investment than was necessary under the old plan when the dealer was called upon to stock an exceedingly large number of colors, many of which were very slow sellers. The same applies to a great many other lines of hardware and it would appear that there are a great many ways in which Canadian manufacturers could effect savings, adopt more efficient methods, and become even better fitted to meet the competition of the manufacturers of other countries.

There is now on foot a movement to establish in Canada an association of Canadian makers of a certain form of goods. The project grows out of the fact that in the United States such an association has operated for years with resulting benefits to all. Here, a manufacturer who has a machine he does not require lets the other members of the association know. He turns the machine into money, and the buyer gets the plant which under existing conditions he could, perhaps, secure in no other way. One merchant has an over stock of certain materials, and another is short. They get together and the work of production is made more easy with consequent benefits to all.

Associations working in this way can accomplish a great deal of good, and it is to be hoped that the co-operative association idea is more generally adopted throughout Canada and that the associations give more publicity to their operations and thus eliminate all cause for suspicion and antagonism on the part of dealers and the public.

EVENTS IN THE TRADE

Business Changes

Port Stanley, Ont.—W. Mitchell has sold his hardware business to R. H. Milne, formerly of Union, Ont.

Obituary

The death occurred at Halifax of Roderick MacDonald, secretary and manager of MacDonald & Co.

The death occurred at his home in Regina after a short illness with pneumonia of Wm. Ardell, traveller of the Winnipeg Oil Co. He was 37 years old.

The death occurred at Brandon, Manitoba, of E. L. Garnett, manager of the Kelly Hardware Co., Limited. He was formerly with the Brandon Hardware Company.

Following a week's illness with pneumonia the death occurred at his home in Toronto of George R. Worthington, proprietor of the Ontario Rubber Company. He was 55 years old and came to Toronto 35 years ago from Kilbride, Ont.

Richard Y. Ellis, aged 78, whose death occurred in Toronto, was for a time after coming to Canada from Cheshire, England, in partnership at Ingersoll, Ont., in a hardware business with his brother A. H. Ellis. Returning to Toronto in 1880, he entered the firm of P. W. Ellis & Co., manufacturing jewelers. He had held the offices of director in the P. W. Ellis Co., vice-president of the Westmount Silver Mining Co., director of the Northern Crown Bank, director British American Watch Co., and proprietor Hungerford Marble Properties, Hastings.

Fire Losses

The wire nail and wire manufacturing plant of the Morrison Steel & Wire Company, Vancouver, B.C., was completely destroyed by fire. The loss of $150,000 is fully covered by insurance.

In a blaze at Dunnville which destroyed several business places F. G. Smith, toy manufacturer, sustained a loss.

Personals

R. S. Glass, formerly with John Lewis, Belleville, Ont., has joined the staff of Aikenhead Hardware Limited, Toronto.

W. J. McMartin, president and general manager of the Winnipeg Ceiling & Roofing Co., is in the east on business.

W. S. Fallis, managing director of the Sherwin-Williams Company of Canada, Limited, is in Winnipeg attending a convention of the salesmen from the four Western provinces.

F. W. Bartlett, formerly with McLennan & Co., of Lindsay, Ont., has joined the staff of the Aikenhead Hardware Limited, Toronto.

Marshall W. Hill, formerly with MacNabb Bros., Orillia, Ont., and recently a munitions worker, is now with the Aikenhead Hardware Limited, Toronto.

J. A. ROLLEFSON

Hardware merchant who was elected Mayor of Swift Current, Sask., by the largest majority in the history of the town.

J. H. Conover, Toronto, manager of the Martin Senour Company, Limited, received word Wednesday that his son, Flight-Lieut. C. C. Conover, R.A.F., who was taken prisoner on September 24, has been repatriated.

Trade Notes

The Dauntless Manufacturing Co., of Redcliffe, Alberta, has commenced operations on a new steel mill and foundry to cost $100,000.

Reports that the Gananoque Spring & Axle Co. were considering removal from Gananoque, Ont., are denied by President W. T. Sampson.

W. P. Brown, manager of the Red Foundry, St. Thomas, Ont., has resigned and will go to Sudbury as manager of the Sudbury Machine Co., Limited.

The Fraser Hardware Co., Galt, Ont., is installing a cash carrier system.

National Tool & Machine Co., Wm. C. Nichol and John Dixon, has been registered in Montreal.

The Artistic Novelty Co., manufacturers of dolls, Edmond Bregent, proprietor, has been registered in Montreal.

The Cushman Motor Works, Limited, of Winnipeg, has opened an Ontario branch in Toronto. Percy Hand is in charge.

The National Association of Auto Accessory Jobbers held its winter meeting at Chicago on Monday, Tuesday and Wednesday of this week.

W. E. McCormick, of Akron, Ohio, is at Brampton, Ont., superintending the work of installing machinery in the new plant of the Hercules Rubber Co.

J. H. Ashdown, of Winnipeg, chairman of the Board of Directors of Wesley College, will subscribe $100,000 towards an endowment fund of $400,000 that is being raised.

The Dominion Forge and Stamping Company of Sandwich, Ont., has purchased eleven acres on which extensions will be made to their plant for handling drop forgings. The firm is making large quantities of forgings for tractors.

Robt. McCullough has taken over the brass foundry at Oshawa, Ont., formerly conducted in partnership with A. F. McCullough, his brother. Frank McCullough is going into the manufacture of auto accessories and is building a shop right beside the brass foundry, 40 x 40 ft., two storeys high.

Montreal News

George Henderson, president of Brandram-Henderson, Ltd., is in Halifax this week.

George Payne, representing A. J. Reach & Co., Philadelphia, was in Montreal early this week.

The Canada Cycle and Motor Co., Ltd., Montreal branch, have leased new quarters at 68 McGill street.

John Richardson of Richardson and Bureau, manufacturers' representatives, is in Quebec this week.

Edward Goodwill, manager of the Thos. Davidson Mfg. Co., Ltd., Montreal, is in Toronto this week.

Tenders have been asked for stock and assets of Hardware, Limited. This company was ordered into liquidation by the Federal Government some weeks ago and the same placed under direction of the alien property custodian.

The many friends of H. T. Diplock of the Steel Company of Canada, Ltd., Montreal, will sympathize with him in

the loss of his mother, who died this week.

Lieut.-Col. Hon. C. C. Ballantyne was a Montreal visitor this week, and attended the annual meeting of the Sherwin-Williams Co. of Canada, Ltd. He was re-elected as vice-president of the company.

Walter H. Cottingham, president of the Sherwin-Williams Company of Canada, Ltd., was in Montreal this week attending the annual meeting of the firm. Mr. Cottingham returned home via New York on Tuesday night.

St. John Notes

R. B. Emerson, of Emerson & Fisher, Ltd., wholesale and retail hardware and proprietors of the Enterprise Foundry, is the new president of the St. John Board of Trade. Senator Thorne, president of W. H. Thorne & Co., Ltd., is a member of the council.

The name of the Canadian Gear Works, Ltd., has been changed to the Miramichi Manufacturing Co., Ltd., and the authorized stock has been increased from $48 000 to $92,000.

At the anual meeting of the Maritime Commercial Travellers' Association Charles W. Smith was elected president, R. S. Sime, vice-president for New Brunswick, and F. A. Graham, vice-president for Nova Scotia.

Incorporations

Motor Industries, Limited. head office Oakville, Ont., capital $75,000, has ben granted a provincial character. The firm plans to manufacture and sell spare wheels for automobiles and to act as general agents for accessories.

The Petrolea Oil and Refining Company. Limited, capital $40,000, head office Petrolea, Ont., plans to manufacture, refine and deal in crude petroleum and its products.

Dillon Crucible Alloys, Limited, capitalized at $320,000, is granted a provincial charter.

Montreal Association Elects New Officers

At the annual meeting of the Montreal Metal and Hardware Association A. Prudhomme was elected president for the ensuing year, E. Goodwill vice-president, and W. J. Hayes treasurer. The board of directors is composed of George Childs. R. H. McMaster, W. S. Leslie and T. W. Pike.

Alexander Gibb, who has held the office of president for some time, was unanimously nominated as the representative of the association to the council of the Montreal Board of Trade.

In keeping with the spirit of the association during the years immediately following the war, the old time annual dinner was dispensed with and the alternative plan of assisting the patriotic and charitable work of the day was continued. This year the funds so contributed will provide a good Christmas dinner for the soldier boys.

Stanley E. Elkin, M.P., of St. John, Becomes Bank Director

STANLEY E. ELKIN, M.P., manager of the Maritime Nail Company, St. John, N.B., who as stated in last week's HARDWARE AND METAL has been elected a director of the Union Bank of Canada, is only 39 years old.

STANLEY E. ELKIN, M.P.
Of St. John, N.B., who has been appointed a director of the Union Bank.

Beginning his business career when he left high school in an insurance office, Mr. Elkin soon afterwards became purchasing agent for the Dominion Iron and Steel Company in Sydney. His next move was to Chicago, where he became assistant to the vice-president of the American Glue Company, during this period also acting as representative of a syndicate of New York bankers in Mexico.

In 1905 he established the Maritime Nail Company, Ltd., of which he is managing director.

Among his other activities are the following: President, Motor Car & Equipment Co., Ltd., St. John; vice-president, Wilson Box Co., Ltd., Fairville, N.B.; vice-president, Canada Nail & Wire Co., Ltd., West St. John; director, Nova Scotia Trust Company, Halifax; president, Rodstan & Co., London, England, and partner, St. Martins Shipbuilding Co., St. Martins, N.B.

Although entering the House of Commons only at the last general elections he was selected as one of the members of the commission to Washington to investigate the U.S. war organization and make recommendations to the Canadian Government.

It is the busy man often who finds time to do things, and during the recent Victory Loan campaign Mr. Elkin was the energetic head of the committee for St. John city and county, which rolled up a fifty per cent. surplus over the district allotment.

He was the leading spirit also in the promotion of the "Canadian Avro Company, Limited," which has been incorporated under Dominion letters patent with an authorized capital of $2,500,000. The head office is in St. John, where a plant will be established for the manufacture and assembly of air craft.

Bissell Co. Elects Officers

At the meeting of the directors of the Bissell Carpet Sweeper Co., Grand Rapids, Mich., and Bridgeburg, Ont., Fred M. Deane, vice-president and treasurer, was made president and treasurer, Mrs. M. R. Bissell becoming chairman of the Board.

The following officers were re-elected: Messrs. M. R. Bissell, Jr., and T. C. Williams, vice-presidents; R. E. Shanahan, secretary and general manager.

A happy coincidence of the election is that it marked the 34th anniversary of Mr. Deane's connection with the Bissell Company.

Galt Firms Favor Early Closing Idea

The Galt, Ont., correspondent of HARDWARE AND METAL sends the following in connection with the suggestion of Mr. Bernier, of Montreal, regarding the early closing of hardware stores: "In Galt the stores open at 7 a.m. and close at 6 p.m. every night except Saturday, when the closing hour is about 10.30. During the "flu" epidemic here stores were closed at 6 p.m. Saturday night, and despite the sudden change the merchants noticed no very great decrease in business, and there has been talk ever since by merchants of various lines, of attempting to get an earlier Saturday closing.

J. A. Fraser, of the Fraser Hardware Co., is in favor of the 9 o'clock Saturday night closing and he considers the public only requires a little education to make early closing a success, as was proven during the "flu" epidemic.

E. Fenn, of the Fenn Hardware Co., is also a strong supporter of early closing and considers that an earlier closing hour Saturday night would not only be appreciated by clerks but also by merchants. Unanimity is all that is required to make early closing a success, he says.

NEW CREDIT MANAGER FOR SHERWIN-WILLIAMS CO.

E. K. Allison has just been appointed credit manager of the Sherwin-Williams Co. of Canada. Ltd., at Winnipeg. Mr. Allison assumes his new work at once and succeeds G. M. Whitehead, retired.

Thomas Pink Company, Limited, to Control McFarlane, Neill Mfg. Co.

THE Thomas Pink Company, Limited, of Pembroke, Ont., has purchased a controlling interest in the McFarlane, Neill Manufacturing Company, Limited, of North Devon, New Brunswick. The Thomas Pink Company, which is one of the largest firms of lumbering tool manufacturers in Canada, intends to equip the plant in Devon with the most modern machinery for the manufacture of this line of products and to expand the business.

Alex. J. Thompson, whose interests have been purchased, will remain with the firm until the new year. The new directorate includes E. A. Dunlop, Pembroke, president; M. A. Tweeddale, Fredericton, vice-president and general manager; Mrs. Walter McFarlane, Fredericton; S. L. Morrison, Fredericton; W. L. Hunter, Pembroke; Thomas Pink, Pembroke; J. F. Munro, Pembroke, directors.

The industry is one of the oldest in New Brunswick. It was established some fifty years ago by the late Walter McFarlane, of St. Mary's. In 1900 the estate of the founder placed the business in a stock company under the name of the McFarlane-Neill Manufacturing Company, Limited. Recently Hon. F. P. Thompson, of Fredericton, was president, and M. A. Tweeddale manager.

WESTERN DIVISION SHERWIN-WILLIAMS COMPANY MEETS AT WINNIPEG

THE convention of the western division sales staff of the Sherwin-Williams Co. of Canada, Ltd., was held in the Royal Alexandra Hotel at Winnipeg, and was a splendid success.

Owing to the necessary postponement of the convention because of the serious epidemic which swept over the country some of the salesmen had been compelled to temporarily leave their routes. Notwithstanding this, the results of the past season were very gratifying in point of sales.

H. H. Eager, sales manager of the western district, presided over the various sessions and was ably assisted by A. W. Mowl. Problems arising in the western field were fully discussed and a very promising spirit prevailed, with the outlook for the coming season an excellent one. There was no feeling of depression, and those present voiced their confidence in the general conditions obtaining and in the forward outlook.

The managing director for Canada, W. S. Fallis, brought greetings from the eastern division, and addressed the gathering of salesmen. Mr. Fallis stated to HARDWARE AND METAL that they expected new records to be attained in the coming season.

One of the most interesting features of the convention was that of the annual distribution of prizes and "top-notcher" awards. The premier position was attained this year by J. J. Whalen, of Vancouver, and Mr. Whalen's efforts were rewarded with special recognition to the extent of $450 in all. He also secured, as a recognition of his good work by the company, a very fine gold pin. This was of special design, the base of the pin being in the form of a painter's palette. The old trade-mark of the company, the chameleon, was also worked into the design, and the pin was suitably engraved.

The convention was brought to a close with a dinner, and the sales force returned to their territory with renewed energies for the year ahead.

WESTERN SALESMEN OF CANADA PAINT COMPANY MET AT WINNIPEG

The influenza epidemic prevented some of the salesmen of the Canada Paint Company attending the convention in Montreal this year and the Western men met in Winnipeg.

W. J. Bland, western sales manager, presided, and reports received indicated that a steady progress had been made during the year. The increase of business was very large, HARDWARE AND METAL is informed, and the new season ahead is expected to prove better still.

Among those from a distance who spoke was W. S. Fallis, the managing director, who formerly resided in Winnipeg.

At the conclusion a dinner was given and the 1918 convention was acclaimed a success.

DEVELOPING PEACE TRADE

In order to re-establish the pre-war business of the Standard Chemical, Iron and Lumber Company, M. L. Davies, the vice-president, has sailed for Europe. Plants were operated by this company in Great Britain, France and Germany for the refining and distribution of Canadian wood alcohol in its various forms. The English refinery will be opened immediately. The French plant at Pont-a-Vendin, about seven miles from Lille will be rebuilt and the operation of the refinery at Worms, Germany, will be discontinued, as it is considered inadvisable to send Canadian raw materials to that country.

Don't Leave Cash in Store Over Week End

Owing to an arrangement merchants of the Border Cities have whereby they place their cash returns for Saturday in the local banks for safekeeping, robbers who entered the department store of C. H. Smith & Company, Windsor, Ont., Monday morning of this week, and blew the safe, were disappointed. Lured by visions of big rewards for their efforts, because of the unusually heavy Christmas trade, they gained entrance to the building through the roof of the Palmer Clark store, adjacent, and through a hole which they knocked through the wall of the Smith store. They removed the safe, a light-weight one, from a conspicuous position on the ground floor to a more convenient place and used electricity for boring. To muffle the sound of the explosion they piled coats and ladies' suits over the safe. Valuable papers and records were destroyed.

PISTOL ORDER CANCELLED

A $3,000,000 order for Colt automatic pistols which Caron Bros. had received from the American Government has been cancelled. Progress was being made for the fulfilment of the order at the former plant of the International Manufacturing Company and it was planned to employ between four and five thousand operatives. Caron Bros. also had orders at the same time for shells at the north-end plant, which, had the other work gone ahead, would have amounted in the aggregate to $10,000,000.

STRIKING WINDOW DISPLAY

A striking window display at St. John, N.B., was shown last week by T. McAvity & Sons, Ltd. It consisted of an excellent reproduction of a large steamer, the body of cardboard and the fittings supplied from stock. The background was formed with flags of the Allies, the whole surmounted by a large sign drawing attention to the firm's stock of supplies for steamers and other vessels. In the foreground was a well arranged display of nautical instruments, supplies and equipment for the construction and operation of vessels. In other windows, with each class grouped separately, were coffee percolators, kitchen utensils outlined in Christmas tree lights, lanterns of all kinds, automobile tires and a wide range of auto accessories.

LEWIS BROS. LTD. CONVENTION

The entire sales staff of Lewis Bros. Limited, Montreal, will be called together in Convention during the week commencing January 6.

Turnbull Elevator Company, Limited, capital $500,000, head office Toronto, has been granted a Dominion charter. The company plans to purchase the goodwill of the Turnbull Elevator Manufacturing Company and engage in the business of iron founders, tin plate makers, and metal workers.

Any Reduction in Paint Prices Will Be Gradual, Says President

PRESIDENT Walter H. Cottingham of the Sherwin-Williams Company of Canada, Ltd., was in Montreal this week attending the annual meeting of the company. To HARDWARE AND METAL Mr. Cottingham stated that a sudden slump in prices was impossible. He looked for a falling off in the matter of buying for a time, but labor would continue high for some time, as well as other manufacturing costs. This would mean that prices would be readjusted to lower levels only on a very gradual scale.

So far as buying was concerned, Mr. Cottingham pointed out that there had been a good deal of restriction during the past four years. People had prospered, had now more money to spend and he looked for a revival of business in ordinary domestic directions. In addition to this the rolling stock of the railway companies would require attention and material for this purpose would be bought. New equipment also, and the fleets of ships that were being constructed would require the application of paints.

The prospects for the business of the company in Australia and South Africa, etc., were promising, Mr. Cottingham stated, and the new plant in Australia was developing well. Altogether the company had sold more gallonage in 1918 than ever before, and the prospects for 1919 were very bright.

In regard to conditions generally, Mr. Cottingham said: "I have little hesitation in saying that as soon as things get settled, and with the aid of the Government toward stabilization, things will go forward again. We are in for a period of good times, both in the United States and Canada."

Reorganization of Consolidated Rubber Co.

AN important step has been taken by the Canadian Consolidated Rubber Co. as a result of the heavy increase in their business, and the numerous branches, with warehouses and stock, that have been established in practically every province of Canada.

As already stated in HARDWARE AND METAL there has been a separate company formed for the Maritime Provinces, and each of six of the other provinces, seven in all, under the term Dominion Rubber System (Quebec), and so on, the complete list being: Dominion Rubber System (Quebec), Ltd., Montreal, $1,500,000; Dominion Rubber System, Limited (Maritime), St. John, $500,000; Dominion Rubber System, Limited (Ontario), Toronto, $1,000,000; Dominion Rubber System, Limited (Manitoba), Winnipeg, $500,000; Dominion Rubber System, Limited (Saskatchewan), Regina, $500,000; Dominion Rubber System, Limited (Alberta), Calgary, $500,000; Dominion Rubber System, Limited (Pacific), Vancouver, $250,000.

Official Statement

The official explanation as given to HARDWARE AND METAL is that this action was taken in order to separate the manufacturing end—with a number of factories in Quebec and Ontario—from the sales and distribution end of the business. The latter branches, therefore, will in future be looked after by separate organizations for the different provinces, each containing some members of the present executive of the Canadian Consolidated Rubber Co., but also being reinforced by several local names. This board in each case will be in charge of the policy for each province. Each company takes over from the parent company the leases, property, book debts, fixtures, stock on hand, etc., at actual valuation, and the Consolidated Rubber Co. receives the greater part of this in the form of stock in the new company.

The selling agencies have become so big that it was decided best for them to become separate corporations, with assets perfectly distinct, it was declared.

RUSSIA NEEDS SCYTHES

Before the war Russia used 6,000,000 scythes annually, of which about half were for Siberia. About 4,500,000 were imported and the remainder manufactured in the country. Of the imported scythes, the Austrian were most in demand, because of their light weight and cheapness. At present there are hardly any scythes to be found in Russia, the native industry being at a standstill and the importation closed. Before the war Russian scythes retailed for one rouble each and Swedish scythes for about two roubles, but recently Swedish scythes have fetched from 15 to 20 roubles in Russia. If Austria should again be in a position to supply scythes shortly, her export capacity for the first year will be wholly taken up by the Ukraine, whose requirements are enormous. But the output of the Austrian scythe works has fallen to less than one-half of the normal, and will probably not suffice for her domestic demand. It is estimated that at present in the six northern Governments of Russia at least 700,000 scythes and in Great Russia 5,000,000 scythes are required. Siberia and the Volga Provinces are not included in this estimate. Some relief is expected from Sweden, where, last spring, a firm at Kristinehamn began the manufacture of scythes of the Austrian type especially for the Russian market. This factory, with an annual capacity of 1,000,000, is now in operation.

HARDWARE LETTER BOX

Gearings, Wringer Parts, Etc.

Bryce Innis, 90 Albert St., Winnipeg.—Would like to know if I can get gearings, parts of wringers and rubber shaftings in Canada.

Manufacturers of clothes wringers in Canada should be in a position to supply any repairs for their lines and by writing to any of the manufacturers listed below they would send you "repair lists" from which you could select parts wanted. Dowswell, Lees & Co., Hamilton; Beatty Bros., Ltd., Fergus, Ont.; J. H. Connor & Son, Ltd. Ottawa; Maxwell's Ltd., St. Mary's Ont.—Ed.

Oil Heaters

Taylor Bros., Carleton Place, Ont.—Kindly advise us the makers of the Puritan Oil Heaters.

These are made by the Cleveland Foundry Co., Cleveland, Ohio.—Ed.

Crown Herald Stoves

Russell Bros., Dundalk, Ont.—Can you tell us who is manufacturer of the Crown Herald stoves and ranges?

The manufacturer of Crown Herald stoves is the Moffat Stove Co., Weston, Ont.—Ed.

CATALOGUES and BOOKLETS

Catalogue No. 6 issued by the Superior Barn Equipment Company of Fergus, Ontario, contains 215 pages of attractively illustrated matter listing the various lines of sanitary steel barn fixtures made by the firm. Among the specialties featured are horse stalls, horse box stalls, horse stable fittings, cow stalls, cow stanchions, maternity pens, calf stanchions, calf pens, bull pens, hog pens, water bowls, manure carriers, feed carriers, feed trucks and milk can conveyors. Copies of the catalogue will be sent to readers of HARDWARE AND METAL who request it. In addition to the information regarding equipment the catalogue contains data of much interest and value to those contemplating the erection of modern stables or improving their present accommodation.

The Jubilee Traveller

The December issue of "The Jubilee Traveller," the monthly price list of the Merrick-Anderson Co., Ltd., Winnipeg, has been mailedw to the trade. This carries quotations of many lines of Christmas cutlery and sporting goods, besides such seasonable lines as sleigh bells, skates, sleighs and winter auto accessories. A new feature has been incorporated in this issue, namely, "News Jottings of Interest," a four-page pamphlet of brief current news gleaned from all sources, which, it is thought, should prove very interesting to the trade.

Urges America to Show Gratitude to Allies Who Saved World

"They Have Paid the Price, With Them Must Rest the Decisions," Says Charles F. Smith—Result of War Means Better Conditions For Average Man

Address of CHARLES F. SMITH, Chairman of Landers, Frary & Clark, New Britain, Conn., Victory Celebration of the South Congregational Church, New Britain, Connecticut

THE great war that for four and one-half years has gripped the world, is ended. In all the Allied lands the people gather at the altars of their faith, as we do here, to renew their trust in God, sorely tried for many of us in these last years, and to celebrate their victory with prayer and thanksgiving. It is very fitting we should do so, for we have much to be proud of and much to be thankful for.

Most of all we should be thankful that our own country did at last break the bonds with which she had been fettered and late, indeed, but not too late, entered into the great war, for by so entering into the great war this nation saved its own soul from death. Who is there now who does not look back with shame on the time from July, 1914, to the spring of 1917?

Impossible Neutrality

We tried to maintain an impossible neutrality, we tried to believe that the war was no concern of ours—we made ourselves rich from the necessities of the Allies, we almost invited war with Great Britain by our determination that our commerce with Germany should not be molested— and all this while the Allies were being driven out of Belgium and Northern France, their countries devastated and ravished, their armies barely able to hold their lines unbroken, and we knew in our hearts that we were playing the most ignoble part that a great free country could be called upon to play.

The cause for which American soldiers gave their lives on the Somme, on the Marne and in the forests of the Argonne was just as much the cause of liberty and democracy and civilization the day the war began as it was when last summer our soldiers went into battle with the war cry, "Remember the Lusitania" on their lips.

Keep Self-Respect

We are to-day a proud and grateful nation, but we know that had we continued to stand aside in this war as we did for two and one-half years that whether the Allies won or lost we should never as a nation be able to hold up our head again or look free men in the face.

So it is we should be supremely thankful that at last we entered the war; that having entered into it we put our whole soul into it, that we performed such feats in the raising and equipment of armies and navies, the building of ships, the contributions of money, as astonished ourselves and our Allies and disheartened all our enemies. We are thankful, too, that these, our soldiers, drawn from a peaceful population unused to any military procedure, so soon and so willingly mastered their duties and so nobly and so effectively acquitted themselves on the battle-fields of France. We are thankful that we arrived in time to play a very honorable and decisive part in the great last campaign. Some say we saved the cause of the Allies—certainly we saved the war from running on for years longer—but, however that may be, we surely did arrive in time to save our own honor as a nation, our own worthy place among the great free peoples of the world—in time to repay the debt we owed to France from our own Revolutionary days. In time to save our own souls. We have never known the real tragedy of this war as the Allied countries have known it; the horror and deadly misery of life in Belgium and northern France and all the lands ruined by the Huns. We all know of it, but we have not felt it.

Mourn the Dead

We mourn for all the young and gallant souls who gave up their lives in the service of the United States and are become an imperishable memory for us; but in our mourning we should remember that the total of our honored dead is less than 50,000, and that more than 2,500,000 French and English soldiers lie buried on the battlefields of France. When to that you add the losses of our other Allies and think of the far greater number of permanently maimed and blinded men we can estimate how little we have done in comparison with those and how greatly we must always be in their debt.

Let us show our gratitude to those nations who at such terrible sacrifices of their young manhood have saved the world for liberty by giving them of our money and resources without stint, as they may need, and by holding up their hands in all honorable ways in all the troublous days to come. They have paid the price—with them must rest the decisions. Be ours the part only to counsel and to help.

We are on the threshold of a new world; we know from the experience of the war the numerous races of men in our land have been drawn in a better knowledge of and closer union with each other because of this war that was not thought possible. In the great melting pot of the war all our inhabitants have been fused into a better citizenship. We know, too, that the result of the war means that the average man is going to have a better share of the world's happiness and comforts. That not only shall all autocrats disappear from thrones, but that everywhere men shall enter into a larger life, a fuller sympathy wtih each other.

The verdict of the great war is that too much power shall not be put into the hands of any man—and it matters not much whether that power be the power of the exploded theory of Divine Right, or whether it be Political Power, or the power that comes with the possession of enormous fortunes. Out of the hands of all such shall power more and more be withdrawn, into the hands of the average man of whom Lincoln said, "God must love him for He made so many of him."

Let Us Remember

Standing on the threshold of that new world, proud of our strength, rejoicing in our victory, let us yet remember by how small a margin we escaped the shame of exalting the material above the spiritual interests of our nation. Let us be grateful with a deep humility that we have been saved, not only from defeat in battle, but from that defeat of the soul which is spiritual death.

The tumult and the shouting dies,
The Captains and the Kings depart;
Still stands thine ancient sacrifice,
An humble and a contrite heart;
Lord God of Hosts be with us yet,
Lest we forget, lest we forget.

NO DEAD ACCOUNTS TO WORRY OVER

(Continued from page 62)

cember 11, published at Sarnia, Ont., contains the following on the front page:

"How much better would it be all around if there was no such thing as credit in this grand city of ours any more? Credit is not the thing. Pay as you go is the only system. Credit makes much confusion, much trouble and scores of bad friends; cash is the great organizer of companionship. Wages are such to-day that the workman can pay cash for his needs. And now is the time, the proper time, to introduce the cash idea. Official records show that hundreds of merchants fail in business each year because of the credit on their books; credit that cannot be collected. This should not be in this Canada of ours. Canada is in the midst of a glowing prosperity. If God in His Providence has ever blessed a land, a country, He has blessed Canada. Go if you will through the country and make some excuse to get into the granaries. See for yourself the heaps of grain—heaps of gold. There is no good reason why the old-time, time-worn, antiquated credit system shouldn't go and go at once."

AUTO RECORDER

Willis Chipman, of the firm of Chipman & Power, civil engineers, Toronto, has invented a device known as the Chipman auto recorder. It is stated that it records the various speeds and stops of any car to which it is attached every hour of the day.

Hardware Convention Program

FOLLOWING is the preliminary program for the Annual Convention of the Ontario Retail Hardware and Stove Dealers' Association to be held at Hamilton on February 18-19-20.

A complete list of speakers' names will be available at an early date. Announcement of the Convention meeting place, dates and first draft of program appeared in HARDWARE AND METAL some weeks ago.

TUESDAY, FEBRUARY 18.

10.30 *A.M.—Arrival of Delegates. Executive Meeting. Appointment of Committees.*

2 *P.M.—Open Session—Reception by Mayor and Trade Representatives.*

3 *P.M.—Closed Session—Distribution of printed forms of officers' reports.*

3.15 *P.M.—Consideration of notices of Motion from* 1918 *convention as follows:*

"That the membership fee in Association be $5.00, *Associate members* $1.00, *Clerk's fee* $1.00."

"That name of Association be shortened to "Retail Hardware Association of Ontario."

"That the office of 2nd V.P. be abolished and that Exec. consist of three members in place of six."

3.45 *P.M.—Report of Resolutions' Committee.*

4.00 *P.M.—Ten minute talks by exhibitors.*
Tuesday evening—Visit to Exhibits.

WEDNESDAY, FEBRUARY 19.

9.30 *A.M.—Ten minute addresses on prospects for* 1919 *by manufacturers and wholesalers.*

Wire and Wire Fencing—representative, Frost Wire Fence Co.

Wire Nails and Kindred Products—representative, Steel Company of Canada.

Builders' Hardware—representative, Canadian Yale & Towne, Limited.

Ready Mixed Paints—representative, Sherwin-Williams Co. of Canada, Limited.

White Lead Situation—representative, Brandram-Henderson Co., Ltd.

Electrical Supplies for the Retail Store—representative, Canadian General Electric Co., Toronto.

Linseed Oil Situation—representative, Dominion Linseed Oil Co., Toronto.

Wholesalers—representative, Can. Wholesale Hardware Association.

Cutlery—representative, Hobbs Hardware Co.. London, Ont.

Glass Situation—representative, Pilkington Glass Co., Thorold, Ont.

Auto Accessories—representative, Hyslop Bros., Toronto, Ont.

Stove Situation—representative, Burrow, Stewart & Milne Co., Hamilton, Ont.

11.15 *A.M.—Nomination of Officers.*

11.30 *A.M.—Ten minute talks by exhibitors (names later) Visit to Exhibits.*

WEDNESDAY NOON

1.30 *P.M.—The income tax, who is eligible, and how to prepare Fnancial Statement—by official of Government Finance Department.*

Government Action on Sale of Gasoline—Is a fixed retail price in this commodity in the best interests of the retail trade—Official of Imperial Oil Co.

2.30 *P.M.—How to maintain your profits in the face of future declining markets—Jno. C. Kirkwood.*

4.00 *P.M.—Talk on How to Advise Customers to Finish Floors—Both as to Wax and Varnish Finish—representative, Berry Bros., Limited, Walkerville, Ont.*

4.30 *P.M.—Election of Officers.*

5.P.M.—*Visit to Exhibits.*

WEDNESDAY EVENING

7.30 *P.M.—How I placed my business on a cash basis, and reasons why I will continue on same basis—W. F. Macpherson, Prescott, Ont.*

8.30 *P.M.—Questions and Answers—a round table talk on problems affecting the hardware trade.*

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

BALL THRUST BEARING

Axle and gear trouble in Ford and Chevrolet cars is almost always caused, it is stated, by the thrust washers on the left of the differential wearing thin, allowing the gears to get out of proper mesh, causing undue pressure on differential case and axle, frequently causing a broken part, extra expense and loss of time. The Graham ball thrust bearing for Ford cars made by the Graham Roller Bearing Co. of Coudersport, Pa., will, it is claimed, eliminate these troubles, reduce repair bills and increase the hill climbing power of a car.

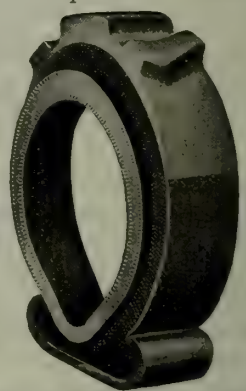
Ball Thrust Bearings

EXTENSION PEDAL

The "Rico" universal extension pedal made by the Rich Mfg. Co., 1777 Broadway, New York, it is claimed, is the only device of its kind which will fit every type or shape of automobile brake and clutch. It is stated it can be attached with sliding clamp toward dash of car or toward seat. The "Rico," it is claimed, eliminates the use of cushion or other expedient ordinarily used to enable the driver to reach the pedals. It is stated it is absolutely rigid when adjusted.

Extension Pedal

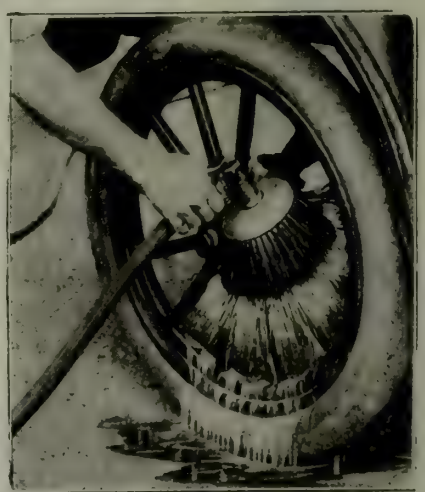
RED STAR WASHER



The Red Star Washing Machine, manufactured by Beatty Bros., Limited, Fergus, Ont., has, it is claimed, an especially advantageous feature in the arrangement of the dolly shaft which slides up and down. It is furnished with a knob by which, it is stated, it may be lifted before the lid is raised. In this manner, it is stated, the clothes are freed from the pegs of the dolly and are not in danger of injury through being lifted out of the tub. The washer, it is stated, is made of cypress lumber and has maple legs. The sides and bottom of the interior, it is stated, are corrugated like a rubbing board to facilitate washing.

Red Star Washer

INNER TUBE



The Stern Wear pneumatic inner tube, made by the Sterns Tire and Tube Company of Canada, Limited, 632 Yonge St., Toronto, solves the puncture and blow-out problem, it is claimed. They are made in standard sizes and, it is stated, will inflate perfectly with 25 per cent. less air pressure and will more than double the life of outer casings. The Stern Wear is reinforced inside and out side with fabric, and does not require any liquid compounds or fillers. It is claimed they reduce punctures to a minimum and cannot blow out.

Stearn Wear Inner Tube

AUTO BRUSH

The water-spray auto brush made by Scully, Jones & Co., 80 East Jackson Boulevard, Chicago, will, it is claimed, wash autos and trucks in half the time and at half the cost. The device consists of a five-inch brush made, it is claimed, of genuine horse hair and Russian bristles. Through the center is inserted, it is stated, an aluminum spray nozzle attached to a hose connection and containing a cut-off value. The volume of water sprayed through the bristles of the brush is controlled, it is stated, by the hand holding the brush. Two kinds of brushes are made, one a short handled water-spray auto brush and the other a three-foot extension water-spraying auto brush. The latter, it is stated, has a three-foot aluminum pipe extension and may be used for under parts and tops and all "hard to clean" places.

Water-spray Auto Brush

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

LOWER prices have been established in the base price of rope this week, the new quotations showing a decline of 2c per pound. Factors contributing to this move are lower fibre prices and a reduction in ocean freight rates. The market is steady at the decline, and with stocks throughout the country generally light, a good trade is looked for during the coming year.

Linseed oil is again furnishing excitement, an advance of 6c and a decline of 5c per gallon being recorded. The result has been a marked narrowing of the range of quotations, and the market carries a steadier tone than for the past two or three weeks. There is little movement at the present time, a seasonable condition.

In an effort, it is said, to stimulate sales, a decline has been recorded in turpentine amounting to 5c per gallon. Markets in the South, after a period of quiet, even dullness, show a little more activity with a firming influence, resulting in a stiffening of prices.

Quotations issued this week on barn door hangers and track and parlor door hangers and track show advances over previous figures. Candle wick has reached a very high figure, and a revision in collar pads upward has been made. Electric light globes have declined, and a lower scale of quotations on copper and brass rods, tubes and sheets has been reached.

Coil chain is up from 15c to 80c per 100 pounds, and log chain has also reached a figure from 15 to 25c above former levels. Pump oilers are up from 10 to 15 per cent. New list prices have been named on canvas belting, along with a change in the discount, giving a net result which shows quotations about 10 per cent. higher.

Ingot metals are again fluctuating, lower prices having been established on tin, spelter and lead in some quarters. There is little activity at present, trading being confined to very small parcels.

MONTREAL MARKETS

MONTREAL, Dec. 19.—Changes for the week have been made in various lines of auto accessories. Declines for casting copper, black sheets, and rope, lathyarn and marline are recorded. There is a tendency to lower levels for lead products, and old materials are weak in as far as the scrap metals are concerned. Tinplates and Canada plates also are ruling with an easier undertone. An advance is made in the price of kraft paper bags.

Christmas business has been seasonably good, and stocks of skates and bells, as well as those of other lines, are pretty well cleaned up. That there will be a general settling down to business within a few weeks is conceded, and the outlook seems to be that any readjustments to be made will come about in a natural way, and that these changes will spread over a considerable period of time.

Paper Bag Prices Are Marked Up

Montreal.

PAPER BAGS.—Prices are marked up for paper bags of the "kraft" type. This is effected through a complete change of the list and which is as follows: One pound size, $3; 2-lb, $3.80; 3-lb., $4.80; 4-lb., $5.60; 5-lb., $6.80; 6-lb., $8.40; 7-lb., $9.40; 8-lb., $11; 10-lb., $12.60; 12-lb., $14.60; 14-lb., $16.50; 16-lb., $18, and 20-lb., $22. From this list a discount of 33 1-3 per cent. is quoted. The old list was lower and the discount from this previously was 15 per cent.

Rubber Patches Up; Air Bags; Jacks

Montreal.

RUBBER PATCHES, AIR BAGS.—Various styles of rubber patches for use on auto tires are advanced. Comparative prices for instance on 3½ inch Samson are: old, 50c; new, 56c. The relative prices for 4-inch are 67c and 79c; 4½-in., 77c and 98c, and 5-in., 93c and $1.08. 25 per cent. discount applies to these prices. Floating flaps are also on an advanced price basis, and various other rubber goods, such as mats, water pails and cementless patches.

Air bags, 3x14, are priced to the trade at $3.49; 4x16, at $3.75; 3½x14, $4.31, and 3½x16, $4.50. In the same line, 4x18 are priced at $5.47; 4½x16 at $5.54, and 4½x18, $6. 5x16 are priced at $6.26, and 5x18 at $6.49. The discount is 25 per cent.

A price of $15.75 each is quoted on Gemco garage jacks, with a 10 per cent. discount applying to the trade.

Hose Connections Up; Pedal Rubbers

Montreal.

HOSE CONNECTIONS—Advances are made in the price of rubber hose connections for Ford cars and also for Chevrolet models. The advance is considerable, and, in some instances, over 50 per cent. Chevrolet size, 1¼x4, are quoted at $1.15 per dozen; 1¾ x 3¾ at $1.50. Ford size, 1¾ x 2¾, are priced at $1.15; 2x3¼ at $1.40, and 2x 3½ at $2.50. A discount to the trade (in dozen lots) of 35 per cent. applies.

Pedal rubbers in lots of one dozen are quoted at 42c each for Chevrolet, and at 39c each for Ford, the same respective costs applying to McLaughlin and Overland.

Ajax patches of 32 square inches are quoted at 35c each in lots of 12, and 70c each for lots of 12 in the 72 square inch size.

Tire Reliners Up From 5 to 10%

Montreal.

TIRE RELINERS.—Advances of from 5 per cent. to 10 per cent. apply to tire reliners. The following prices are in effect for various sizes and on the basis of the dozen price: 30x3, $1.58; 30x3½, $1.79; 32x3½, $1.89; 31x4, $2.49; 32x4, $2.52; 33x4, $2.63; 34x4, $2.70; 34x4½, $2.90; 35x4½, $3.01; 36x4½, $3.08; 37x 4½, $3.22; 36x5, $3.50; 37x5, $3.64.

Radiator Hose up 10-15%; Brake Lining 15%

Montreal.

HOSE, BRAKE LININGS.—Radiator hose is higher, from 10 per cent. to 15 per cent. New prices are as follows:— 1 in., 25c; 1¼ in., 32½; 1½, 38c; 1¾, 42c; 2 in., 49c; 2¼, 57c; 2½, *0½c; 2¾, 70c.

Brake linings are higher, too. The average advance is around 15 per cent. and a few prices follow. These are trade prices on lots of 50 feet, and from which 40 per cent. discount may be taken: ⅛x 1 in., 26½c; ⅛x1½, 30c; ⅛x2, 44c; ⅛x 3, 61c, and ⅛x4, 76c. In the 5-32 size by 1 in. the price is 30c; 5-32x2, 53c; 5-32x3, 75c; and 5-32x4, 99c per foot. Size 3-16x1, 35½c; 3-16x2, 63c; 3-16x3, 92½c; 3-16x4, $1.19; ¼x1 in., 47c; ¼x 2½, 63c; ¼x2, 83c; ¼x3, $1.20; ¼x4, $1.55.

Rope Declines 2c; Lathyarn, Marline, Too

Montreal

ROPE AND CORDAGE.—Declines of two cents per pound are made this week for various rope. The basis for pure manila is reduced to 37c, that for British manila to 31c, and that for sisal to 25½c per pound.

Lathyarn is down 2c also to 25½c basis, and pure African hemp marline is down 2c to 36c per lb. Standard African hemp is quoted 37c. Prices are effective from December 14. The usual differentials apply for the various rope and lathyarn specials.

Ware Trade Quieter; Stoves Slow, Too

Montreal.

STOVES AND WARES.—There is very little movemnt of wares now that the season has run its course. Manufacturers have had a large volume of business, however, and are well satisfied. The same is true regarding stoves and ranges, and the outlook for a good season in 1919 is an encouraging one. Prices are likely to rule firmly.

Coal Oil Holding; Gasoline Sales Less

Montreal.

COAL OIL, GASOLINE.—Sales of coal oil are steadily better, although the city trade is not a big factor. Price for Royalite grade is still 19c per gallon, and for Palacine and Electroline 22c, holds still. Motor grade gasoline is selling at 34c per gallon, and the demand is now somewhat less, although many motor cars are yet operating that are put up for the winter ere this other seasons.

BRIEFS FROM THE WEEK'S MARKETS

Linseed oil is up 6c and down 5c per gallon in the Toronto market. The result has been a marked narrowing of the range on quotations.

* * *

Barn door hangers and track and parlor door hangers are quoted at advanced prices.

* * *

Canvas belting has been placed on a new list of prices per foot and the discount revised—the net result is an advance approximating 10 per cent.

* * *

Kraft paper bags have undergone revision upward. An item of expense that should be figured in cost of doing business.

* * *

Curtain stretchers show an advance in new prices issued this week.

* * *

The metal markets furnish the thrills again this week, tin, spelter and lead each recording slight declines in some quarters.

* * *

The cost sheets of stove manufacturers now under revision may, it is said, reveal the necessity of a levelling up or readjustment of values on some lines to higher figures.

* * *

Candle wick has gone up to 80c per pound.

* * *

Rope prices show a decline this week of 2c per pound. Pure manila is down to 37c base; British manila 31c; sisal 25½c per pound. Lower fibre figures are the main contributing factors in this lowering of prices.

* * *

Pump oilers jumped up from 10 to 15 per cent. during the week.

* * *

New prices issued on coil chain show an advance of from 15c to 80c per 100 pounds. Logging chains are up from 15c to 25c per 100 pounds.

Nails Move Slowly; Basis the Same

Montreal.

NAILS AND WIRE.—The basis for wire nails is steady and unchanged. This holds at $5.50, and that for cut is $5.85. With navigation just closed the water shipments have been cut off and sorting orders for small lots will now be the feature.

Smooth steel wire is steady and unchanged with the base price holding at $6.25 per 100 lbs.

Black Sheets Easier; More Offerings

Montreal.

SHEETS.—With the removal of restrictions and with a desire manifest among the jobbers to create new business, sheet prices have again declined. This applies only to the black list in certain gauges and while quotations are unchanged for galvanized, it is expected that prices favorable to the buyer will be quoted for quantities that may be wanted. The prospects are for more favorable prices.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$7 50	$11 50
12 gauge	7 60	11 00
14 gauge	7 75	8 20
16 gauge	7 75	8 00
18-20 gauge	7 75	8 00
22-24 gauge	7 90	8 35
26 gauge	7 95	8 40
28 gauge	8 05	8 50
GALVANIZED SHEETS—		
10¾ oz.	$11 35	$12 35
28 gauge	10 90	11 90
26 gauge		11 35
22 and 24 gauge		11 15
20 gauge		11 05
18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Iron and Steel on Unchanged Basis

Montreal.

IRON AND STEEL.—Nothing of new interest has developed, and it will be a week or two before there is any likelihood of changes being made. With a removal of restrictions in the near future there may be some slight reductions in the base prices, but this will depend upon the available supplies to a great extent. Orders just now are naturally small.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Interest Lags in All Lead Products

Montreal.

LEAD PRODUCTS.—A quietness has been ruling in lead products for some time and the movement is confined to the user's present needs. Prices are naturally easier and the tendencies are to lower levels for pipe and sheets, although the recent reductions will probably hold for the present. Lead is none

too plentiful, and if there is any revival of buying the market will firm somewhat again. Solder is easy, but unchanged.

Lead pipe, lb.	$0 14	$0 15
Lead pipe (cut lengths)		0 15
Lead waste pipe, lb.	0 15	0 16
Lead traps and bends	Net list.	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 12¾
Lead sheets, 4 to 8 lbs., s. ft.		0 11½
Cut sheets, ¾c lb. extra, and cut sheets to size, 1c. lb. extra.		
Solder, guaranteed, lb.		0 47
Solder, strictly, lb.		0 43
Solder, commercial, lb.		0 40
Solder, wiping, lb.		0 40
Solder, wire (8 gauge)—		
40-60		0 49¾
45-55		0 54
50-50		0 58
Zinc sheets, casks		
Do., broken lots		

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Inactivity Rules in Old Materials

Montreal.

OLD MATERIAL.—Interest is limited and no movement is reported, either in the way of receipts or of sales. It will be some weeks before the conditions improve. Old rubbers are holding steady, while iron and steel, and also brass copper and lead are on the easy side, but without quotable changes being made.

Dealers' Buying Prices:		
Tea lead		0 05½
Heavy lead pipe		0 07¼
Yellow brass		0 13
Red brass		0 21½
Light brass		0 08
Scrap zinc		0 06¼
Heavy copper	0 22	0 23
Wrought iron, No. 1, per gr. ton	22 00	23 00
No. 1 machinery cast	35 00	36 00
Heavy melting steel	22 00	23 00
Pipe scrap	18 00	20 00
Stove plate, per ton	23 00	24 00
No. 2 busheling	12 00	12 50
Old rubbers, boots and shoes	0 08	0 08½
Overshoes, lumbermen's rubber boots		0 06
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Copper Scores Decline; Tin Shows Weakness

Montreal.

INGOT METALS.—The markets are unsettled this week. An easier feeling has developed on copper, and tin also is weaker again in London. Little stability is looked for in the whole list until after the first of the year.

COPPER.—Casting copper is weaker and is quote here this week at 27c. Electrolitic grades are firm and steadier and still hold at 30-31c.

TIN.—Weakness developed again in London, cables recording another decline. There has been no immediate reflection here excepting that offerings are freer and prices somewhat more open than they were.

SPELTER.—A general absence of trading and an unconcerned buying element leaves little to say on this item. The price basis of 10½c still rules here.

LEAD.—Some of the importers see no reason why lead should have been lowered in price, for they state that supplies are still small and likely to be light for some time. 9½ to 10c still is quoted here.

ANTIMONY.—Antimony is quite uninteresting and the position is easy, but unchanged, with sales made at 11-12c per lb.

ALUMINUM.—Little interest manifested and sales made at 48-50c for small quantities.

TORONTO MARKETS

TORONTO, Dec. 19—Higher prices have been reached on many lines of manufactured goods including barn door hangers and track, parlor door hangers, cotton candle wick, solder pots and collar pads. Electric light globes have undergone revision downward and lower prices have been named on brass and copper sheets, rods and tubing. Rope has come in for a reduction of 2c per pound. Ingot metals show little change, though some shading of prices on lead and spelter is reported and tin has declined slightly.

Business on sleighs, skates, snowshoes and all seasonable lines has been heavy. The Christmas trade being the big factor to provide for the heavy movement.

Barn Door Hangers Revised Upward

Toronto.

BARN DOOR HANGERS.—A revised list of prices has been issued on R. W. barn door hangers in some quarters which provides for a move to higher levels. New quotations now in effect are: No. 321, $19 per dozen pairs; No. 542A, $14; No. 544, $16.50; No. 543, $17.75; No. 545. $12.75; No. 41 x 1, $19; No. 41 x 2, $22.75; No. 41 x 3, $27.75; No. 843, $11.50.

Trolley hangers have also joined the upward movement, No. 20½ B being quoted at $3.10 per set and No. 28½ B, $5.50.

Track, Stays, Latches Also Up

Toronto.

TRACK, STAYS, LATCHES.—Higher prices have also been reached on barn door track, quotations named being as follows: Flat, 3-16 x 1¼ inch, $9 per 100 feet; Round, No. 542 A x ⅞ inch, $11.15; No. 543 x 1⅜ inch, $13.75. Trolley track No. 30 for Nos. 30 and 0030 hangers is quoted at $21 per 100 feet; No. 31 for Nos. 321 and 20½ B hangers, $20.

Barn door stays have followed the upward movement, No. 68 being quoted at $6 per dozen. Latches No. 125 Bull Dog are up to $12 per dozen.

Parlor Door Hangers Move Higher

Toronto.

PARLOR DOOR HANGERS. — The range of quotations on R. W. parlor door hangers reveals an upward tendency in this line. Figures just issued in some quarters reveal higher levels as follows: No. 12 single, with track, $24.60 per dozen sets; No. 12 double, with track, $49.20; No. 112 single, with track, $24.60; No. 112 double, with track, $49.20; No. 122 single, with track, $23.40; No. 122 double, with track, $46.80.

Sliding door locks No. 510 are being quoted at $2.80 each.

Candle Wick Reaches High Figure

Toronto.

CANDLE WICK.—Higher prices have been reached on candle wick in some quarters, the new quotation which is now being named to the trade being 80c per pound. The raw cotton market seems to be strengthening somewhat on export demand and if overseas shipments becomes heavy a higher level of prices seems probable. The effect will be felt on manufactured cotton products also.

Electric Light Globes Decline

Toronto.

ELECTRIC LIGHT GLOBES.—A decline has been registered in electric light globes amounting to about 3c each. List prices are shown below along with the standard packages and the trade discounts which apply are as follows: 500 lamps or over in one shipment, 25 per cent; 100 lamps and up to 499 in one shipment, 17 per cent.; less than standard package, 10 per cent.

	Standard Package.	List Each.
Tungsten Lamps—		
10 to 40 Watt	100	$0 32
60 Watt	100	37
100 Watt	24	75
Nitrogen Lamps—		
100 Watt	50	1 17
200 Watt	24	2 34
300 Watt	18	3 45

Collar Pads Undergo Revision

Toronto.

COLLAR PADS. — New prices have been established on Ventiplex collar pads, quotations now ranging at following levels: No. 300 x 9 inch, $6 per doz.; 10 inch, $6.25; 11 inch, $6.50; 12 inch, $6.75; No. 400 x 9 inch, $6.50; 10 inch, $6.75; 11 inch, $7; 12 inch, $7.25; No. 500 x 9 inch, $6.50; 10 inch, $6.75; 11 inch, $7; 12 inch, $7.25; No. 700 Duplex x 10 inch, $9; 11 inch, $9.50; 12 inch, $10.

Copper and Brass Sheets, Rods Down

Toronto.

COPPER AND BRASS RODS, SHEETS. — Lower prices have been

named on copper sheets, rods and tubes and brass sheets, rods and tubes are also down to a lower scale of quotations. New figures which have been reached are named as follows: Copper sheets, 46c per pound; copper rods, 46c per pound; copper tubing, 52c per pound; brass sheets, 40c per pound; brass rods, 37c per pound; brass tubing, 48c per pound.

Solder Pots Make Advance

Toronto.

SOLDER POTS. — Quotations now available on metal solder pots provide for an advance over previous figures. The present basis of quoting on these is for the 5-inch, 60c each; 6 inch, 80c; 8 inch, $1.35; 10 inch, $2.10; 13½ inch, $4.20.

Lower Prices Named on Rope

Toronto.

CORDAGE, TWINE. — Lower prices are the order of the day in rope, quotations to-day showing a decline of 2c per pound in the base over figures which have been in effect for the past few months. Prices at which manila and sisal fibre can now be bought show a decline from levels at which most of manufacturers' stocks have been bought at, it is intimated, but some reaction seemed bound to come and the result has shown in binder twine and now in rope. The new range of quotations is given as follows: Pure manila, 37c per pound base; British manila, 31c; New Zealand hemp, 31c; sisal, 25½c; single sisal lath yarn, 25½c.

There has been no further change in the twine situation and the market is holding quite steadily.

Stoves May Be Revised; Wares Firm

Toronto.

STOVES, WARES. — Manufacturers of stoves intimate that in getting down to figuring costs as they are now doing they expect it may be necessary to undertake a levelling-up or readjustment in some lines which may result in an advance for some grades and styles of perhaps 5 per cent. There is no intimation that present basis on any one line is too high, and as noted there may be some slight advances. The outlook is considered good for 1919, though present business is comparatively quiet, a seasonable condition.

Wares are holding steadily with a firm undertone. Prospects for 1919 business are considered excellent.

Nails Hold at Unchanged Levels

Toronto.

NAILS, WIRE.—The undertone to the market remains firm. It is true that pig iron has declined, but there is no change reported in wire or wire products, and some manufacturers intimate there is at present an insufficient spread between wire and rods. However, no price change seems imminent. Locally the situation is without change, wire nails selling at a base of $5.50 per 100 pounds and cut nails at $5.85 per 100 pounds. There is some talk that a new manufacturer of wire nails is to enter the Canadian market.

Smooth steel wire is unchanged at the base price of $6.25 per 100 lbs.

Oils Holding; Gasoline Unchanged

Toronto.

OILS, GASOLINE.—There are no new developments to record this week in oils. The market rules with a steady tone and prices show no change. Coal oil is in good demand at prices ranging from 18½ to 21½c per gallon according to grade.

Gasoline demand has continued at high levels from outside points due to the generally fine weather prevailing with the opportunity for using the autos to a later date than usual. Price rules without change at 33c per gallon.

Bars Hold Steady; Unchanged

Toronto.

IRON AND STEEL. — Bars show no further change from levels reached last week, the common bar iron being quoted at from $4.85 to $5.25 per 100 pounds base and bar steel at $5 to $5.50. The demand is small just now and little movement is expected for the next few weeks.

TORONTO—	Per 100 lbs.	
Common bar iron	$4 85	$5 25
Common bar steel	5 00	5 50
Refined iron	....	5 65
Angle base	....	5 75

Little Movement in Corrugated Sheets

Toronto.

CORRUGATED SHEETS. — There is little movement just now in corrugated sheets or other lines of manufactured sheet metals, but this is a seasonable condition. Manufacturers look for good business on eavetrough and conductor pipe early in 1919 and expect that other lines such as roofing and siding will show activity a little later on. The trade as a whole are most optimistic over prospects for next year's business.

TORONTO—	Per 100 Sq. Feet

No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Sheets, Plates Remain Unchanged

Toronto.

SHEETS, PLATES.—The market on sheets and plates locally seems to have reached a basis more in line with prices at the mills, and any further revisions which may take place will quite likely be gradual; no big changes are expected. It was intimated in last week's issue that there might be a fair movement of sheets this month. Definite advice has been received by one jobber that a couple of hundred tons are moving his way and this will serve to help out stocks which have been badly depleted. It would appear that a fairly good movement may be looked for from now on.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$7 50	$8 50
12 gauge	$6 85	7 35	8 35
14 gauge	6 90	7 20	7 90

14 gauge	8 15	8 25

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

Tubes Coming; Wrought Pipe Holds

Toronto.

BOILER TUBES, WROUGHT PIPE —The mills are cleaning up all back orders of Canadian dealers for tubes rapidly and this means that high priced tubes are being received locally. There has been no price change made as yet on tubes, but it seems possible that the first of the year will bring with it a reduction of 5 to 10 per cent. in present scale of quotations.

There are no new developments reported in regard to wrought iron pipe. Prices have held firm and unchanged with supplies fairly well equal to present demands. Prices appear in current market quotations.

Nothing Doing in Old Materials

Toronto.

OLD MATERIALS.—The scrap metal market is still in a poor condition. No sales are being made unless there is considerable urgency in the deal. Prices for material are very uncertain, and any quotation that is made is hardly indicative of the real condition of the market, hence can be considered only nominal. No buying is being done at the figures shown.

Metals Continue To Fluctuate

Toronto.

INGOT METALS.—The markets continue to show decided fluctuation, some comparatively low prices being recorded in spelter and lead, while tin has come down another 5c per pound in some quarters. There is little moving even at price inducements made.

COPPER.—There has been no change recorded in the situation locally. It does not seem likely price control will be a factor in this market after the first of the year, and there is some speculation as to how prices will go. Locally there has been no change, 30 to 32c per pound being price quoted.

TIN.—Lower levels have again been reached in some quarters, prices as low as 75c per pound being quoted and ranging up to 85c. There is practically no movement and supplies are considered ample for limited demand.

SPELTER.—The local market seems to be quite bare of supplies, but even with this condition some lower figures have been reached as will be shown by the quotations of 9½ to 10c per pound available.

LEAD.—The market has sagged still further in favor of the buyer. Quotations named this week range from 8¼c and 8½c to 9½c per pound. There is little trading reported, only small lots changing hands.

ALUMINUM.—No change is the condition still reported in this metal. There are really no elements of interest yet developing. Price holds unchanged at the nominal figure of 50c per pound.

ANTIMONY.—The price of 10c per pound is generally in effect this week on antimony. The market is dull and featureless.

PIG IRON.—A decline of $3 per ton at United States furnaces is reported, but there is still no indication that supplies are plentiful. As a matter of fact it would appear as though pig iron will be scarce for some time to come as demands from all commercial sources will be extremely heavy. There is little new to report in the situation locally.

LONDON MARKETS

LONDON, Ont., Dec. 19.—Lower prices have been named on linseed oil, amounting to 5c per gallon, and turpentine has also come down a straight 5c per gallon. Higher prices have been named on curtain stretchers, chisel handles, and shaving soap. A 10 per cent. advance has been made on canvas belting, and food choppers have also moved upward in price.

Sales of flashlights, carpet sweepers, silver-plated flat ware, electric heaters and appliances represent a heavy volume of present business. Christmas trade has been good, and a fine clean-up of stocks seems probable.

Curtain Stretchers Move Upward

London, Ont.

CURTAIN STRETCHERS.—Higher prices have again been found necessary on curtain stretchers, the scarcity of wood, and difficulty in securing supplies of desirable stocks being factors, it is intimated, which have brought about this change. Quotations which are now being made to the trade are: No. 88 plain, $19 per dozen; No. 5 with easel, $27.50; No. 22 loose pin, $33.50.

Chisel Handles Go Higher

London, Ont.

CHISEL HANDLES.—New prices which have been issued on chisel handles this week provide for a substantial advance over previous figures. The present basis of quoting is as follows: Tanged, No. 600, 65c per doz.; No. 601, 75c; No. 606, $1.35; No. 607, $1.50; Socket, No. 610, 45c; No. 611, 50c; No. 616, $1; No. 617, $1.15. Framing chisel handles No. 621, 70c.

Ten Per Cent. Advance in Canvas Belting

London, Ont.

CANVAS BELTING.—A ten per cent. advance has been recorded in Maple Leaf canvas belting during the week. The new prices shown reveal a new list and a new discount which provide for higher price levels to extent mentioned above. The new list prices are per foot: 1½ inch x 4 ply, 30c; 2 inch x 4 ply, 39c; 2½ inch x 4 ply, 48c; 3 inch x 4 ply, 57c; 3½ inch x 4 ply, 65c; 4 inch x 4 ply, 74c; 4½ inch x 4 ply, 81c; 5 inch x 4 ply, 90c; 6 inch x 4 ply, $1.05. From these list prices a discount of 45 per cent. applies.

Food Choppers Up; Electric Appliances

London, Ont.

FOOD CHOPPERS, ELECTRIC APPLIANCES.—Higher price levels are shown in new quotations issued this week on Universal food choppers. The new prices are given as follows: No. 0, $19.50 per dozen; No. 1, $23.75; No. 2, $28.90; No. 3, $37. Sales of all lines of electric appliances have been heavy during the holiday season. Prices have held steadily, quotations on the Red Hot electric stoves being made at $3.25 each. Canadian Beauty electric toasters have held at $4.50 each. Activity marks the movement of flashlights and batteries, and the discount remains unchanged; Eveready Daylos and batteries selling at 33 1-3 per cent. from list.

Shaving Soap Up; Flatware, Sweepers Move

London, Ont.

SHAVING SOAP, FLATWARE, SWEEPERS.—A new price has been named on both Williams' and Colgate's shaving soaps, the barber's bar now being quoted at 80c per pound. Silver-plated flatware has been active at unchanged prices, the 1847 flatware being quoted at 40 per cent. off list. Net prices on some sets are: 1847 plain dessert knives and forks, $4.75 per set; 1847 plain medium knives and forks, $5; 1847 pattern dessert knives and forks, $5.65; 1847 pattern medium knives and forks, $6. Carpet sweepers and vacuum sweepers are other lines which have been moving forward to the trade readily, and retailers report good sales. Quotations have held at unchanged figures as follows. Carpet sweepers: Universal, japanned, $39 per dozen; Universal, nickel-plated, $46; Grand Rapids, japanned, $41; Grand Rapids, nickel-plated, $48; Princess, $49; Elite, $54; Parlor Queen, $54; American Queen, $51; Vacuum sweepers: Household, $96 per dozen; Grand Rapids, $108; Superba, $126.

Ice Tongs Up; Lunch Boxes Here

London, Ont.

ICE TONGS, LUNCH BOXES.—Quotations on heavy ice tongs have undergone revision to higher levels, the new

prices on the No. 2 V and B being $23 per dozen, and on the No. 3 V and B $27.50 per dozen. A new line of sheet metal lunch box is being offered to the trade which will be sold as No. 3 and japanned finish. The price established is $3.25 per dozen.

Nails Quiet; Heaters Unchanged

London, Ont.

NAILS, OIL HEATERS.—Nails are moving very slowly at the present time but the undertone to the market seems quite steady. No price change is recorded, the base price of the wire holding at $5.50 per 100 pounds, and on the cut at $5.85. A slower sale of oil heaters is reported, the milder weather accounting for this it is thought. Prices have held firm and unchanged at following levels: New Perfection, No. 525, list $7 each; No. 530, $8.25; No. 630, $10.25, less 25 per cent. McClary, No. 860, n.p., $4.75 each net; No. 860, enamel, $5.50.

Lower Prices Named on Rope

London, Ont.

ROPE.—A new base price has been established on rope this week which provides for a decline of a straight 2c per pound. Lower fibre prices are the main factor in bringing about this decline. On the new basis quotations to the trade range as follows: Pure manila, 37c per pound base; British manila, 31c; New Zealand hemp, 31c; sisal, 25½c; sisal lathyarn , 25½c.

Turpentine Declines 5c Per Gallon

London, Ont.

TURPENTINE.—Lower levels have been established on turpentine locally, the decline amounting to 5c per gallon and following on the heels of a decline last week. This is a reflection of markets in the South which underwent a sharp decline a week or two ago, although the bottom seems to have been reached and an upward movement is again in progress. The main reason assigned for this decline locally is an effort to stimulate sales, which are light. The new prices to-day are: 1-bbl. lots, $1.10 Imperial gallon; 2 to 4 bbl. lots, $1.09; 5 gal. lots, $1.20.

Linseed Oil Again Lower

London, Ont.

LINSEED OIL.—Lower prices are again in evidence this week on linseed oil, the decline amounting to a straight 5c per gallon. Lower flaxseed is one of the reasons fo rthis movement, although the trade as a whole would probably be glad to take care of a little more business than is now being offered. However, the limited demand is a seasonable condition and a steadier market is looked for during the next few weeks. The new range of quotations now in effect is as follows: 1 to 2 bbls, raw, $1.70 per $1.69, boiled. $1.72; 6 to 9 bbls. raw, gallon, boiled, $1.73; 3 to 5 bbls. raw, $1.67, boiled, $1.70, less bbls., add 10c gallon.

WINNIPEG MARKETS

WINNIPEG, Dec. 19.—Price changes for the week have been fairly numerous, though quotations show only very moderate advances. Lines which have reached higher levels are coil chain, logging chain, scythe stones, safety chain, ladder chain, pump oilers, dry paste, post mauls, rosin, horse rasps, log chain swivels and slip and grab hooks. Markets in general are holding very firm, and few changes are looked for before the first of the year, or until factories are assured of next year's supply of raw material.

Business in general hardware lines is reported as very fair, while all dealers report a good Christmas trade. There is a noticeable demand for all kinds of good mechanical toys.

Repair Links Go To Higher Levels

Winnipeg.

REPAIR LINKS.—Prices on swivel repair links have undergone a revision upward. This, it is intimated, is due to increasing cost and shortage of material. Prices ruling to-day are as follows: Swivel repair links, No. 2530 A, 65c; B, $1; C, $1.35; D, $1.85; F, $2.45 per dozen.

Chain Swivels, Slip and Grab Hooks Move Up

Winnipeg.

CHAIN SWIVELS, SLIP AND GRAB HOOKS.—Prices on log chain swivels along with slip and grab hooks took a further increase during the week. The new quotations show an advance of about 5 per cent. over old figures. Prices have now reached the following figures: Log chain swivels, No. 7 x ⅜ inch, $1.90; No. 8 x ½ inch, $2.10; No. 9 x 9-16 inch, $2.75 per dozen. Slip hooks, ¼ inch, $1.65; 5-16 inch, $1.95; ⅜ inch, $2.60; 7-16 inch, $3.45; ½ inch, $4.50 per dozen. Grab hooks, ¼ inch, $1.65; 5-16 inch, $1.95; ⅜ inch, $2.60; 7-16 inch, $3.45; ½ inch, $4.50.

Horse Rasps Go Up Five Per Cent.

Winnipeg.

HORSE RASPS.—Prices recently received from the manufacturers show higher prices on Heller Bros.' horse rasps, both plain and tanged. These move up approximately 5 per cent, while prices on this make of blacksmiths' hammers, hoof parers, etc., remain unchanged. Prices now ruling on horse rasps are given herewith: Heller's horse rasps, plain, 14 inch, $8; 15 inch, $9.40 per dozen. Tanged, 14 inch, $10.40; 15 inch, $12.30 per dozen.

10 to 15% Advance in Pump Oilers

Winnipeg.

PUMP OILERS.—Owing to the high prices ruling for tin as well as the scarcity of this material, further advances have just now become effective covering the genuine Cannon oilers. Prices have moved up from 10 to 15 per cent. over former prices and have now reached the following figures: Cannon oilers, No. 1, $15; No. 2, $16.50; No. 3, $19.50 per dozen.

Post Mauls Reach Higher Levels

Winnipeg.

POST MAULS.—Increased cost of production in the local foundries has been the means of forcing post maul prices higher. To-day's selling price has been established at 6c per pound for all sizes and shapes.

Higher Prices on Safety, Ladder Chain

Winnipeg.

SAFETY AND LADDER CHAIN.—New prices just issued by manufacturers show that further advances have been made covering brass safety chain and ladder chain. The increase is very moderate. To-day's ruling prices are given as follows:

Brass Safety Chain—No. 2/0, $2.15; No. 1/0, $2.70; No. 1, $3.35; No. 2, $4.00 dozen yards.

N.P. Safety Chain—No. 1/0, $3.00; No. 1, $3.65 dozen yards.

Brass Ladder Chain—No. 19, $1.35; No. 18, $1.70; No. 17, $1.95 dozen yards.

Scythe Stones Revised Upward

Winnipeg.

SCYTHE STONES.—Prices on scythe stones which have remained firm for the past six months have been revised to higher levels. This is largely attributed to increased freight rates. Prices at which these are now selling are represented by the following figures: Leader, $7.75 gross; Indian Pond, $12.50 gross; Black Diamond, $17.50 gross; Quick Cut, $15 gross.

Coil Chain Goes Up 15c to 80c

Winnipeg.

COIL CHAIN.—Prices on coil chain have again been revised during the past week due to labor costs and heavier freight rates. The increase varies from 15c per 100 pounds on the larger sizes to 80c per 100 pounds on the smaller size. Stocks are reported as only fair

owing to the difficulty manufacturers have been experiencing securing raw materials. Prices now ruling are given herewith:

Coil Chain—3-16 inch, $19.20; ¼ inch, $16.25; $12.35; ½ inch, $12.25; 9-16 inch, $12.25; ⅝ 5-16 inch, $13.75; ⅜ inch, $12.75; 7-16 inch, inch, $12.00; ¾ inch, $11.65 per 100 pounds.

Log Chains Follow Upward Movement

Winnipeg.

LOG CHAINS.—Logging chain prices have also advanced in sympathy with the rise in coil chain. New prices show this has moved up from 15c to 25c per 100 pounds. To-day's prices are given as follows: ¼ inch, $18.05; 5-16 inch, $15.55; ⅜ inch, $14.55; 7-16 inch, $14.15; ½ inch, $14.05 per 100 pounds.

Dry Paste Up; Rosin Higher

Winnipeg.

DRY PASTE, ROSIN.—Prices on Stick Fast dry paste have moved to higher levels during the week. To-day's market price now being as follows: 1 lb., pkgs, $2 per dozen; 2 lb., $3.85. The market price on rosin which has held firm locally for the past year has been revised during the week. Selling price to-day has been advanced to 11½c per pound.

Turpentine Fluctuates; Selling Price Same

Winnipeg.

TURPENTINE. — Turpentine prices, while showing a slight increase in the fore part of the week, again dropped to the quotations prevailing last week and is holding firm at the following figures: Barrels, $1.20 per gal.; ½ barrels, $1.23 gal.; 5-gal. lots, $1.25 gal.; 1-gal. lots, $1.25 gal., plus the usual extras for containers. Stocks are reported below normal but will no doubt be sufficient to supply all present demands.

Linseed Oil Remains Unchanged

Winnipeg.

LINSEED OIL.—Despite considerable fluctuation in flaxseed prices no change is reported in the price of linseed oil, which is holding firm at former quotations of $2.20 per gallon for raw linseed oil and $2.23 per gallon for boiled linseed oil in single barrel lots. There is only a moderate demand at this season of the year.

PITTSBURGH MARKETS

PITTSBURGH, Pa., Dec. 19.—The prices, $3 a ton on pig iron, $4 on iron and steel industry is reducing unfinished steel, except rods, and $4 to $6 per net ton on most finished steel products, wire being an exception.

While our previous reports have reflected an expectation that producers would make a strong effort to maintain existing prices, the present reductions do not run counter to that principle. The reductions are, in essence, an effort to maintain prices, slight concessions being made for the purpose of meeting the situation and reducing the tendency to cut prices deeply. The trade was disposed to maintain Government prices because it did not see that it could find a good stopping place in the decline that would have to come sooner or later. Means have been found, however, for establishing a slightly reduced level, and the question now is how long the reduced level will hold. The theory is that it will hold longer than the full Government prices would have held.

The new level is produced by the ingenious device of the general committee of the American Iron and Steel Institute preparing a schedule of reductions, to be submitted to the War Industries Board as a basis for Government prices for the first quarter, and upon the Board's refusal to consider the matter, announcing the schedule in the newspapers as representing the views of the trade. There is no doubt that when the schedule of reductions was prepared it was known that there was scarcely any possibility of the War Industries Board naming any prices to obtain after the present quarter.

Old and New Prices

The reductions are as follows: Pig iron, $3 per gross ton; Bessemer, $35.20 to $32.20; basic, $33 to $30; No. 2 foundry (1.75 to 2.25 per cent. silicon), $34 to $31; malleable, $34.50 to $31.50; forge, $33 to $30; unfinished steel, $4 per gross ton; billets, $47.50 to $43.50; sheet bars and small billets, $51 to $47; and slabs, $50 to $46; rods being unchanged at $57; plates. 3.25c to 3c., or $5 a net ton; shapes, 3c to 2.80c; bars, 2.90c to 2.70c; blue annealed sheets .10 gauge, 4.25c to 3.95c; black sheets .28 gauge, 5c to 4.70c; galvanized sheets, 28 gauge, 6.25c to 6.05c; tin plates, $7.75 to $7.35; standard steel pipe, three points or $6 a net ton, from 51 per cent. to 54 per cent. basing discount.

No change is made in wire products as the wire mills had complained that their costs were particularly high. Various steel products are to be reduced in proportion to the basic material to which they are cognate. How far this will be carried out remains to be seen. Thus if hoops and bands were reduced from 3.50c to 3.30c there would be a reduction of $4 a ton, the same as is made in bars, but hoops being a more finished product might perhaps be entitled to a larger reduction.

At this writing nearly all the steel makers have announced reduced prices in conformity with the schedule, but applying only on new sales for delivery after this month. The blast furnaces have shown an indisposition to reduce their asking prices at once, but, of course, will do so eventually. There is so little enquiry before them, except for practically spot shipments, that there is no particular occasion to reduce prices suddenly. So far as actual transactions are concerned the market is perhaps properly quotable at the old level, but undoubtedly a good buyer prepared to take a round tonnage could purchase at the reduced figures.

Bearing on Contracts.

The pig iron and steel producers are all insisting that the reductions do not apply on contracts, that they will expect customers to take out material at full contract prices. As to this the customers will doubtless have something to say and the producers will probably have afterthoughts. In previous market declines some contracts have stood, others have been revised. Pig iron contracts usually stand, as do contracts for unfinished steel. Finished steel for definite jobs of construction, such as shapes for buildings and bridges, plates for steel cars, line pipe for pipe lines, are ordinarily in the form of irrevocable contracts. Contracts with manufacturing consumers and jobbers have frequently been subject to revision. When occupying this attitude as to holding customers to contracts, producers do not like to be reminded of the fact that if their declared program had been carried out, of the reductions being recommended to the War Industries Board and the Board naming them as Government prices for the first quarter, the Government regulation would have required the revision of many contracts. According to the Government regulation promulgated December 28, 1917, and repeated at intervals afterwards, all contracts after that date had to be so written and interpreted that the invoice price should not be above the Government price at time of shipment. As the War Industries Board is not making the prices the producers are relieved of the regulation, but according to the appearance of things the producers desired the Board to name the reduced prices and it was the Board that refused to do so.

Buying Is Light

Price reductions never stimulate buying, at least at the outset, and the iron and steel market has been particularly quiet in the past week. There is fairly heavy pressure for deliveries of finished steel on some contracts, but only by consumers who can dispose of their finished products at once and encounter practically no risk by having material on their hands in a declining market. During the war steel was very scarce and upon its conclusion there is naturally considerable call for steel in certain quarters, but there is no well rounded out consumption of steel sufficient to engage the full capacity. Mills are, moreover, feeling cancellations of Government orders to a greater extent than in the first three or four weeks after the signing of the armistice.

The future of the iron and steel market depends upon the development of regular investment buying, through new buildings, bridges, factories, etc., being

Continued on page 68

WEEKLY PAINT DEPARTMENT

Aiming to Make 1919 Record Year

Manager of One Firm Says There Never Was as Much Painting to Be Done, and People Have the Money to Do it and Will Do it if Dealers Go After the Business

"MAKE 1919 the greatest paint selling year in Canada's history" is the slogan which more than one paint manufacturer has adopted. Acting on the theory that the whole country was never more prosperous, especially the farming communities, that there was never so much painting that needs doing, and that by pushing business aggressively they can make new sales records these firms are preparing for big things. Now that the war tension is over and business is getting back to normal conditions and a big revival in building is expected, there is every justification for the retailer to plan along similar lines and prepare to take full advantage of every opportunity.

TAKE BROAD VIEW

Taking a broad view of the situation there is every indication that Canada is entering a period of splendid prosperity. While many retailers have been inclined to buy cautiously expecting that a reduction may be made in prices, they are beginning to realize after a careful survey of the situation that any price reductions that come will likely come gradually, and that with the demands that are likely to be made, the labor situation to some extent uncertain, and supplies of many materials limited, the firms that get their orders placed are those that will have the goods for sale when the demand comes.

ONE FIRM'S VIEW

Discussing the outlook with HARDWARE AND METAL this week, the manager of one firm expressed himself as follows:

"First off, I would be inclined to say that great care must be exercised in the purchasing, as we do not know what a day may bring forth. In other words, there is a feeling of uncertainty, and nobody seems to know what is going to take place. This feeling is all wrong and contrary to the true spirit of the day. Therefore, we brush aside all thoughts of pessimism and start the spring with the firm belief that we are going to have a better year than ever. When you come to analyze the situation you have every encouragement to be optimistic. During the past four years there has been a desire to conserve. Now, there is a new condition. Money that has been in circulation as a result of war contracts will be diverted through other sources, and it is, therefore, natural that other lines of business that have been dormant to some extent, must wake up, so that there will still continue to be a large circulation of money. Our idea is to go ahead, endeavor to inspire confidence, and prepare for the biggest year we have ever had. If everybody does the same thing, there is no question as to the result.

LOTS OF WORK TO DO

There never were as many houses to be painted and there never was as much money in the hands of those who are usually good spenders, but if we want to keep on top, we must row, and the merchant who won't row will be forced out of the boat. Remember that 1919 will bring us just what we work for. If you look for dislocation of business, as far as you are concerned, you will have it. If you look for good business, you will get it, no matter where prices go to or no matter what happens.

When the war broke out, England was unprepared and the Empire didn't know just what was coming, but she went at it to win, irrespective of any possible obstacle and she won. Nelson said: "England expects every man to do his duty". Canada says the same thing to the merchant and manufacturer today.

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, December 19.—Linseed oil advanced 6c this week and furnishes one of the chief items of interest in paint markets. Turpentine declined as much as 10c per gallon. There is little improvement in the position here as regards supplies and some are still withholding from any selling activity. The accumulation of a little more stock at southern centres will probably not continue, and prices may stiffen here, for it is anticipated that there will be a freer shipment to European countries. Putty, white lead, and paints are steady and quiet, and varnishes are firm. There seems to be a strong probability of the latter advancing.

Linseed Oil Advances Again; Gains 6c

Montreal.

LINSEED OIL.—The market furnishes one of its frequent surprises again this week in the shape of an advance over last week of six cents. This is the season of the year when the basis very often settled down to a more steady thing and crushers are expecting a more steady market to obtain from now on. As far as future seed is concerned the market seems to be firmer, and anything forward from February is appreciably higher. Immediate sales of oil are limited. and this was really the big factor in the low prices that have been ruling.

LINSEED OIL

Raw, Imp. Gallon—	
1 to 4 bbls.	$1 62
5 to 9 bbls.	1 61
10 to 25 bbls.	1 60
Boiled, Imp. Gallon—	
1 to 4 bbls.	1 64½
5 to 9 bbls.	1 63½
10 to 25 bbls.	1 62½

Turpentine Down 10c; Supplies Scarce

Montreal.

TURPENTINE.—A decline of 10c has been made in the price of turpentine. This is due. it is claimed, to the delay in demand that had been expected from Europe. The movement to sources there from the producing sections of the South was expected to develop quickly and did not, but it is now expected that this will soon manifest itself and that shipments will find their way to the continent ere long. This will have a steadying effect and prices, some think, will not decline much, if any, in the immediate future.

Turpentine.	Per Imp. Gal.
1 to 4 barrels	$1 05 $1 15
Small lots	1 17
(Packages extra)	

Putty Basis Holds; Sales Are Less

Montreal.

PUTTY.—Little new has developed in the putty market, and aside from the small sales that are made so late in the season there is not much business reported. The basis holds without change as follows:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%. 15 days, net 60.

White Lead in Oil Remains Steady

Montreal.

WHITE LEAD IN OIL.—The market is a steady although a quiet one. Sales at this season of the year are not active, and while the supplies are not excessive, there is enough to supply the needs of the trade. Five-ton lots are selling on the basis of $17 per 100 pounds; 1-ton lots at $17.50, and smaller quantities at $17.85.

Glass Prices Hold; Has Moved Freely

Montreal.

GLASS.—The glass season has been very fair all things considered, and the basis has held steadily. No changes are anticipated here and a firm position is expected to obtain for some time. Stocks are ample for requirements but difficulty of securing supplies has not altogether disappeared.

Varnishes Very Firm; Paints Holding

Montreal.

PAINTS AND VARNISHES.—The outlook is that varnishes will hold a very firm position from the price standpoint. It is even expected that prices may be advanced soon. for there is quite a keen competitive buying of raw materials in the United States to-day. European firms are figuring in this and taking up a great deal of the stocks there Mixed paint business is very small at this time and there is not likely to be very much improvement in the immediate future. The outlook for a big business next year is very encouraging, however.

TORONTO

TORONTO, Dec. 19.—Linseed oil has stiffened in some quarters, resulting in a narrowing of the range of prices to higher levels. Turpentine is down somewhat locally, though primary points record firmness, resulting in advances. The glass situation is very firm and some of best selling sizes are said to be growing scarce. Booking business on mixed paints for Spring has very largely been completed and represents a very satisfactory total, according to manufacturers' advices.

Linseed Oil Range Narrows; Up and Down

Toronto.

LINSEED OIL.—Higher prices have been reached on linseed oil from low levels recorded last week, and this has served to narrow the range materially, as other houses are quoting a slightly lower figure from highest point of last week's figures. A general readjustment of values seems to be in progress, though it is hard to interest anyone more than casually just at this season of the year. The movement of oil is light, but it is understood orders are being accepted for delivery up to March 1 at the basis of $1.64 per gallon for raw. Little variation from present levels is looked for during the balance of this year at least.

Linseed Oil—	Raw Imp. gal.
1 to 2 barrels, gal.	$1.64 $1.70
3 to 5 barrels, gal	1.63 1.69
	Boiled Imp. gal.
1 to 2 barrels, gal.	$1.66½ $1.73
3 to 5 barrels, gal.	1.65½ 1.72

Add 10c gallon in smaller quantities.

Turpentine Down In Some Quarters

Toronto.

TURPENTINE.— Turpentine locally records a decline in some quarters Whereas buying generally is light, interests, who are consistent users, are back in the market for their require-

Uniformity in Varnish

One of the most difficult problems in the manufacture of varnish is that of making the product absolutely uniform.

DOUGALL VARNISH

is guaranteed in this respect. Every batch of varnish is made to tried and tested formulas and no varnish is permitted to be shipped unless tests prove it to be true to formula.

Thus a gallon of DOUGALL VARNISH purchased one or two or five years from now will be exactly the same and will give the same good service as a gallon of that same varnish purchased to-day.

SOLE CANADIAN MAKERS:

THE STANDARD PAINT CO. OF CANADA, LIMITED

MONTREAL TORONTO WINNIPEG VANCOUVER

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

BRITISH AMERICA PAINT CO., LIMITED

VICTORIA VANCOUVER CALGARY EDMONTON REGINA

ments. The markets in the South, after a period of quiet, even dullness, show some activity, and this has resulted in a firming of the market with higher prices being asked. Little variation is looked for prior to the turn of the new year, when the demand may be expected to improve. Once inquiry and sales are started, it looks like a comparatively strong market. Prices here are now ranging at following levels:

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1.07-$1.10
2 to 4 barrels (barrels included)	1.06- 1.09
5 gallon lots	1.17- 1.20

Situation Unchanged in Mixed Paints

Toronto.

MIXED PAINTS.—The situation is without change locally this week. Travellers have pretty well completed their year's outside work and manufacturers report the volume of business turned in for Spring as very satisfactory, with every indication that there will be a good selling movement through the coming year. Prices have held firm and without change.

White Lead in Oil Situation Steady

Toronto.

WHITE LEAD IN OIL.—No features of particular interest surround this market this week. Lower prices on pig lead and lower values on oil have not yet exerted a depressing influence on the market, and until corroders are working on the basis of the lower prices it does not seem likely any marked change in present quotations will result. Pure white lead in oil is being quoted at $17.80 per 100 pounds in ton lots, and $18.15 in smaller quantities.

Glass Holds Firm; Putty Unchanged

Toronto.

GLASS, PUTTY.—There seems to be every indication that at least present prices will be maintained if higher levels are not reached before very long on window glass. Stocks on some of the best selling sizes are reported as becoming depleted and it seems possible that a scarcity may develop before the next blow is marketed, as operations are being delayed, it is understood, until February 1. Labor, which is a big element in the manufacture of glass, has asked, and been granted, a higher scale of wages, so it would not come as any great surprise if higher price levels were announced in the not distant future.

Putty records no change. There is a very limited amount moving, and interest in this market is expected to lag to some extent until after the first of the year.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

British Hardware Association Refuses Membership to Germans

AT a meeting of the Wholesale Hardware Association held in London, England, recently it was announced that the Council had thought it opportune to take steps to keep the activities of the Association free from enemy influence, and, therefore, in the new form of proposal for membership a clause had been inserted asking for the country of birth of new candidates and whether or not they were naturalized.

The following resolution dealing with enemy influence was carried:

"In view of the eminently unsatisfactory manner in which houses of enemy origin and enemy interests are being dealt with, the members of this Association express their strong opinion that the various trade associations should be asked to act as advisory committees for their trades to confer with the officials of the Board of Trade with a view to getting rid of enemy influence."

Hon. F. M. B. Fisher, speaking on "Restriction and Control of Trade after the War," said that of all the problems which lay ahead the most vital was how to get rid of the inefficient State control which was destroying trade. The bill under which it was proposed to control imports and exports for three years he regarded as a serious menace to the trade relations of this country. Ostensibly the purpose of that bill was the encouragement of British trade, but he believed it would have the opposite effect. There appeared to be a shocking lack of recognition of the importance of trade to the life of the Empire. He did not believe that in this country the political mind had yet realized the relative value of trade and politics. The trade of the country should be left in the hands of the men who had made it what it was. One of the most important things to be done was the reconstruction of the Reconstruction Department. If the Imports and Exports Bill became law it would result in the strong entrenchment of a number of State Departments which would have no desire to relinquish their authority. That would not be to the advantage of the country, and the Association which he represented was out to get rid of that. Discussing the tonnage difficulties, he said that when the armistice was signed the tonnage owned by the British Empire would automatically increase by 30 per cent., and when the building of American ships was completed America would have a larger mercantile marine than we had when we started the war. There was going to be more tonnage and cheaper freights than we had seen for a long time, and to set up any system of tonnage control would be nonsense. If control was necessary in some directions there was no reason why we should not have it, but first let it be clearly understood what were the things it was necessary to control. Certainly there must be no attempt to tie up our overseas trade in order to control some of the raw material.

WEEKLY MARKET REPORTS

Continued from page 83

projected. The investors have more to wait for than a reduction in iron and steel prices, for in carrying out their projects they must buy other materials also, and they must wait for them to come down. It is clearly understood that one motive actuating the iron and steel producers to reduce prices promptly was that of setting a good example to sellers of other commodities, to induce them to reduce prices also. Then the labor situation must be improved before much work can be undertaken. Premiums for labor must disappear and men must be willing to put in a full day's work for a day's pay. These readjustments will require some time still, but there are many observers who think that within three months' time conditions will be such as to encourage investors to go ahead with new projects.

Trade Inquiries

895. **Hardware and tools.**—A Johannesburg agent with twenty years' standing is prepared to take up the representation of Canadian manufacturers in all lines of household hardware and shovels, spades, axes, hammers, and saws, and other tools.

896. **Oil engines.**—A Natal firm of wholesale merchants, with a field staff selling agricultural machinery, make inquiry for the supply of small oil engines for farm use, suitable to run electric equipment for ten to thirty lights, must also be capable of working farm machinery, when not required for light machinery.

897. **Lighting equipment.**—A Natal firm of specialists in farm goods, ask for particulars which would enable them to quote on electric lighting plants for country houses. Details and prices must be submitted so that they may quote complete installation, oil engines only, or lighting plant only, without engines.

898. **Hardware, tools, stoves.**—A Johannesburg agent with good connection is prepared to take up Canadian agencies in such lines as hardware, all kinds, tools, household, spades, shovels, axes, saws and other lines suitable for the wholesale jobbing trade. Stoves, enamelware and household utensils are lines which this agent can handle to advantage.

899. **Carbide.**—A Johannesburg firm of engineering merchants, with branch offices and warehouses in each principal centre of South Africa, is prepared to take up the representation in this country for Canadian carbide not already on the market.

905. **Domestic enamelware.**—A Manchester firm inquires for a Canadian manufacturer of domestic enamelled ware open to appoint an agent.

A Quality Standard

"Equal to Berry Brothers" is a statement often heard by varnish buyers. This is because the uniform dependability of all their products has caused them to become the standard of comparison.

There is no surer prelude to an artistic and lasting finish on woodwork, walls, floors and ceilings than Berry Brothers' varnishes, enamels and stains.

The wide knowledge of this fact among discriminating buyers makes all products bearing the Berry label easy to sell.

CONSERVE LABOR

Everyone possesses some degree of energy. That energy expressed is labor. Without labor the world would suddenly stand still. Production of any kind would be absolutely impossible. Humanity would perish.

Labor is, and will continue to be scarce. Labor is costly. Expenditure of labor through inefficient methods is a waste not only of labor, but of time and money, all of which should be expended more profitably.

A Figure 109 Installation
(From an actual photograph)

BOWSER
ESTABLISHED 1885
SYSTEMS

for the storing and handling of oil will conserve

70%

of the labor necessarily expended by less efficient methods.

They also conserve—

TIME
CAPITAL
SPACE
MACHINERY
LIVES
PROPERTY
MATERIAL

Bowser Systems are

LEAK-PROOF	DIRT-PROOF
LOSS-PROOF	EVAPORATION-PROOF
FIRE-PROOF	DETERIORATION-PROOF

An inquiry carries no obligation whatever. Let us help you conserve labor.

The Ideal Christmas Present

Automobile Skates

The Only Skates With Aluminum Tops

SEASONABLE and attractive—appreciated by nearly every boy and girl and by most "grown-ups" as well.

It will pay to push them hard between now and Christmas.

A nice "Christmassy" skate window will draw lots of business which would otherwise go to jewelers and other stores.

Hangers, display cards, electros, etc., free on request. Write for them.

How's your stock?

Canada Cycle & Motor Co., Limited

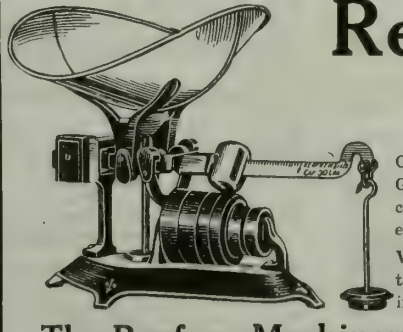
Sell Handles that are Most in Demand

STILL'S

There are more of STILL'S HANDLES sold in Canada than any other make. What's the logical conclusion of this fact?—*they are the best.*

There's a Still Handle to meet every need: Axe, Pick, Sledge and Hammer Handles; Cant Hook and Peavie Handles.



There's nothing like selling the best of everything. Good profits in our handles, too.

J. H. Still Mfg. Company

ST. THOMAS -:- ONTARIO

Stirs up Business

Precious few housewives realize the many uses of an accurate scale in the kitchen—saving losses in careless weighing at butchers and grocers—weighing produce before marketing, weighing flour and other ingredients while baking, etc., etc., etc. It is surprising what a little bit of salesmanship and displaying will accomplish in stirring up big business in Renfrew Scales! The Renfrew is compact, handy, and stands hard knocks. It doesn't get out of order and always tells the truth. A Government inspector's certificate accompanies every Renfrew. These features make the Renfrew a lively seller these days. Push business with the

Gregg Plow Eveners Pull Big Business

Gregg Plow Eveners, like Gregg Wagon Sets, Neck-yokes and Hitches, are built for service. They are guaranteed against defective materials and workmanship.

Send for copy of catalogue describing our full line.

Any jobber in the Canadian West can supply you with Gregg Goods.

Gregg Mfg. Co., Limited

WINNIPEG

Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

THE BUYERS' GUIDE

If what you want is not here, write us, and we will tell you where to get it. Let us suggest that you consult also the advertisers' index facing the inside back cover, after having secured advertisers' names from this directory. The information you may desire may be found in the advertising pages. This department is maintained for the benefit and convenience of our readers. The insertion of advertisers' headings is gladly undertaken, but does not become part of any advertising contract.

Easier and Better Housecleaning

NORTHERN ELECTRIC VACUUM CLEANER

appeals to the thrifty housewife because it means real economy in time, energy and health.

The extra large nozzle, specially designed nozzle brush, combined with the large fan and high-speed motor, makes this cleaner faster, more thorough and fully dependable.

Extra attachments make it possible to clean walls, picture moulding, draperies, upholstered furniture, pianos, etc., etc.

It is strong and durable. Weighs only twelve pounds.

Write our Nearest House for literature and full particulars to-day.

Some Folks Prefer Free Power

The sale of a Washing Machine will often depend on the cost of the power required to run it.

Prospects who will not buy an electric washer and wringer, such as the "Seafoam" will purchase an "Ideal" water power machine quite readily, because the power is obtained from the tap without additional cost.

Don't miss a sale. If your customer finds the "Seafoam" electric Washer and Wringer too expensive to buy or to run, try the "Ideal" water power washer. It is as nearly perfect as a piece of machinery can be. It is the most popular water-power washer on the market and has earned its popularity by merit.

To make sure of a sale, show the "Seafoam" and the "Ideal" side by side. Each is supreme in its class.

Repeat Sales are the most Profitable—

BECAUSE they cost least in selling-energy---and they sell **other goods** as well.

But repeat sales come only with the **first** sale of **Quality** goods.

Laco Lamp Customers are the Store's Customers---because they have bought a first rate article, that gives **better satisfaction** at **lower cost**---from a man **they have proved** "knows his business."

It **pays** to handle this business--- and it pays **best** to sell a **Quality** lamp. Sell

LACO LAMPS

and make your store headquarters for lighting efficiency in your district.

Be A Lighting Expert

and Build REPEAT Lamp Sales.

It pays to be a LIGHTING SPECIALIST.

With the co-operation of Laco Engineers it is easy for the Dealer to give a specialized service and expert advice for the lighting of any building or any purpose---and this co-operation is at the call of Laco Dealers any time, any place.

Specialize---be an expert lighting man---Sell Laco Lamps!

(Tungsten)

AUTO-LAMP BULB

(Nitrogen)

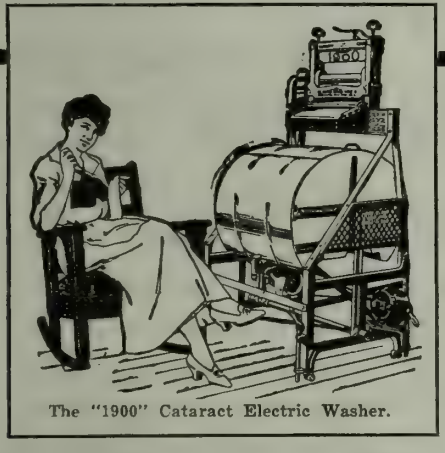
We take this means and opportunity of thanking our many friends and acquaintances of the hardware trade for their valued support during the year just closing, and to extend to each of you our sincere good wishes for a Merry Christmas and a Happy and Prosperous New Year.

BULB G 12

One of the good things we can offer you next year is a complete range of BLUE LABEL automobile lamp bulbs of our own manufacture which will be ready for delivery during the first quarter of 1919.

Orders now being accepted.

Prices quoted on application.



HEADLIGHT

Manufactured by

THE CANADIAN TUNGSTEN LAMP CO., LIMITED

HAMILTON, CANADA

Branches—WINNIPEG TORONTO MONTREAL

The "1900" Cataract Electric Washer.

With the addition of our two newest and greatest models, the "1900" line is complete.

The Washers the Women Want

The articles that are in demand are the profitable ones, from the Hardware Man's standpoint. Those that are hard to sell—the unknown ones—prove less lucrative in the long run.

It's Profits That You Want

and you can get them from "1900" Washers.

For more than twenty years we have been making and selling nothing but washing machines—the very best that can be made. Our whole attention has been centred on "1900" Washers, on perfecting and developing new models.

The "1900" Cataract Electric Washer

These most modern washers, as well as the other "1900" machines—the Gravity, Water Power and Gasoline Motor Washers—are sold everywhere through our extensive advertising, which is the largest publicity campaign conducted for washing machines in Canada. Inquiries in large numbers result from this advertising and these inquiries are turned over to such "1900" dealers as have proven their worth in their different territories.

If there is no one selling "1900" Washers in your territory there is a chance for you. Make use of it by writing to-day to the Wholesale Department.

The "1900" Agitator Electric Washer

The "1900" Agitator Electric Washer.

THE "1900" WASHER COMPANY

Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

Electric Steam Radiators

Each radiator independent, complete with glass leg rests, extension cord and plug, etc. The radiator generates steam heat, and is healthy and economical.

Our radiators give the heat and are indispensable for sick rooms, fall and spring use, as a complement to present heating system, garages, temporary heating, etc.

Rapid Radiators will satisfy your customers. Write us for full information and terms.

Rapid Radiators Limited,
196 KING Street West

"Complete Satisfaction Our Constant Aim"

Do You Want Export Business?

ADVERTISERS in the "Export Numbers" not only reach every worth-while hardware buyer in Canada, but also reach a select list of 1,200 buyers in foreign lands. The next "Export Number" will be issued Feb. 2. Last forms close Jan. 26. Copy and cuts for the export section this issue should be sent in without delay. Regular advertisers may use space pro rata on contract. Rates same as in ordinary issues. Two pages, $100; one page, $55; half page, $31.25. Extra color if desired, $18.75 page.

It would cost you many thousands of dollars and take years for a representative to call on the 1,200 foreign buyers who receive the "Export Numbers" of HARDWARE AND METAL. For the modest rates given above, you can reach these buyers simultaneously.

Write for evidence of direct results secured by advertisers in these numbers.

Success and Your Associates

ALWAYS associate with men who are earning more money than you are. Such is the advice given by a man whose name is known the world over for his own success and the business which he created. It is good advice of a certainty, but we are not urging that it is the best advice. At the same time it is wise to associate with better or bigger men than you are yourself, because you are likely to be lifted up to their levels.

Most of us would probably like to be the intimates of J. P. Morgan, or of John D, or of Charlie Schwab, or Canny Andrew. If we had a speaking acquaintance with John Wanamaker, or Lord Beaverbrook, or Lord Shaughnessy, and with other distinguished and successful men, we would take comfort from the fact.

And most of us would feel rather small and uncomfortable if we were placed beside President Woodrow Wilson at a dinner table, or beside Sir Robert Borden, Sir Herbert Holt or Sir Wm. Mackenzie. And the reason would probably be that we know so little of the knowledge that really counts. If these successful business men engaged us in conversation we would probably find ourselves knowing very little about the things that matter.

This will illustrate the point:

Here's a true story. A Toronto manufacturer found himself on a train going to Albany in company with a number of distinguished Americans about to attend the inaugural ceremonies of a State Governor. A washout led to a delay, and the Canadian was thrown into close association with senators and congressmen and prominent lawyers. They bantered the little Canadian about Canada. He had the pluck of a bigger man. He had been a constant reader of THE FINANCIAL POST, and had absorbed many facts about Canada. He surprised his American traveling companions with his positive, well-informed and wide knowledge of Canada. When the company reached Albany, the Canadian was persuaded to attend the ceremonies, and was introduced as the man who knew all about Canada. The Governor was interested in Canada, and said so, and the little Canadian found himself telling the story of Canada very ardently to a very attentive listener, much to the amusement of his friends who introduced him.

This man made a hit on that journey, and many friends. One of the company gave him a stock market tip worth a fortune.

The point of this story is: You, as a Canadian, can make yourself informed very fully and intelligently if you become a regular reader of THE FINANCIAL POST. You can make yourself a worthy companion and intimate of presidents and magnates. The world likes to listen to men who know something well, and who can talk interestingly and informingly on the subject of their study.

You can become worth listening to if you know your Canada well. And you can get the kind and amount of knowledge concerning Canada which will make you interesting to others if you will read THE FINANCIAL POST regularly each week.

IF you read THE FINANCIAL POST REGULARLY you will find yourself keeping company with the highest paid staff of editors engaged on any publication in Canada—trained men who know how to make others know what they know and learn.

You will find yourself living in a most interesting world—the great, throbbing world of business. You will have your thoughts tremendously stimulated and helpfully directed. You will find yourself becoming a fit table companion for big men — this because you will have knowledge of a quality that will keep you from shame.

What is it that keeps you and THE POST separated? It cannot be its subscription price of $3. Probably it is because you are not very well acquainted with this paper.

We are going to put it to you this way: If you have the desire to be worthy of association with big men, then prepare yourself for such association by reading THE POST, and to make acquaintance easy, we provide the coupon below. It offers you THE POST for four months for a dollar bill.

The MacLean Publishing Company, Limited,

143-153 University Avenue, Toronto.

Send $\frac{\text{me}}{\text{us}}$ THE FINANCIAL POST for four months for One Dollar. Money $\frac{\text{enclosed}}{\text{to be remitted}}$

(Signed)

Make Money from Good Pumps---Profit

Unless a metal pump is made just right it will leak at joints or valves.

"Aremacdee" pumps do not give dealers who sell them trouble and loss from defective service in "Aremacdee" pumps sold customers.

Pumps for every use—hand or motor—force or lift—every type a dealer can sell.

All in the big catalogue. Ask for it—for dealer prices—for dealer terms.

The R. McDougall Co., LIMITED

Say You Saw It In Hardware and Metal

OWL METALS

Somebody's selling Babbitt and kindred alloys in your locality. You would be that somebody if you pushed Owl Metals. Especially Owl Traction Babbitt for Tractors. Owl Babbitt Metal for Threshers.

OWL METAL COMPANY WINNIPEG

Hardware and Metal Subscribers

Buy for business as well as for private consumption. That is why one inquiry frequently pays for an entire year's advertising. Advertisers in HARDWARE AND METAL reach only the cream of the trade—the best and biggest buyers in Canada.

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

Improved No. 1 Valve Spring Lifter
For Ford Cars

A FEW FACTS:

1. Specially designed for Ford Cars.
2. This Lifter is made of strong, tough, malleable iron.
3. Can be folded together, occupying very little space in tool chest or roll.
4. The improved ratchet holds the lifter in any desired position when compressing a valve spring.
5. You have the free use of both hands.
6. The springs are made from selected spring stock.
7. The slot at the end of arms is **WIDE** and the stock heavy.
8. Length overall, 8¾ inches.
9. Weight for mailing, approximately 1 lb.
10. Carefully packed in carton properly labelled.

LIST PRICE

No. 1 .....65 cents each

Auxiliary Radius Rod
for Ford Cars and Ford One-Ton Trucks

You will add 100% to the strength of Axle and Radius Rod already on Ford Cars.

The Clamps are Solid and of Selected Malleable Iron. The Bar is **SOLID** ⅝-inch, carefully selected material and machine threaded. The finish is black Japan, properly baked on.

NOTE, **Mr. JOBBER:**

Plans Laid Now Mean Dollars and Cents

With the turning of the New Year come plans for the New Year's business—the home-builders' plans for their requirements, the building or furnishing of the home—the hardware retailers' plans to meet this demand—the wholesalers' plans to take care of the immediate requirements of all, and last, but not the least — the manufacturers' plans to keep his production up to the demand for his lines.

Our buyers are laying plans to have the stocks complete in every respect in anticipation of your needs this spring. Don't let your customers find you out of the lines they require.

We extend to you our best wishes for a happy and prosperous New Year and thank you for your favors during the year just past.

WROUGHT STEEL BRACKETS

These brackets are famous for their correct design, superb strength and attractive finish.

The use of the arched forms of steel in the wall and shelf plates give much greater strength than if flat metal was used.

The angle formed brace is well riveted and renders it secure against buckling or bending sideways under the severest strain.

Baked enamel finish, packed half dozen in a box. They sell quickly, easily and net a good profit to you.

Put This Stand On Your Counter

This attractive stand displays a Millers Falls Bit Brace No. 732, the only brace that is nationally advertised. It shows the features of the brace and is an effective silent salesman. Sent free with a small brace order.

Once you put it on your counter you will find that there is a market for these braces which you did not realize existed.

Our advertising in the "Saturday Evening Post" features No. 732 Brace as the third tool for every household, and it is creating a buying interest that you should cash in on.

This brace is already the carpenter's favorite, so that it appeals equally to amateur and professional tool user and will help speed your whole tool line. No. 732 Brace has the famous Millers Falls tool quality throughout. Ball-bearing head, ratchet and all-purpose chuck that takes twist drills as well as auger bits.

Send for our sales handbook, "How to Sell Tools." It is full of selling ideas that are worth money to you. Free on request.

For the Needs of Peace

THE ending of the great world-war has opened the way for new construction that has long been urgently needed—schools, homes, churches, factory buildings, public buildings — structures of all sorts. Sheet Metal will form an essential part of most of these buildings. Sheet Metal is used for cornices, roofs, sidings, eavestrough, balconies, flashings, ridges, gutters, ventilators and in many other ways.

It is vitally important that all the Sheet Metal used should be lasting, should resist corrosion.

The important factor of cost is all in favor of Ferric Sheet Metal.

Among sheet metals made from iron ore base, time and the experience of hundreds of building owners have proven that TONCAN METAL is unsurpassed in its ability to resist corrosion—to give long satisfactory service.

If you are building for permanence, specify TONCAN METAL for all Sheet Metal work.

Our "Corrosion Book" gives a lot of interesting information about sheet metal. It's yours on request.

Those Hard-To-Get-At Nuts

In every garage, machine shop, blacksmith shop and factory in your locality there's a lot of unnecessary cussing that you can turn to profit.

Those nuts that are so hard to get at with an ordinary wrench are easy prey to the Original "Westcott" adjustable "S" Wrench. The "Westcott," besides being the most convenient and useful wrench for ordinary use, can be used in places inaccessible to the Monkey-Wrench. It stops the cussing and adjusts the nut quickly and effectively.

"Westcott" Wrenches are fully guaranteed to do their duty. We empower you to refund the purchase price of any "Westcott" that fails.

The "Westcott" is easily adjusted by the hand that holds it. Its handle is made of first-class refined malleable iron and the jaws of forged steel scientifically h treated.

If your jobber cannot supply the "Westcott," write us and we will tell you who can.

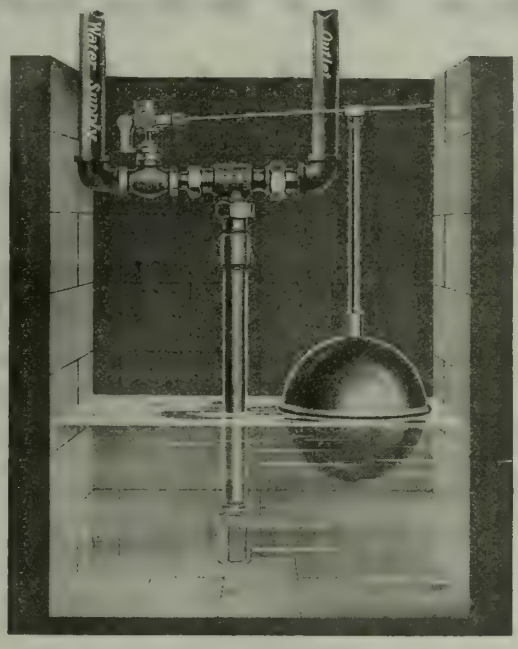
POSTAL STATION B

A Dependable Cellar Drainer!

When a customer enquires of you about a proper apparatus to keep his cellar dry, it's up to you to make no mistake.



He is up against a very annoying nuisance, and if you sell him a cellar drainer that is dependable, his gratitude will know no bounds.

Morrison Automatic Cellar Drainers as the name implies operate themselves—are willing workers, *always on the job*. A veritable

"Watch Dog of The Cellar"

They have a *greater lift* than another cellar Drainer; 30 feet when connected to 60 lbs. water pressure.

All working parts above water—of simple construction and easy to install.

Recommend the

MORRISON Automatic Cellar Drainer

The same **Morrison Guarantee** back of this apparatus as is back of all our products.

That's your assurance of dependability.

We would welcome an opportunity to send you information and prices. If you will but write us.

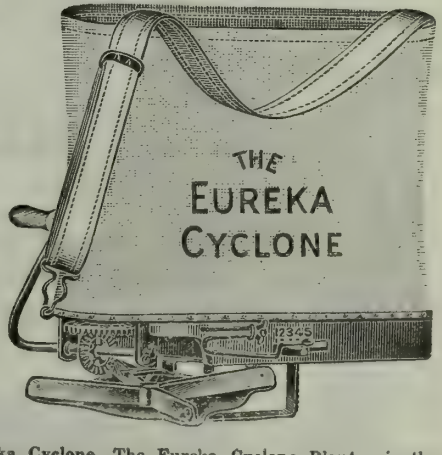
EUREKA PLANTERS

Your Customer Will Be Pleased With An Eureka Planter. A Satisfied Customer Means More Business.

Eureka Planters are made from the best materials, simple in construction and easy to operate. The fact that they are measuring up to all we claim for them is making a tremendous appeal to dealers everywhere.

Eureka Corn Planter



In one and two-hand styles, well finished, light and durable, positive and accurate in action. A seed guard determines the number of kernels to be dropped in each hill. Only one lot of seed can pass into the jaws at one time. A flat steel spring is used in place of the cheap brushes used in ordinary planters, which constantly wear out.

Get next to the Eureka Line.

There's money in it for you.

We manufacture many more handy labor-saving devices for the Farmer and Gardener.

Write to-day for literature and prices of our complete line.

Eureka Cyclone—The Eureka Cyclone Planter is the most economical Planter of its kind on the market to-day. It will distribute a more uniform spray of seed over the land than the old hand method. Easy to carry. A light weight device, yet durable. Planting with the Eureka Cyclone results in a greater yield to the acre.

EUREKA PLANTER CO., Limited, Woodstock, Ontario

SIMONDS CANADA SAW CO., LIMITED

Guaranteed to Cut 10% More Timber".

SIMONDS

"The Saw Makers"

The superiority of Simonds Crescent Ground Cross-Cut Saws is due to the quality of the steel used in them and the method of grinding. Crescent grinding is an exclusive process, used only in Simonds Saws. It means teeth of even thickness throughout the length of the saw, and the blade tapered for clearance to the greatest degree consistent with strength. This grinding makes cutting easy because it prevents binding in the kerf. Write for Booklet.

4 Good Reasons
---READ 'EM!

Why you should sell Rolled Thread Bolts and Screws:

BETTER QUALITY—Rolled Thread Bolts can only be made from first quality Basic Open-Hearth Stock.

STRONGER—Actual tests show 13 per cent. greater strength than Cut Thread Bolts.

NO USELESS WEIGHT—Shanks are smaller than threads. No useless weight to pay freight on.

BIG FIRMS ADOPTING THEM—Some of the largest users on the continent will accept nothing else—and they always investigate before acting.

From War to Peace

SANE optimism is in the air throughout the five stories of the Gillette office and factories.

From the office to the shipping department, we look forward to the twelve months of 1919 with optimism of the finest and most wholesome kind.

Just as we planned to develop business along the lines of war needs, so we have turned our efforts now to peace and "business as never before!"

As before, our plan is solely to create demand through the retail store. Not a week goes by but we interest men in the purchase of a Gillette—men who pass your store.

Every dealer can get his share of this business, but the man who, like ourselves, plans an aggressive campaign to sell Gillettes, will profit most by the prosperity that follows victory!

The Gillette Safety Razor Co., of Canada, Limited, wishes you to enjoy

Stanley Chest Handle No. 1207

WHEN Captain Kidd buried those chests heavy with doubloons and jewels, he doubtless was careful to see that the chest handles were amply strong for the work required of them. The Stanley Chest Handle No. 1207 here shown is not merely sturdy, but it permits of a comfortable grip and is especially suitable for use on chests and boxes which have surface for applying only a narrow plate.

This handle is furnished in Plain Steel and in Japan Finish only. The handle is 4 inches wide and has a plate 1 3/4 x 7/16, with a 5/16 inch wire, 7/8 x 8 screws and is packed 1/4 dozen per carton or 12 dozen pairs in a case.

Everyone who needs a chest handle needs a good one and this is it!

Shippers Demand "Cash" from Railways

Only Fair, They Say, if They Must Settle Promptly For All Shipments That Railways Should Pay Up When Claims Are Made For Damages, Over Charges— Railway Order Postponed Until March 1

THE proposal which the Canadian railways announced some weeks ago of putting all shippers on a cash basis on January 1 will not go into effect until March 1. At a meeting held in Toronto and attended by a number of manufacturers and retailers, representatives from the accounting departments of the various railways and the secretary of the Canadian Railway Board, it was decided, after going carefully into the question, to postpone putting the measure into effect for two months.

It was stated to HARDWARE AND METAL that the first announcement sent out by the railways to the shippers was misleading and resulted in a great deal of misunderstanding. The announcement led many to believe that no goods would be accepted for shipment unless the charges were either paid for or a bond was given that would assure the payment inside of 96 hours.

Against the Proposal

Many shippers, especially some of the larger ones, regarded this action as decidedly drastic and protested vigorously, pointing out that it would cause them a great deal of inconvenience. It would mean that they would have to prepay all charges and then collect from the retailer.

At the conference it was explained that it was not intended to have the measure work out in this way. The railway authorities stated that they had intended to allow shipments to be made as at present, with the option of collection being made at either end. This would leave all shipping arrangements as they are now, subject to whatever understanding is arrived at between the shipper and the consignee.

Want Their Money

The representatives of the railways, it is stated, took a firm stand in regard to the cash basis and pointed out that they proposed to get their money and not have collections spread over weeks and months. They claimed that this "credit" system had resulted in too many losses and that they proposed to put all shippers on the same basis. At the present time some pay cash and others do not, but after March 1 they plan for all to pay cash.

The manufacturers and retailers, as pointed out in a former issue of HARDWARE AND METAL, have a grievance against the railways in that money due them from the railways for overcharges and other causes is often not paid for six months or a year. Claims for damages, it is stated, are not settled promptly in a great many cases. These matters were brought up at the conference and the manufacturers and retailers declared that if the railways are going to collect cash from everyone in future they ought to arrange to settle all damage claims, overcharges, etc., on a cash basis and inside of a few days after the claims are made.

They made the point very strongly and also pointed out that the proposal of the railways to only allow a limit of 96 hours for payment for shipments was unreasonable and in many cases a physical impossibility because merchants, especially those getting in large quantities of goods from overseas, did not get the necessary papers in that time and could not check up the shipments to see that they were OK or enter any claims for damages that might be necessary.

It was suggested that one week at the very least should be allowed for settlement, preferably a little longer.

The justice of these claims of the manufacturers and retailers was admitted and it was finally decided to postpose the date at which the railway's order would become effective in order that the questions at issue may be taken up more thoroughly with business interests all over the country.

Will Meet Later

This is being done immediately and circular letters are being sent out this week by the Canadian Manufacturers' Association. It is expected that some other suggestions may be made and which will be in the interests of all and when the information is in a committee will meet and decide upon what recommendations are to be made. They will then take the question up with the representatives of the railways and Secretary of the Canadian Railway War Board.

When the new order becomes effective it will mean that the accounting systems of many large shippers will have to be changed. There has been some objection to this on the grounds of inconvenience. The railways, however, have made it plain that the cash basis plan is to be put into effect and as many of the manufacturers and others are working either on a cash basis or as close to it as possible, they state that in the long run the plan would work out in the best interests of all.

For Forty Years

The Canadian railways have been granting credit to shippers and time in which to pay for more than forty years, one official stated to HARDWARE AND METAL. Some months ago it was decided to go on a cash basis as a result of the policy that was inaugurated in the United States by Director-General of Railways McAdoo. The plan, it is stated, worked so well across the line that the Canadian railways after investigating thoroughly took the necessary steps to make it effective in this country.

"Between increases in wages and higher operating expenses the railways need all the money they can get now to carry on business," said one official to HARDWARE AND METAL. "Under the old system of granting credit there were many losses and often delays and inconvenience and all sorts of disputes and quibbling, sending out and chasing up accounts and so on. It is hoped by the new system to eliminate all troubles of this kind and to reduce all losses from collections to a minimum.

Stove Prices Guaranteed Until April 1

At Meeting Held in Toronto it Was Decided to Continue Present Basis—Reduction in Pig Iron Prices Will Make But 1% Difference in Finished Stoves—Prices Have Been Advanced Moderately

HARDWARE dealers may purchase their requirements of stoves and ranges during January, February and March at present prices, and they will be taken care of by the manufacturers in so far as the guaranteeing of prices are concerned. Any purchases made within this time will be invoiced at to-day's prices, and if declines occur by April 1 a refund will be made accordingly.

In effect, this is the decision arrived at by the stove manufacturers at a meeting held in Toronto.

"Prices for stoves and ranges have not been as high as they should have been," said a Montreal stove maker to HARDWARE AND METAL. "Costs of raw material steadily increased throughout the year and when advances were made these were the closest possible and did not begin to cover the cost to the maker and allow him any kind of a margin. The stove makers of Canada have made little or no money."

It was further pointed out that, in view of the decreased cost of pig iron the trade would perhaps expect stoves to cost less. "This will mean a decrease in the cost of manufacture of about one per cent.," said one manufacturer, "thus there will be practically no difference in the situation." It is evident that the manufacturer can make no price changes on the basis of his present buying.

Prices to Hold

That prices are likely to rule steadily for the immediate future is probable. It will be recalled that little or no material above the scant necessities of the makers was brought in last fall as it could not be secured. There is therefore little stock to go ahead with and deliveries of raw material are expected to be slow now that winter has set in. Transportation is a big problem in addition to that of material shortage and it will take considerable time to overcome this.

Some dealers plan to convey these facts to customers through newspaper announcements and in other ways will reach out for all the stove business possible. There are no indications that prices are to decline rapidly, and manufacturers have gone on record as against entertaining any thought of them reaching pre-war levels. Statements from the Government heads appear to confirm the continuance of a more or less steady basis, and merchants may profitably employ themselves it is stated, in carrying on business energetically.

British Government Relaxations On Exports And Imports Affecting Canada

THE British Board of Trade announces that the following relaxation of the existing prohibitions of export and import is now in effect.

A. Export Prohibitions

The following is a list of the articles affected and of the changes made in the nature of the prohibitions applicable to each. In explanation of the changes it should be noted that goods on list A are prohibited to all destinations, and goods on list B to all destinations outside the British Empire, while goods on list C are prohibited only to countries neighboring enemy countries.*

It will, of course, be understood that the existing position regarding trading with enemy countries is in no way affected by these modifications.

(Note.—Attention is called to the fact that by the proclamation of October 1, 1918, all goods, whether mentioned by name or not (except printed matter and accompanied by personal effects), are prohibited on list C.)

Headings Transferred From One List to Another

(A) Nails manufactured from iron or steel wire.
(A) Screws manufactured from iron or steel wire.
(C) Manufactures of wire and wire rods not otherwise prohibited.

AMERICAN WAR BOARD LIFTS RESTRICTIONS ON RUBBER

The United States War Trade Board announces, in a new ruling (W.T.B.R. 414), that all restrictions upon the quantity of crude rubber which may be imported from overseas have been removed. Applications for licenses to import this commodity will now be considered without limit as to quantity.

It is also announced that the War Trade Board withdraws the Government option price and will require no further undertaking relative to maximum values.

Careful consideration has been given to the advisability of eliminating the requirement of guaranties, but it has been found necessary to require these undertakings for the present.

This relaxation, however, will not authorize the importation of any shipments of rubber from any country other than the country of origin. Applications for import licenses for such shipments will not be considered until after February 13, 1919. The same policy will be applied to applications for licenses to import shipments of rubber now in the United States which have been made in violation of the regulations.

BIG DEMAND FOR STEEL

Reports from Sheffield, England, state that peace business is coming forward in increasing volume from both home and overseas sources, mainly for saws, files, and various descriptions of hand and shop tools. A good deal of work has also begun on railway axles, tyres, springs and the like. In such departments the makers can see full work for a long period, and only fear that they may be hampered by want of labor. The prospects for agricultural steel and farm tools has never been brighter, and a record demand next season is anticipated. Material is now available, but makers are crying out for more workmen.

Two Lines With Big Possibilities

Auto and Tractor Accessories and Electrical Goods Will be Splendid Sellers According to Many Hardwaremen Who Are Planning to Handle Them More Extensively Than Ever—What Are You Planning For Next Year?

ALL parts of your business are not equally profitable. In the very nature of hardware merchandising there are some lines that sell much faster than others. Now is a splendid time to go over your stock and check up carefully. You will be surprised how many changes you can make that will help you to make a faster turnover and hence bigger profits next year. The more goods you can handle and the faster you can keep them moving the bigger your sales records will be and that is a goal towards which all merchants strive.

Many firms will in the next few weeks while taking stock consider carefully what lines they should increase, what lines they will buy less of and what lines they will eliminate altogether. This requires a thorough knowledge of the needs of the territory in which the store is located and its possibilities for development.

Steadily Expanding

Many dealers to whom HARDWARE AND METAL has talked recently mentioned two lines especially in which they were planning to increase sales next year. One of these is auto accessories and the other electrical goods.

It is a question which of these lines is going to be the biggest seller in the future. While some hardware men will tell you that they are doing a splendid and steadily increasing business in electrical goods others will tell you that their auto accessory departments show an equally profitable expansion. It seems to be generally conceded that there are going to be enormous opportunities in both the auto accessory business and in electrical specialties. With money pouring into the farmers' pockets from every side and with the steady extension into the rural districts of electric power lines, there is certain to be a tremendous call for electrical labor-saving devices, washing machines, vacuum cleaners, motors for various purposes, toasters, percolators and other goods. On the other hand the figures issued by the Government show that the number of licenses issued for autos is growing at the rate that only those who are in close touch with the situation appreciate.

Hardwaremen's Chance

All this means golden opportunities for the hardwaremen, and that they are alive to their chances and are getting ready to cash in on this business is shown by the plans they are making. Many firms are getting ready also to handle tractor accessories in connection with auto accessories. These lines make a combination, they claim, that will not only show splendid profits but go well together. While the tractor business is as yet only in its infancy great things are predicted for it. A representative of one of the largest firms in the world making both autos and tractors stated to HARDWARE AND METAL that they would not be surprised if in a very few years their tractor business did not surpass their auto output, and they are not looking for any diminution in the auto business. On the contrary their output for the coming season is only limited by the ability of the steel mills to fill orders.

Worth Studying

This situation is worth the most careful consideration on the part of any hardwareman. Two years ago tractors, that is, the smaller and less expensive varieties were largely in the experimental stage. Five years ago the handling of auto accessories in hardware stores was the exception. Many firms were just beginning to see the possibilities of the trade, few were handling them in large quantities. Many hardwaremen will tell you to-day that no department of their store has developed as rapidly or as steadily as the auto accessory business. In spite of war conditions and everything else it grew and grew.

"We started five years ago with a line of wrenches," said C. A. Whitwam, of the Hobbs Hardware Company, London, Ont., to HARDWARE AND METAL. "We thought auto accessories was going to be a profitable line to go into, but we wanted to feel our way. The business has grown steadily and shows every indication of still growing. We started with a stock of wrenches and this year alone we bought $20.000 worth of tires to say nothing of other goods."

Enlarging Department

"We have done a splendid business in accessories," said W. J. A. Lytle, manager of the Aikenhead Hardware, Limited. "They are an all year seller and we handle them in steadily increasing numbers. The main thing in building up an auto accessory business is to get the right goods. If a merchant gets the wrong kind of a stock he can lose money on it very quickly. There are so many new lines which nobody knows very much about that there may be a temptation to buy them. We handle only standard goods for which there is a demand. We have made provision for a larger accessory department than ever next year and intend to push these lines harder than ever.

Are Fast Sellers

"We find auto accessories are developing into one of our best sellers," says the firm of De Long & Clarke, of Centreville, New Brunswick. "They are great custom getters. Auto owners have to have repairs and by handling accessories we get many customers that otherwise we might never get."

These are merely the opinions of a few firms. They voice the general views of many others with whom HARDWARE AND METAL has discussed the situation. Confidence is one of the big requisites of successful merchandising. These hardwaremen are confident that auto accessories and tractor accessories are not only here to stay, but that their sale will increase every year and they are laying their plans accordingly.

Turn Stock Quickly

"We turn our stock over quickly," said one dealer. "We find the percentage of profit is larger than on many lines of hardware and we find also that the business attracts an especially good class of customers to our store. Most car owners want what they want and are not inclined to discuss prices as long as they are at all reasonable. Most of them have the money and pay cash for all they get and they have proven themselves good buyers. We have never plunged in regard to stocking a lot of goods we did not know anything about. We have built the business carefully, supplying the needs of our customers and handling standard lines that are in demand. The accessory department has shown a steady and most satisfactory growth in every way."

Get in The Swim

"My advice to hardware dealers," said another successful accessory man, "is to get in on what is proving itself to be a splendid business. It is going to be

(Continued on p. 51)

TIRE DEALERS PLAN TO STOP PRICE SLASHING

A NUMBER of dealers handling tires and other rubber goods plan to meet the manufacturers on Monday, December 30, and take up with them the question of setting standard prices for all lines. There have, it is stated to HARDWARE AND METAL, been many complaints regarding price cutting and this had had such serious effects upon trade in some sections that the dealers will ask the manufacturers to take the necessary measures to stop it. In some lines of rubber goods the druggists are alleged to have slashed prices outrageously to the detriment of other firms. It is stated that this has happened especially in London and St. Thomas. In both of these cities there are cut rate drug stores. Just what action will be taken has not yet been definitely decided, but a committee representing the dealers of Ontario will meet the manufacturers and go into the matter with them and it is expected that a policy will be decided as a result of the conference.

HARDWARE MEN MADE MOST OF OPPORTUNITY

RETAILERS in general and hardware men in particular report a splendid Christmas trade. Some merchants state to HARDWARE AND METAL that their only trouble has been that they did not buy sufficient quantities of many lines to take care of their trade. One firm for instance, that purchased 1,000 electric heaters early in the fall, sold so many for Christmas gifts that it had only fifty left on Thursday. The manager stated that he cannot get new shipments very quickly and is wondering how he will take care of the rest of the season's business. As was expected, Christmas giving this season has leaned as never before to the purchase of useful and serviceable gifts and this offered a golden opportunity that hardware firms have not been slow to take advantage of. The coming of the New Year will find many firms, it is stated, with their stocks of many lines lower than they have ever been and the hardware trade on a sound and substantial basis in every way.

NEW ORDER MAY HELP BRUSH MANUFACTURERS

THE United States War Trade Board announces in a new ruling (W.T.B.R. 347) that it will now consider applications for licenses to export wool, mohair, camel's hair, alpaca, cashmere, and all similar hairs; also all tops, noils, yarns, shoddy, and waste of the foregoing; and all manufacturers of wool, mohair, camel's hair, alpaca, cashmere, and all similar hairs; journal waste; human hair, manufactured and unmanufactured; human hair press cloth; animal hair, manufactured and unmanufactured; animal hair press cloth; and hog bristles, manufactured and unmanufactured.

This may have the effect shortly of helping the difficulty Canadian firms have found in securing bristles and material for brushes.

CALGARY WILL VOTE ON EARLY CLOSING

THE question of early closing is to be referred to the citizens of Calgary at the coming election. It is a question that has come in for a good deal of attention and there has been a good deal of differing opinion on the matter. The matter came up again at a recent sitting of the city council, and after much discussion by various members of the council as well as by delegates from associations interested, the following options were drafted by Ald. Adams, chairman of the legislative committee, and City Solicitor Ford:

That the following be substituted for clause 3 of the legislative report of Nov. 20 and submitted on preferential vote basis—

Indicate by figure one which of the under-mentioned closing hours you prefer:

A The present closing hours of retail stores as governed by the early closing by-law which are 1 p.m. on Wednesday the year round, 10 p.m. on Saturday and 6 p.m. on every other day of the week.

B 1 p.m. on Wednesday, 9 p.m. on Saturday and 6 p.m. on other days of the week.

C 6 p.m. on every week-day except May, June, July and August, when the closing hour shall be 1 p.m. on Saturdays.

D 6 p.m. on every week-day except Saturday, on which day the closing hour shall be 1 p.m. the year round.

E Half-holiday either Wednesday or Saturday the year round, such day to be selected for each class of retail shop by a majority of such class of retailers and closing at 6 p.m. on every other day of the weeek.

The vote on none of these questions shall apply to barber shops.

GLASS WORKERS ASKING FOR INCREASE IN WAGES

LATEST reports from American centers indicate that the glass market continues very firm. Demands made by the workers recently, says a report from Pittsburgh, were for 35 per cent. advance to all the four skilled trades and to snappers, and they have asked for a flat price per box on all single strength sizes, which is now under consideration but would be a most serious penalty to the manufacturers at this time. The workers seem to be very firm in their demands and it looks as if there would be an advance over the wages at the close of last blast.

The report says in part: "All parties propose adherence to the curtailment plan that was arranged with the Washington officials in September and October, and of course that will be a great factor in the settlement. A meeting of the committee was held on December 17, so there cannot be any new glass made until late January or early February, and with a higher wage scale unavoidable, I think it should be most reassuring to the buyers."

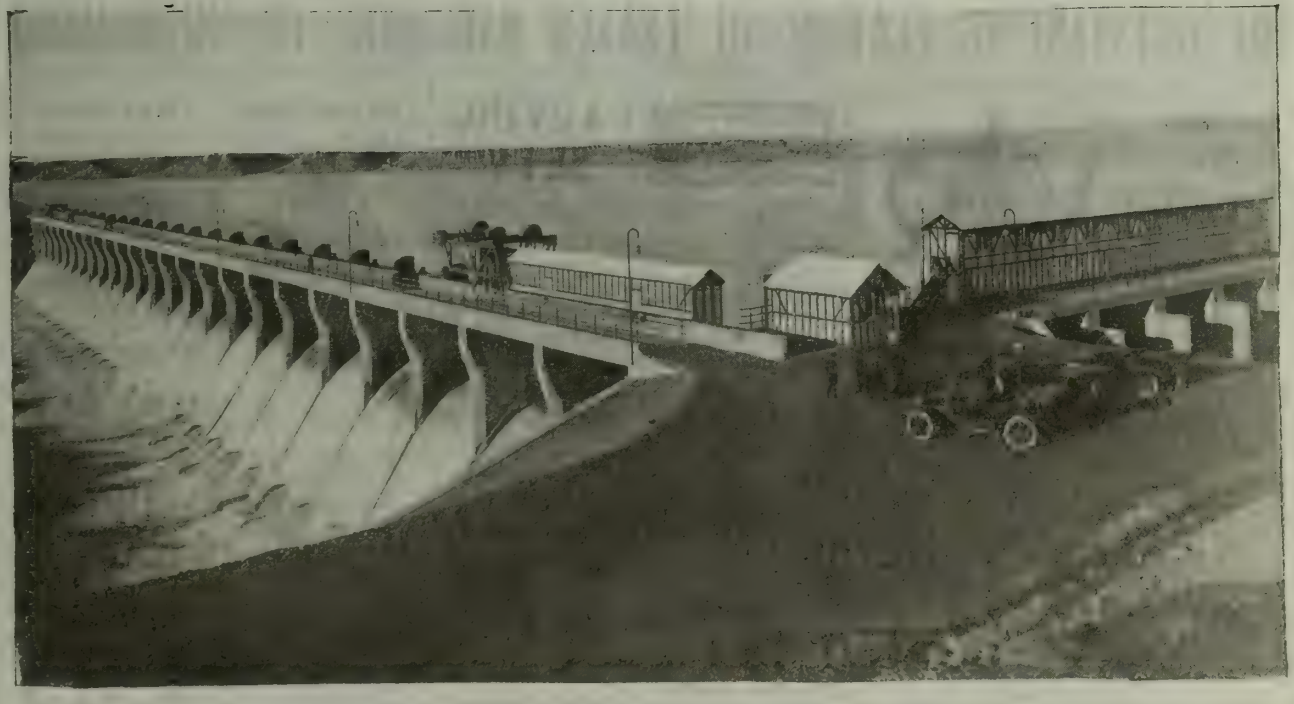
ASK FOR REMOVAL OF THE WAR TAX ON AUTOS

ANNOUNCEMENT may be made shortly of the removal or modification of the war tax on automobiles.

Representatives of the organized automobile industries of Canada waited on Sir Thomas White, acting Prime Minister, and Hon. A. K. MacLean, acting Minister of Trade and Commerce, and urged that the excise war tax on automobiles be removed. The tax which was imposed in the last budget amounts to 10 per cent. on automobiles, and is applicable to all imported into or manufactured in Canada and unsold on April 30, 1918. The request of the auto manufacturers is being considered at Ottawa.

ENGLISH TOOLS WILL BE AVAILABLE SHORTLY

AN English manufacturer states that he will be in a position to take care of orders from Canadian trade in the near future for such lines as chisels, plane irons, garden rakes, dutch and other lines of garden hoes, trowels and so forth. These, he stated, could be delivered for the requirements of the trade early next year. These lines are on the free list.



It is understood that spades and forks will be the short lines, these being on the closed list yet, and in addition there may be a shortage of garden shears. Transportation will now be the big question and there is every prospect that more ships will be available shortly.

PROPOSED CHANGES IN EXPRESS RATES DEFERRED

NO increase in existing express rates will be made before March 1. Before that date recommendations will be made by a special committee which may considerably modify the schedule of rates recently submitted by the railway express companies. Strong objection was made to these, especially by Toronto shippers, as the rates between Toronto and Montreal, were to be increased by 100 per cent.

At a conference held in the offices of the Canadian Manufacturers' Association between representatives of the manufacturers and the Secretary of the Railway War Board and the officers of the Accounting Departments of the various railroads, the question of freight and express charges and credit arrangements was fully discussed. It was finally agreed that the date at which the regulation should go into effect should be postponed until March 1. In the meantime J. E. Walsh, of the Canadian Manufacturers' Association, will appoint a special committee of manufacturers to study the question and make a counter-proposal. This will be presented before the Railway War Board prior to March 1 for a final settlement of the issue.

THE GREAT DAM AT BASSANO, ALBERTA

Water sufficient to irrigate 440,000 acres is diverted by the dam, which is one of the largest of its kind in the world. The concrete structure is 720 feet long and it raises the level of the Bow River by 46 feet. The dam is part of the system which supplies water for what is known as the eastern section of the territory to be irrigated. The outlay in connection with this has totalled about $8,000,000, and there are about 2,500 miles of distributing ditches which take the water to all parts of the country.

Increasing Business By 100 Per Cent.

Galt Hardware Man Tells Results of Advertising and Gives Figures—Weekly Special Sales, Well Advertised, Bring Cash Buyers to Store in Crowds

"ADVERTISING has increased our business 100 per cent. and it will do the same for other hardware men," said J. A. Fraser of the Fraser Hardware Co., Galt, Ont., to HARDWARE AND METAL.

As will be seen from the illustrations the Fraser Hardware Co. arranges its advertising matter in an attractive manner. It aims to get results and it gets them. Realizing that it is important not only to let people know that you have the goods, but to give them a picture of what is offered and give them the price the firm features all of these points. In addition it tries to make the goods it offers advertise the store. One of the ways of doing this has been to offer weekly specials. The Fraser Company does business on a cash basis and it aims to keep its stock turning over rapidly. It has found that its "specials" are big producers from a sales standpoint and that whatever is offered acts as a "leader" which brings many more sales.

Came In 15 Miles

As will be seen from the advertisement reproduced below the firm offered a good serviceable lantern at $1.05. At present prices these lanterns were a real bargain and the people of Galt and vicinity were not slow to take advantage of the sale. It will be noted that the sale was held on Saturday. There was a special object in this as Galt is a market town. Farmers came in that day from a radius of fifteen miles around and no less than seven dozen of the lanterns were disposed of, the majority of them going to the farmers.

In addition to its advertisement the firm had a big window display of the lanterns. They were shown in its centre window and a large card with the price in big figures was put in a conspicuous place.

Sold Other Goods

"The sale of the seven dozen lanterns was only one of the results," said Mr. Fraser, "The advertisement and the window display brought scores of people into our store and a big percentage of them took home other things. We did a splendid business and were well satisfied. One of the things we try to do in our advertising is not to overcrowd the ad with reading matter and to have attractive illustrations.

The firm has found that people have come to look regularly for the Saturday sales and every week it holds one. The announcement is usually made in an ad generally occupying about half a page. The time of the sale is announced and the hours set are rigidly kept. Only during the hours mentioned can the "special" that is offered be secured.

Note in the advertisement the prominence that is given to the word "Value." The biggest type in the whole advertise-

ment is used for this and it was given the most conspicuous and central position possible. The firm tries in this way to drive home to everyone who reads the ad that the "special" offered is not only big value but that the whole policy of the store is to give good value.

Clear Illustrations

In arranging its advertisements the firm makes a point of using cuts that stand out. For instance in the illustration of the lantern the lettering on the base "Guaranteed Wind Proof" is quite distinct. There is nothing smudgy or indistinct about any of the cuts. This is a good policy, especially when it is considered that many of the cuts shown in various papers are often so smudgy as to be illegible. Clear, sharp illustrations create a favorable impression on prospective buyers and when the price is given in big figures the good impression is added to. These are important things to consider when it is remembered that a good advertisement is a real "salesman" and is aimed to bring people into your store to buy.

Sold The Goods

The following week the Fraser firm put on a two-day sale. The object in this was to give both the women of the city of Galt and the Farmers' wives a chance to buy aluminum. The city women could shop on Friday and the farmers' wives on Saturday, the market day. Apparently they could not resist the "special." That "Aluminum" "Last Big Sale of the Year" brought them to the store in such numbers that Mr. Fraser says he did the second largest day's business the firm has ever had. They came from the city and the country in spite of the fact that it rained on both days. Besides a large number of the special sets and the kettles the firm sold about $75 worth of other aluminum goods.

Mr. Fraser is able to give some interesting figures which show the real "pull" both his advertising and the "special sales" have in comparison with the regular business. He has held three special sales of aluminum. By this means he sold 360 sets of the pans. During the same time and without the special advertising he disposed of 140 at the regular price. He regards this as the most convincing evidence that the "sales" create the demand. "The success of our sales," he said, "is due to advertising, to giving real value and service and to our abiding by the strict rules of the sales."

It will be noticed that in the last advertisement the "Cash" policy of the store is emphasized right in the centre of the reading matter. "Do not ask for credit as we will have to refuse you. This sale is for cash only."

Mr. Fraser says the cash plan is working out splendidly.

Restrictions Hamper British Gunmakers

Discussing the outlook in England for the manufacture of sporting guns the "Ironmonger" says:—

"The prompt removal is needed of the restrictions on the manufacture of shotguns. No industry has been more severely injured by the war than this. At the beginning, practically all the skilled mechanics in it were sent either into the army as armorers or into the big rifle factories as instructors and later on nearly all the older men were taken, while the few that remained were obliged to obtain licenses to carry on their trade. In addition stringent regulations were introduced to govern the use of materials for gun making and for repairs, and as a result the trade became moribund. The manufacturers are still precluded from carrying on their industry, and their men, now being discharged fro the rifle factories, cannot obtain employment at their regular trade. Overseas markets are clamoring to be supplied, and if British gunmakers are not allowed to supply them others will. The goodwill created by British gunmakers is a valuable asset, but unless the prevailing restrictions are promptly removed it will probably be extinguished. There is urgent need, too, for a prompt settlement of accounts with the small-arms factories. Several of these could be adapted for the production of machine-made sporting guns on a scale which would enable this country to recapture the trade in cheap guns, formerly lost to foreign competitors. Until the controlling interests learn from the Government precisely where they stand, however, they cannot be expected to move far in that direction. The requirements of the moment are the settlement of financial matters and the release by the Government of works and plant. Those subjects can be dealt with immediately, and it is of the highest importance that there should be no unnecessary delay."

AFTER EXPORT BUSINESS

Now that the new test of prices applicable to export of bar iron has been issued, Scottish firms are losing no time in endeavoring to recover and extend the important overseas markets they possessed before the war. The falling off in Government requirements in steel material has enabled producers to turn more machinery on to iron output, so that their position for undertaking an enlarged mercantile business is steadily improving. A feature of order-books is the abundant request they disclose for material for agricultural machinery and for rivets and bolts. There is a good demand also for hoops and strips, a circumstance that indicates activity at the necessity for widespread distribution of tube works.

EDITORIAL COMMENT

STANDING THE TEST WELL

PERHAPS no better indication of the splendid manner in which Canadian business interests were prepared to meet the reconstruction period could be had than the commercial statistics which show that during the month of November the smallest number of failures was recorded in twenty-six years. This is in spite of the fact that business was decidedly irregular during that period owing to all sorts of rumors which preceded the signing of the armistice and the big celebrations that took place after. In Canada and the United States during November there were 549 failures recorded, a decrease of twenty per cent. over October and of 43 per cent. over November a year ago. During the eleven months of 1918 for which figures are available business failures totalled 8,810, a decrease of twenty-six per cent. from the number in 1917 and just more than half of the number in 1915, which holds the record with 17,447.

DO YOUR BEST FOR THEM

THE boys who have been "over there" are beginning to come home. A few thousands have already arrived and many thousands more will be on the way shortly. When they started away to fight for the flag most of them were assured by their employers "your job will be waiting for you when you come home again." Well, the boys are coming home and one of the most cheery things they can hear these days is a hearty welcome from the man they formerly worked for and the assurance that he will be glad to have them back in the store again just as soon as they can come. Some of the boys who are coming in the first lots are just getting over wounds and it will be some time before they can take the positions they formerly held, but it will comfort them a whole lot if they know the place is waiting for them. They have offered their best for the Dominion, for the Empire, and to help keep the world free, and giving them back their old positions is one of the very least things employers can do and yet it is a thing the boys will appreciate thoroughly.

COMMERCIAL AVIATION

THE possibilities of commercial aviation are receiving a great deal of attention by the governments of France, England and the United States. Now that the war is over and thousands of aeroplanes and thousands of specially trained aviators are available, the question of employing these men and speedy machines in facilitating commercial projects is being careful investigated. The delivery of mails in Canada and in some parts of the United States has been accomplished most successfully. If aeroplanes are useful for this purpose, why not for delivery of merchandise and other things is the question that is asked. It is not at all impossible that before very long regularly organized air routes may be established between important points. Such a service, it is argued, would greatly facilitate the delivery of important letters, and small shipments of goods. The latest developments in aeroplanes has resulted in some remarkable carrying power being obtained and speed which makes even the fast express trains seem like mere snails. All sorts of projects have been suggested to the governments, but in the meantime, reports from investigating committees have not been made.

CHEAPER STEEL, BETTER BUSINESS

THE remarks of Judge Gary before the members of the Steel Institute are of keen interest to the trade, especially to those who have been trying to study out what the future has in store.

It is announced that the prices of iron and steel products will be cut $3 or more per ton, except for ore. But wages are not to be cut. This was well known to Judge Gary, when he declared that "the next five years in this country will be the most progressive, prosperous, and successful of our history. The results will astonish even the most optimistic of to-day.

I have intimated that values or prices generally throughout the country are abnormal and unreasonable. We ought to get back to a peace basis as soon and as speedily as possible. It should be accomplished in an orderly and methodical manner and with the least disturbance to general business and without injustice to any. This is peculiarly a time for constructive thought and action; for cool heads, for courage, for the exercise of a spirit of fairness: even for sacrifice when necessary. There should be no danger in this country of serious business depression. We are so rich and prosperous and our resources are so large that the indulgence of feelings of fear or doubt as to our financial, commercial or industrial safety and progress would be wholly unjustified. Our prospects are bright, our opportunities for success are greater than ever before."

PRACTICAL EDUCATION

EXTENSION of industrial and technical education and the getting away to a great extent of a lot of the more or less useless things at present on the curriculum, seems to be the policy which Hon. Dr. Cody, Minister of Education, is adopting. From the standpoint of business men and manufacturers, this is a move in the right direction. One of the great complaints of commercial men in connection with modern schools was that the product they turned out was not fitted to take its place in the stores, the factories or the warehouses and do the work competently. A great deal of extra training was nearly always necessary. Hon. Dr. Cody is planning, it is stated as a start of his new policy to establish industrial and technical schools in the Brantford, St. Catharines, Welland, Thorold districts, where a great deal of manufacturing is done. Other schools it is expected will be opened later. Hon. Dr. Cody has stated that if the Dominion Government will do for technical and industrial education what it has done for agriculture great advances can be made. He is working to secure Dominion aid and has the backing of a number of business men and manufacturers.

IMPORTANT DEVELOPMENTS

SOME interesting indications regarding the outlook for business in Canada may be gained by a glance at some of the statistical reports. Not in many years have the banks been opening so many new branches. This policy is general in all parts of the country and is especially noticeable in the Canadian West. Important development in connection with banking extensions are also under way in the Maritimes. Inquiries continue to pour in from overseas from firms wanting Canadian goods of all kinds. In this issue of HARDWARE AND METAL, no less than a dozen inquiries are listed from firms wanting hardware goods of various kinds. These are merely the forerunners of what are coming according to many manufacturers who are looking for a big trade. Just in this connection is a point of interest to retailers in regard to placing their orders. Manufacturers state that the first people to place orders will naturally be the first to get their goods and while no serious delays are anticipated, some firms are not finding the class of help they require at all plentiful. With the farmers needing all the help they can get, with thousands of foreign laborers leaving for home on every boat and with little prospect of any great numbers of soldiers returning for many months, the question of securing adequate help may yet be more serious than was anticipated. An immense demand for building materials of all kinds is expected in the spring and many firms report that already inquiries for materials are coming in in large numbers. All these facts may be merely straws which show which way the wind will blow. Another indication of bigger business is that a number of firms have already purchased land on which to erect factory extensions and the lists of new incorporations is larger each week than it has been since the war started.

FIXING EXPORT PRICES

THE British Minister of Munitions announces he is fixing export prices of pig iron applicable to all exports while existing maximum prices for home delivery remain in force. New maximum prices are also being fixed for steel for delivery in the United Kingdom from February 1. The Ministry state that while the Government was practically the sole purchaser of iron and steel products, prices were stabilized by paying direct to makers a subsidy representing increased costs due to war conditions. Since the Government no longer is the sole purchaser it is desirable to place the industry on an economic basis, but as the immediate withdrawal of all subsidies would seriously prejudice the resumption of ordinary commercial work the Goverment has decided to remove the subsidies in two stages. Subsidies applicable to steel making will be removed January 31, those applicable to pig iron will continue to April 30. It is not intended that Government subsidies should be used to enable exports to be made to overseas markets at less than full cost, and therefore, the Government will levy as drawback on exported iron and steel the difference between home and export prices.

ENGLAND IS OPTIMISTIC

THE direct cost of the war to all the belligerents is estimated at $200,000,000,000. Of this amount about $150,000,000,000 has been raised by war loans. This seems a huge sum and yet it cannot be said that the world's bankers are worrying particularly about it, although the charges for interest and sinking fund will run up to about $10,000,000,000 annually. The British financiers refer casually to the fact that Britain "only owes about $5,000,000,000 abroad" and declares that she is amply able to take care of this debt. It is a decidedly encouraging fact that most of England's debt is to those at home. If history repeats itself, and many competent authorities assure us that it does, a comparison of England's financial status now and one hundred years ago is interesting. At that time Britain was emerging from a fight with Napoleon and others which had lasted for twenty years, and was up to that time one of the great wars in the world's history. Her debts then, which were considerably under $100,000,000 were looked up on by many as colossal and predictions were made that the country would be swamped. What happened? England's trade developed by leaps and bounds and the foundation was laid for the prosperity which has made it possible for her to come through the tremendous struggle of the last few years with such flying colors. As far as the future is concerned, England is looking for enormous trade gains in the next few years. She expects to capture markets that were formerly held by Germans who will now not be in a position to ship and even if they were would find that sentiment against Hun made goods would be very strong. In the far East, in South America and in Russia, British merchants and manufacturers expect to do a greatly increased trade.

EVENTS IN THE TRADE

Business Changes

Fort Saskatchewan.—The firm of Gordon and Dubuc, hardware merchants, has dissolved partnership, P. D. Gordon having retired from the firm. Mr. Gordon will move to Vancouver, while Mr. A. Dubuc will carry on the business.

Obituary

James Lawson, of Barrie, Ont., died on Tuesday. He was a brother of W. J. Lawson, buyer of shelf hardware for Rice Lewis & Son, Limited, Toronto.

Louis P. Foucar, aged 74, for many years in the hardware business at Tottenham, Ont., died from the effects of a stroke he sustained some weeks ago.

Personals

A. Sparks has joined the staff of the Western Hardware Company of Edmonton, Alberta.

John Neiderhouse has been taken on as a clerk by the W. E. Warner Hardware Co., Edmonton.

T. F. Towers, formerly with the Mackenzie, Milne Hardware Co., of Sarnia, Ont., is a mayoralty candidate at Sarnia.

Frank Stott, who has been on the road for the Miller, Morse Hardware Co., Winnipeg, has left to join the travelling staff of Wood, Vallance Ltd., Winnipeg, and will be starting out on his new territory early in January. Mr. Stott passed through Toronto Monday of this week on his way to Cobourg, where he will spend the holidays.

Fire Losses

Fire of unknown origin caused a loss of $50,000 in the building at 179 McDermot Ave., Winnipeg, occupied by the Louis McLain Co., Ltd. A large stock of aluminum good and hardware specialties was almost completely destroyed. The fire occurred only a short time after Mr. Louis McLain had left on a business trip to Cleveland.

Trade Notes

Newbrassware Co. of Canada, Ltd., has been registered in Montreal.

J. A. Lefils & Frere, manufacturers of brooms, has been registered in Montreal.

The Canadian Kron Scale Co., Wm. M. Thorpe, Stanley L. Gibson and G. H. Smith has been registered in Montreal.

The Fox Chain Company, of Hamilton, Ont., capitalized at $200,000, plans to manufacture anti-skid chains for automobiles.

Many Hardware Lines Removed From the Conservation List

The following articles have been removed from the conservation list by the American Government:

All articles of aluminum containing ten per cent. or more (in weight) of metallic aluminum.

Brass and all articles containing ten per cent. or more (in weight) of brass, brass pipe, brass plates, brass sheets, brass tubes, brass wire.

Bronze and articles manufactured therefrom.

Cameras, photographic, other than moving-picture cameras.

Chromium ore, and any metal or ferro-alloy thereof.

Cobalt ore, and any metal or ferro-alloy thereof.

Copper, as follows: All articles containing 10 per cent. or more (in weight) of copper; pipe; plates, rods, sheets, scrap, tools, tubes, wire.

Crucibles, as follows: graphite (plumbago); platinum.

Diamond, industrial.

Ferroalloys, as follows: Ferrocerium, ferrochrome, ferrocobalt, ferromanganese, ferromolybdenum, ferrotitanium, ferrotungsten, ferrouranium, ferrovanadium, ferrozirconium.

German silver (nickel silver and alpaca metal) and articles containing same.

Glass, optical.

Graphite (plumbago) and articles manufactured therefrom.

Lead, as follows: pipe, sheet.

Nickel, all articles containing 10 per cent. or more (in weight) of nickel.

Nickel alloys.

Nickel silver (German silver and alpaca metal) and articles containing same.

Oil-well drilling implements, machinery and accessories.

Ore, as follows:

Antimony, chromium and any metal or ferro-alloy thereof, chromium and any metal or ferro-alloy thereof, manganese and any metal or ferro-alloy thereof, radium, strontium, titanium, tungsten and any metal or ferroalloy thereof, uranium, zirconium, oxide or manganese, plumbago (graphite) and articles manufactured therefrom, pyrites, rods, copper; scrap, copper; searchlight reflectors, sheelite, sheet lead, silverware containing no tin, silverware containing tin, spelter, tungsten ore and any metal or ferroalloy thereof, vanadium, wolframite, zinc or spelter.

Leather (Removals)

Harness leather; leather, as follows: belting leather, rough tanned leather.

Electrical Apparatus

Carbon electrodes, caustic soda cells, electrolytic, electrodes, as follows: carbon, graphite (plumbago), electrolytic cells, emery, as follows: files; flour, grain; flour, emery; generators, suitable for searchlights, searchlights and parts thereof and generators therefor.

Twenty-nine Firms in British Explosives Merger

The firms which, under the name of Explosives Trades Limited, recently formed a merger in England with a capital of $90,000,000 plan to carry on the business of manufacturers and producers of nitro-glycerine, dynamite, blasting gelatine, gelignite, sporting and military powders, fuses, detonators, fireworks, explosives of all kinds, chemicals, gas mantles and illuminating apparatus, glycerine, oils, fats, artificial manures, celluloid, artificial silk and dyes.

The amalgamation had its origin in the fact that the co-operation which was found to be essential during the war to meet the demands for explosives, proved so advantageous to the individual companies that it was decided to perpetuate and extend the effort in peace time. The war demand for explosives has now practically disappeared, but there is an enormous and growing field for explosives in various peace industries. Another incentive to combination, apparently, has been the knowledge that foreign manufacturers of explosives have banded themselves together and that it will need a strong organization to rebuild this branch of British trade in overseas markets.

The twenty-nine firms in the merger are: Alliance Explosives Co.; Australian Explosives and Chemical Co.; Bickford, Smith & Co.; Wm. Bennett, Sons & Co.; St. Helens Electric Fuse Co.; Unity Safety Fuse Co.; Birmingham Metal and Munitions Co.; British Explosives Syndicate; British South African Explosives Co.; British Westfalite; Cotton Powder Co.; Curtis's and Harvey; E. C. Powder Co.; Eley Bros.; Eley Bros. (Canada); Abbey Improved Chilled Shot Co.; Elterwater Gunpowder Co.; King's Norton Metal Co; Kynoch; Kynoch-Arklow; National Explosives Co.; New Explosives Co.; Nobel's Explosives Co.; Electric Blasting Apparatus Co.; Patent Electric Shot Firing Co.; Roburite and Ammonal; Sedgwick Gunpowder Co.; Schultze Gunpowder Co.; W. H. Wakefield & Co.

On January 1 the Canadian SKF Co., of Toronto, will open a sales office at 412 St. James St. W., Montreal, Que., under the direction of Geo. F. Sheppard, where they will carry a large stock of the company's products.

The Western Hardware Company, Edmonton, Alta., is extending its business by the addition of a large stock of furniture. W. E. Warner is also stocking furniture and plans to carry a more complete line later.

Montreal News

George MacAllister, representing Shurley and Dietrich, Galt, was in Montreal this week.

A. E. Dykes, manager of the J. H. Ashdown Hardware Co., Ltd., at Winnipeg, spent a day or two in Montreal on his return from Atlantic City.

A. W. Poole of McArthur, Irwin, Ltd., is this week a guest in his old home at Poole's Resort.

L. T. Wall of Winnipeg, manager of Central Tools and Forgings, was a Montreal visitor this week.

Incorporations

Dalyte Electric Limited head office Guelph, Ont., capital $1,000,000, has been granted a Dominion charter. The company plans to acquire the business of the Dalyte Lampp Company, Limited, The Munder Tungsten Lamp Company, Limited, and The Flexible Conduit Company, Limited, and to manufacture and deal in textile materials, conduits, cables, tungsten lamps, incandescent lamps and other electrical materials and supplies.

The Canadian Cushion Inner Tire and Rubber Company, Limited, head office Wingham, Ont., capital $40,000, plans to manufacture rubber tires and rubber goods and to purchase from Carl E. Judgson, of London, Ont., his interest in patent No. 173866 granted to The Aero Cushion Tire Company for an alleged new and useful improvement in tire fillers.

McColl Bros., Ltd., capitalized at $1,000,000, head office Toronto, Ont., plan to carry on the business of exporters, importers and manufacturers of and dealers in oils, varnish and soap.

The Standard Cabinet Company, Limited, head office Montreal, capital $95,000, plans to manufacture house fittings, fixtures, toys, wooden wares and furniture of all kinds, gramophones, phonographs, musical instruments, toys, house fittings and fixtures and brass, wooden and metallic ware.

Coke and Coals, Limited, capital, $50,000, head office Montreal, plans to carry on the business of coke and coal merchants, and to deal in coal of all kinds, coke, copper ores and clay and mineral substances, and to carry on the trade of mine, coal and oil-well owners, foundry, quarrymen and metal dealers, and to manufacture, refine and sell petroleum, oil, gases and other products from coal, and to make and deal in firebricks, cement and fuel of all kinds.

Trying Arbitration Instead of Lawsuits

That elimination of wastage by lawsuits is being daily more carefully guarded against by big business in its initial contracts and agreements is shown by an arbitration proceeding in which many Ontario lumbermen are vastly interested and which is in progress in Toronto before a board composed of Judge Valin, Mr. W. R. White, K.C., of Pembroke, and Mr. McCaughey, of North Bay. The parties directly concerned are the Forest Products Co. and the Beaverboard Manufacturing Co. The former, it is alleged, contracted to supply 10,000 cords of pulpwood to the latter, at a named price, and it is alleged delivered only a few cords, when demanded and price went up. The Beaverboard Co. now seeks damages under the contract, one clause in which provides for the arbitration of any dispute arising out of the transaction. The proceedings are still going on.

European Varnish Makers Are Seeking Raw Materials

INDICATIONS point to a firm market for varnishes in 1919 according to W. W. Ingersoll, vice-president and secretary of the Dougall Varnish Company, Limited, Montreal. Mr. Ingersoll bases his opinion, he says, upon actual conditions that have arisen since the armistice was declared; some of them at any rate. With the lifting of restrictions and the assurances of peace being signed European varnish makers have come into the American market for their requirements of raw material. Activity in this respect had been very marked already and prices firmer as a consequence. With European needs to be supplied and a big deficiency to be covered, prices here were bound to stiffen and advances would be very probable, he said.

"Prices," said Mr. Ingersoll, "will not be lower for a year."

Asked as to the container outlook Mr. Ingersoll said that this was much better as far as supply is concerned. "But we shall have to pay for them, and they will perhaps be hibher than they have been," was his reply. Mr. Ingersoll expects a big business in 1919.

HARDWARE AND METAL has given various reports and opinions regarding the outlook for the coming season as related to varnish and the tendencies appear to be quite as firm as they have been. With so much work to be done because of the deferring of necessary finishing owing to the war, there is every reason to anticipate great activity.

NOVEL PLAN PROVES BUSINESS BOOSTER

Merchants of Kingsville, Ont., as a means of attracting farmers from the surrounding district to attend their monthly co-operative sales, have adopted the plan of inviting rural visitors to bring with them on the first Saturday of every month, any goods they wish to sell. Services of an auctioneer are provided free of charge, and the farmers are thus enabled to convert personal effects which they no longer value into ready cash, a large proportion of which is exchanged for merchandise offered by the Kingsville retailers. The plan, recently adopted as an experiment, has proved successful as a pulling power for trade, and members of the Kingsville Retail Merchants' Association who are responsible for the innovation are well pleased with the results.

MAY EXTEND EXPRESS SERVICE

Investigation into the possibility of extending express service to Sandwich, Ont., will be conducted shortly by the different companies who will go over the situation with the Border Chamber of Commerce, which has been endeavoring to secure this service for some time. Under the present system, merchants of Sandwich have been compelled to pay a rate of 25 cents per hundred pounds for all goods consigned to them to cover the extra cost of transportation from Windsor.

HAMILTON STORY IS DENIED

A story on the front page of a Toronto morning paper on Thursday stated that the Steel Company of Canada was planning to go into the manufacture of stove pipes, kettles and galvanized sheets. Inquiries made by HARDWARE AND METAL elicited the information from officials of the firm that no such step is contemplated.

$60,000 CHRISTMAS GIFT

A Christmas gift valued at $60,000 in the shape of a pavement was formally presented to the City of Sarnia, Ont., by the Imperial Oil Company. The presentation was made at a gathering attended by Hon. W. J. Hanna, M.P.P., C. O. Stillman, Geo. W. Mayer, G. H. Smith, A. McQueen, Daniel Strachan, Victor Ross, of New York.

Hon. W. J. Hanna, M.P.P., president of the Imperial Oil, Ltd., told the story of the origin of the idea of the presentation. He was in the south when the suggestion came under his notice by wire. He realized Sarnia's supreme need, as is the supreme need of every other city and municipality, to be good roads, and readily endorsed the idea.

HARDWARE LETTER BOX

Watch Repairs and Tools

B. N. Sparks, Enterprise, Ont.—Where can we secure to advantage watch repairs and tools?

P. W. Ellis & Co., Toronto and Montreal.—Ed.

Curtain Stretchers

Des Rochers, Ltd., Montreal, Que.—Kindly give us the name of a curtain stretcher manufacturer?

These are made by Otterville Mfg. Co., Ltd., Otterville, Ont.; McFarlane Mfg. Co., Ltd., Toronto; Chicago Curtain Stretcher Co., Chicago, Ill.—Ed.

Says Big Demand For Cutlery Means That Prices Will Remain Firm

THERE is small chance of cutlery prices being reduced for some time according to Charles F. Smith, who, at the twenty-fourth annual convention of the National Hardware Association in Atlantic City, spoke as follows:

"The world-wide shortage that exists in many lines of manufacture is particularly pronounced in all kinds of cutlery, table, pocket, scissors, shears, razors, etc., for the reason that for four and one-half years the cutlery factories of England, France and Germany were commandeered for war purposes, and that for the last year or more the cutlery facilities of the United States have been largely devoted to war work.

The accumulated stocks have been used up and the shelves of the world are bare of cutlery.

Will Take Time

It will be a long time before the cutlery factories of England and France, with many of their workmen killed or maimed, can get back from a war to a peace product and to a production equal in volume to the pre-war period.

It will take even longer to do that in disorganized Germany. It is fair to assume that the product of the European cutlery factories will for some time be taken up by their home market. England will naturally send her first exports of cutlery to her overseas Dominion, now more than ever drawn close together by their common efforts and sacrifices in the great war. Germany, when she has cutlery to export, will send it to neutral markets, as for example, South America, where she will find it easier to do business than in the United States.

Barely Enough

The production of cutlery in this country is barely enough to supply our own needs even with the considerable additions to plans made since the war began. Under such conditions, and with orders on the books of cutlery makers far greater than usual, any reduction in the prices of these goods seems highly improbable unless there shall be great reductions in the prices of material and labor. Such reduction we neither expect or desire. Material is so small a part of the cost of cutlery that it would take a great reduction in the price of material to justify a reduction in the finished product.

As to labor, while it is true that the fantastic prices paid in many instances to war workers must disappear and are disappearing, it is equally true that for a long time the present general level of wages will probably continue.

Food Prices High

With the whole world short of food of all kinds, it is unlikely we shall see the farmers' profits cut and until there are conditions which bring about lower prices for food, rent, clothing—the main items in the high cost of living—there is no good reason to expect lower prices for labor, and no justice in asking labor to bear a greater burden.

"Plainly, then, we do not intend to reduce prices either on our cutlery products or on our lines of house furnishing hardware. To show our confidence in the future we propose to you that during the coming year we shall guarantee the prices of all our products against our own decline for 90 days from date of invoice.

Plenty of Business

"We say to you frankly that the volume of business on our books is such that we do not wish you to load us up with large orders unless shipping dates can be spread through the year. Anxious as we are to give good service, we shall be unable to take the proper care of all our trade unless we are able to distribute our goods evenly where they are really needed to take care of current business."

CANADIAN HARDWARE WANTED IN SIBERIA

L. D. Wilgress, Canadian Trade Commissioner at Vladivostok, Siberia, writes under date of November 8, 1918 as follows:

"One of the largest importing and distributing houses in Siberia have given me the following list of articles for which there is a good market in Siberia: Safety hammer automatic revolver, glass, dry plates, kodak films, photographic films, sharpeners, self-loading pistols, revolvers, champion single gun automatic ejector, Berdan primers, automatic pistols, chilled lead shot, Parrer guns, double-barrel hammerless shotguns, Remington auto rifles, lawn mowers, crosscut saws, sporting rifles, pocket scissors, barber's shears, Wizard portable and Mirr-O-Lite lamps, taper square shank drills, saws, spoke shaves, Diamond files, gasolene torches, Niagara grinders, wrought brass butt hinges, garden tools, sets of furniture casters, nickeled, trunk locks, spring dividers, reciprocating automatic drills, horse nails, batteries, battery zincs, padlocks, electrical household irons, rivet forges, utility rugs, steel boiler tubes, steel wire rope, carbon brushes for dynamos, radiators for automobiles, Chicago spring butts, registers japanned, door bells, automobile lamps, switches, tools, knives, coat and hat hooks, duplex stocks and dies with pipe cutters, chain wrenches with flat link size, auger bits, scroll saw blades for wood, flexible hack-saw blades, plain gilt upholsterer's nails, screw-drivers, adze eye plain face hammers, combination pliers, ring ratchet braces, pipe cutters, spring tempered rules, gas and water tubes, machinists' hammers without handles, emery, latches, rectangular bells, door checks "Bloint," pruning shears, California pattern, railroad picks, spark plugs, Rotastrop, high-speed steel cutters for cylindrical blocks, nut wrenches, bright, regular grinding wheels for wet and dry works, paper shot shells, steel furniture springs, wire nails, copper sulphate, electric lamp stands for the table, combination coffee mill, Morse taper shank twist drills, pails — galvanized iron, steel-frame freezer, various toys, automatic pencil sharpeners, flexible cleaner for 22 calibre rifles, Yale locks, oilstones, vertical power forge pumps, dolls, round iron, brass sheets, wool knitting, sacking or packing needles, glassware, washboards, sewing machine needles, speed indicator, hand-sewing machines, red and white lead, aluminium enameled ware, agricultural machinery, twine.

Says Nova Scotia Has 100,000 Horse-Power in Undeveloped Waterways

AT a conference attended by over 100 business men and manufacturers in Amherst, N.S., under the auspieces of the Canadian Manufacturers' Association, reconstruction problems affecting commerce and industry were considered. W. S. Fisher, of Emerson & Fisher, Ltd., St. John, presided, and the speakers included K. Y. Smith, district engineer of the Dominion waterpowers branch; W. H. Sexton, principal of the N.S. Technical College; J. Grove Smith, of the Commission of Conservation staff; Dr. W. B. McCallum, chairman of the Commission on Research; Watson Griffin, Chief of the Commercial Intelligence Department, Ottawa, and Sir John Willison, Toronto, president of the Canadian Industrial Reconstruction Association.

The development of the water powers of the Maritime Provinces, in order to relieve the demands on the coal mines and forests, was urged in the paper prepared by Mr. Smith, who estimated that in Nova Scotia alone there were water powers in close proximity to industrial centres which could develop 100,000 horse power.

The great need for improved facilities for technical education was emphasized by Dr. Sexton, who said, in order to secure prompt action and adequate development the co-operation of the manufacturers is required. As a preliminary to more advanced work he suggested a technical course paralleling the high school course.

In an address in which he furnished startling figures on Canada's annual fire loss, J. G. Smith urged the appointment of fire marshals in every province of the Dominion.

Sir John Willison said that organization, co-operation and production were the three vital problems in Canada. He emphasized the need for immediate and

adequate organization to secure for the Dominion a full share in the business arising from the rebuilding of the desolated portions of Europe.

An address on the resources and commercial possibilities of the Maritime Provinces was given by Mr. Griffin. He said that in the countries of Europe, in Siberia, South America, South Africa, Australia, New Zealand, the West Indies and even in old India there will be opportunities for sales managers of Canadian companies to make great records during the next few years, as merchants' supplies of almost all kinds of goods have been nearly exhausted during the war.

Placing at the disposal of the manufacturers and merchants the organization of the Commercial Intelligence Service of the Department of Trade and Commerce, he also pointed out that in the countries of Spanish America where Canada is not represented, arrangements have been made for the co-operation of the British consuls. The work of Exhibits and Publicity Bureau, with its permanent exhibition in Ottawa and its motion picture service was described.

Few Canadians, he said, as yet realize the great natural resources of the Maritime Provinces and the geographical advantages they possess. He pointed out that while the eastern ports are 2,000 miles nearer Europe than New Orleans and the gulf ports, they are also 500 miles nearer to the leading countries of South America and South Africa, on account of the way that portion of the North American continent juts out into the ocean. He urged the organization of steamship lines on a scale sufficient to enable Canada to reap the benefit of this advantage and also of all water connection between the lower province ports and upper Canada.

Mr. Smith's final suggestion was for the formation of hydro-electric commissions in Nova Scotia and New Brunswick.

Detroit Auto Manufacturers Expect Little Change in Prices

THE Windsor, Ont., correspondent of HARDWARE AND METAL writes as follows: "Detroit auto manufacturers have completed plans for making pleasure cars during 1919 that will only be limited by the amount of steel they can procure. On January 1 Washington will lift the restrictions and the manufacturers are prepared to return to the 100 per cent. basis of production.

Steel at present is not coming in as plentifully as desired. As transportation burdens of the railroads become lighter the manufacturers hope to secure an ever-increasing supply.

Few new models will be shown at the March automobile show in Detroit and these will only be for display purposes. New models will not be placed on the market in appreciable degree until September, six months being required to turn out a new line once the designs are approved.

The principal changes contemplated in the higher priced cars will be centred in the motors. The airplane design is increasing in favor and will be adopted widely it is stated.

Although some decreases in price have been reported no important drops are anticipated for one or perhaps two years. Prices will range all the way from $400 to $3,500 on Detroit made products.

TRADE INQUIRIES

The Department of Trade and Commerce has received the following inquiries relating to Canadian trade. Addresses may be secured from the Department, or from the Editor, Hardware and Metal, Toronto, Canada. Please quote reference number when requesting addresses.

878. Turin concern wish to represent manufacturers of tools, screw bits, leather belting, saws, and engineering sundries.

882. Messina merchant would handle cereals, coal tools, wood, timber, linoleum, safes, ropes, paper, nails, etc.

883. Rome representative seeks agencies for chemicals, pharmaceutical products, colors, varnishes, oils for colors and lubricants, cotton and woollen piece-goods, agricultural and industrial machinery, steam and electrical motors and apparatus, leather, etc., articles.

886. **Iron and steel.**—A British firm of merchants in Argentina steadily purchasing large quantities of the following articles in New York, would like to receive prices f.o.b. New York from Canadian manufacturers. Confirmed and irrevocable letters of credit are opened in favor of shippers. Articles: Baling wire, fencing wire, galvanized and black, iron girders, merchant bars, galvanized sheets, flat sheets, mild steel bars, nails, high carbon oval steel wire, galvanized piping, black plates, iron fencing standards, galvanized gas tubes, calcium carbide and cotton waste.

888. **Wire fencing and gates.**—A London firm seeks the agency for the United Kingdom of a Canadian manufacturer of wire fencing and gates, which articles he could work in with other agencies which he is handling.

889. **Component parts for automobiles, etc.**—A United Kingdom automobile manufacturing company is prepared to purchase from Canadian manufacturers, supplies of component parts required for the production of 30 cwt. motor lorries and two to five-seated pleasure cars, including engines, wheels, front and back axles, frames, gear boxes, complete steering, complete transmission, clutches.

892. **Pipe fittings for the British West Indies.**—A Trinidad firm having branch offices throughout the West Indies and a branch office in Halifax, N.S., wishes to get in touch with a Canadian firm that can supply pipe fittings.

893. A partner in a London firm specializing in manufactures of wood and turnery, of which he possesses an expert knowledge, and for the sale of which an established connection is claimed, propose visiting Canada shortly to place contracts for such goods as dowels, broom, pick, hayfork, rake and other handles; washboards, skewers, clothes-pegs and clips, etc. The firm is prepared to either represent manufacturers on a commission basis, or purchase goods outright.

900. **Catalogues and price lists.**—A Johannesburg wholesale firm of general dealers ask for catalogues and price lists from Canadian manufacturers of lanterns, enamelware, tools, all kinds, hardware, brushware, handles, woodenware and furniture shipped k.d.s.

901. **Engineering specialties.**—A Johannesburg firm of specialists in engineering supplies is prepared to take up agencies and control for South Africa in such lines as wrenches, forgings, jacks and other engineering or mining supplies. If any line is taken up, this firm undertake to advertise in a thorough way.

902. **Agencies.**—A South African commission house now representing successfully one Canadian manufacturer, is prepared to take up other agencies in such lines as hardware, household utensils, farm-house specialties, shovels, spades and other tools.

903. **Toys.**—A Manchester commission agent with good connections wishes to represent a Canadian manufacturer of toys.

904. **Domestic woodware.**—A Manchester commission agent with a large connection, is open to represent a Canadian manufacturer of domestic woodware, washboards, pegs, rolling pins, towel rails, bread boards, etc.

906. **Machinery and tools.**—A Manchester merchant is open to handle on commission, machinery and tools.

908. **Machinery.**—A Manchester firm is open to represent manufacturers of heavy specialized machinery and engineers' tools.

909. **Steel, etc.**—A Manchester commission agent is open to represent manufacturers of billets, sheets, sections, castings, forgings, air compressors, machinery engineers' tools.

911. **Tools.**—A Manchester manufacturers' agent wishes to hear from Canadian firms open to appoint a representative to handle pulleys, hack-saw blades, twist drills, hammers and vises.

927. **Agency—Linseed cakes.**—A firm in Delft, Holland, wishes to secure the agency for Holland of Canadian manufacturers of linseed cakes and similar cattle food.

929. **Automobiles, motor-cycles and automobile accessories.**—A firm at The Hague, Holland, is desirous of getting into touch with Canadian manufacturers of automobiles, motor-cycles and automobile accessories.

930. **Steel and copper wire, etc.**—A London company wishes to get into touch with Canadian manufacturers with the object of securing their selling or buying agency for the United Kingdom. They have a branch at Birmingham. Goods suggested are steel and copper wire, wire nails, etc., mica, chemicals, leather for upholstering trades, woodpulp, etc.

931. **Crude asbestos.**—A firm in Amsterdam, Holland, desires the address of Canadian manufacturers of crude asbestos.

932. **Cellulose, chemicals and metals, boots and shoes, food products.** An import-export house in Milan wishes to hear from Canadian exporters of the foregoing products.

934. **Industrial chemicals, metallurgical products and metals, refractory material.**—A firm in Milan wishes to get in touch with Canadian firms with a view to obtaining exclusive agencies in Italy for industrial chemicals, metallurgical products and metals and refractory material.

945. **Construction hardware, construction materials, paints, varnishes, etc.**—A Paris concern desires to open connections with Canadian manufacturers of construction materials, steel, paints, varnishes, etc., and hardware materials in general.

951. **Oils, white lead, etc.**—A French firm would like to buy in Canada oils, white lead and all kinds of raw materials for the manufacture of colors, paints and varnishes.

957. **Iron and steel.**—A French agent requires representation in France of Canadian firm exporting steel and iron.

THE CLERKS DEPARTMENT

Did You Know That C. M. Schwab Started Career as Grocery Clerk?

Steel Magnate Who Was Recently Offered $53,000,000 For His Holdings Began Business Life at $30 a Month —Early Learned the Value of Service

CHARLES M. SCHWAB started his business career by earning $30 a month behind the counter of a grocery store at Braddock, Pa. Later his contract with the Carnegie Steel Company called for $1,000,000 a year. Now he is drawing $1 every twelve months from Uncle Sam, with the shadow of the White House creeping ever nearer.

True, the salary chart of Charles M. Schwab—a retail clerk, steelworker, master organizer and the world's greatest shipbuilder—would resemble the ups and downs of an express elevator.

Charles Michael Schwab—everyone is so accustomed to calling him "Charlie" or "C. M." that his full name has been almost forgotten—was born in Williamsburg, Pa., on February 18, 1862. His family wasn't wealthy. In fact, even for that section of the country, they were rather poor. But they managed to secure for Charles M. a sound educational foundation in the local school, followed by two years at St. Francis College. Not a complete education, by any means, but one of which young Schwab made the most by specializing in chemistry and mathematics—subjects which proved most valuable in the later years of his career.

At the age of sixteen, when most boys are just entering high school, Schwab had to leave his books and look for a job.

Stage Driving

The first place that presented itself was that of a driver of the stage coach which his father ran between Loretto, Pa., and Cresson station. This job did not present much opportunity for the exercise of the knowledge which Schwab had picked up at school, but there are lots of residents of the Pennsylvania steel country who claim to this day that "Charlie" was the best driver the old coach ever had.

"He was careful to avoid unnecessary danger," they say, "but he had nerve enough to take a risk when it had to be taken. And he always got away with it"—which is a comment applicable to every phase of the Schwab career.

The heavy snows in the mountains made stage-driving practically an impossibility in the winter months, so in November, 1878, Schwab landed his first real job behind the counter of the grocery store of A. H. Speigelmire, an old friend of the elder Schwab, who also kept a retail store.

His First Insight

It was there that he got his first insight into human nature and the best manner of handling customers. "It's pretty hard to find any place to beat a neighborhood store when it comes to picking up a knowledge of people in general," Schwab stated in later years. "You get in the habit of sizing up men, of learning—unconsciously, perhaps, but none the less certainly—the characteristics of voice and appearance, which go far to indicate the real nature of the man or woman with whom you are dealing. You learn patience, and you pick up a multitude of other information which ought to prove of value to the man who knows how to use it. You gain at least a rudimentary knowledge of the value of money, and you secure an insight into the world of commerce. True, it may be only a peep through the gates, but it serves to inspire the ambitious man with a craving for further knowledge—a craving which he later learns can never be satisfied, but which goes on and on, leading him constantly upward."

"Million-Dollar" Smile

The memory of the citizens of Loretto may have become somewhat tinged with gold in the years since Schwab worked behind the counter of the Speigelmire store, but there are people alive to-day who claim to remember him at that time and who assert that he was the ideal clerk.

Even in those days his smile—for which Pierpont Morgan was later credited with offering a million dollars—was always in evidence. He smiled when he opened the store at six o'clock in the morning and he smiled when he closed it late at night. Possibly he smiled even more contentedly when he received his salary of $30 a month, but he never lost sight of the fact that he owed it to himself and his employer to present a pleasant face, even when the work was the hardest.

Learned "Service"

Incidentally, in the Speigelmire store Schwab picked up his first knowledge of the meaning of the word "service." He was always ready to make change, carry parcels, or do errands, and in the evenings he divided his time between entertaining the children with his piano playing and brushing up his mathematics, with a view to some day becoming an engineer.

In the back of his head, however, he kept always the thought that the steel mills of the country presented the real future for himself and his country. He believed in steel in a day when this industry was comparatively insignificant, and he finally carried this belief to the point where it enabled him, solely through the eloquence of his oratory, to form the United States Steel Corporation with a capital of a billion dollars and $28,000.000 worth of stock in the name of Charles M. Schwab, president.

Opportunity Comes

It was while he was still working behind the Spiegelmire counter that his opportunity came to him. Captain William R ("Bill") Jones, then superintendent of the Carnegie Steel Works, and the best known steel maker in the country, dropped into Speigelmire's one day to make a trifling purchase. Schwab waited upon him, and before he left, had asked him for a place in the mills.

"Can you drive stakes?" inquired Captain Bill, attracted by the earnestness of the boy's voice and the sincerity of his smile.

"I've driven a stage coach and I'm not afraid to tackle stakes," came the answer. The next morning he started on his new job at $1 a day. Six years later he was superintendent of the entire mills, at that time the largest steel works on the continent!

It was Captain Bill Jones that gave Schwab his first opportunity to make good in the industry he had always intended to enter and it was Captain Bill Jones who took him to Andrew Carnegie, at the age of twenty-two, with the statement that, "Here is a young man who knows as much about the mill as I do."

Great Organizer

At twenty-four Schwab had planned and organized the greatest steel mills in the world, the Homestead Steel Works. He was at the head of the engineering department of the entire Carnegie Company, and he had between 6,000 and 7,000 men under him. At thirty-five he had

tackled and solved every problem in connection with the company—including the reconstruction work necessary after the disastrous strike of 1892—and received, as his reward, the presidency of the Carnegie Company.

It was shortly after this that Carnegie voluntarily tendered him a contract calling for a minimum salary of $1,000,000 a year—the contract which Schwab tore up when the United States Steel Corporation was formed, because he did not wish his personal affairs to interfere with the future of the new organization.

In the early days of the war Schwab was offered $53.000.000 for his holdings of Bethlehem Steel—with the proviso that he should continue to act as president, but he declined. Money had ceased to mean anything to the man who formerly clerked behind the counter. Power and work and a part in the future of the industry to which he had devoted his life were what he wished.

Then came the entry of America into the world war, and, with it, the appointment of Charles M. Schwab to the position which will probably live longer in the minds of the people than any other—that of the head of the United States Shipping Board—the man who built the line of ships across the Atlantic.

"But," Schwab would say, "I didn't build the ships. It was the men who worked with me—not for me. They deserve the credit."

The country, however, thinks otherwise.

TWO LINES WITH BIG POSSIBILITIES

(Continued from page 39)

better now the war is over and steel and other materials become available for new cars. I do not think it is wise for a hardware man who does not know much about accessories to jump right into the business. It takes a little time to learn to buy the right lines. Very often there is a tendency to buy too much, especially of goods that look all right but which it may turn out are not in demand or are not suited to the dealer's trade. Some dealers have found to their cost that it does not pay to stock every new accessory that comes out. They are innumerable and many of them are fads. It is good policy for any dealer to buy only for the market in sight and expand as the demand expands. Accessories handled properly are a good money maker and bring nice trade. Our experience with them has been most satisfactory in every way."

WOULD INCREASE FEE OF TRANSIENT TRADERS

W. C. Miller, secretary of the Ontario Branch of the Retail Merchants' Association, appeared with a large deputation of Toronto merchants recently before the Board of Control, asking that the license fee for transient traders be increased from $50 to $250. The board recommended that the City Solicitor submit a new by-law at the next meeting of council and an effort will be made to collect from this class, which at present avoids paying into the city treasury while competing with merchants who do.

KEEPING FROST FROM WINDOWS

Solutions of Retailer's Perplexing Problem in Winter-time—Adequate Ventilation Best Preventative of Heavy Frosting

ONE of the difficulties which Winter time annually presents to the retailer appears to be the elimination of frost from display windows, and, though there has been much written on the subject, HARDWARE AND METAL has been in receipt of many inquiries recently regarding the matter. These letters are from retailers who are taking time by the forelock and are preparing well in advance.

There are various remedies suggested for the frosting of windows, and these are roughly divided into two parts. In cases of slight frosting, the trouble can usually be eliminated by the rubbing on the window of preparations such as alcohol, glycerine and water, ammonia and salt water, or alcohol and water. Where windows do not frost over very heavily, it is also possible to keep the glass clear by throwing a strong current of air over the inside with an electric fan. The current of air should strike the glass from one side and sweep over the entire surface, thus creating a circulation of air over as much as possible of the surface. In large windows two fans should be used.

Cause of Trouble

It might at this point be well to define the cause of the frosting of windows, which in cases of considerable difficulty necessitate much more drastic measures than those previously enumerated. The windows frost over because of the difference in temperature in front and back of the glass. If the air in the window is warmer than that outside, there will be condensation of moisture when it strikes the glass. Thus the point is to make the temperature on both sides of the glass as nearly the same as possible.

The windows should be enclosed, the back, sides and floor being practically air-tight so that none of the warm, moisture-laden air of the store or basement will find its way in. Sometimes this will be all that is necessary, but in exceptional cases of heavy frosting it will be necessary to go further and have some form of an opening just below the glass to admit cold air into the window, and openings in the top to let out the warm air. This circulation of air from outside will keep the temperature of the inside of the glass much the same as that outside.

Old Windows

There are several ways of ventilating windows already installed. When the floor and background have been made thoroughly air-tight, the window should be ventilated by boring holes through the sash, about 1 inch in diameter, with corresponding holes in the upper sash of the window placed from six to twelve inches apart. If the glass is so set that there is no wooden sash to bore through, it will be necessary to instal air ducts from the base of the window up through the floor.

Some windows are built in bay window style protruding over the sidewalk, and in such cases all that is necessary is to bore holes through the floor which overhangs the sidewalk, with corresponding holes in the ceiling of the window. This often provides the necessary ventilation but it will be necessary to put a top cover over the roof holes to prevent rain entering.

Open Back Windows

In cases where windows are used which are not enclosed, it is impossible to use the ventilating system as a preventive of frost. In such cases the best remedy suggested is to get as much heat next to the glass as will render the glass too warm for frost to accumulate. To do this, some stores uses electric heaters, oil heaters and gas, the latter in numerous small jets from a pipe run along the lower sash.

A Novel Idea.

Another suggestion, which is both simple and very often effective, is to place pots of unslacked lime in the window as near the plate glass as possible. These can be made to appear as part of the display by using jardinieres or other containers, and the design of the window need not be affected. In large windows there should be three or four such jardinieres, but in small windows one or two will suffice.

HOW GERMANY SAVED TIN CANS

The extent to which Germany absorbed old tin cans and tin plate from England before the war and some of the processes by which the tin is removable from such material is doubly interesting at present, when we are urged to employ every means possible to save by-products and scrap of all kinds, and when tin itself has reached the highest price in its history.

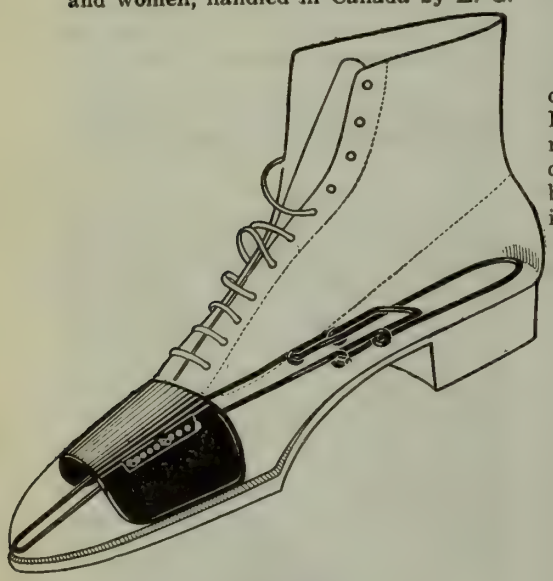
Before the war a German firm established in several parts of Great Britain large works for cleaning tin cans, recovering the tin and solder, and pressing the clean steel into bales. In this way they shipped a large quantity of good steel to Germany. Ultimately they stopped detinning in England and merely desoldered the scrap and shipped it baled to Germany. Detinning by the chlorine process was cheaper on the continent, yielding, in addition to the sheet, tin tetrachloride, a valuable product of silk manufacture. Tinned steel plate to the amount of some 150,000 tons, some of which is believed to have been detinned, was exported from England for many years before the war, and thus Germany obtained at small cost a large tonnage of steel and other metals that could have been worked up into marketable products.—"Scientific American."

NEW HARDWARE GOODS

OFFERED TO CANADIAN HARDWAREMEN

PORTABLE SEWING MACHINES

Davis portable sewing machines manufactured by the Davis Sewing Machine Company of Dayton, Ohio, will be

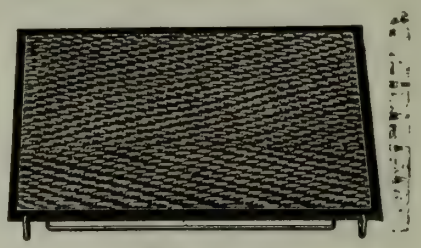


Portable Sewing Machine

handled by the Factory Products Company, 220 King St. W., Toronto, who have secured the selling rights for Ontario. The machine, which is electrically operated, will, it is stated, cover a wide range of work, and when not in use can be stowed away in a small space. It is stated that it can be run slowly or up to 800 stitches per minute, and is regulated by a foot controller. The claim is made that 200,000 stitches can be made at a cost for power of one cent.

SHOE TREES

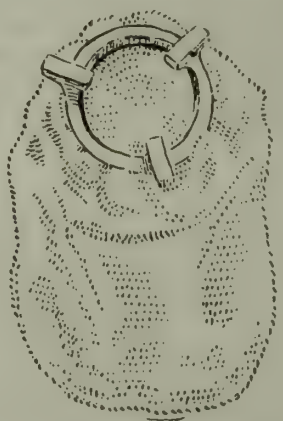
"Kloo" adjustable shoe trees for men and women, handled in Canada by E. G. Gooderham, 24 King St. W., Toronto, will, it is claimed, fit any sized shoe and will make shoes last twice as long and retain their shape. The "Kloo" shoe trees, it is stated, weigh only six ounces, will fold up to the size of an ordinary brush and may be conveniently carried in a travelling bag. They are made of enamelled steel.



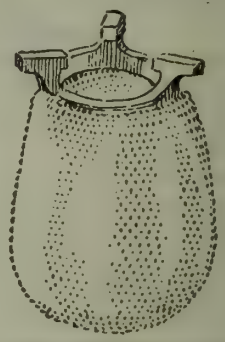
Shoe Trees

AUTO MAT

The auto board "Koko Mat," made by the Theo. H. Gary Co., 67 Irving Place, New York, is, it is stated a matting woven of Cocoa-Fibre-Yarn clamped in a black enamelled steel frame in such a way that it cannot be taken out or become loose by any means. The frame is attached to the running board by a patented locking spring clamp, which, it is claimed, holds it tight so that it cannot rattle or work loose.



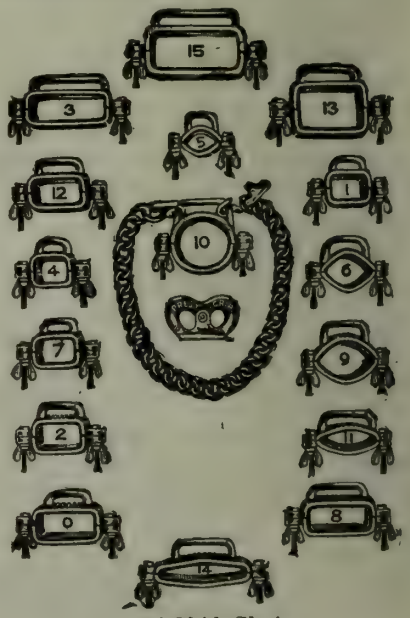
No holes or screws are necessary, it is stated. The matting scrapes the mud off shoes, and being porous, allows the moisture to evaporate quickly, it is stated, and the dust to fall through or to be shaken out.



Koko Mat

R. M. FLEXIBLE MANTLES

R. M. Moore Co., Ltd., Vancouver, have come on the market with the R. M. Flexible Gas Mantle, for which they make the following claims: Greater candle power and longer life, and cannot be damaged in shipment. As the name implies, it is flexible and can be tied in a knot without being damaged. This allows it to be shipped easily. When put on a burner it shapes itself to suit the amount of gas supplied, thus it is pointed out, it is not necessary to regulate the gas to suit the mantle. This gas mantle has already been used by some cities illuminated with natural gas, and is being adopted by a number of city gas companies.



Before Burning

After Shaping on Burner

ANTI-SKID CHAINS

"Prest-O-Grip" anti-skid chains, made by the Rowe Calk and Chain Company, Plantsville, Ct., are, it is claimed, quickly and easily hooked on. They are made specially for motor trucks with solid tires, and if a truck is stuck in the mud it is claimed "Prest-O-Grips" will take it out without the necessity of jacking it up. Another claim is made that it is not necessary to push the truck around to attach the grips.

Anti-Skid Chain

WEEKLY HARDWARE MARKET REPORTS

STATEMENTS FROM BUYING CENTRES

THE MARKETS AT A GLANCE

INGOT metals seem to be furnishing most of the thrills in the hardware markets, which generally are very well maintained. Lead has reached lower levels, and with the heavy stocks held in Canada some are of the opinion that even further declines can be expected. Antimony has come down materially, and whereas even lower figures may be reached, no further big drops are anticipated. Spelter has come down, copper is lower, and there seems to be some tendency towards lower prices on aluminum.

A lowering of values has been recorded in eavetrough and conductor pipe this week. These have been selling on a basis of list plus 15 per cent., and the new prices determined on are net list. This is a reflection of declines which have been recorded in galvanized sheets during the past two or three weeks. Corrugated sheets have not been changed. The basis now prevailing was not determined on from high-priced flat sheets, with the result that present quotations on the corrugated sheets are well in line or slightly less comparatively than the flat sheets.

An easier feeling has developed in regard to rope. Hemp, which is the real basis, has been sagging materially the past few weeks, and with ample supplies coming forward, substantial declines seem to be a prospect for rope. Any further change follows on the heels of a decline of 2c per pound recorded last week.

Contracts for cotton waste are being completed, and these are being filled in "subject to decline." The feeling prevails that a gradually lower scale of quotations will be in evidence, though this must be slow in coming. Restrictions on the use of wool in wool waste have been removed, and former basis for the various grades is being established.

Sheets and plates have held firm and unchanged at levels recently established. The present range of quotations seems to be fairly well in line with figures at the mills, and whereas some slight adjustments may be effected, no material change is contemplated.

Christmas business has been very good. The mild weather and absence of snow for so long resulted in a big movement of coaster wagons, kiddie kars and kindred lines. Skates also moved very well in the last couple of days, along with sleighs, snowshoes and toboggans. Cut glass, silver-plated ware and cutlery of all kinds were very active, and jobbers report a splendid clean-up of all holiday goods. The outlook for 1919 in all lines is considered very bright.

MONTREAL MARKETS

MONTREAL, Dec. 26.—Ingot metals show weakness and declines are recorded in copper, tin, spelter and lead. Old materials are weak, although old rubbers hold steady. Solder is lower on three grades, strictly, commercial and wiping, and wire solder also is quoted down. A decline of half a cent per gallon has been made in the price of fuel oil.

A firm basis obtains for stoves and ranges, and prices are being guaranteed for the next three months. Sheets and plates are easy, and trading very limited. Jobbers report an excellent sale of seasonable lines, and some are completely sold up on gift goods, while none seem to have any overstock at all.

Rope is Quiet On Steady Basis

Montreal.

ROPE AND CORDAGE.—The recent declines are the basis still in this market on the various qualities of rope. Sisal is selling at 25½c per pound base; pure manila at 37c and British manila at 31c per pound. Little trading is being effected.

Stove Prices Firm; Prices Guaranteed

Montreal.

STOVES AND WARES.—That stove prices will hold during the first quarter of 1919 is predicted by the manufacturers. In fact this is looked upon by the makers as a certainty and those buying during the first three months of 1919 will be guaranteed against declines.

Wares are rather quiet, but the markets are seasonable and prices are maintained.

Gasoline, Coal Oil Held; Fuel Oil Down

Montreal.

COAL OIL, GASOLINE, FUEL OIL.—The coal oil market is steady and business seasonably good. Royalite is selling at 19c and Palacine and Electroline are unchanged at 22c per gallon. Gasoline of motor grade is selling at 34c per gallon.

A decline of half a cent per gallon has been effected for fuel oil.

Wire and Nails Hold; Movement Seasonable

Montreal.

WIRE AND NAILS.—The base price of wire nails is unchanged at $5.50 per 100 pounds, and that for cut is held at $5.85. Few sales are reported of any size, only sorting business being transacted.

The base price for No. 9 smooth steel wire is held at $6.25 per 100 pounds.

Sheet Prices Same; Declines Will Come

Montreal.

SHEETS.—The basis for sheets is weak but without further change. That revisions downward will be made in galvanized and also in black grades seems likely. Trading has not been at all active and there is little new interest in prospect for the remainder of the year.

BLACK SHEETS—	Per 100 lbs.	
10 gauge	$7 50	$11 50
12 gauge	7 60	11 00
14 gauge	7 75	8 20
16 gauge	7 75	8 00
18-20 gauge	7 75	8 00
22-24 gauge	7 90	8 35
26 gauge	7 95	8 40
28 gauge	8 05	8 50
GALVANIZED SHEETS—		
10¾ oz.	$11 35	$12 35
28 gauge	10 90	11 90
26 gauge		11 35
22 and 24 gauge		11 15
20 gauge		11 05
18 gauge		10 95
16 gauge		10 85

NOTE.—These prices are for full bundles, an extra charge of 25c to 35c per 100 lbs. is made for broken lots.

Steel and Iron Hold Same Basis

Montreal.

IRON AND STEEL.—The market conditions are quite the same as have obtained for the past three weeks. No quotable changes are made, though it seems possible that some readjusting may be effected within the next fortnight or so. These will follow the adjustments that will be made in the pig iron basis.

Common bar iron, per 100 lbs.	$4 55
Refined iron, per 100 lbs.	4 80
Horseshoe iron, per 100 lbs.	4 80
Norway iron	12 00
Mild steel	5 05
Band steel	5 05
Sleigh shoe steel	5 05
Tire steel	5 25
Toe calk steel, per 100 lbs.	5 95
Mining tool steel, per lb.	0 17½-0 19
Black Diamond tool steel, per lb.	0 18 -0 19
Spring steel	6 50
Single reeled machinery steel	6 50
Iron finish machinery steel	5 10
Harrow tooth steel	5 20
Black Diamond cast steel, lb.	0 22

Some Solders Down; Lead Lines Easy

Montreal.

LEAD PRODUCTS.—The price of strictly and commercial grade solders has declined from 2¼c to 3c per pound. Wire solder is also lower as quoted below. This is in accordance with the weakness on pig tin and also on lead. There is no new feature in lead products, but the same are ruling with an easy undertone and declines may be made soon.

Lead pipe, lb.	$0 14	$0 15
Lead pipe (cut lengths)		0 15
Lead waste pipe, lb.	0 15	0 16
Lead traps and bends	Net list.	
Lead wool, lb.		0 14
Lead sheets, 3 to 3½ lbs. sq. ft., lb.		0 12¾
Lead sheets, 4 to 8 lbs., s. ft.		0 11½
Cut sheets, ¾c lb. extra, and cut sheets to size. 1c. lb. extra.		
Solder, guaranteed, lb.		0 47
Solder, strictly, lb.		0 40
Solder, commercial, lb.		0 36¾
Solder, wiping, lb.		0 36¾
Solder wire (8 gauge)—		
40-60		0 48
45-55		0 52
50-50		0 58
Zinc sheets, casks		
Do., broken lots		

Note—The above prices for solder are for full boxes of 100 lbs. Jobbers will charge several cents more for small lots.

Dearth of Business in Old Material

Montreal.

OLD MATERIAL.—The old metal markets are decidedly quiet and very little interest of any kind attached to them. A change is not looked for now and prices will probably be maintained until after the turn of the year. Old rubbers are more steady than other items in the list, the tendencies on metals being weaker.

Dealers' Buying Prices:		
Tea lead		0 05½
Heavy lead pipe		0 07¼
Yellow brass		0 13
Red brass		0 21½
Light brass		0 08
Scrap zinc		0 06¼
Heavy copper	0 22	0 23
Wrought iron, No. 1, per gr. ton	22 00	23 00
No. 1 machinery cast	35 00	36 00
Heavy melting steel	22 00	23 00
Pipe scrap	18 00	20 00
Stove plate, per ton	23 00	24 00
No. 2 busheling	12 00	12 50
Old rubbers, boots and shoes	0 08	0 08½
Overshoes, lumbermen's rubber boots		0 06
Bicycle tires	0 04½	0 05
Automobile tires	0 04¾	0 05

Tin, Copper, Lead, Spelter Are Down

Montreal

INGOT METALS.—As pointed out in HARDWARE AND METAL last week, the ingot markets are unsettled and this condition still prevails. Tin is lower

GETTING THE MARKETS IN BRIEF

Pyrex oven ware has come in for a revision of prices and the move is upward.

* * * *

Wheel goods, such as coaster wagons, Kiddie Kars, etc., were big factors in Christmas business, mild weather and absence of snow being factors.

* * * *

Linseed oil has hesitated in its downward movement. Opinion is general that lowest point has been reached and that pendulum may swing the other way after the first of the New Year.

* * * *

That a gradually lowering range of quotations on cotton waste way be looked for is the opinion voiced throughout the trade. Restrictions on manufacture of wool waste have been lifted.

* * * *

Bamboo poles show another advance in prices issued this week. The days of the lad with his 5-cent rod over his shoulder have been left behind.

* * * *

Soldering coppers show a decline of 6½c per pound in some quarters this week.

* * * *

Exercisers move up from 5 to 10 per cent. in new quotations issued this week.

* * * *

Weakness prevails in the hemp market though the result locally in rope is not yet apparent. That lower levels will be reached on rope seems more than likely, a substantial decline being a prospect now.

* * * *

Stoves and ranges are holding steady in price and the present basis seems likely to hold for the next three months at least.

* * * *

Fuel oil registered a further decline of half a cent per gallon in the Montreal market this week.

* * * *

Among the ingot metals declining this week are lead, tin, copper, and spelter. Aluminum is also easier.

* * * *

Canthooks have been revised. Higher prices are now in effect.

* * * *

Jobbers report the best clean-up of holiday stocks in their history. Silver plated flat ware, cut glass, coaster wagons, sleighs and skates have all been very active.

* * * *

Ice cream freezers show a further revision upward in quotations issued this week. The 5 per cent. advance is not a "freeze-out," however.

* * * *

Eavetrough and conductor pipe are two lines to register declines this week. The new selling prices will be based at net list; former quotations were list plus 15 per cent.

and as also are lead, copper and spelter, with aluminum somewhat weaker too.

COPPER. — The market has been weakened for best grades owing to the competitive effect of casting grade. This is selling here at 26c and electrolytic is quoted at 29c per pound.

TIN.—Cables from London are lacking, but the position is easier and lower prices still are anticipated. For small lots, from 77c to 78c per pound is being quoted, and even a better price than this may be had on quantity. Stocks are ample for any spot business offering.

SPELTER.—Spelter is easier, and this is due to a lack of trading, in part. The price quoted this week is from 9½ to 10c per pound.

LEAD.—Business has been very slow on this line and the tendency is to lower levels, with quotations made at 9 to 9½c per pound.

ANTIMONY.—For what business there is, 11 to 12c per pound is being quoted.

ALUMINUM.—Very little interest is taken in this line and the price is easier at 43 to 45c per pound.

TORONTO MARKETS

TORONTO, Dec. 26.—Lower price levels have been recorded on eavetrough and conductor pipe following the easing away in the market on galvanized sheets. An easier tendency is noted in rope and that lower levels will be reached seems quite probable. Ingot metals are hard to figure out, the markets to-day really being in favor of the buyer, which may ultimately result in even lower price levels. Jobbers report that there has been a very heavy holiday trade and that all Christmas lines have been well cleaned up.

Easier Feeling Noted in Rope

Toronto.

CORDAGE, TWINE. — Following closely on the heels of the decline recorded in rope last week is shown a weaker tendency for the future. The main factor in this easier feeling is the lower hemp market supplemented by the arrival of fairly ample supplies. Just how this may work out is still a question, but it seems quite certain that a lower basis will be established by the first of the new year. Just how much lower prices will go is uncertain, but a fairly substantial decline seems imminent. Prices for the week remain at levels established last week, viz.: Pure manila, 37c per pound base; British manila, 31c; New Zealand hemp, 31c; sisal, 25½c.

Sisal fibre, which is really the base in binder twine, is holding very firm and there seems no immediate prospect of a recision in values from lower basis recently established.

Eavetrough, Conductor Pipe Come Down

Toronto.

EAVETROUGH, CONDUCTOR PIPE. —Lower price levels have been reached on both eavetrough and conductor pipe this week. These follow closely on the heels of the decline in galvanized sheets, the new prices quoted being net list superseding the list plus 15 per cent. quotations that have been effective for some time. On the new basis quotations to the trade are as follows: Conductor pipe, plain, 2 inch, $8 per 100 feet; 3 inch, $9.70; 4 inch, $12.80; 5 inch, $17.50; 6 inch, $21.30. Eavetrough is quoted as follows: 8 inch girth, $6.90 per 100 feet; 10 inch. $7.70; 12 inch, $9.10; 15 inch, $12.50; 18 inch, $16.

Stoves Show No Change; Wares Steady

Toronto.

STOVES, WARES. — There is little doing this week in regard to stoves. No price changes have yet been announced, but indications are that the market is holding very firm. Sales at this time are only fair, though some retailers report a fair amount of business in stoves.

Seasonable quiet is recorded in all lines of wares. The trade is preparing for a big 1919 business and orders already at hand would indicate that retailers have placed quite freely.

No Change Recorded in Nails

Toronto.

NAILS, WIRE. — The situation is without change this week in regard to nails. There is very little movement in progress and these conditions are expected to prevail until the first of the year. Prices hold at steady levels, the wire selling at $5.50 per 100 pounds base and cut at $5.85 per 100 pounds base.

Smooth steel wire is inactive and the market generally dull. The base price is unchanged at $6 25 per 100 pounds.

Oils Steady; Gasoline Firm

Toronto.

OILS, GASOLINE.—A steady tone is noted in the situation on all oils this week. Trade except for essential purposes is just a little quiet, Christmas business not being greatly interested in coal oil. Prices to the trade show no change this week at 18½c to 21½c per gallon.

Gasoline shows no feature of particular interest this week. The demand has eased away somewhat and prices ho'd at unchanged levels, 33c per gallon being the quotation to-day.

Little Movement Noted in Bars

Toronto.

IRON AND STEEL.—There is little activity in this market. Prices have shown no further change and indications seem to be that present levels will carry through to the first of the new year. Business is seasonably quiet.

TORONTO—	Per 100 lbs.	
Common bar iron	$4 85	$5 25
Common bar steel	5 00	5 50
Refined iron	....	5 65

Sheet cast steel	0 42	0 45
Tool steel	0 20	0 42

Corrugated Sheets Remain Unchanged

Toronto.

CORRUGATED SHEETS —There has been no change recorded in the market on corrugated sheets. Prices have shown no change for some months, even in the face of advancing prices on sheets and indications seem to be that a steady market may be expected for some little time yet. Quotations which are ruling this week are as follows:

TORONTO— Corrugated Sheets—	Per 100 Sq. Feet Gal'zed	Painted
No. 28 gauge	$ 9 00	$ 7 50
No. 26 gauge	10 00	8 50
No. 24 gauge	15 00	11 25
No. 22 gauge	18 00	14 00
No. 20 gauge	21 00	17 50
No. 18 gauge	27 00	21 00

Discount, 7½ per cent.

Steady Tone in Sheets, Plates

Toronto.

SHEETS, PLATES.—There seems to be a steadier tone to the market on sheets and plates after a period when lower levels have been almost a weekly feature. The feeling seems to be that a pretty substantial basis has been arrived at and no sharp breaks from present levels are thought likely—as a matter of fact it looks as though present range of quotations will carry through into the first of the year or until such time as supplies become quite free.

BLACK SHEETS—	Per 100 lbs.	
10 gauge		$7 50 $8 50
12 gauge	$6 85	7 35 8 35
14 gauge	6 90	7 20 7 90

12 and 14 gauge	8 15	8 40

Prices shown are for full cases. An extra charge of from 25c per 100 lbs. is made for less than case lots.

Tubes in Better Supply; Wrought Pipe

Toronto.

BOILER TUBES, WROUGHT PIPE.—There seems to be a good supply of boiler tubes arriving and difficulties which trade have experienced in getting deliveries seem to be fading away. There has been no price change recorded as yet, but a slight revision to lower levels seems to be a possibility early in the new year. Quotations now ruling are shown below.

The situation in wrought iron pipe has shown no change. Supplies are available for urgent demands of the trade and there is a feeling that better stocks to draw from may be available at a comparatively early date. Prices shown in current market quotations are unchanged.

	Per 100 feet	
Boiler Tubes—		
Toronto—	Cold drawn	Lapweld
1 inch	$36 00	$ ....
1¼ inch	40 00	....
1½ inch	43 00	36 00
1¾ inch	43 00	36 00
2 inch	50 00	36 00
2¼ inch	53 00	38 50
2½ inch	55 00	42 00
3 inch	64 00	50 00
3¼ inch	....	58 00
3½ inch	77 00	60 00
4 inch	90 00	75 00

Lead Products Hold, Solder Steady

Toronto.

ZINC AND LEAD PRODUCTS.—No new prices have been named on manufactured lead products, quotations shown below being held at unchanged levels. The market on pig lead is easier and even lower levels are anticipated which may work out in declines on the manufactured goods.

Solder has held unchanged at declines recently reported. The market is none too firm, lower lead and a situation that is anything but steady in tin providing an easier tendency. Prices are shown below:

Lead pipe lb.	$0 14
Lead waste pipe, lb.	0 15
Lead traps and bends	Net list
Lead wool, lb.	0 14
Lead sheets, 4 to 6 lbs., sqr. ft., in rolls, lb.	0 12½

Cut sheets, ½ to ¾c lb. extra, and cut sheets to size, 1c lb. extra.

Solder, commercial, lb.	0 36½	0 39
Solder, wiping, lb.	0 34	0 45
Solder wire, lb.	0 49½	0 54
Zinc sheets, lb.		0 26

Market in Old Materials is Dull

Toronto.

OLD MATERIALS.—The market in old materials is dull and there is no buying or selling interest displayed by the trade. Supplies are ample, but there seems to be no encouragement to trading whatever. Quotations shown are on a nominal basis only.

	Dealers' Buying	Prices.
Tea lead	$0 05¼	....
Heavy lead pipe	....	0 08
Yellow brass	0 12	0 13

No. 1 busheling	16 00	17 00
No. 2 busheling	....	12 00
Country mixed scrap	....	16 00

Cement Steady; Plaster of Paris Too

Toronto.

CEMENT, PLASTER OF PARIS.—There is a steady tone to the market in cement and indications are that present prices will carry through for the balance of this year. There is little movement at the present time and not much expected before the middle of January.

Similar conditions may be said to prevail in the market on plaster of paris. Prices hold at unchanged levels and business just now is rather quiet.

Waste May Be Easier; Oakum

Toronto.

WASTE, OAKUM.—Higher prices on a couple of grades of cotton waste were recorded recently, X going up ½c to 17½c per lb. and leap XX up 1c to 19c per pound. The outlook seems to be that a gradual easing away in prices will take place after the turn of the new year. Contracts are being made "subject to decline" and the trade is looking for somewhat lower levels. The restrictions on wool waste have been lifted.

Business on oakum is somewhat quiet just now and prices remain unchanged at levels shown in current market quotations.

Ingot Metals Hard to Fathom

Toronto.

INGOT METALS.—It seems hard to get a definite statement of the market. As a matter of fact some interests state there is no such thing to-day. Lead declined in the States this week and tin went up in London. Neither move has yet influenced prices here which show no change from last week's levels.

COPPER. — There is no indication which way prices will swing when copper is put on the open market the first of the year. If it comes down much it treads on the toes of labor mining it. So whether much lower levels will be possible is a question. Locally there is not any change from the 30-32c per pound level.

TIN.—Higher prices in London exerted no marked influence on the market here. Trading is confined to what is going into consumption on a basis ranging from 75c to 85c per pound.

SPELTER. — No new developments are recorded in this metal. Supplies are scarce locally and no more being bought than wanted for immediate use. Locally prices hold at 9½c to 10c per pound.

LEAD.—Prices in the United States showed a further decline early in the week, but this has not yet been reflected here. That lower levels will be reached locally seems quite possible, however. Quotations range to-day from 8¼ to 9½c per pound. Business is limited.

ALUMINUM.—There have been no new or interesting developments here. Nominal quotations range around 50c per pound, but the trade, commercially,

ROPE PRICES REVEAL EASIER TENDENCY

A DECLINE of two cents per pound occurred last week in base prices on rope and even at levels established the market seems to rule with a weaker tendency. From advices now at hand it seems quite within the realm of probability that further declines may be recorded about the first of the new year.

The main factor as far as rope is concerned is hemp. Supplies have been coming along very freely the last few weeks and prices have steadily gone to lower levels. Most manufacturers have been working on stocks which cost them very much higher figures than those now in effect and it was with a desire to equalize costs somewhat that lower prices were named last week.

However, there is always an element to be considered at this time which may crop up and work out in a substantial lowering of values. That is the possibility that some manufacturers may have disposed of their entire holdings bought at high levels and are entering the market on to-day's levels. What they may do in a case like that is hard to determine. Will an effort be exerted to bring about a gradual readjustment to the basis which the present hemp market would work out at or will the decline be recorded in one big drop? Those are the queries facing the trade and indications seem to be that a pretty substantial decline is under consideration in rope values. Developments may be expected at an early date, probably prior to the first of the new year.

The situation in binder twine is dependent to a large extent on sisal fibre and prices on this are holding steadily and at the present time there seems to be no talk of lower levels than those named recently.

has adopted a waiting attitude as far as its future requirements are concerned.

ANTIMONY.—This metal is dull and uninteresting. The marked declines have stopped for a few days at least and any further recessions in value seem likely to come gradually rather than otherwise. Prices to-day are around 10c per pound.

PIG IRON.—The outlook seems to be pretty fair and the first of the year should see manufacturers in the market for fairly substantial amounts. There have been no changes of movement in the situation.

LONDON MARKETS

LONDON, Ont., Dec. 26.—Higher price levels have been reached in quotations issued this week on Pyrex oven ware. Advances have been made also in nut wrenches and cant hooks, while a readjustment in quotations on cast enamel sinks and some lines of saw sets is reported. Soldering coppers have declined 6½c per pound.

Christmas trade has been brisk, silver-plated flatware, cut glass and safety razors all enjoying a good sale at unchanged prices.

Higher Prices Named On Pyrex Ware

London, Ont.

PYREX WARE.—New prices have been issued on Pyrex oven ware which provide for an advance over former levels. Dealers report the sale this season as very heavy. Advanced prices on some of the best sellers are given herewith: Gift sets, No. 1216, $6.00 each; bake dishes, No. 121, $14.00 dozen; bake dishes, No. 122, $12.00 dozen; casseroles, No. 167, round, $16.85 dozen; casseroles, No. 168, round, $21.00 dozen; casseroles, No. 193, oval, $16.85 dozen; oval bread pans, No. 212, $10.50 dozen; utility pans, No. 231, $12.75 dozen; pie plates, No. 202, $9.25 dozen; pie plates, No. 203, $10.50 dozen.

Cast Enamel Sinks Readjusted; Sifters Move

London, Ont.

CAST ENAMEL SINKS, SIFTERS.—Prices have been readjusted somewhat again on cast enamel sinks and the present basis of quoting arrived at is now as follows: 16 x 24 inch, $6.30 each; 18 x 30 inch, $6.90 each; 18 x 36 inch, $9.72 each.

Ash sifters continue to move forward freely and sales all season have been quite active. No further price change is recorded. Quotations to the trade on the Daisy, galvanized, being $15.00 per dozen; Banner, $3.45 each; No. 1 Rocker, $5.50 each.

Lower Prices on Soldering Coppers

London, Ont.

SOLDERING COPPERS. — Lower prices have been reached on soldering coppers in this market, the decline amounting to 6½c per pound and bringing the present basis of quoting to 58c per pound. The new prices which have been reached are as follows: 3 lbs. to pair, 58c per pound; 2½ lbs. to pair, 59c per pound; 2 lbs. to pair, 60c per pound; 1½ lbs. to pair, 61c per pound; 1 lb. to pair, 64c per pound; ½ lb. to pair, 65c per pound.

Nut Wrenches Up; Saw Sets Changed

London, Ont.

NUT WRENCHES, SAW SETS.—Higher prices have been named in some quarters on Wescott nut wrenches. On the new basis of quoting the 6-in. have reached the price of $10.25 per dozen; 8-in. are up to $13.00; 10-in. are up to $15.50, and the 12-in. are now $19.50 per dozen.

Quotations have been revised also on a couple of lines of cross-cut saw sets, the new prices named being for the Whiting, $5.50 per dozen; Lincoln, $8.50 per dozen. No change in other lines is reported as yet.

Higher Prices on Canthooks; Rope

London, Ont.

CANT HOOKS, ROPE.—A change is noted this week in quotations issued on cant hooks. The new prices named provide for an advance to higher levels as will be shown in figures herewith: With 3½ foot handles, $24.50 per dozen; with 4 foot handles, $25.00 per dozen; with 4½ foot handles, $25.50 per dozen.

At the new basis established on rope last week, spring booking business is being accepted. The undertone to the market is rather weak, hemp which is the real basis showing marked declines and supplies being much improved. That even lower levels than those reached last week seems quite probable on rope. Quotations to-day are: Pure manila 37c per pound base; British manila 31c; New Zealand hemp 31c; sisal 25½c.

Sales Saws Considered Fair

London, Ont.

SAWS.—Jobbers report that a very fair sale of cross cut saws and buck saws has been maintained. The market is steadily maintained, no price changes being effected whatever so far. Quotations on a few lines are reproduced herewith. Cross cut saws: Philadelphia Lance 57c foot; Champion 57c foot; Maple Leaf Lance, Premier, Pangburn, Simonds No. 22, Simonds No. 13, Racer, 5 ft. $4.95 each; 5½ ft. $5.85 each; 6 ft. $6.60.

Buck saws: Happy Medium $9.60 dozen; No. 50 Disston Lance Tooth $12.50 dozen; Prince Rupert Lance Tooth $12.50 dozen; Whiting Pride Lance Tooth $11.00 dozen.

Wagons, Wheel Goods Very Active

London, Ont.

WHEEL GOODS.—Activity has been marked throughout the Christmas shopping rush in wagons and all wheel goods. The mild weather and general absence of snow have been contributing factors. No change in prices have been made, quotations on a couple of lines being given herewith: Auto wheel coasters, No. 00, $22.88 dozen; No. 01, $45.04; No. 1, $54.34; No. 2, $60.06; No 3, $66.50; No. 4, $75.79.

Kiddie Kars, No. 3, $1.35 each; No. 4, $1.70.

Glass Steady; Putty White Lead Unchanged

London, Ont.

GLASS, PUTTY, WHITE LEAD IN OIL.—A very steady situation is shown in window glass though the market is ruling with a very firm undertone. Discounts remain unchanged, single and double diamond in full boxes being quoted at 25 per cent. and cut lights 10 per cent. from list.

The market on putty is quiet and there is little movement in progress. Prices to the trade are as follows: Standard 100 lb. drums, $6.75 per 100 lbs.; standard 25 lb. drums, $7.00; pure 100 lb., $8.75; pure 25 lb., $9.00.

White lead in oil remains in an unchanged position, pure in ton lots being quoted at $17.80 per 100 pounds and in less than ton lots $18.15. The demand is small just now and is expected to remain that way until after the first of the New Year.

Linseed Oil Holds; Turpentine Steady

London, Ont.

LINSEED OIL, TURPENTINE.—The market on linseed oil shows no change this week. The seed market is somewhat steadier with futures showing some strength and the feeling is expressed that the bottom has been reached and that slightly higher levels may be named. The prices reached last week are steadily held as follows: 1 to 2 bbls. raw $1.70 per gallon, boiled $1.73 per gallon; 3 to

5 raw $1.69, boiled $1.72; 6 to 9 raw $1.67, boiled $1.70. Less than barrels, add 10c per gallon.

Exchanges in the South are closed so late reports from primary points on turpentine are missing. The last received showed a strengthening market and this seems to be the outlook for the next couple of months. Prices locally are held firm and unchanged at following levels: 1 bbl. lots $1.10 imp. gallon; 2 to 4 bbl. lots $1.09; 5 gallon lots $1.20.

WINNIPEG MARKETS

WINNIPEG, Dec. 26.—Price changes during the week are limited to usual number at this season of the year. Manufacturers generally are holding off making new prices until after the first of the year, when a considerable number of changes is looked for. Among the advances during the week appear the following lines: Dash churns, breast drills, bamboo poles, ice cream freezers, and exercisers.

Demands during the past week have been very active on all holiday goods, sales being heavy on cut glass, silver-plated ware, cutlery, toys and sleighs. Many of the jobbers' stocks on these lines have been greatly depleted. Business in other lines is reported rather quiet owing to the dealers keeping stocks as low as possible till after stock-taking.

Exercisers Up From 5 to 10 Per Cent.

Winnipeg.

EXERCISERS. — Market prices on sporting goods show little change during the week. Whiteley Exercisers are the only item to change, moving up from 5 to 10 per cent. over former quotations. This, it is indicated, is due to the scarcity of materials entering into their manufacture. New prices now ruling are given herewith: No. 0, $3; No. 1, $4; No. 2, $5; No. 3, $6 each.

Higher Levels on Bamboo Poles

Winnipeg.

BAMBOO POLES. — Bamboo poles have shown probably the heaviest advances since the commencement of the war of any line handled by the hardware jobbers. This has been due almost entirely to the abnormal freight rates on all Pacific shipments. Practically all vessels were pressed into war service on the Atlantic and for the past year the freight on bamboo poles, which are imported from the Orient, has averaged approximately three times the value of the poles. There is no immediate signs of lower rates. New prices, which are higher, have just been announced for spring business and are given herewith:

Bamboo Poles—12 ft., $14.75; 14 ft., $19.25; 16 ft., $28.25; 18 ft., $37.75; 20 ft., $43.50 per 100. The above prices are for full bundles of 100 poles. For smaller quantities an extra charge of $1.00 per 100 poles.

Rope Still Remains Unchanged

Winnipeg.

ROPE.—Rope prices have shown no change during the past few months, all grades holding very firm. Recent advices from American markets would indicate an easier tone on some grades but as there is a steady demand and only reasonable stocks no change has been made here as yet. That lower levels will be reached seems quite possible after the first of the new year. Prices now ruling are given as follows: Sisal rope, 28¼c per pound base; pure manila rope, 39¾c; British manila rope, 33¾c; lathyarn, 28¼c; African hemp, 33¾c; cotton rope, ¼ inch and larger, 71c per pound.

Ice Cream Freezers Move Up 5 Per Cent.

Winnipeg.

ICE CREAM FREEZERS.—Prices on ice cream freezers which have held firm for the past year have undergone a slight revision, and prices move up approximately 5 per cent. This, it is said, is due to increased manufacturing costs and higher freight rates. New prices now ruling are given below and jobbers are soliciting bookings for spring at these figures:

Ice Cream Freezers—Lightning, 4-qt., $5.30; 6-qt., $6.75; 8-qt., $8.65; 10-qt., $11.55; 12-qt., $13.00 each.

Blizzard—2-qt., $3.25; 3-qt., $3.90; 4-qt., $4.75; 6-qt., $6.10 each.

Crown with fly wheel—14-qt., $23.75; 18-qt., $30.35; 24-qt., $36.85 each.

Dash Churns Move Upward

Winnipeg.

DASH CHURNS.—Prices on dash churns have again been revised due to shortage of material and high freight rates. Quotations have moved up from 5 to 10 per cent. over former figures. To-day's ruling prices are given as follows: Ash dash churns, No. 24, $20.25; No. 25, $21.40; No. 26, $22.60 per dozen.

5 Per Cent. Advance in Breast Drills

Winnipeg.

BREAST DRILLS.—During the week new prices have been announced on a few lines of Millers Falls breast drills, which show an increase of approximately 5 per cent. The balance of the lines remain firm at former prices. To-day's prices on the revised lines are as follows: Breast drills No. 12, $6.25; No. 019, $5.65; No. 86, $10.85 each.

Window Glass Holding Firm

Winnipeg.

WINDOW GLASS. — Window glass prices continue firm while stocks are reported very low, and indications point to even higher prices in view of the fact that the American glass workers are demanding a wage increase of about 35 per cent. Should this be granted higher prices on glass will be imperative. Prices ruling to-day are confirmed as follows:

	Single Case	Double Case
Window Glass, up to 25 ins....	$15 50	$19 50
26 to 40 ins....	16 50	22 00
41 to 50 ins....	19 50	25 00
51 to 60 ins....	20 50	25 50
61 to 70 ins....	21 50	27 00

Situation in Linseed Oil Unchanged

Winnipeg.

LINSEED OIL.—Linseed oil prices hold firm on the local market at former quotations despite the drop in flaxseed and reports of reduction in oil at some of the Eastern points. Prices ruling to-day are as follows: Raw linseed oil, $2.20 gallon; boiled linseed oil $2.23 gallon in single barrel lots.

Turpentine Holds Firm, Unchanged

Winnipeg.

TURPENTINE. — Turpentine prices show no change on the local market during the past week, holding very firm with about the usual seasonable demand while stocks are very moderate. Reports from American markets show prices firm, and as soon as shipping space is arranged for export business prices are expected to strengthen. To-day's prices locally are given herewith: Barrels $1.25 per gallon; ½ barrels $1.28; 5-gal. lots $1.28; 1-gal. lots $1.28, plus the usual extras for containers.

Many Steel Furnaces Have Sold All They Can Produce Until July 1

THE steel situation in the United States at the close of this year is outlined by "Iron Age" in its issue this week as follows:

"At the close of the year 1918, never to be forgotten because it marked the attainment of the iron trade's greatest contribution to the winning of war, conditions contrast sharply with those which prevailed at the end of 1917. Then the operations of manufacturing plants, particularly blast furnaces, were seriously hampered by the inadequate supply of materials, due largely to the extremely cold weather, but the mild weather this winter and the liberal supply of cars have made conditions much more satisfactory. Then the Government price-

fixing policy had become established and shortly before Christmas the War Industries Board had recommended to the President the extension of the prices promulgated late in the preceding September, thus relieving the fear that the schedule would be reduced.

Conditions Reversed

Now the trade witnesses the voluntary lowering of prices of pig iron and finished material by most of the manufacturers. Then there was a decided scarcity of labor, while now the problem of how the returning soldiers and the employees discharged from war industries will find jobs is causing no little anxiety at Washington and in industrial centres. Then the percentage of output being made for the Government was rapidly increasing while now it is even more rapidly declining. Then all thoughts were concentrated on how to render the most efficient service to the cause of the United States and its Allies, while now all efforts are directed toward an orderly readjustment of industries.

After Export Trade

In organizing for the post-war extension of commerce, independent steel manufacturers have named the new export company the North American Steel Products Corporation, and selected E. A. S. Clarke, long prominent as a manufacturer of steel and during the war a very active worker in co-operating with the Government in the regulation of prices without legislation. Exporters who are not manufacturers have expressed anxiety as to whether their sources of supply would be cut off by the new organization, but it is authoritatively stated that the corporation will be so conducted as to give no ground for complaint on the part of exporting houses, which will be able to obtain steel from it or from other companies.

The New Contract

The new form of contract which has been agreed upon by the Contract Committee of the American Iron and Steel Institute, except as to a few details, is expected to have an important influence on standardizing contracts and stabilizing conditions. It is intended to prevent both overselling and overbuying, to bind both buyer and seller, and to be strong enough to resist all attempts at cancellation. The new attempt to make contracts more than options will probably be inaugurated at an early date and may be subjected to severe tests during the readjustment period.

Stocks Are Low

Sellers continue to call attention to high costs and low stocks, and it certainly is true that the stocks of pig iron in furnace yards are very low, but there is an increasing tendency on the part of pig iron sellers to accept the new schedule which reduces prices $3 per ton on sales for delivery after January 1. A few furnaces still insist that they will not reduce prices, but it is probable that at an early date the quoting at the lower level will prevail as to a very large percentage of the tonnage still to be sold for the first half of 1919. Statistics show, however, that many furnaces are sold up to July 1 as to 90 per cent. of their estimated production.

Little Buying

In finished materials there is very little buying at the new schedule. This causes no disappointment, for it was not expected, during the holiday season with so much uncertainty existing for various reasons as to the future, that buying would be active.

Implement manufacturers are displeased on account of the announcement of the new price schedule. When they received a concession of $5 per ton on bars about the middle of the year they entered hard and fast contracts to which they must adhere. Now they say their customers, having heard of a new reduction, are endeavoring to cancel contracts for implements, despite the fact that most of the steel has been delivered.

Saving Waste Paper Profitable

Market Conditions and Matter of Saving Are Queried—The Element of Fire Risk—What To-day's Prices Show—How Dealers Clubbing Together May Help

AN inquiry coming to hand this week re waste paper, will be of interest to more than the individual merchant who puts forth the queries. There have been two questions asked which read as follows:

1.—How will the market for waste paper be in the future?

2.—Will the price be worth the trouble of saving it?

Question No. 2 and Fire Risk

First of all it might be well to touch on one phase of the situation which should not be overlooked. It will probably help answer question No. 2, that is the question of fire risk. Baled waste paper will not burn—it may ignite and smoulder away slightly, but it is really in such shape when baled that it does not burn easily. This should mean the elimination of one item of fire risk—loose paper lying around and ready to spring into flames from the spark of a match carelessly discarded.

There is another point. The dealer has to get rid of his waste paper under any consideration, and probably burning is the method adopted. This means labor and careful watching—the baling and shipping of waste paper will not involve any more, if as much, labor.

What To-Day's Prices Show

And now the actual question—will the price be worth the trouble of saving it? The trouble end of the question is probably covered in the paragraph above. The price to-day is $10 per ton f.o.b. Toronto. The price has been higher and it has been lower, the law of supply and demand covering the operations of the market on waste paper as in every other marketable commodity.

What Net Returns to Expect

Taking $10 as the f.o.b. Toronto price then, and estimating freights from Port Hope, a point 60 miles away, and Trenton, a point 100 miles away. Carload rate from Port Hope is 11½c per 100 pounds on waste paper, or $2.25 per ton. From Trenton the rate is 14½c per 100 pounds, or $2.85 per ton. That means to the dealer selling $7.75 net per tons from a point 60 miles away, or $7.15 net per ton from a point 100 miles away. A minimum carload is 24,000 pounds.

How Dealers Clubbing Together May Help

You may say that you are attempting the impossible to fill a car. Get together with eight or ten of your fellow merchants, hardware, dry goods, men's wear, or stationers. If each one save a ton in two months' time that would mean six carloads a year for a net return to the merchants of from $85 to $93 per carload—really found money. There are few grocers who make much on sugar. There are few hardware merchants who make much on wire nails—why then not make a little on waste paper? Cut down your overhead, eliminate the little leaks which mean the difference between a really profitable business and one which is just making a living for the merchant?

Waste Paper Subject to Market Conditions

The first question, "How will the market for waste paper be in the future?" may be answered briefly by saying that this commodity is marketable the same as any other, and as such is subject to market conditions—in other words, supply and demand. Figures show that best marketing periods are from March to June, and September to December, these being periods on which greatest activity is shown in nearly every line of business. It would appear reasonable to expect that the market for waste paper will prove quite satisfactory and worth small amount of time involved in baling and shipping.

HOLD CONVENTION

Sales Force Harold F. Ritchie & Co. Gathered Together Last Week—Conditions Arising Out of Termination of War Discussed

The annual convention of the sales force of Harold F. Ritchie & Co., Toronto and New York, was held last week at Toronto. Those in attendance include four representatives from the New York office: D. C. Nixon, who has charge of the export business; E. B. Bredin, who covers the Southern States,

(Continued on page 64)

WEEKLY PAINT DEPARTMENT

Let People See Your Stock of Paint

Can You Rearrange Your Paint Department to Advantage?—How One Dealer is Making More Sales Than Ever—Great Opportunities Coming in 1919 For Selling More Paint

WHAT are you planning for your paint department for the new year? There is no such thing as standing still in business and if you do not go forward you must necessarily be slipping backward. Are you planning to make your paint department one of the real features of your store and one of the best paying branches? Are you going after the record paint trade that is anticipated in 1919 because of the building revival and the work that has been held up for four years? Paint dealers will have the best opportunity for making record sales of paints and varnishes in the coming year that they have had in a long time and many of them are planning to make the most of their chances. Some of the dealers seen by HARDWARE AND METAL are busy figuring out various plans for boosting business.

REARRANGING STORE

A Western Ontario dealer who during the summer changed the location of his paint department from the rear of his store to a more central location intends to again move it. This time it will be at one side and nearer the front of the store.

"I found that by putting the paint where people could see it that sales began to increase right away," he stated to HARDWARE AND METAL. "Many people who seldom bought paint here became interested in our displays and many good sales resulted. I was not selling as much paint as I should simply because many people did not know that I had the stock. As soon as we can get at it our paints will be given a prominent place in the store. I am going to keep the goods where people can see them and use more of the display matter sent out by the manufacturer. I am planning also to have special displays of lines suitable for interior work in the home arranged on tables, with brushes and we will have regular window displays.

IT WORKED WELL

"I got this idea of using display tables from success which followed displays of kitchenware. We had some stuff we wanted to clear and I set it out on a table one Saturday. Before the day was half over every piece was gone. From then on we have had displays of this kind continually and it has been a most satisfactory way of keeping the goods moving. Because I have been busy and short handed I have not had time to do the same with paints and varnishes, but as soon as possible in the new year our stock will be brought to the front and there will be regular displays of seasonable lines. I am satisfied that a neat arrangement on the shelves, backed by table displays and occasional window trims, will increase our sales greatly. You have probably noticed that while we carry a good stock of brushes it cannot be said that they are well displayed. I am going to let the people know that we have brushes and talk about them, too, to every customer who wants paint. Many of them never think about the brush until they get home unless we draw their attention to it in the store. I have many cases of people who have not got the results they should have from painting because they tried to do the work with an old, worn-out brush or one that was hard and unfit for use."

ANOTHER MAN'S PLANS

Another dealer intends putting on a special paint sale shortly with a view of getting rid of some lines which he has held too long. He plans to keep a list of the needs of all who have come in response to his sale and will use it for reference in a follow-up campaign in the spring.

Another dealer is getting a list of buildings which he knows will require painting. Among them are several schools and one or two churches. He plans to round up this business by seeing the proper people and getting them to work early on the clean-up and paint-up idea. He did this with considerable success last spring and plans to enlarge his field of action this year.

Boeckh's Sweeping Brooms for Household Use

The *Boeckh* line of Sweeping Brooms are becoming a necessary equipment in every Canadian home.

Their *usefulness* and *wearing qualities* have won favor with the *housewife* everywhere.

Boeckh's Sweeping Brooms are "making good"—backed by the Boeckh guarantee.

Why not become a Boeckh representative? It means further prestige for you.

WEST TORONTO

WEEKLY PAINT MARKETS

MONTREAL

MONTREAL, December 26.—Turpentine is ruling very strong this week and is probably due for an advance. This, at least, is the expression of a large operator who stated to HARDWARE AND METAL that an increase was looked for within the next ten days. Linseed oil is unchanged and quiet. Spot sales are limited and the future seed markets are appreciably firmer. Little interest attaches to white lead or putty and this is likewise true of mixed paint and varnishes.

Linseed Oil Holds; Future Market Strong

Montreal.

LINSEED OIL.—The future markets are showing much strength as regards flaxseed. Spot seed is less firm and this is accounted for largely because of the quiet conditions that prevail from a trading standpoint. The oil market is ruling with little interest and there is no change of price. The spread is from $1.62 to $1.73 on raw, in small lots.

LINSEED OIL

Raw, Imp. Gallon—		
1 to 4 bbls.	$1 62	$1 73
5 to 9 bbls.	1 61	1 73
10 to 25 bbls.	1 60	1 73
Boiled, Imp. Gallon—		
1 to 4 bbls.	1 64½	1 76
5 to 9 bbls.	1 63½	1 76
10 to 25 bbls.	1 62½	1 76

Turps Very Firm; May Go Higher

Montreal.

TURPENTINE.—The market is firmer than ever and in the absence of an er than ever and in absence of an active demand it is still holding. The tendencies are to higher levels, and some are even asking more now, while the immediate prospect is for an advance right after the first of January. This, some say, may be from 7 to 10c per gallon.

Turpentine.	Per Imp. Gal.	
1 to 4 barrels	$1 05	$1 18
Small lots	....	1 17

(Packages extra)

Little Putty Sold; Holds Its Basis

Montreal.

PUTTY.—Little movement can be looked for at this season of the year and there is no promise of an early change being made in the quotations. There are ruling steady and unchanged, with the usual differentials.

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 00	$5 25	$5 60
Do., ½ barrels	5 15	5 40	5 75
Do., 100 lbs.	5 85	6 10	6 45
Do., 25 lbs.	6 10	6 35	6 70
Do., 12½ lbs.	6 35	6 60	6 95
3 and 5 lb. tins	8 10	8 35	8 70
1 and 3 lb. tins	8 60	8 85	9 20
Do., in 100 lb. cases.	7 15	7 40	7 75

Pure linseed oil putty, $2 per 100 lbs. advance on above prices.

Glaziers' putty—$1.60 per 100 lbs. advance on above prices.

Terms—2%, 15 days, net 60.

Basis Still Same On White Lead in Oil

Montreal.

WHITE LEAD IN OIL.—Steady and unchanged basis obtains here for this commodity. A few quantities are asked for and the movement is seasonable, but on the quiet order. Five-ton lots of standard grade are selling on the basis of $17 per 100 pounds; ton lots at $17.50, and less quantities are quoted $17.85.

Little Activity in Mixed Paints, Etc.

Montreal.

MIXED PAINTS.—There is little interest at this eleventh hour in the paint market and the trade is confined to the usual odd business of small proportions which always obtains in late December. The season has been a good one and a better one is now anticipated for 1919.

TORONTO

TORONTO, December 26.—Steady markets are revealed this week, linseed oil finally settling down to a firmer basis with the opinion general that early in the new year somewhat higher prices may be expected. Turpentine markets in the South are closed but the latest news coming through showed a firmer tendency with some higher prices asked. Locally there has been no change. White lead in oil is without change this week and putty is in a quiet mood. Mixed paint sales for spring have been very good and outlook seems promising for 1919.

Steady Market in Linseed Oil

Toronto.

LINSEED OIL.—After a period of marked fluctuating the market on linseed oil seems to have settled down to a steadier basis and this week quotations are unchanged from levels established a week ago. The seed market is one of fair strength, though declines seem to vie with advances for the honors in excitement. However, the changes either way are not of such a wide nature as formerly apparent in the exchanges and future seed generally shows a strong tendency. The opinion is very general and quite pronounced that about the lowest point has been reached in oil and that the first of the year when the demand becomes active again will see prices reach higher levels. Quotations for the week are ranging at the following levels:

Linseed Oil—	Raw Imp. gal.	
1 to 2 barrels, gal.	$1.64	$1.70
3 to 5 barrels, gal	1.68	1.69
	Boiled Imp. gal.	
1 to 2 barrels, gal.	$1.66½	$1.73
3 to 5 barrels, gal.	1.65½	1.72

Add 10c gallon in smaller quantities.

Turpentine Holds Firm, Unchanged

Toronto.

TURPENTINE.—There is little new to report in the situation on turpentine. The exchanges in the South are closed over the holiday, and what the tendency may be is not definitely known. Latest advices reaching this market showed a firm market with prices tending upward. If shipping space can be secured for export business prices will more than likely go much higher. An active demand after the first of the year will more than likely keep prices moving up somewhat at any rate. Locally there have been no new developments to record. The demand is limited, the supply ample, and prices are unchanged at following levels.

Turpentine—	Imp. gal.
1 barrel (barrel included)	$1.07-$1.10
2 to 4 barrels (barrels included)	1.06- 1.09
5 gallon lots	1.17- 1.20

Mixed Paint Holding Steadily

Toronto.

MIXED PAINT.—A very steady tone is noticeable in the situation on mixed paint. Manufacturers indicate that final efforts of their salesmen for the year have resulted in rolling up a splendid volume of business for spring. Efforts now are being directed towards meeting the requirements of the trade and it is felt that 1919 offers an opportunity for heavy sales of paint which retailers will develop aggressively. Prices have held at firm levels, figures shown in current market quotations revealing no change.

Unchanged Position in White Lead in Oil

Toronto.

WHITE LEAD IN OIL.—No new de-

And Now to Rebuild What War Has Wrecked

TO restore the world to a normal, commercial condition requires sound purposes, sane effort—and a vast amount of unselfish co-operation.

The reconstruction problem is even more complex than the problems of war.

We have many buildings to erect, mighty rivers to harness, much road-building to complete, vast industries to establish—thousands of human beings to transplant from army life to the useful occupations of people.

A flood of business–dammed up for four years by war—will be let loose upon our manufacturing institutions.

The immediate future holds wonderful opportunities—but it also will bring grave responsibilities.

Canada—because of her wealth of resources—must do more than her share in the task of reconstructing a world that war has torn asunder, and laid waste.

In order that our part shall be performed with profit and prestige, it is essential that every individual and every concern shall throw the full weight of an unselfish endeavor into the Herculean effort that now becomes at once Canada's duty and her privilege.

BRANDRAM-HENDERSON LIMITED

MONTREAL HALIFAX ST. JOHN TORONTO WINNIPEG
MEDICINE HAT CALGARY EDMONTON VANCOUVER

velopments have been recorded in this market this week, and little change is anticipated prior to the turn of the new year. The market on lead has receded still further in the United States, and it seems probable that local conditions will reflect this situation. Linseed oil, however, seems to have steadied down, and some think that about the lowest point has been reached in this. A quiet and steady situation in white lead in oil seems probable for some time.

Glass Unchanged; Putty is Quiet

Toronto.

GLASS, PUTTY.—The market on window glass remains steady and without any quotable change in evidence. The undertone to the situation is one of strength and it seems possible some announcement may be made at an early date as to probable trend of prices for next blow. There is little moving. Putty is quiet, very little demand being in evidence and prices holding steadily at unchanged levels shown herewith:

	Per 100 lbs.		
Standard Putty—	5 ton	1 ton	Less
Bulk, in barrels	$5 30	$5 55	$5 90
Do., 100 lb. irons	6 15	6 40	6 75
Do., 25 lb. irons	6 40	6 65	7 00
Do., 12½ lb. irons	6 65	6 90	7 25
Bladder, in barrels	7 05	7 30	7 65

Pure putty advance $2 per 100 lbs. over above prices.

Employees of Steel Company of Canada Hold Annual Five Pin Tournament

THE annual Christmas five-pin tournament of the Office and Works' employees of the Swansea branch of the Steel Company of Canada, Limited, was held last Saturday evening at Saunders' Academy, eleven two-man teams participating.

The first prize, consisting of a turkey for each of the winners, was carried off by J. Glenny and L. McDermott with a total of 811. The second prize, a pair of chickens each, was won by Garnet Ross and Robt. Fawcett, with a score of 805. After leading for the first two games C. G. Knott and J. Smythe fell away in the last game, finishing third with 752, thereby winning a box of cigars each. W. F. Hodgson secured the prize for the highest individual score. 481 points. He and Fred Forbes came fourth, but Fred did not come fast enough to land any of the poultry. The booby prizes, consisting of a box of cigars each, went to T. Blackwell and D. Sloan.

The prizes were very ably presented by W. A. Rowland, works manager, who in turn was very much surprised when he was presented, on behalf of the employees, by Judge T. F. Hodgson, of the city office, with a silver mounted silk umbrella, as a slight token of their appreciation and regard. Mr. Rowland expressed his thanks and stated that he was still wearing the gold ring which the employees gave him several years before, and that he was very proud of same.

The teams with the scores for the three games are shown below:

The scorers were P. O. King, of the Kennedy Hardware Company, and Judge Hodgson and H. D. Macdonald, of the Steel Company's city office.

Team	Office		Works		Total
1	J. Glenny	425	L. McDermott	386	811
2	R. Fawcett	380	G. Ross	425	805
3	C. G. Knott	425	J. Smythe	327	752
4	W. F. Hodgson	481	F. Forbes	268	749
5	J. Davidson	416	G. Brown	305	721
6	W. Hunter	417	W. M. Vaisey	236	653
7	O. Henry	320	E. Phillips	331	651
8	G. Hood	396	G. Stephens	251	647
9	A. McPherson	388	H. Pennal	250	638
10	T. Harte	355	J. Hevenor	261	616
11	T. Blackwell	276	D. Sloan	284	560

Seeds to Sell in 10c Packages

The 5c. Package a Thing of the Past—Idea to Develop a Standard Package—Reasons for High Price of Seeds

FROM information available to date it is understood that a higher selling price has become necessary on seeds and all Commission Packets will be sold at 10c per packet during the coming season. It is understood that the Seed Commissioner at Ottawa has been anxious to have the Canadian Seed Trade adopt a standard packet and this idea will be conformed with. It is stated, however, that the new packet will contain considerably more seed than at former prices.

Prices of high grade seeds will remain high for the coming season, but it seems evident that there will be sufficient for all. In the staple varieties of vegetable seeds there will be no shortage. England and France have been able to send fair quantities of all kinds of garden seeds. United States growers have extended their operations and Canadian grocers are also branching out. From Denmark shipments during the past two years have been prohibited. The finer sorts have come from this source, the Danish growth being an advanced process, cauliflower and cabbage being two vegetable seeds in great demand from this market. It seems possible that there may be a limited quantity released for coming season's requirements and upon which the Danish Government are setting values. The prices will be high.

Holland has not been the factor in supplying seeds during the past two or three years which she formerly was. One dealer reported receiving a shipment last August which was due the preceding December, or one year ago now. It is believed that few, if any, orders are now placed in Holland awaiting shipments.

It is indicated that the United States Government has placed an embargo on the export of clover seed and whereas there is a fair supply available, unless there is some modification of this embargo there may not be sufficient to meet the requirements of the trade. There would appear to be plenty of alsike available.

There have been many factors contributing to the present high prices of seeds. The past season was an unfavorable one for growing in both England and France, where the bulk of the seed is grown. Added to this was the smaller acreage allotted to the growers. The price of cereals has been very high and garden seeds naturally react upward as a reflection of this condition.

Handling charges are very high, the labor which goes into the testing, packing and distributing representing a considerable percentage of the ultimate cost. The package has increased materially, too, paper, lithographing and printing adding their quota to the higher cost.

The seeds themselves are very much higher, vegetable seeds ranging from twice to ten times pre-war figures and there is no indication that much lower values will be possible for a long time to come. Most certainly the coming season will not witness any decline in prices and beyond that indications are that lower levels will come gradually.

HOLD CONVENTION

(Continued from page 59)

and W. L. Bredin and Mr. Meath, who cover the New England States. The Canadian representatives include W. H. L. Usher, Maritime Provinces; C. G. Armstrong and R. A. Sonne, Montreal and Quebec province; S. D. Steinberg and F. G. Erskine, Eastern Ontario; R. W. Brown, F. D. Le Gassie, Mr. Dill and Mr. Miller, Toronto; Joseph F. Johnson and H. C. Emerson, Western and Northern Ontario; Harry Davis, Manitoba; J. J. Wood, Alberta and British Columbia; in addition to H. F. Ritchie, W. J. Millsap, J. L. Lane and S. G. Ainsley, who direct from the Toronto office.

A general discussion on all topics was undertaken with special reference termination of the war. Meetings were addressed by Mr. Shiriff, of the Imto conditions which may arise out of the perial Extract Co.; Mr. Palmer, of the Hooton Chocolate Co.; Mr. Ketchum, of the Sunset Dye Co., New Rochelle, N.Y. Enthusiasm and optimism are, it is said, predominating factors around which the 1919 program is being worked out.

Varnish Insurance

Berry Brothers' label bears the same relation to varnishes and their allied products as the sterling mark to silver. It is trusted by all classes of varnish buyers and users, because it is a sure protection against inferior varnishes, stains and enamels. It is also a safe guide to quality and efficiency in every varnish-using industry. The long record of all Berry Brothers' Finishes for complete dependability is a sales-making asset for the dealer.

Lowe Brothers Paints

Look to the Future!

A spirit of optimism is abroad in the land. The Heroes who have done their bit over there are coming home and creating a spirit of good-fellowship, joy and happiness within Canadian Households everywhere. Canada has no need to fear for the future. Our resources are unlimited. It behooves us one and all to preach this spirit of optimism—to think it—to act it—to live it, and above all—sell it.

You can best do that through Lowe Brothers' Paints.

Their brilliancy of color—their lasting, durable and satisfying qualities will prove a factor, a helping to "carry on" this helpful spirit.

Now is the time for you to become acquainted with Lowe Brothers' Paints. A stock of interior paints on your shelves, with the resultant sales to be made from our especially fast selling lines, will mean added prestige to your paint department before the busy spring rush sets in.

Look over the following list and write us for information and prices. We are sure our agency proposition will interest you. Ask about it.

Terms 2% 30 days, approved credit.

Freight equalized on Chatham, Guelph, Hamilton, London, Montreal, Toronto, Welland.

While the foregoing prices on iron pipe are the nominal prices, it has been found in practice that prospective buyers should ask for quotations on sizes 2½ inches and larger on account of the shortage of these sizes and the extra difficulty of procuring supplies.

PAINT UP!

The Boys Are Coming Home

If you are alive to the situation this means more paint sales for you. In every locality where there is a paint dealer, there are homes awaiting the return of loved ones from the battlefields of Europe. Walls, floors, ceilings, and furniture in these homes are in need of brightening up.

It's up to you—to make the proper display and suggestions, enabling the *welcome home* to be more effective.

Recommend—

Stephens'

REGISTERED TRADE MARK

Interior Paints, Varnishes, Stains, Wall Colours, and Enamels.

There's a reputation back of Stephens' Products that makes satisfied customers and produces more business.

Stephens' Paints are known the country over as good value for the money, because — they are made from the best materials — are easy to apply — look good and possess lasting qualities far out-numbering cheaper paints.

We have a very attractive agency proposition. May we send you particulars?

Let this *Worthy Brand* Dominate Your Paint Department And Hold Your Trade

Only the skilled and expert chemist can determine Jamieson quality by *examination.* To the workman, however, Jamieson quality is determined only by *service.*

Many years' experience and continual improvement have given the Jamieson line to-day a prestige that makes it a best seller wherever paints and varnishes are sold.

We want *you* to be the Jamieson agent in your town. Drop us a postcard and we will show you how it will *pay* you to sell Jamieson Paints and Varnishes exclusively to your customers.

Do you know that they are now being made in Canada?

Lucas Imperial French Greens in Oil as made by McArthur, Irwin, Limited, at Montreal, are the same famous Greens that you have always known as the world's standard—the same Greens your father and your grandfather knew.

They are made under the original Lucas formula with the same conditions prevailing in the Canadian plant as are in force at the Lucas factory in Gibbsboro, N.J.

Lucas

Imperial French Greens in Oil

as made in Canada are of the same uniformly high quality that has made the name Lucas synonymous with color perfection. They have the same extreme brilliancy, the same strength of coloring, the same smoothness, the same great covering capacity. They are entirely free from poison.

When in need of greens bear in mind that it is no longer necessary to import to get the best in the world. They can be had right here in Canada.

Order through the nearest distributor, or direct.

An Extraordinary Test

Inquire for prices on our new patented extension bottom for extra long door openings

This is an ordinary stock "Kasement" screen door, hung on our regular "Kasement" hinges. The three men weigh 496 pounds—the door when proven with a square immediately afterwards showed no sign of sagging and the hinges no sign of distress.

"Kasement" doors are supplied complete with hardware sets in individual cartons. They are the *easiest* fitting doors in the world.

The householders are ready for a high grade door at a moderate price and they appreciate the many advantages of "Kasement" doors. You should order your stock at once.

Kasement Skrene Dore Co.

TORONTO, - ONT.

Good Men

DO you need the services of a good retail salesman, traveller, or manager. The best of them read HARDWARE AND METAL each week from cover to cover. Incidentally they also note the condensed ads. in the "Wanted" section. You can use space in this section at a cost of two cents per word for the first insertion, and one cent a word for subsequent insertions. Add five cents for box number or address.

Telegraphic Address: "GOBLETS, BIRMINGHAM"

MEHASCO

Pocket and Household Cutlery

Mehasco Pocket Cutlery meets every demand of Prairie life. It is especially strong in Cattle and Punch Knives. These are made from Wardlow's English steel, the best obtainable, and are absolutely guaranteed. We'll convince you on your trial order.

Hart's Hollow Handle Household Cutlery with its high quality at medium price is just the thing for every day use in the home or for restaurants. Heavily nickel plated with blades of oil tempered shear steel. They can be left in boiling water for any length of time without soaking up any of the water, and they can be put on a stone and given a real edge. They are nicely put up in half dozens, each knife and fork wrapped in tissue paper individually, not in brown paper rolls.

Merchants Hardware Specialties
LIMITED
CALGARY

TO THE WESTERN CANADA DEALER

Does a connection with a progressive and aggressive, amply capitalized and fully equipped concern, grown to be the largest paint and varnish factory in Western Canada, appeal to you?

BRITISH AMERICA PAINT CO., LIMITED

Wants more live dealers in Western Canada. It co-operates with its dealers to make bigger and better business. Join up with a pushing selling organization that will help you put 'em over. Send for booklet "The Evidence." Tells the story in fac-simile letters from Bapco dealers.

DISTRIBUTING POINTS

Established at Victoria in 1900 the British America Paint Co., Ltd., has found ever-widening markets. To care for this trade branches have been opened at VANCOUVER, B.C., CALGARY and EDMONTON, ALBERTA, and REGINA, SASKATCHEWAN.

TO SELL AND RE-SELL

Paint MUST give satisfaction.

Bapco Pure Paint and Bapco Varnish are of the highest possible quality. To insure this the raw materials undergo chemical laboratory tests. Skilled makers see that the ingredients are perfectly proportioned and modern machinery insures proper grinding and blending. Rigid machine and chemical tests are made during process of manufacture and the completed mixtures are subjected to comparative tests with the fixed Standards. One big roof of the factory is devoted to weather tests.

The growth of the British America Paint Co. and its constantly expanding trade territory is convincing evidence, not only of the quality of its goods, but of its resourcefulness and enterprise as well.

BRING the JUNKERS to JUDGMENT!

"IF William Hohenzollern and the German butchers who engineered the war are not brought to trial and the lesson driven home that the world brooks no license in the name of Kultur, then our Canadian soldiers have died in vain. No peace," declares MACLEAN'S MAGAZINE, "will be satisfactory to Canada that leaves them at large."

Read this powerful article in the December issue of MACLEAN'S, in which it is declared that Canada is a unit in demanding stern measures. "There is no mawkish sympathy here, no tendency to grant dangerous favors to a foul-fighting opponent who has taken the count."

It is asserted that Canadians as a whole want:

1. **No softening of armistice terms.**
2. **Canadian representation at the Peace Conference.**
3. **Banishment of all Hohenzollerns from Germany that the seeds of autocracy may be uprooted.**
4. **The punishment of the criminals who started the war and conducted it so ruthlessly.**
5. **The payment of an indemnity to Canada to cover our war bill.**

It is an unsparing, outspoken expression of Canadian opinion—an article that deals hammer-blows at the tendency abroad to shield Germany.

An All-Star Line Up This Month

"Delta" Files

—we'll help you sell them

TRADE MARK
DELTA

If the "Delta" Dealer never said a word about these good files but just kept handing them across his counter day by day he would gradually build up an enviable reputation for the quality of files he sells. But we believe in hurrying up that good reputation by telling our agents' customers facts about "Delta"—facts which interest file users and induce them to buy "Delta."

If you want to take on the "Delta" File Agency in your district we will help you make it the most profitable line in your stock. We'll help you interest all the big users of files and show you how to close them up.

This is a genuine plan we want you to try, so write and get full particulars.

"White"

MOP WRINGERS

EASE OF OPERATION, THEIR GREAT UTILITY AND THEIR SUBSTANTIAL CONSTRUCTION, COMBINED WITH THEIR PRICE, MAKES THE WHITE MOP WRINGER A RAPID SELLER.

Made of malleable iron and the best of hard woods — Maple or Birch. Fits any kind of pail and wrings the mop thoroughly.

It has more than one use —often used for fruit and vegetable presses and works perfectly. The advent of the White Mop Wringer proved a boon to the housewife—it sells itself and is a good profit-maker.

Why wait 'til the boys come home?

WHY WAIT until the boys come home from France to replenish your force of retail salesmen? Here are four clerks who apply to you for positions.

They ask to be judged by their work for thousands of other dealers. Their past and present performances recommend them. They are generally regarded as the best retail salesmen of their kind.

CLERK ONE—

The Gargoyle Mobiloils flange sign

This metal sign hangs over your door. Putting up this sign is like hiring a clerk who is favorably known by most of the owners of passenger cars, motor-trucks, tractors, and motorcycles in your locality. Such a man would attract business. That's just what the sign *does*.

CLERK TWO—

Your Window

Of course, your window has always worked for you. But most retailers don't fully recognize the selling power of timely, business-like window trims.

The right way to look at this is: *If some one wanted to board up your window, what price would you ask him?*

Get the fullest possible value out of your window. Write us for free cuts of window trims.

CLERK THREE—

The Gargoyle Mobiloils Complete Chart of Recommendations

This is the head clerk on oils. When asked to name the correct oil for any make of passenger car, motor-truck, tractor or motorcycle, he answers quickly — and with scientific exactness.

He passes this solid information along to your sales people and thus increases their value. He trains new help—saves them from "guessing" and "don't knowing."

CLERK FOUR—

The Booklet *"Correct Lubrication"*

Here is a clerk who constantly reminds motorists of your good service by giving friendly help in times of trouble.

In addition to reprinting the Complete Chart of Recommendations, this booklet tells how to locate and remedy engine trouble and explains many points which make for economical maintenance.

* * * * *

Man help is still too scarce to overlook clerks like the ones we have described above. Hardware dealers who are stabilizing their business have repeatedly proved the value of these sales helps. We suggest that you profit by their example. Write us to-day.

BRANCHES IN ALL CITIES

A Quick Service Gasoline Pump

Quick and convenient service is the profitable advantage given the dealer by the Gilbert and Barker T-209 Pump with overhead discharge.

The hose connects across the sidewalk with the car tank; you pump five Imperial gallons at a stroke; quantity stops are set for delivering single gallons. Exact measurement gives you and your customer a square deal. There's no can-carrying; no spilling waste. The motorist knows he's getting clean gas, for it's filtered while he looks on. Such satisfactory service will bring him again.

Write for our catalogue of gasoline and oil handling and storage equipment for progressive dealers. Or see any Imperial Oil Limited branch for full information.

Why You Should Be A Michelin Dealer

No. 37

Not Only the Best--- But One of the Best Advertised of Tires

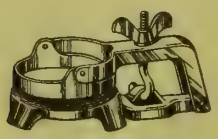
Probably no other tire possesses world-wide reputation and prestige in the same degree as does the Michelin.

This reputation is maintained and augmented by extensive advertising.

In Canada, alone, over 10,000,000 Michelin Advertisements have appeared during 1918.

This combination of quality, reputation and advertising is an assurance of success---proved by the uniformly prosperous records of Michelin Dealers everywhere.

Write today for Michelin's Dealer Proposition.



Michelin Tire Company
of Canada, Limited
782 St. Catherine St. W.
MONTREAL

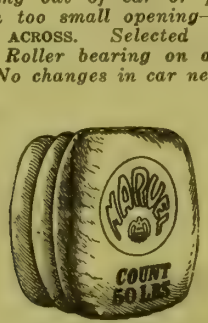
MICHELIN

Three BIG Reasons why you should be a Marvel Dealer

There are THREE BIG reasons why Marvel Dealers are successful. **First:** Marvel dealers are allowed attractive discounts on **every** product of the complete Marvel line. As a Marvel dealer, you are backed by an established firm, recognized in the accessory field,—a firm that will be back of you this, next and in all future years as it has backed others in past years.

JUNIOR TUBE VULCANIZER

A simple, compact outfit for the quick roadside repair. Comes complete with six heat disks and six patches. Gives just the right amount of heat; welds the patch to the tube. A good seller.



JUMBO TIRE VULCANIZER

A complete tire repair outfit. Welds as large a patch as 1½ x 2½" with a fine feather edge. Complete with twelve patches and heat disks. Quick, simple, compact and reliable.

WINDSHIELD CLEANER

Prevents accidents. Eliminates stretching out of car or peeking through too small opening—cleans CLEAR ACROSS. *Selected rubber wiper. Roller bearing on all contacts. No changes in car necessary to fit.*

WIPING CLOTH

White, knit, absorbent cloth that saves time and money. Time—because it works faster; no loose ends to drag over and smear parts already wiped. Economical—because it can be washed and used.

Second: Marvel dealers get practical helps—helps that first attract, then build up, and promote sales. Every piece of illustrated Marvel literature, there is at least one for every product, puts forth clear, unpainted sales arguments in a manner that creates confidence not only in the product but in **you** as the dealer in such products. These and other selling helps, such as window displays, cards, novelties, etc., tell why

MARVEL
ACCESSORIES

give the motorist the most for his money—why it will pay him to drive around **to you** for all accessories.

Third: The third reason is the products themselves. Marvel products are established. The name Marvel is known through at least one product or another to almost every motorist. They are all good sellers. Glance through the leaders illustrated on this page. Note how there is a Marvel to cover every need—every request from your trade.

The jobbers listed below will supply your needs promptly, but write at once for full details of the sales and profit possibilities of the Marvel line. Learn how the Marvel agency will make **your** store the Accessory Headquarters at your vicinity.

TRUSTI-PATCH

Three sizes moderately priced. Eliminates the carrying around of a large assortment of patches. You cut from a roll each patch to fit each size of injury. Comes complete with tube of cement and emery paper in solid can.

PORTABLE GASOLINE VULCANIZER

Casing repairs can be made as quickly and easily with this type B outfit as tube injuries. Uses gasoline, is simple, and handy. Insures an even heat. Covers space 2½ x 4½".

UNIVERSAL VALVE GRINDER

Every motorist is a prospect for this device that takes all the drudgery out of valve grinding. No rocking—simply turn the crank in one direction. Complete with five points, spring, and compound.

JUNIOR VALVE GRINDER

Medium priced. Every motorist an expert valve grinder. Lighter than the above model but insures as perfect a seat. Ideal for Ford car—reaches the last valve. Complete with five points, spring and compound.

DUNLOP TIRES

SEAL OF QUALITY

AUTOMOBILE

"Traction"—The Tire Beautiful—

WE hear so much about the "lines" of an automobile that we are apt to forget the "lines" of a tire.

* * *

Surely if beauty is an essential in automobile construction it is likewise an essential in tire construction.

* * *

Examine "Traction" for beauty—no unnecessary lines, no distorted "treadlets," no ugly, unsymmetrical gouges—just one powerful, resilient, beautiful balance. And all this is extra — extra over and above the greatest road mastery ever obtained in a rubber tire.

* * *

We also make Dunlop "Special" and Dunlop "Plain" — two tires that are in great favor with motorists in general.

* * *

DUNLOP SEAMLESS TUBES and DUNLOP ACCESSORIES likewise make lasting friends wherever used.

With Harvesting and Threshing At Hand

The Harvesting and Threshing Season stimulates sales for North Star Dry Cell Batteries, because of the confidence our many customers have in this battery so adaptable to Western needs.

All Western Hardware men should stock the North Star No. 6. You always get it fresh. It gives satisfaction to the customer and profit to the dealer.

"The Western Battery for the Western Need."

Have your jobber supply you.

CANADA DRY CELLS, LIMITED, WINNIPEG, CANADA

Hardware Merchant's Influence

¶The local hardware merchant exerts a great influence throughout the district in which his store is located. The majority of hardware merchants have been established for many years; they are reputable merchants who have built up their businesses on sound business principles and who have endeavored in every possible way to give the best possible service to their customers and supply them with goods which will give satisfaction.

¶Is it any wonder, therefore, that when customers visit the store of a well-known and long-established hardware merchant, they consider him an authority on lines which he is selling and will usually follow out his recommendation regarding the lines which they wish to buy. Actual investigations have proven that in the majority of cases customers place absolute confidence in the recommendation of their local dealer.

¶The chief problem, therefore, confronting the manufacturer who wishes to distribute products to the hardware trade or to introduce new lines, whether direct or through wholesalers, is to sell the hardware merchant and his sales staff. When you sell the hardware merchant and his salesmen on your line, you can rest assured that you have then gained the co-operation of the strongest retail selling force in the Dominion.

¶Practically every worth-while buyer and seller of hardware in Canada can be reached through the advertising pages of HARDWARE AND METAL. The keenest hardware buyers in Canada are the closest readers of the advertising pages in HARDWARE AND METAL, because it pays them.

Sell the Old Reliable CLARK FOOT WARMERS

Used in Open and Closed Automobiles, Sleighs and Other Vehicles

No. 7D—Clark Heater—Slanting Top

Covered with high grade material, metal parts nickel plated and polished, 14 inches long and weighs 9 pounds.

There are several models of Clark Heaters, all reasonable in price and all good sellers.

Catalogue on request

SOME SPECIAL USES

In the Home. Old folks and invalids derive great comfort from Clark Foot Warmers. They give off no smoke or odor and are of attractive appearance.

In shipping clerks' offices, general and private offices where the floors are cold or drafty.

In hospitals for convalescents who sit out of doors.

In florists' wagons to keep flowers and plants from freezing.

In duck blinds and duck boats. Hunters find Clark Heaters ideal for warming the feet and hands.

It costs less than One Cent per hour to operate a Clark Heater and get a dollar's worth of real comfort.

Now is the time to make a display of Clark Heaters. A good assortment means but a small investment for a quick and profitable turnover.

Heater users insist on having Clark Carbon Fuel Bricks on account of superior quality. More heat for less money.

Your Jobber can supply you.

The next ten weeks are the best of the year for Clark Heater sales.

Stock them and get the business.

They sell quickly and never fail to please the user.

The Value of the Business Press to Business Men

"Business men do not realize the value which trade journals and technical magazines may have for them in increasing the efficiency of their factories and in giving them a broad and comprehensive view of their business.

"Our foreign competitors read almost every article published upon their business with great care and thoroughness. Many of them have duplicate copies of their favorite trade paper sent to their homes so that they may read them away from the business without being disturbed. Many foreign manufacturers contribute articles to these journals on phases of the business with which they are most familiar. Such articles are bound to be helpful and have a constructive effect.

"Our trade journals and technical papers are the best in the world, and they should be supported and encouraged by our business men.

"Copies should be placed where employees can see them and they should be urged to read and study them.

"These papers are preaching the gospel of sound business on practical lines and are helpful not only to business but to the country as a whole.

"If the suggestions made by them in the past had been followed by our business men it would not be necessary at this time to point out some of the fundamental weaknesses in American business."

—Edward N. Hurley, formerly Chairman of the Federal Trade Commission, in "The Awakening of Business."

The Real Ankle Support That Makes Others Look Like Imitations

Sell Perfection Ankle Supports—the only sure and comfortable ankle support on the market.

Made from the best quality of steel, and is so devised that by means of a hinge and sliding attachment the ankles may bend forward or backward, but simply can not bend sideways.

You'll sell more skates this winter as well as supports if you handle this line.

Write us for prices.

Say You Saw It In Hardware and Metal

This page is the logical place for anyone in the Canadian hardware trade to place his "condensed" advertisements if he wants anything that can be supplied by any other Canadian hardwareman.

Do you want a clerk or store manager?

Do you want a position as clerk or travelling salesman?

Do you want a traveller?

Do you want to sell or exchange your business?

Do you want to buy a hardware business?

Do you want to buy or sell any store equipment?

If so, sit down now, and draft an advertisement for Hardware and Metal's "Wanted" page, setting forth just what you want, and stating your needs or qualifications.

Such an advertisement will automatically seek out for you, the only people you want to reach—those who are actively engaged in selling hardware, in Canada.

The cost?

Trifling! Two cents per word for first insertion and one cent per word for each subsequent insertion of the same advertisement. Each figure is counted as a word, and a charge of 5 cents extra per insertion is made when Box Number is required. In this way the advertiser's name is kept confidential.

Copy for Condensed Advertisements should reach the Toronto office of Hardware and Metal not later than Thursday morning to catch the current week's issue. In order to save unnecessary correspondence and bookkeeping, please remit with copy, preferably by money order.

INDEX TO ADVERTISERS

Occasionally advertisements are inserted in the paper after the index has been printed. The insertion of the advertiser's name in this index is not part of the advertising order. The index is inserted solely for the convenience of the readers of the paper.

A Happy New Year

West-Woods Limited
WINNIPEG

Becoming a Bigger Man

WHAT is the difference between some men you know and others known to you? Why are some men earning $3,000 a year and some $30,000? You can't put it down to heredity or better early opportunities, or even better education. What, then, is the explanation of the stagnation of some men and the elevation and progress of others?

We are reminded of a story. A railroad man, born in Canada, was revisiting his home town on the St. Lawrence River. He wandered up to a group of old-timers who sat in the sun basking in blissful idleness. "Charlie," said one of the old men, "they tell me you are getting $20,000 a year," "Something like that," said Charlie. "Well, all I've got to say, Charlie, is that you're not worth it."

A salary of $20,000 a year to these do-nothing men was incredible. Not one of the group had ever made as much as $2,000 a year, and each man in the company felt that he was a mighty good man.

Charlie had left the old home town when he was a lad. He had got into the mill of bigger things. He developed to be a good man, a better man, the best man for certain work. His specialized education, joined to his own energy and labor sent him up, up, up. To put it in another way: Charlie had always more to sell, and the world wanted his merchandise—brain, skill and ability. Having more to sell all the time, he got more pay all the time.

Charlie could have stayed in the old home town; could have stagnated like others; could have been content with common wages. In short, Charlie could have stayed with the common crowd at the foot of the ladder. But Charlie improved himself and pushed himself, and this type of man the Goddess of Fortune likes to take by the hand and lead onward and upward. Almost any man can climb higher if he really wants to try. None but himself will hold him back. As a matter of fact, the world applauds and helps those who try to climb the ladder that reaches towards the stars.

The bank manager in an obscure branch in a village can get out of that bank surely and swiftly, if he makes it clear to his superiors that he is ready for larger service and a larger sphere. The humble retailer can burst the walls of his small store, just as Timothy Eaton did, if he gets the right idea and follows it. It is not a matter of brain or education so much as of purpose joined to energy and labor. The salesman or manager or bookkeeper or secretary can lift himself to a higher plane of service and rewards if he prepares himself diligently for larger work and pay. The small manufacturer, the company director, the broker—all can become enlarged in the nature of their enterprise and in the amount of their income—by resolutely setting themselves about the task of growing to be bigger-minded men.

Specialized information is the great idea. This is what the world pays handsomely for. And to acquire specialized information is really a simple matter, calling for the purposeful and faithful use of time. This chiefly.

One does not have to stop his ordinary work, or go to a university, or to any school. One can acquire the specialized information in the margin of time which is his own—in the after-hours of business. Which means: If a man will read the right kind of books or publications, and make himself a serious student at home, in his hours—the evening hours or the early morning hours—he can climb to heights of position and pay that will dazzle the inert comrades of his youth or day's work.

IF business—BUSINESS—is your chosen field of work, we counsel you to read each week THE FINANCIAL POST. It will stimulate you mentally. It will challenge you to further studious effort. It will give you glimpses into the world of endeavor occupied by the captains of industry and finance. With the guidance of the POST, and with its wealth of specialized information, you, a purposeful man, aiming to go higher in life and pay, will find yourself becoming enlarged in knowledge and ambition, and will be acquiring the bases and facts of knowledge which become the rungs of the ladder you climb by.

It is the first step which costs. But this cost is trivial—a single dollar. We offer you the POST for four months for a dollar. Surely it is worth a dollar to discover how right we are in our argument. If yoou have the will to go higher in position and pay, sign the coupon below.

THE MACLEAN PUBLISHING COMPANY, LIMITED,
.—143-153 University Avenue, Toronto.

Send me / us THE FINANCIAL POST for four months for one dollar.

Money to be enclosed / remitted

GEARS

We hope early in 1919 to announce a complete line of Automobile Cut Gears for Ford Cars. A little later on, it is our aim to present to the Trade a most complete line of Gears for Commercial and Automobile work. This literature we will distribute as promptly as possible.

BOBLETT RADIATORS

At this time, we are developing the Boblett Radiator in Canada, having had control of the Patent Rights for the manufacture of this Radiator for some time. We are now able to advise the Trade of our intention to develop this Radiator within a very few months. More complete and definite announcement will appear at a later date.
